PIONEERS OF SHORTHAND & TYPEWRITING

G. H. Joshi, F.S.D.S., C.T.S.D. (Eng.), M.I.S.D.M. (Paris). Winner of Col. Watkin's Cup, International Shorthand Competition (London, 1929).

The Premier Karnatak S. D. Society's Recognised and Registered Shorthand and Typewriting Institute, since its inception in 1920, has produced excellent results among both students and business-men and has succeeded in creating a liking for Typewriting and Shorthand. The system of shorthand employed is Sloan-Duployan, which to-day is the recognised system for all Government Examinations and appointments.

The Institute has been visited by many Gazetted officers and other prominent persons and have been impressed by the friendliness between pupils and instructors. Mr. Joshi himself has gained unbounded praise and is considered one of the best teachers in the district. Ever since 1926, he has been unanimously elected a Fellow of the Ramsgate Sloan-Duployan Society & College and in 1929 topped the list in the International Shorthand Competition held at London.

His Institute received upto 1927, a Governament grant of **Rs. 1,225.** He holds the advanced Typewriting Diploma in Typewriting with Honours, marks 95 out of 100. And in Shorthand possesses High Speed Diploma, 186 words per minute from Shorthand College, Ranisgale, England, and 160 words per minute in Paris Diploma.

The Sloan-Duployan System is the only system

1. Of which His Majesty's Inspector has stated "Shorthand shows remarkable success."
2. Which is written without any complicated rules and exceptions, gramalogues, etc., and can be adapted to any language.
3. Which is used on the Official Parliamentary Reporting Staff.

Mr. W. J. Merridan, A. C. P., Master of Methods, Royal Norman College (London), after 15 years' research, indicated Sloan-Duployan as possessing the greatest merit in the three essentials of simplicity, legibility and speed. Mr. John A. Fraser in his "Short History of Shorthand" also reveals his preference for this system.

G. H. JOSHI'S

Shorthand & Typewriting Institute
3576 Shanwar, Belgaum.

1,200 STUDENTS TRAINED BY THIS INSTITUTE.

PREFACE

THE Editors have to thank many correspondents who during the past year have sent them suggestions for the improvement of this book. The Indian Year Book is intended above all to be a book of reference, and its completeness and convenience of arrangement must necessarily depend to a great extent on the part taken in its editing by the members of the public who most use it.

The help extended to the Editors by various officials, and more particularly by the Director of Information and Labour Intelligence, Bombay, and the Indian Commercial Intelligence Department, has again been readily given and is most gratefully acknowledged. Without such help it would be impossible to produce the Year Book with up-to-date statistics.

Suggestions for the improvement or correction of the Year Book may be sent to the Editors at any time, but those which reach them before January have a better chance of being adopted than later suggestions which only reach them after the work of revision has been partly completed.

The Times of India, Bombay,
April, 1934.

An Indian Glossary.

ABKARI.—Excise of liquors and drugs.

ACHHUT.—Untouchable (Hindi, Asuddhar.

ACREAGE CONTRIBUTION.—Contribution paid by holders of land irrigated by Government.

ADHIRAJ.—Supreme ruler, over lord, added to "Maharaja," &c., it means "paramount"

AFSAR.—A corruption of the English "officer"

AHIMSA.—Non-violence.

AHLUWALIA.—Name of a princely family resident at the village of Ahlu, near Lahore.

AIN.—A timber tree TERMINALIA TOMENTOSA.

AKALI.—Originally, a Sikh devotee, one of band founded by Guru Govind Singh (who died 1708): now, a member of the politico-religious army (*dal*) of reforming Sikhs.

AKHARA.—A Hindu school of gymnastics.

AKHUNDZADA.—Son of a Head Officer.

ALIJAH.—Of exalted rank.

ALIGHOL.—Literally a Mahomedan circle. A kind of athletic club formed for purposes of self-defence.

ALI RAJA.—Sea King (Laccadives)

AM.—Mango.

AMIL.—A name given in Sind to educated members of the Lohana community, a Hindu caste consisting principally of bankers, clerks and minor officials.

AMIR (corruptly EMIR).—A Mohammedan Chief, often also a personal name.

AMMA.—A goddess, particularly Mariamma goddess of small-pox, South India.

ANICUT.—A dam or weir across a river for irrigation purposes, Southern India.

ANJUMAN.—A communal gathering of Mahomedans.

APHUS.—Believed to be a corruption of ALPHONSE, the name of the best variety of Bombay mango.

ARZ, ARZI, ARZ-DASHT.—Written petition.

ASAF.—A minister.

ASPRISHYA.—Untouchable (Sanskrit).

AUS.—The early rice crop, Bengal, syn. Ahu, Assam.

AVATAR.—An incarnation of Vishnu.

AYURVEDA.—Hindu science of Medicine.

BABA.—Lit. "Father," a respectful "Mr." Irish "Your Honour."

BABU.—(1) A gentleman in Bengal, corresponding to Pant in the Deccan and Konkan. (2) Hence used by Anglo-Indians of a clerk or accountant. Strictly a 5th or still younger son of a Raja but often used of any son younger than the heir, whilst it has also grown into a term of address=Esquire. There are, however, one or two Rajas whose sons are known respectively as—1st, Kunwar; 2nd, Diwan; 3rd, Thakur; 4th, Lal; 5th Babu.

ZABARDASTI.—Oppression.

ZAMINDAR.—A landholder.

ZAMINDARI.—(1) An estate; (2) the rights of a landholder, zamindar; (3) the system of tenure in which land revenue is imposed on an individual or community occupying the position of a landlord.

ZANANA.—Of women. Women's apartment, harem.

ZIARAT.—Pilgrimage. Ziarat-gah, any shrine or tomb to which people go in pilgrimage.

ZIKR.—Commemorative prayer said at the tomb of the prophet or a Mahomedan saint.

ZILA.—A District.

ZOR-TALABI.—Tribute paid to Junagadh Darbar by numerous Kathiawar States.

ZULM, ZULUM.—Tyranny, Oppression.

Manners and Customs.

Next to the complexion of the people, which varies from fair to black, the tourist's attention in India is drawn by their dress and personal decoration. In its simplest form a Hindu's dress consists of a piece of cloth round the loins. Many an ascetic, who regards dress as a luxury, wears nothing more, and he would dispense with even so much if the police allowed him to. The Mahomedan always covers his legs, generally with trousers, sometimes with a piece of cloth tied round the waist and reaching to the ankles. Hill men and women, who at one time wore a few leaves before and behind and were totally innocent of clothing, do not appear to-day within the precincts of civilisation and will not meet the tourist's eye. Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes of the rich. The child Krishna, with all the jewels on his person, is nude in his pictures and images.

Dress.—The next stage in the evolution of the Hindu dress brings the loincloth nearly down to the feet. On the Malabar coast, as in Burma, the ends are left loose in front. In the greater part of India, they are tucked up behind—a fashion which is supposed to befit the warrior, or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf thrown over the left shoulder, or round both the shoulders like a Roman toga. Under this garment is often worn a coat or a shirt. When an Indian appears in his full indigenous dress, he wears a long robe, reaching at least down to the calves: the sleeves may be wide, or long and sometimes puckered from the wrist to the elbow. Before Europeans introduced buttons, a coat was fastened by ribbons, and the fashion is not obsolete. The Mahomedan prefers to button his coat to the left, the Hindu to the right. A shawl is tied round the waist over the long coat, and serves as a belt, in which one may carry money or a weapon, if allowed. The greatest variety is shown in the headdress. More than seventy shapes of caps, hats, and turbans, may be seen in the city of Bombay. In the Punjab and the United Provinces, in Bengal, in Burma and in Madras other varieties prevail. Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles: folded brims, projecting brims: long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the "parrot's beak" of the Maratha turban—all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head-covering whether the wearer is a Hindu, Mahomedan or Parsi, and whether he hails from Poona or Dharwar, Ahmedabad or Bhavnagar.

Fashion Variations.—Fashions often vary with climate and occupation. The Bombay fisherman may wear a short coat and a cap, and may carry a watch in his pocket; yet, as he must work for long hours in water, he would not cover his legs, but suspend only a coloured kerchief from his waist in front. The Pathan of the cold north-west affects loose baggy trousers, a tall head-dress befitting his stature and covers his ears with its folds as if to keep off cold. The poorer people in Bengal and Madras do not cover their heads, except when they work in the sun or must appear respectable. Many well-to-do Indians wear European dress at the present day, or a compromise between the Indian and European costumes; notably the Indian Christians and Parsis. Most Parsis however have retained their own headdress, and many have not borrowed the European collar and cuffs. The majority of the people do not use shoes: those who can afford them wear sandals, slippers and shoes, and a few cover their feet with stockings and boots after the European fashion in public.

Women's Costumes.—The usual dress of a woman consists of a long piece of cloth tied round the waist, with folds in front, and one end brought over the shoulder or the head. The folds are sometimes drawn in and tucked up behind. In the greater part of India women wear a bodice: on the Malabar coast many do not, but merely throw a piece of cloth over the breast. In some communities petticoats, or drawers, or both are worn. Many Mussalman ladies wear gowns and scarfs over them. The vast majority of Mahomedan women are *gosha* and their dress and persons are hidden by a veil when they appear in public: a few converts from Hinduism have not borrowed the custom. In Northern India Hindu women have generally adopted the Mussalman practice of seclusion. In the Dekhan and in Southern India they have not.

As a rule the hair is daily oiled, combed, parted in the middle of the head, plaited and rolled into a chignon, by most women. Among high caste Hindu widows sometimes shave their heads in imitation of certain ascetics, or monks and nuns. Hindu men do not, as a rule, completely shave their heads, Mahomedans in most cases do. The former generally remove the hair from a part of the head in front, over the temples, and near the neck, and grow it in the centre, the quantity grown depending upon the fancy of the individual. Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Indian Christians. Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere where the Mahomedan influence was paramount in the past. Parsis and Christians follow their individual inclinations. Hindu ascetics, known as Sadhus or Bairagis as distinguished from Sanyasis, do not clip their hair, and generally coil the uncombed hair of the head into a crest, in imitation of the god Shiva.

Hindu women wear more ornaments than others of the corresponding grade in society. Ornaments bedeck the head, the ears, the nose, the neck, the arms, wrists, fingers, the waist

until motherhood is attained, and by some even later—and the toes. Children wear anklets. Each community affects its peculiar ornaments, though imitation is not uncommon. Serpents with several heads, and flowers, like the lotus, the rose, and the champaka, are among the most popular object of representation is gold or silver.

Caste Marks.—Caste marks constitute a mode of personal decoration peculiar to Hindus, especially of the higher castes. The simplest mark is a round spot on the forehead. It represents prosperity or joy, and is omitted in mourning and on fast-days. It may be red, or yellowish as when it is made with ground sandalwood paste. The worshippers of Vishnu draw a vertical line across the spot, and as Lakshmi is the goddess of prosperity, it is said to represent her. A more elaborate mark on the forehead has the shape of U or V, generally with the central line, sometimes without it, and represents Vishnu's foot. The worshippers of Shiva adopt horizontal lines, made with sandalwood paste or ashes. Some Vaishnavas stamp their temples, near the corners of the eyes, with figures of Vishnu's conch and disc. Other parts of the body are also similarly marked. The material used is a kind of yellowish clay. To smear the arms and the chest with sandalwood paste is a favourite kind of toilet, especially in the hot season. Beads of Tulsi or sacred Basil, and berries of Rudraksha *elæocarpus ganitrus*, strung together are worn round their necks by Vaishnavas and Shaivas, respectively. The Lingayats, a Shaiva sect, suspend from their necks a metallic casket containing the Linga or phallus of their god. Bairagis, ascetics, besides wearing Rudraksha rosaries round their necks and matted hair, smear their bodies with ashes. Religious mendicants suspend from their necks figures of the gods in whose name they beg. Strings of cowries may also be seen round their necks. Muslim dervishes sometimes carry peacock's feathers.

Hindu women mark their foreheads with a red spot or horizontal line. High caste widows are forbidden to exhibit this sign of happiness, as also to deck themselves with flowers or ornaments. Flowers are worn in the chignon. Hindu women smear their faces, arms, and feet sometimes with a paste of turmeric, so that they may shine like gold. The choice of the same colour for different purposes cannot always be explained in the same way. The red liquid with which the evil eye is averted may be a substitute for the blood of the animal slaughtered for the purpose in former times. In many other cases this colour has no such associations. The Muslim dervish affects green, the Sikh Akali is fond of blue, the Sanyasi adopts orange for his robe, and no reason can be assigned with any degree of certainty.

Shiva.—India is a land of temples, mosques and shrines, and the Hindu finds at every turn some supernatural power to be appeased. Shiva has the largest number of worshippers. He has three eyes, one in his forehead, a moon's crescent in his matted hair, and at the top of the coil a woman's face representing the river Ganges. His abode is the Mount Kailas in the Himalayas, from which the river takes its source. Round his neck and about his ears and limbs are serpents, and he also wears a necklace of skulls. In his hands are several weapons, especially a trident, a bow, and a thunderbolt, and also a drum which he sounds while dancing for he is very fond of this exercise. He sits on a tiger's skin, and his vehicle is a white bull. His wife Parvati and his son Ganesha sit on his thighs. An esoteric meaning is attached to every part of his physical personality. The three eyes denote an insight into the past, present and future: the moon, the serpents, and the skulls denote months, years and cycles, for Shiva is a personification of time, the great destroyer. He is also worshipped as a Linga or phallus which represents creative energy.

Ganpati.—Ganesh or Ganpati, the controller of all powers of evil subject to Shiva, is worshipped by all sects throughout India. Every undertaking is begun with a prayer to him. He has the head of an elephant, a large abdomen, serpents about his waist and wrists, several weapons in his hands, and a piece of his tusk in one hand. He is said to have broken it off when he wanted to attack the moon for ridiculing him. The different parts of his body are also esoterically explained. His vehicle is a rat.

Parvati.—Parvati, the female energy of Shiva, is worshipped under various names and forms. She is at the head of all female supernatural powers, many of whom are her own manifestations. Some are benign and beautiful, others terrible and ugly. Kali, the tutelary deity of Kalighat or Calcutta, is one of her fierce manifestations. In this form she is black: a tongue smeared with blood projects from her gaping mouth: besides her weapons, she carries corpses in her hands, and round her neck are skulls. Bombay also takes its name from a goddess, Mumbadevi. Gouri, to whom offerings are made in Indian homes at an annual festival, is benign. On the other hand the epidemic diseases like the plague and small-pox are caused by certain goddesses or "mothers."

Vishnu, the second member of the Hindu trinity, is the most popular deity next to Shiva. He is worshipped through his several incarnations as well as his original personality. His home is the ocean of milk, where he reclines on the coils of a huge, many-headed serpent. At his feet sits Lakshmi, shampooing his legs. From his navel issues a lotus, on which is seated Brahma, the third member of the trinity. In his hands are the conch, which he blows on the battlefield, and the disc, with which the heads of his enemies are severed. Round his neck are garlands of leaves and flowers, and on his breast are shining jewels. As Shiva represents destruction, Vishnu represents protection, and his son is the god of love. To carry on the work of protection, he incarnates himself from time to time, and more temples are dedicated nowadays to his most popular incarnations, Rama and Krishna, than to his original personality. Rama is a human figure, with a bow in one of his hands. He is always accompanied by his wife Sita, often by his brother Lakshmana, and at his feet, or standing before him with joined hands, is Hanuman, the monkey

chieftain, who assisted him in his expedition against Ravana, the abductor of his wife. Krishna is also a human figure, generally represented as playing on a flute, with which he charmed the damsels of his city, esoterically explained to mean his devotees.

Brahma is seldom worshipped: only a couple of temples dedicated to him have yet been discovered in all India.

Minor Deities.—The minor gods and goddesses and the deified heroes and heroines who fill the Hindu pantheon, and to whom shrines are erected and worship is offered, constitute a legion. Many of them enjoy a local reputation, are unknown to sacred literature, and are worshipped chiefly by the lower classes. Some of them, though not mentioned in ancient literature, are celebrated in the works of modern saints.

The **Jains** in their temples, adore the sacred personages who founded and developed their sect, and venerate some of the deities common to Hinduism. But their view of Divinity is different from the Hindu conception, and in the opinion of Hindu theologians they are atheists. So also the **Buddhists** of Burma pay almost the same veneration to Prince Siddhartha as if he was a god, and indeed elevate him above the Hindu gods, but from the Hindu standpoint they are also atheists.

Images.—Besides invisible powers and deified persons, the Hindus venerate certain animals, trees and inanimate objects. This veneration must have originated in gratitude, fear, wonder, and belief in spirits as the cause of all good or harm. Some of the animals are vehicles of certain gods and goddesses—the eagle of Vishnu: the swan of Brahma: the peacock of Saraswati: Hanuman, the monkey of Rama: one serpent upholds the earth, another makes Vishnu's bed: elephants support the ends of the universe, besides one such animal being Indra's vehicle: the goddess Durga or Kali rides on a tiger: one of Vishnu's incarnations was partly man and partly lion. The cow is a useful animal: to the Brahman vegetarian her milk is indispensable, and he treats her as his mother. So did the Rishi of old, who often subsisted on milk and fruits and roots. To the agriculturist cattle are indispensable. The snake excites fear. Stones, on which the image of a serpent is carved, may be seen under many trees by the roadside. The principal trees and plants worshipped are the Sacred Fig or Pipal, the Banyan, the Sacred Basil, the Bilva or Wood Apple, the Asoka, and the Acacia. They are in one way or another associated with some deity. The sun, the moon, and certain planets are among the heavenly bodies venerated. The ocean and certain great rivers are held sacred. Certain mountains, perhaps because they are the abodes of gods and Rishis, are holy. Pebbles from the Gandaki and the Narmada, which have curious lines upon them, are worshipped in many households and temples.

Worship.—Without going into a temple, one can get a fair idea of image worship by seeing how a serpent-stone is treated under a tree. It is washed, smeared with sandal, decorated with flowers: food in a vessel is placed before it, lamps are waved, and the worshipper goes round it, and bows down his head, or prostrates himself before the image. In a temple larger bells are used than the small ones that are brought to such a place: jewels are placed on the idol: and the offerings are on a larger scale. Idols are carried in public procession in palanquins or cars. The lower classes sacrifice animals before their gods and goddesses.

Domestic Life.—Of the daily domestic life of the people a tourist cannot see much. He may see a marriage or funeral procession. In the former he may notice how a bridegroom or bride is decorated: the latter may shock him for a Hindu dead body is generally carried on a few pieces of bamboo lashed together: a thin cloth is thrown over it and the body is tied to the frame. The Mahomedan bier is more decent, and resembles the Christian coffin. Some Hindus, however, carry the dead to the burial ground in a palanquin with great pomp. The higher castes cremate the dead: others bury them. Burial is also the custom of the Muslims, and the Parsis expose the dead in Towers of Silence.

Indian Names.

The personal name of most Hindus denotes a material object, colour, or quality, an animal, a relationship, or a deity. The uneducated man, who cannot correctly pronounce long Sanskrit words, is content to call his child, father, brother, uncle, or mother, or sister, as the case may be. This practice survives among the higher classes as well. Appa Saheb, Anna Rao, Babaji, Bapu Lal, Bhai Shankar, Tatacharya, Jijibhai, are names of this description, with honorific titles added. It is possible that in early society the belief in the re-birth of departed kinsmen lent popularity to this practice. Nothing could be more natural than to call a man white, black, or red: gold or silver: gem, diamond, suby, pearl, or merely a stone: small or tall, weak or strong: a lion, a snake, a parrot, or a dog: and to name a woman after a flower or a creeper. Thus, to take a few names from the epics, Pandu means white, and so does Arjuna: Krishna black: Bhima terrible: Nakula a mongoose: Shunaka a dog: Shuka a parrot: Shringa a horn. Among the names prevalent at the present day Hira is a diamond: Ratna or Ratan a jewel: Sonu or Chinna gold: Velli or Belli, in the Dravidian languages, means white metal or silver. Men are often called after the days of the week on which they were born, and hence they bear the names of the seven heavenly bodies concerned. When they begin to assume the names of the Hindu deities, they practically

enter upon a new stage of civilisation. It is doubtful whether the Animists ever venture to assume the names of the dreaded spirits worshipped by them. To pronounce the name of a devil is to invite him to do harm. If the spirits sometimes bear the names of human beings, the reason seems to be that they were originally human.

High-caste practices.—The high caste Hindu, on the other hand, believes that the more often the name of a deity is on his lips, the more merit he earns. Therefore he deliberately names his children after his gods and goddesses, so that he may have the opportunity of pronouncing the holy names as frequently as possible. These are also sonorous and picturesque. Shiva is happy: Vishnu is a pervader: Govinda is the cowherd Krishna: Keshava has fine hair: Rama is a delighter: Lakshmana is lucky: Narayana produced the first living being on the primeval waters: Ganesha is the Lord of Shiva's hosts: Dinakara is the luminary that makes the day: Subrahmanya is a brother of Ganesha. Sita is a furrow: Savitri a ray of light: Tara a star: Radha prosperity: Rukmini is she of golden ornaments: Bhama of the glowing heart. Shiva and Vishnu has each got at least a thousand names, and they may be freely drawn upon and paraphrased in naming one's children; and the whole Hindu pantheon is as crowded as it is large. When a mother loses several children, she begins to suspect that some evil spirit has conspired against her and in order to make her off-spring unattractive to the powers of darkness, she gives them ugly names, such as Keru, rubbish, or Ukirda, dunghill, or Martoba, the mortal. Women are named after rivers, as Sarasvati, Ganga, Bhagirathi, Godavari, or Kaveri, just as men are sometimes called after mountains. Manu counsels young men not to choose a wife with such a name, perhaps because a river is an emblem of deviousness and inconstancy, as a hill is an emblem of stability. But the names of rivers have not been discarded. The Burmans have a curious custom: if a child is born on a Monday, its name must begin with a guttural, on Tuesday with a palatal, on Thursday with a labial, on Saturday with a dental.

Family names.—When a person rises in importance, he adds to his personal name a family or caste name. It was once the rule that the title Sharma might be added to a Brahman's name, Varma to a Kshatriya's, Gupta to a Vaishyas, and Dasa to a Shudra's. This rule is fairly well observed in the case of the first two titles, but the meaning of the other two has changed. Dasa means a slave or servant, and the proudest Brahman cannot disdain to call himself the servant of some god. Thus, although Kalidas, the famous poet, was a Shudra, Ramadas, the famous guru of Shivaji, was a Brahmin. The Vaishnavas have made this fashion of calling oneself a servant of some god exceedingly popular, and in Western India high caste Hindus of this sect very commonly add Das to their names. The Brahmans of Southern India add Aiyer or Aiyangar to their names. Shastri, Acharya, Bhat, Bhattacharya, Upadhyaya, Mukhopadhyaya, changed in Bengal into Mukerji, are among the titles indicative of the Brahmanical profession of studying and teaching the sacred books. Among warlike classes, like the Rajputs and Sikhs, the title Singh (lion) has become more popular than the ancient Varma. The Sindhi Mal, as in Gidumal, means brave and has the same force. Raja changed into Raya, Rao and Rai was a political title, and is not confined to any caste. The Bengali family names, like Bose and Ghose, Dutt and Mitra, Sen and Guha, enable one to identify the caste of their bearers, because the caste of a family or clan cannot be changed. Shet, chief of a guild or a town, becomes Chetty, a Vaishya title, in Southern India. Mudaliyar and Nayudu, meaning leaders, are titles which were assumed by castes of political importance under native rulers. Nayar and Menon are the titles of important castes in Malabar. Ram, Lal, Nand, Chand, are among the additions made to personal names in Northern India. Suffixes like Ji, as in Ramji or Jamshedji, the Kanarese Appa, the Telugu Garu, the feminine Bai or Devi, are honorific. Prefixes like Babu, Baba, Lala, Sodhi, Pandit, Raja, and the Burmese Maung are also honorific.

Professional names.—Family names sometimes denote a profession: in some cases they might have been conferred by the old rulers. Mehta, Kulkarni, Deshpande, Chitnavis, Mahalnavis are the names of offices held in former times. One family name may mean a flour seller, another a cane-seller, and a third a liquor-seller. To insert the father's name between one's personal and the family name is a common practice in Western India. It is rare elsewhere. When a family comes from a certain place, the suffix 'kar' or 'wallah' is added to the name of the place and it makes a family surname in Western India. Thus we may have Chiplunkars and Suratwallahs, or without these affixes we may have Bhavnagris, Malabaris and Bilimorias, as among Parsis. Thus Vasudev Pandurang, Chiplunkar would be a Hindu, whose personal name is Vasudev, his father's name Pandurang, and family name derived from the village of Chiplun, is Chiplunkar. In Southern India the village name precedes the personal name. The evolution of Musalman names follows the same lines as Hindu names. But Muslims have no god or goddesses, and their names are derived from their religious and secular history. These names and titles are often as long and picturesque as Hindu appellations. The agnomens Baksh, Din, Ghulam, Khwaje, Fakir, Kazi, Munshi, Sheikh, Syed, Begum, Bibi and others, as well as honorific additions like Khan have meanings which throw light on Muslim customs and institutions. The Parsis also have no gods and goddesses, and their personal names are generally borrowed from their sacred and secular history. Their surnames frequently indicate a profession or a place, as in the case of Hindus in Western India. Bathiwallah, Readymoney, Contractor, Saklatwallah, Adenwallah and others like them are tell-tale names.

Indian Art.

In India there has never been so marked a separation between what are now known as the Fine Arts, and those applied to industry as was the case in Europe during the nineteenth century. As, however, Industrial art forms the subject of a special article in this book, the term Indian Art will here be confined to Architecture, Sculpture and Painting.

Historical.—The degree of proficiency attained in art by Indians prior to B. C. 250, can only be conjectured by their advancement in literature; and by the indirect evidences of indebtedness shown by the works of the historic period, to those which preceded them; or direct records of artistic work of an earlier date than B. C. 250 do not exist. The chief historic schools of architecture are as follows:—

Name.	Dates.	Locality of the best Examples.
Buddhist	B.C.250—A.D.750.	Ellora, Ajanta, Kali, Sanchi.
Jaina	A.D.1000—1300.	Ellora, Mount Abu, Palitana.
Brahminical	A.D. 500 to the present day.	Ellora, Elephanta, Orissa, Bhuvaneswar, Dharwar.
Chalukyan	A.D.1000—1200.	Umber, Somnathpur, Ballur.
Dravidian	A.D.1350—1750.	Ellora, Tanjore, Madura, Tinnevelly.
Pathan	A.D.1200—1550.	Delhi, Mandu, Jaunpore.
Indo-Saracenic	A.D.1520—1760.	Lahore, Delhi, Agra, Amber, Bijapur.

Buddhist Architecture is mainly exemplified by the rock-cut temples and monasteries found in Western India and in the *Topes* or sacred mounds. The interior decorations, and external facades of the former, and the rails and gates surrounding the latter point unmistakably to their being derived from wooden structures of an earlier period. The characteristic features of these temples are horse-shoe openings in the facades to admit light, and colonnades of pillars with richly ornamented caps in the interior halls. Jaina Architecture is found in its most highly developed form in the Dilwara temples at Mount Abu. The ground plan consists of a shrine for the god or saint; a porch, and an arcaded courtyard with niches for images. The characteristic of the style is grace and lightness, with decorative carving covering the whole interior, executed with great elaboration and detail. Constructional methods suggest that original types in wood have been copied in marble.

Brahminical, Chalukyan and Dravidian styles differ little in essential plan, all having a shrine for the god, preceded by pillared porches. The outer forms vary. The northern Brahminical temples have a curved pyramidal roof to the shrines, which in the southern or Dravidian style are crowned by a horizontal system of storied towers, and each story, decreasing in size, is ornamental with a central cell and figures in high relief. The Chalukyan style is affected by its northern and southern neighbours, taking features from each without losing its own special characteristics of which the star-shaped plan of the shrine, with the five-fold bands of external ornament, is the principal feature. Pathan Architecture was introduced into India by the Mahomedan invasion of the thirteenth century. At old Delhi are fine examples in the Kutub Mosque and Minar. The characteristics of the style are severity of outline, which is sometimes combined with elaborate decoration due, it is stated, to the employment of Hindu craftsmen. The mosques and tombs at Ahmedabad already show Hindu influence; but purer examples are to be found at Jaunpore and Mandu. Indo-Saracenic Architecture reached the climax of its development during the reigns of the Moghul Emperors. Akbar, Jehangir and Shah Jahan. It eclipsed in richness of material and refinement of taste the building efforts of previous periods, its crowning example being the Taj Mahal at Agra. The buildings erected during the Adil Shahi dynasty at Bijapur at a slightly later date, exhibit a certain Turkish influence, especially in the great tomb of Mahmoud. Though less refined and lacking the attraction of precious materials in their decoration, these splendid edifices are held in higher esteem by some critics than those of the Moghals, on account of their simplicity, grandeur and fine proportions. The era of great civil architecture in India was revived by the Mahomedan powers. Splendid palaces and fortresses were built at Madras, Delhi, Agra, Fattehpore-Sikri and Bijapur, and the example thus set was copied by the Hindu princes at Jaipur, Udaipur and elsewhere in India. The application of great architectural treatment, unequalled in extent elsewhere, is to be seen in the Ghauts or steps enclosing lakes and on the banks of rivers. The most notable constructional contribution of the Mahomedans to Indian architecture was the introduction of the true arch and dome.

Sculpture.—The use of sculpture and painting in isolated works of art was practically non-existent in India until modern times. One or two reliefs and certain gigantic figures may be quoted as exceptions, but taken generally it may be stated that these arts were employed as the decorative adjuncts of architecture. No civil statuary, such as is now understood by the term, was executed; for no contemporary portrait figures, or busts in marble, or bronze, have come down to us from the ruins of ancient India, as they have from those of Egypt, Greece and Rome. Sculpture has been used exclusively as the handmaid of religion, and to this fact may be attributed the stereotyped forms to which it became bound. The lavish use of sculpture on Indian temples often exceeds good taste, and mars the symmetry

and dignity of their mass and outline ; but for exuberance of imagination, industrious elaboration and vivid expression of movement, Indian sculpture is perhaps without its equal elsewhere in the world. The most impressive specimens are the earliest, found in the Buddhist and Brahminical cave temples of Ellora, Ajanta and Elephanta. The great Trimurthi in the last named of these temples ranks for mystery and expressive grandeur with the greatest masterpieces of art. The outstanding characteristics of Hindu sculpture are the power displayed in suggesting movement; the fine sense of decorative arrangements of line and mass ; and an overpowering ingenuity in intricate design. Mahomedan sculpture in India, though not exclusively confined to geometric forms as is that of the more severe Arabian school, is very restrained as compared with that of the Hindus. Floral motifs are often used in the ornaments to tombs and palaces, but rarely in those of mosques. Their geometric ornament shows great ingenuity and invention ; and wonderful decorative use is made of Persian, Arabic and Urdu lettering in panels, and their borders. The representation of human or animal figures is rarely to be met with. Sculptured and modelled relief is, as a rule, kept very low ; and is mainly confined to the decoration of mouldings, architraves, lintels, or the bands of ornament which relieve large exterior wall spaces. Buildings of purely Mahomedan design and workmanship show greater restraint than those upon which Hindu workmen have been employed and are more satisfactory ; but at Ahmedabad the two celebrated windows are striking examples of a happy combination of the two styles and Fattehpore Sikri is a magnificent example of the mixed style of Akbar.

Painting.—Much of the carved stonework upon ancient Indian buildings was as in ancient Greece and then decorated with colour, but the only paintings, in the modern acceptation of the term, now existing, which were executed prior to the Moghul period, are those upon the walls of the cave temples at Ajanta, Bagh, and in Ceylon. These remarkable works were produced at intervals during the first 600 years of the Christian era. They exhibit all the finer characteristic of the best Indian sculpture, but with an added freedom of expression due to the more tractable vehicle employed. The Ajanta Caves remained hidden in the Deccan jungles for nearly twelve hundred years, until accidentally discovered in 1816. They are painted in a species of tempora ; and when first brought to light were well preserved but they have greatly deteriorated owing to the well meant, but misguided action of copyists, and the neglect of the authorities. The Nizam's Government have in recent years done a great deal towards the preservation and study of these mural paintings. The second period of Indian painting owed its origin to the introduction of Persian artists by the Moghul Emperor Akbar; and the establishment of the indigenous Moghul school was due to the encouragement and fostering care of his successors, Jehangir and Shah Jahar. Unlike the works of the Ajanta painters, which were designed upon a large scale, the pictures of the Moghul school were miniatures. They were executed in a species of opaque water-colour upon paper or vellum, resembling to some extent the illuminated missals produced by the monks in Europe during the middle ages. Some of the finest of the earlier specimens in India are of a religious character; this phase of development being closely allied to the art of the caligraphist. As its range extended, a remarkable school of portrait painters arose notable for restrained but extremely accurate drawing, keen insight into character, harmonious colour, fine decorative feeling, and extraordinary delicacy and finish in the painting of detail. The artists of a Hindu off-shoot of this movement, known as the Rajput school, were less fully endowed with the technical and purely aesthetic qualities than were the Moghul painters; but they brought to their work poetry and sentiment which are not to be found in that of the Mahomedans. The pictures of both branches of the Moghul school, although highly decorative in character, were not intended for exhibition upon the walls of rooms, according to Western practice, and, when not used as illustrations or decorations to manuscript books, were preserved in portfolios. It is very significant that up to the best period of Mughal painting, the reign of Jehangir, European ideas in art, pictures, and prints were extensively patronised by the Emperor. This broad eclecticism of the Moghuls is in marked contrast to the opinions of Mr. Havell and his school of critics who have severely criticised the facilities of advanced training in Indian art schools which Bombay in particular has adopted with marked success.

Modern Painting.—As the reign of Shah Jahan exhibits the high tide of artistic development in India, so the reign of his successor Aurangzeb marks the period of its rapid decline. The causes of this are attributable to the absence of encouragement by this Emperor ; to his long periods of absence from the court at Delhi or Agra, entailed by the continuous wars he waged in his efforts to bring the whole of the Peninsula under his rule ; and partly to the fact of the school of Moghul Painting becoming stereotyped in its practice. Foreign designers, painters and craftsmen who had been attracted to India by the great works carried out by Akbar, Jehangir and Shah Jahan left the country, and their places were taken by no successors. The indigenous artists left to themselves in the isolated courts of small Indian princes, or collected in schools in remote districts, employed themselves mainly upon repeating the works of a previous age, instead of seeking new motifs for artistic treatment. At the time when the British East India Company ceased to be only a guild of merchants and became a great administrative power in 1757, very little vitality survived in the ancient art of the country. During the century of its administrative history between the battle of Plassey and the Indian Mutiny, the "Company" was too fully occupied in fighting for its existence, extending its borders and setting the internal economy of its ever increasing territories, to be able to give much attention to conserving any remnant of artistic practice which had survived. Without any deliberate intention of introducing western art into the country, Greek and its derivative style

of architecture were adopted for public and private buildings in Calcutta, Bombay and Madras because these were found to be more suitable for their purpose than buildings of indigenous pattern. The practical result was the same; for the Indian craftsmen employed upon their erection were confronted with styles affording no scope for the application of their traditional ornament and concerning which they had no knowledge or sympathy. As there were no sculptors in India capable of modelling or carving civil sculpture, the monuments to distinguish public servants were all imported from England; and the portraits, or other paintings which decorated the interior walls of the buildings, were furnished by European painters who visited India or by artists in England. Although a considerable amount of research work of a voluntary nature was done by Archæologists, no official interest was taken in artistic education until the Government of India was transferred to the British Crown in 1859. In England itself, the first fifty years of the nineteenth century was a period of gross commercialism and artistic degradation; but with the advent of the International Exhibition of 1851 the eyes of the nation were opened to the value of art as applied to industry.

The **Schools of Art** then instituted throughout England were imitated in a timid and tentative manner in India; and were attached to the educational system, which had been previously modelled upon a definitely European basis. The work of the Schools of Art in regard to industrial art is referred to elsewhere; and as several of them have confined their activities almost exclusively to this branch of the subject it is sufficient to mention only the work of the Schools at Calcutta and Bombay in the present article. The Calcutta school, except for occasional experiments in the application of the graphic arts to lithography, engraving and stained glass, has become a school of painting and drawing. That at Bombay covers a wider field; for in addition to classes for modelling, painting and design it possesses a special school of architecture; and a range of technical workshops, in which instruction is given in the applied arts. It is in the principles underlying the instruction in painting that the schools at Calcutta and Bombay have taken almost diametrically opposite roads to reach the end they both have in view, namely, the revival of the art of painting in India by means of an indigenous school of Indian painters. Mr. Havell, who several years ago was the Principal of the Calcutta School, (he left India in 1907) banished from within its walls every vestige of European art; and claimed that the traditional art of India, in its old forms, is not dead, but merely sleeping or smothered by the blanket of European culture laid upon it for the last 150 years, and needed but to be released from this incubus to regain its pristine vigour. Well equipped with literary ability; backed by intense enthusiasm for the views he held, he imposed upon his students an exclusive and severe study of the Moghul and Rajput schools of painting. He was fortunate in finding a willing and equally enthusiastic friend in Mr. Abindranath Tagore, an artist of imagination and fancy, combined with a serious devotion to his art. He with other Bengal painters, inspired by Mr. Havell's precepts, founded, about thirty years ago, what has since become known as the Calcutta School of painting. In their early work the painters of this school closely adhered to the conventions of Moghul and Rajput artists, whom they took as their models; and these early examples made a great impression upon all European critics who saw them. They were welcomed as the first sign of a genuine revival of Indian painting, based upon traditional lines, and it was confidently hoped that the movement would meet with the support it merited from Indians of all classes. Interesting as many individual works of the school undoubtedly are the anticipations which greeted its inception have scarcely been fulfilled by the Calcutta school. The painters themselves have never reached the high technical standard of the artists who produced the best works of the Moghul or Rajput schools, and, as time has passed, their outlook appears to have shifted, and, while stemming the flood of western influence, they appear to have drifted into a backwater of Japanese conventions. The Indian public has failed to give the school the support it was hoped they would afford and the movement has had to depend for encouragement mainly upon Europeans in England and India.

Bombay School of Art.—The attitude towards the development of art in modern India taken by its successive Principals Messrs. Lockwood Kipling, Griffiths, Greenwood, and Cecil Burns, was on wider lines than that favoured by Mr. Havell. In general the view this School of Art has taken is that with European literature dominating the system under which the educated classes in India are trained and with European ideas, and science permeating the professional commercial, industrial, and political life of the country, it is not possible for modern Indians now to recapture the spirit which alone gave vitality to the great works of the past; that without this spirit, the conventions the ancient artists adopted are mere dead husks: and that to copy these would be as unprofitable as it would be for the artists of Europe to harness themselves to the conventions of the Greek and Roman sculptors or to those of the mediæval painters; that with European pictures, often of inferior quality illustrating every educational text book, and sold in the shops of every large city, it is essential for the proper education of art students that they should have before them the masterpieces of European art; and that, with the wide adoption of European styles of architecture in India, it is necessary for a school of art to possess the best examples of ornament applicable to the great historic styles, for the purpose of study and reference. There are certain basic principles common to the technique of all great art, such as fine and accurate drawing in its widest sense, composition and design, and the science of colour harmony.

Among the developments during Mr. Burns administration were the founding of the Architectural School, the extension of drawing classes in the Government Schools, and the appointment of an Inspector of Drawing to inspect and report on the drawing classes in the schools. A Pottery Department was also started and

was abolished in 1926. Mr. Burns retired in 1918 and was succeeded in 1919 by the present Principal, Mr. W. E. Gladstone Solomon, R.B.C.

The guiding principle with Mr. Solomon has been to teach the students to draw and to paint what they see; and further to encourage by all possible means their natural progress in the decorative direction towards which their inherent instinct most obviously urges them. He has always maintained that theory in regard to the training of Indian Art students is in itself unproductive and can only be proven by practice; and as Mr. Solomon has now held the post of Principal for many years it is possible to gauge the results achieved by his system of training.

The Life Classes which were organised at the end of 1919 have been pronounced by competent judges as well up to the level of the Life Classes of the European Schools of Art. But proficiency in technique forms only one side of the present system of training; for even in Europe, too much of the study from Life is quite capable of negativing its own object. In India, where the decorative instinct is inherent, and where the possibilities of freehand drawing are still understood, the danger of overdoing the Life Class is even more palpable. So side by side with these realistic aids to study, and at the same period, a class of Indian Decorative Painting was inaugurated in the Bombay School of Art under the patronage of the Governor of Bombay (Lord Lloyd). As this class specialises in **Mural Painting** it has long been popularly known as the Class of Mural Painting. This class has executed the decorations for many public and private buildings, and painted the ceiling and panels of a specially constructed Indian Room which was exhibited at Wembley in 1924. A great deal of controversy, which has been characterised by its academic rather than its practical note, has centred round these new movements in art training in India; but the Bombay School of Art has retained the patronage and support of the public and the increase in the number of its students (who now number over 600 in all sections of the School) has been continuous since it took its present line. It is significant that the widespread revival of public interest in Art in Western India has synchronised with these activities.

The School of Art has of late years enjoyed the patronage of successive Governors of Bombay and, largely due to the efforts of Sir Leslie Wilson, the Government of India inaugurated a competition of Indian Artists in 1927 for the decoration of wall spaces in the new buildings at New Delhi. The result of the Competition was notified in October 1928, when five artists of Bombay, and the students of the Bombay and Lahore Schools of Art were commissioned to paint Mural Decorations in the new Secretariat buildings. The Bombay School undertook the decoration of Committee Room "A" (in the North Block) and the paintings, which were executed in oils on canvas, were finished, and successfully placed in position on the dome and walls by the middle of September 1929. These decorations were original compositions of life size figures, symbolising the main periods of Indian Art, and the different branches of the Fine and Applied Arts. In April 1929, the Government of Bombay converted the Bombay School into a Department independent of the Director of Public Instruction, the Principal (Mr. W. E. Gladstone Solomon) being made Director. In October 1930 the latter organised an exhibition of the work of all Departments of this School of Art in India House, London. The Exhibition was very well patronised by the public and extremely well received by the art critics and the Press. Her Majesty the Queen Empress graciously patronised the exhibition and selected several of the paintings displayed.

While the Bombay School was engaged upon the work of mural decoration at New Delhi in 1928-1929, which is referred to above, a public competition for the selection of four Indian artists to proceed to England was announced by the Government of India. The successful candidates were to study for a year at the Royal College of Art, South Kensington; after which they were to be employed on the mural decoration of the interior of India House, Aldwych. The Bombay School was unable to compete, owing to its preoccupation with the New Delhi decorations; and four artists from Bengal were selected by a Committee appointed by the Government of India, which, though it included two representatives from Bombay (who were not artists) has been criticised on the ground that several of the Bengal representatives were professional artists, that the Bombay School's inability to take part was not brought to the notice of the Committee, and that therefore the result of the competition could not be representative of all the Indian Provinces. The four elected artists finished the decorative work which they had been engaged to execute at India House and returned to India in 1932. But in 1933 two of them were re-engaged to decorate the entrance hall of the building; in consequence of this considerable controversy has arisen on the whole subject of the India House mural paintings and their claim to be representative of India as a whole. This episode has thrown into stronger relief the differences on the subject of art in India between the Western and Eastern districts of the country; a noticeable diminution of the exclusionists' art propaganda, and a tendency towards aligning art in Bengal with the position which Bombay has occupied in this matter for the last two generations, is one of the salient symptoms of the present situation (1934). Another cause of public controversy, which was more local in character, had occurred near the end of 1932, when the Bombay Reorganisation Committee which had been appointed by the Bombay Government for purposes of retrenchment, advocated the closing down of the Bombay School of Art, the abolition of its buildings and the utilisation of the compound of the school for a hospital. The Architectural School was to be moved elsewhere. These draconian recommendations created a great deal of public dissatisfaction, which expressed itself in public agitation, processions and a crowded meeting of protest. After full examination of this vexed question, the Governor of Bombay, Sir Frederick Sykes, who had taken keen interest during his administration, in the welfare of the School, personally announced in a speech delivered at the School of Art on November 24, 1933, that the institution was to be maintained upon its present basis.

Indian Architecture.

The architecture of India has proceeded on lines of its own, and its monuments are unique among those of the nations of the world. An ancient civilization, a natural bent on the part of the people towards religious fervour of the contemplative rather than of the fanatical sort, combined with the richness of the country in the sterner building materials—these are a few of the factors that contributed to making it what it was, while a stirring history gave it both variety and glamour. Indian architecture is a subject which at the best has been studied only imperfectly, and a really comprehensive treatise on it has yet to be written. The subject is a vast and varied one, and it may be such a treatise never will be written in the form of one work at any rate. The spirit of Indian art is foreign to the European and few can entirely understand it, while art criticism and analysis is a branch of study that the Indian has not as yet developed to its full extent. Hitherto the best authority on the subject has been Fergusson, whose compendious work is that which will find most ready acceptance by the general reader. But Fergusson attempted the nearly impossible task of covering the ground in one volume of moderate dimensions, and it is sometimes held that he was a man of too purely European a culture, albeit wide and eclectic, to admit of sufficient depth of insight in this particular direction. Fergusson's classification by races and religions is, however, the one that has been generally accepted hitherto. He asserts that there is no stone architecture in India of an earlier date than two and a half centuries before the Christian era, and that "India owes the introduction of the use of stone for architectural purposes, as she does that of Buddhism as a state religion, to the great Asoka, who reigned B.C. 272 to 236."

Buddhist Work.

Fergusson's first architectural period is then the Buddhist, of which the great tope at Sanchi with its famous Northern gateway is perhaps the most noted example. Then we have the Gandharan topes and monasteries. Perhaps the examples of Buddhist architecture of greatest interest and most ready access to the general student are to be found in the Chaitya halls or rock-cut caves of Karli, Ajanta, Nasik, Ellora, and Kanheri. A point with relation to the Gandhara work may be alluded to in passing. This is the strong European tendency, variously recognized as Roman, Byzantine but most frequently as Greek, to be observed in the details. The foliage seen in the capitals of columns bears strong resemblance to the Greek acanthus, while the sculptures have a distinct trace of Greek influence, particularly in the treatment of drapery, but also of hair and facial expression. From this it has been a fairly common assumption amongst some authorities that Indian art owed much of its best to European influence, an assumption that is strenuously combated by others as will be pointed out later.

The architecture of the Jains comes next in order. Of this rich and beautiful style the most noted examples are perhaps the Dilwara temples near Mount Abu, and the unique "Tower of Victory" at Chittore.

Other Hindu Styles.

The Dravidian style is the generic title usually applied to the characteristic work of the Madras Presidency and the South of India. It is seen in many rock-cut temples as at Ellora, where the remarkable "Kylas" is an instance of a temple cut out of the solid rock, complete, not only with respect to its interior (as in the case of mere caves) but also as to its exterior. It is, as it were, a life-size model of a complete building or group of buildings, several hundred feet in length, not built, but sculptured in solid stone, an undertaking of vast and, to our modern ideas, unprofitable industry. The Pagoda of Tanjore, the temples at Srirangam, Chidambaram, Vellore, Vijayanagar, &c., and the palaces at Madura and Tanjore are among the best known examples of the style.

The writer finds some difficulty in following Fergusson's two next divisions of classification, the "Chalukyan" of South-central India, and the "Northern or Indo-Aryan style." The differences and the similarities are apparently so intermixed and confusing that he is fain to fall back on the broad generic title of "Hindu"—however unscientific he may thereby stand confessed. Amongst a vast number of Hindu temples the following may be mentioned as particularly worthy of study:—Those at Mukteswara and Bhuvaneswar in Orissa, at Khajuraho, Bindrabun, Udaipur, Benares, Gwalior, &c. The palace of the Hindu Raja Man Singh at Gwalior is among the most beautiful architectural examples in India. So also are the palaces of Amber, Datiya, Urcha, Dig and Udaipur.

Indo-Saracenic.

Among all the periods and styles in India the characteristics of none are more easily recognizable than those of what is generally called the "Indo-Saracenic" which developed after the Mahomedan conquest. Under the new influences now brought to bear on it the architecture of India took on a fresh lease of activity and underwent remarkable modifications. The dome, not entirely an unknown feature hitherto, became a special object of development, while the arch, at no time a favourite constructional form of the Hindu builders, was now forced on their attention by the predilections of the ruling class. The minaret also became a distinctive feature. The requirements of the new religion,—the mosque with its wide spaces to meet the needs of organized congregational acts of worship—gave opportunities for broad and spacious treatments that had hitherto been to some extent denied. The Moslem hatred of idolatry set a tabu on the use of sculptured representations of animate objects in the adornment of the buildings, and led to the development of other decorative forms. Great ingenuity came to be displayed in the use of pattern and of geometrical and foliated ornament. This Moslem trait further turned the attention of the builders to a greater extent than before to proportion, scale and mass as means of giving beauty, mere richness of sculptured surface and the æsthetic and symbolic interest of detail being no longer to be depended on to the same degree.

Foreign Influence.

There would appear to be a conflict between archæologists as to the extent of the effect on Indian art produced by foreign influence under the Mahomedans. The extreme view on the one hand is to regard all the best of the art as having been due to foreign importation. The Gandharan sculptures with their Greek tendency, the development of new forms and modes of treatment to which allusion has been made, the similarities to be found between the Mahomedan buildings of India and those of North Africa and Europe, the introduction of the minaret and, above all, the historical evidences that exist of the presence in India of Europeans during Mogul times, are cited in support of the theory. On the other hand those of the opposite school hold the foregoing view to be due to the prevailing European preconception that all light and leading must come by way of Europe, and the best things in art by way of Greece. To them the Gandharan sculpture, instead of being the best, is the worst in India even because of its Greek tincture. They find in the truly indigenous work beauties and significances not to be seen in the Greco-Bactrian sculptures, and point to those of Borobuder in Java, the work of Buddhist colonists from India, wonderfully preserved by reason of an immunity from destructive influences given by the insular position, as showing the best examples of the art extant. It is probable that a just estimate of the merits of the controversy, with respect to sculpture at any rate, cannot be formed till time has obliterated some of the differences of taste that exist between East and West.

To the adherents of the newer school the undisputed similarities between Indo-Mahomedan and Hindu buildings outweigh those between Indian and Western Mahomedan work, especially in the light of the dis-similarities between the latter. They admit the changes produced by the advent of Islam but contend that the art, though modified, yet remained in its essence what it had always been; indigenous Indian. The minaret, the dome, the arch, they contended, though developed under the Moslem influence, were yet, so far as their detailed treatment and craftsmanship are concerned, rendered in a manner distinctively Indian. Fergusson is usually regarded as the leader of the former school while the latter and comparatively recent school has at present found an eager champion in Mr. E. B. Havell, whose works, on the subject are recommended for study side by side with those of the former writer. Mr. Havell practically discards Fergusson's racial method of classification into styles in favour of a chronological review of what he regards to a greater extent than did his famous precursor as being one continuous homogeneous Indian mode of architectural expression, though subject to variations from the influences brought to bear upon it and from the varied purposes to which it was applied.

Agra and Delhi.

Agra and Delhi may be regarded as the principal centres of the Indo-Saracenic style—the former for the renowned Taj Mahal, for Akbar's deserted capital of Fatehpur Sikri, his tomb at Secundra, the Moti Musjid and palace buildings at the Agra fort. At Delhi we have the great Jumma Musjid, the Fort, the tombs of Humayon, Sufdar Jung, &c., and the unique Qutb Minar. Two other great centres may be mentioned, because in each there appeared certain strongly marked individualities that differentiated the varieties of the style there found from the variety seen at Delhi and Agra, as well as that of one from that to the other. These are Ahmedabad in Gujarat and Bijapur on the Dekhan, both in the Bombay Presidency.

Ahmedabad.

At Ahmedabad with its neighbours Sirkhej and Champanir there seems to be less of a departure from the older Hindu forms, a tendency to adhere to the lintel and bracket rather than to have recourse to the arch, while the dome though constantly employed, was there never developed to its full extent as elsewhere, or carried to its logical structural conclusion. The Ahmedabad work is probably most famous for the extraordinary beauty of its stone "jali"—or pierced lattice-work, as in the palm tree windows of the Sidi Sayyid Musjid.

Bijapur.

The characteristics of the Bijapur variety of the style are equally striking. They are perhaps more distinctively Mahomedan than those of the Ahmedabad buildings in that here the dome is developed to a remarkable degree, indeed the tomb of Mahmud—the well-known "Gol Gumbaz"—is cited as shewing the greatest space of floor in any building in the world roofed by a single dome, not even excepting the Pantheon. The lintel also was here practically discarded in favour of the arch. The Bijapur style shews a bold masculine quality and a largeness of structural conception that is unequalled elsewhere in India though in richness and delicacy it does not attempt to rival the work of the further North. In this we recognize among other influences that of the prevailing material, the hard uncompromising Dekhan basalt. In a similar manner the characteristics of the Ahmedabad work with its greater richness of ornamentation are bound up with the nature of the Gujarat freestone, while at Delhi and Agra the freer choice of materials available—the local red and white sandstones, combined with access to marble and other more costly materials—was no doubt largely responsible for the many easily recognizable characteristics of the architecture of these centres.

II. MODERN.

The modern architectural work of India divides itself sharply into two classes. There is first that of the indigenous Indian "Master-builder" to be found chiefly in the Native States, particularly those in Rajputana. Second there is that of British India, or of all those parts of the peninsula wherever Western ideas and methods have most strongly spread their influence, chiefly, in the case of architecture, through the medium of the Department of Public Works. The work of that department has been much animadverted upon as being all that building should not be, but, considering it has been produced by men

of whom it was admittedly not the *metier*, and who were necessarily contending with lack of expert training on the one hand and with departmental methods on the other, it must be conceded that it can shew many notable buildings. Of recent years there has been a tendency on the part of professional architects to turn their attention to India, and a number of these has even been drafted into the service of Government as the result of a policy initiated in Lord Curzon's Viceroyalty. In time, therefore, and with the growth of the influence of these men, such of the reproach against the building of the British in India as was just and was not merely thoughtlessly maintained as a corollary to the popular jape against everything official, may gradually be removed. If this is so as to Government work progress should be even more assured in the freer atmosphere outside of official life. Already in certain of the greater cities, where the trained modern architect has established himself, in private practice, there are signs that his influence is beginning to be felt. He still complains, however, that the general public of India needs much educating up to a recognition of his value, both in a pecuniary sense and otherwise.

To the work of the indigenous "master-builder" public attention has of recent years been drawn with some insistence, and the suggestion has been pressed that efforts should be directed towards devising means for the preservation of what is pointed out—and now universally acknowledged—to be a remarkable survival—almost the only one left in the world—of "living art," but which is threatened with gradual extinction by reason of the spread of Western ideals and fashions. The matter assumed some years ago the form of a mild controversy centring round the question of the then much discussed project of the Government of India's new capital at Delhi. It was urged that this project should be utilised to give the required impetus to Indian art rather than that it should be made a means of fostering European art which needed no such encouragement at India's expense. The advocates of this view appear for the most part to have been adherents of the "indigenous Indian" school of archæologists already mentioned, and to have based their ideas on their own reading of the past. They still muster a considerable following not only amongst the artistic public of England and India, but even within the Government services. Their opponents, holding what appears to be the more official view both as to archæology and art, have pointed to the "death" of all the arts of the past in other countries as an indication of a natural law, and deprecate as waste of energy all efforts to resist this law, or to institute what they have termed "another futile revival"! The British in India, they contend, should do as did the ancient Romans in every country on which they planted their conquering foot. As those were wont to replace indigenous art with that of Rome, so should we set our seal of conquest permanently on India by the erection of examples of the best of British art. This is the view which, as we have indicated, appears to have obtained for the moment the more influential hearing, and the task of designing and directing the construction of the principal buildings in the new Capital was accordingly entrusted jointly to two famous British architects, neither of whom can be unduly influenced by either past or recent architectural practice so far as India is concerned. The building of New Delhi is perhaps too recent an event for the passing of a definite verdict. The work of Sir Edwin Lutyens and Sir Herbert Baker abides the judgment of posterity. If that work has had its severe critics, it has also received the commendation of many. The cream domes set on tall bases, rise from the centre of the Secretariat buildings, and surmounted by cupolas have reminded some of Bramarte's work in Rome, or the Pantheon, or Wren's dome of St. Paul's. Below there are the semi-circular entrances resembling Moghul doorways; the rows of comparatively small windows, some filled with pierced sandstone screens somewhat distract the eye, and seem to mar the effect of sturdiness prevailing throughout. The Secretariats were meant no doubt to usher the visitor to New Delhi to the "piece de resistance" of the architectural composition, the Viceroy's House. Standing where it does, this building is intended to dominate and necessarily arrests the gaze of the visitor, while its massive end bays, with stepped entablature capped by saucered fountains are said to give the architectural eye a feeling of safety against spreading. This feeling of security continues as the spectator's gaze travels down the unusual design of the metalled dome to the solid projecting bays that contain the statues of King George V and Queen Mary, which complete the composition. Some think that the colour scheme avoids the "glaring disunity" in Moghul buildings when the white luminous marble was used with similar red sandstone; for here, the two sandstones, red and cream are blended and co-ordinated. With regard to the interior decorations of New Delhi, strenuous efforts were made by those who believed in the enterprise as a point of focus for the revival of Indian art to obtain for the Indian art schools and artists commissions to carry out the Mural paintings required in the new buildings. After a great deal of public agitation on this subject in Bombay some commissions of this kind were given by the Government of India, based on the results of a public competition. But in spite of the indubitable success of many of the paintings, and the proof furnished thereby of the Indian artist's capacities for this kind of work, nothing further has been accomplished in the matter since the end of 1929.

The controversy of East and West, however vital to the interests of the country's architecture, is too purely technical for its merits to be estimated by the general reader or discussed here. Its chief claim on our attention lies in the fact that it affords an added interest to the tourist, who may see the fruits of both schools of thought in the modern buildings of British India as well as examples of the "master builders" work in nearly every native town and bazaar. The town of Lashkar in Gwalior State may be cited as peculiarly rich in instances of picturesque modern Indian street architecture, while at Jaipur, Udaipur, Benares, etc., this class of work may be studied in many different forms both civil and religious.

Industrial Arts.

The ancient industrial arts of India formed two distinct groups. The first included those allied to, and dependent upon, architecture; the second comprise those applied to articles devoted to religious ritual; military weapons and trappings, domestic accessories; and to personal adornment.

The articles of the first group were intended for some fixed and definite position, and the style of their design and the character of their workmanship were dictated by that of the building with which they were incorporated. Those of the second group were movable, and the range of their design was less constricted and their workmanship was more varied. Examples of work in both groups are so numerous, and the arts comprise such a diversity of application, that only a cursory survey can be attempted within the limits of a short review. Although the design and treatment differ in the two groups, the materials used were often the same. These materials cover a very wide range but space only permits of reference to work applied to the four materials upon which the Indian craftsman's skill has been most extensively displayed. These are stone, wood, metal and textiles.

Before dealing separately with each of these materials a few words upon the principal Indian styles are necessary. The two distinctive styles are Hindu and Mahomedan. The former may be termed Indigenous, dating as it does from remote antiquity; the latter was a variation of the great Arabian style, which was brought into India in the fourteenth century, and has since developed features essentially Indian in character. The art of both Hindus and Mahomedans is based upon religion and the requirements of religious ritual. The obvious expression of this is shown in the different motifs used for their ornament. In Hindu art all natural forms are accepted and employed for decorative purposes; but in that of the Mahomedans, nearly all natural forms are rejected and forbidden. The basis of Mahomedan decoration is therefore mainly geometrical. In each of them, racial characteristics are strikingly exhibited. The keynote of Hindu work is exuberance, imagination and poetry; that of Mahomedan, reticence, intellect and good taste. The Hindus are lavish, and often undiscriminating in their employment of ornament; the Mahomedans use more restraint. In fact the two styles may be compared, without straining the analogy, to the Gothic and classic styles in Europe. In both styles the fecundity of ideas and invention in design are marvellous, and the craftsmanship often reaches a very high standard. Hindu art had been subjected throughout the ages to many foreign influences, but the artistic instincts of the people have proved so conservative that, whether these alien ideas came from the east or the west, they have often been absorbed, and are now stamped with a definite Indian character. Recognition of this fact should relieve the anxiety of those critics who fear that the penetration of Western art and culture into India at the present time will eventually rob Indian art of its national character.

Stone Work.—Carved stone work is the principal form of decoration employed in Hindu temples. In variety and scope it ranges from the massive figures in the Buddhist and Brahminical Cave Temples, and the detached sculpture of the temples of Southern India, to the delicately incised reliefs and elaborately fretted ornament of the Jain temples at Mount Abu. A curious fact in relation to Hindu work is that priority of date appears to have no relation to artistic development. It is not possible to trace, as in the case of Greek, Roman and Mediæval craftwork, the regular progressive steps from art in its primitive state to its culminating point and its subsequent decay. Styles in India seem to spring into existence fully developed; the earlier examples often exhibiting finer craftsmanship than those of a later date. There can be little doubt that stone carving in India was simply the application of the wood carvers' art to another material. The treatment of stone by the Hindu craftsmen, even in the constructive principles of their buildings, bears a closer resemblance to the practice of the wood-worker than to that of the stone mason. The earlier wooden examples from which the stone buildings and their decorations were derived have long since disappeared, but their influence is apparent. The keynote of Hindu design is rhythmic rather than symmetrical; that of their craftsmanship, vigour rather than refinement. In the carving of the human figure and of animals great power of expressing action is shown, and this spontaneous feeling is preserved despite the greatest elaboration and detail. The industry displayed is amazing, no amount of labour appears to have daunted the Hindu craftsmen in carrying out their huge and intricate schemes of decoration.

The stone carving on Mahomedan buildings except where Hindu carvers have been allowed a free hand, is much more restrained than that on Hindu temples. The fact that geometrical forms were almost exclusively used, dictated lower relief and greater refinement in the carving; while the innate good taste of the designers prompted them to concentrate the ornament upon certain prominent features, where its effect was heightened by the simplicity of the rest of the building. The invention displayed in working out geometrical patterns for work screens, inlay, and other ornamental details appears to be inexhaustible; while wonderful decorative use has been made of Arabic and Persian lettering in panels and their framing. To obtain a rich effect the Hindus relied upon the play of light and shade upon broken surfaces, the Mahomedans to attain the same end used precious materials; veneering the surfaces of their buildings with polished marble which they decorated with patterns of mosaic composed of jade, agate, onyx and other costly stones. Although the art of inlaying and working in hard stones was of Italian origin, it proved to be one eminently suited to the genius of the Indian craftsman; and many wonderful examples of their skill in the form of book rests, tables, thrones, footstools, vases and sword handles are extant to show the height of proficiency they attained. The treatment of precious

stones by Indian jewellers may here be referred to. Sir George Birdwood states that "the Indian jeweller thinks of producing the sumptuous, imposing effect of dazzling variety of rich and brilliant colours and nothing of the purity of his gems." This is true in a general sense and "full many a gem of purest ray serene" was utterly ruined by crude cutting and piercing. But although as early as the sixteenth and seventeenth centuries diamonds and precious stones from the Indian mines were taken to Europe to be cut, many of the finest jewels found their way back to the treasure houses of Indian princes. Sir G. Watt has divided Indian stone work into three great stages or types, *viz.* (1) from the excavation of Cave Temples and the construction of Buddhist topes; (2) the building of Hindu Chalakyan and Jain Temples; (3) the Pathan and Moghul Mosques, tombs and palaces. It is interesting to note that the Schools of Art in India have given attention to this industry. For instance the Bombay School of Art has to its credit a number of public buildings adorned by means of its student stone-cutters.

Wood Work.—With a fine range of timbers suitable for the purpose, wood has played a great part in the construction and decoration of Indian buildings. Unfortunately, much of the ancient wood work has been destroyed by the action of the climate and the teeming insectivorous life of India; and that which escaped these enemies was wiped out by fire and the sword. It is therefore only possible to conjecture the height of artistic development these buildings and their decorations displayed by the copies in stone which have been preserved. Few if any examples of a date earlier than the sixteenth century are to be found. Many of these, and specimens of a later date to be seen in towns and cities throughout the country, are masterpieces of design and craftsmanship. The carved timber fronts and inner courtyards of houses in Ahmedabad, Nasik, and other parts of Western India are notable for their picturesqueness and beauty the structural beams, the overhanging balconies, with their screens and supporting brackets, being carved in a manner which unites richness of effect with good taste and propriety. Of furniture, as the term is now understood, few examples were in use in India before Europeans introduced their own fashions. These were confined to small tables and stools, book rests, clothes chests and screens, the designs of which conformed somewhat closely to the architectural style of the period. Many of these were decorated with inlays of coloured woods, ivory and metal; while in some cases the wooden basis was entirely plated with copper, brass or silver. In Southern India, where close grained sandalwood is grown, jewel cases and boxes are enriched with carving executed with the attention to detail and the finish generally associated with the carving of ivory. Coloured lac was freely used to decorate many articles of furniture, especially those turned on the lathe; and rich colour effects were obtained in this, perhaps the most distinctive and typically Indian development of decoration as applied to wood work. Teak, shisham, deodhar, sandalwood, ebony, walnut, jun, nim and Madras red wood are among the chief woods used in India for ornamental work.

Metal Work.—With the exception of weaving, the metal working industry employed and still employs the greatest number of artistic craftsmen in India. Copper and brass have always been the two metals most widely used for domestic purposes by Mahomedans and Hindus. The shapes of many of these humble vessels are among the most beautiful to be found in the country. They exhibit that sense of variety and touch of personality which are only given by the work of the human hand; and the shapes are those which grow naturally from the working of the material with the simplest implements. In the technical treatment of brass and copper Indian craftsmen have shown a taste and skill unsurpassed by those of other nations, except in the department of fine casting. In this, and in the working of gold and silver, a higher standard of technical and constructive exactness has been reached by the metal workers of Europe and Japan. It may be taken as an axiom that the more beautiful the shape of an article is, and this especially applies to metal work, the less need exists for the decoration of its surface. It is equally true that the highest test of craftsmanship is the production of a perfect article without any decoration. The reason being that the slightest technical fault is apparent on a plain surface, but can be hidden or disguised of one which is covered with ornament. The goldsmiths and silversmiths of India were extremely skilful and industrious, but judged by this test their works often exhibit a lack of care and exactness in the structural portion and a completely satisfactory example of perfectly plain work from the hands of the gold and silversmiths of India is rarely to be met with. Much of the excessive and often inappropriate ornamentation of the articles that they produced owed its application as much to the necessity of hiding defective construction as it did to any purely decorative purpose. For many generations, ornaments of gold and silver were regarded in the light of portable wealth, a practice which naturally made for massiveness. These solid ornaments are most effective and picturesque; and, despite an enormous output of elaborate and delicate work from their hands, the most valuable contribution of the Indian metal workers to the sum total of man's artistic use of the precious metals will probably be found to lie in a certain barbaric note which distinguishes these pieces—a note not present in the craft work of other countries. In the design of Hindu gold and silver ornaments, religious symbols have been extensively used. The ornaments which bedeck the early sculptured figures, and those depicted in the paintings at the Cave Temples of Ajanta are precisely the same in design and use as similar articles made at the present time, thus affording a striking evidence of the inherent conservatism of the Hindu people and its effect upon an industrial art that makes a closer personal appeal than any other.

Textiles.—The textile industry is the widest in extent in India and is that in which her craftsmen have shown their highest achievements. Other countries, east and west of India have produced work equal at least in stone, wood, and metal; but none has ever matched that of her weavers in cotton and wool, or excelled them in the weaving of silken

fabrics. Some of the products of the looms of Bengal are marvels of technical skill and perfect taste, while the plum bloom quality of the old Cashmere shawls is an artistic achievement which places them in a class by themselves. Weaving being essentially a process of repetition, was the first to which machinery was applied, and modern science has brought power loom weaving to such a state of perfection that filaments of a substance finer even than those of Dacca, which astonished our ancestors, are now produced in the mills of Lancashire. But for beauty of surface and variety of texture no machine-made fabrics have ever equalled the finest handiwork of the weavers of India. Many of the most beautiful varieties of Indian textile work have disappeared, killed by the competition of the power loom. In other branches of art as applied to textiles India does not hold so pre-eminent a position as in that of weaving. The printed silks and calicoes of the seventeenth and eighteenth centuries deservedly held a high place in the estimation of Western nations, whose craftsmen learnt many valuable lessons from the technical skill, and artistic taste they display. Nothing approaching the tapestries made in Europe in the middle ages has been produced in India. The nearest approach to these is in carpets and rugs. This art was introduced from Persia; but Indian craftsmen have never succeeded in equalling the finest work of their instructors either in colour or design.

Modern Conditions.—In the foregoing sketch of the ancient industrial art of India, as applied to the four principal materials employed only a general indication of its more striking characteristics has been possible. A volume would be required to give a detailed description of any one of them, and would leave many other minor arts to be considered. All these branches of art came into existence, were developed and flourished in India when social and economic conditions were vastly different from those of the present day. Like similar artistic crafts carried on in Europe up to the end of the eighteenth century, they were executed by hand labour. The processes involved had not been discovered by scientific inquiry, such as is now understood by the phrase: but were the outcome of generations of slowly built up experience. We now come to the effect upon them of the changed conditions which have revolutionised industrial art in Europe during the last century.

The invention of the steam engine, and the application of mechanical power and scientific research to industry in Europe, mark the dividing line between ancient and modern industrial art. Not only on its technical side is this so, but the effect of these changes has been to alter the character of the work itself and the spirit which animated the craftsmen. In place of the ancient ideal of variety in design and treatment, which meant a limited output, the modern one of uniformity and unlimited output has been substituted. The capitalist has displaced the master craftsman: the organised factory, the small workshop; specialisation and division of labour have taken the place of general proficiency among the artisans; the function of the designer has been separated from that of the craftsman; local markets have been extended to serve the whole world; and the skilled handicraftsman has, in a great measure, become a machine-minder. It took about one hundred years of gradual change for the craftsmen of Europe fully to adjust themselves to these altered conditions; and during the greater portion of that period India protected by the difficulties of transport, continued its immemorial practice. Fifty years ago this protective barrier was removed by the opening of the Suez Canal, and the craftsmen of India have since been struggling to avoid the same fate which overtook those of Europe half a century before. With less time to adapt themselves to the changed conditions the Indian craftsmen have had to meet the competition of European rivals already fully equipped with new and unknown tools. Even before this period of intense competition, observers interested in Indian craftwork had noticed evidences of its deterioration. The falling off, both in design and workmanship was attributed to the conservative practice of the craftsmen: to the gradual loss of foreign markets, and to the long period of internal disorder which had deprived them of both the patronage of the rulers of an earlier age and the stimulating contact with foreign craftsmen who had previously been attracted to the splendid courts at Delhi and Agra. During the same period, an even greater degradation in design had overtaken the craftwork of Europe. This was due to entirely different causes namely, to the introduction of machinery. Attention had been so concentrated upon speedy production, mechanical accuracy and commercial organisation that beauty of design had been almost entirely neglected. This was so forcibly demonstrated at the International Exhibition of 1851 that efforts were at once made to bring art and industry together once more. Schools of Art and Museums were founded throughout England and the same system was copied in a tentative and timid fashion in India. The function of these institutions was accurately estimated in England, where the artistic industries were already highly organised and were commercially successful, and whose products were to be found in every market of the world. Their business was to assist these industries by training a body of efficient designers capable of furnishing the factories with suitable designs, new or old, and in any style, to satisfy the requirements of customers in any country. It was never supposed for an instant that a School of Art could lead an industry. In India their function was as completely misunderstood as were the causes of the depression in Indian craftwork. The schools were not only expected to lead the industries which were living, but to revive those which were moribund, and resurrect those which were dead. In the report of the Indian Industrial Commission the need for some State-aided system of industrial and commercial organisation of the industrial arts with an expanded scheme of technical and artistic instruction for the craftsmen has been recognised. If, assistance and encouragement are given by the Imperial and Local Governments to the Indian craftsmen industrial art in India will quickly emerge from the cloud of depression, which has hung over it for a century past into the sunlight of prosperity.

Archæology.

The ancient monuments of India are as varied as they are numerous. Until a few years ago, the earliest known were the brick and stone erections of the Maurya period, a group of mounds at Lauriya Nandangarh, illustrative of the Vedic funeral customs and assignable roughly to the 7th or 8th century B.C., and some rough stone walls at the ancient city of Rajagriha of about the same period. The absence of structures of an earlier period was then supposed to be due to the fact that all previous architecture had been of wood and had completely perished. The recent excavations, however, at Mohenjo-daro, in Sind and at Harappa in the Punjab, have completely revolutionised ideas on this subject and proved that as far back as the 3rd or 4th millennium B.C. and probably much earlier still, India was in possession of a highly developed civilization with large and populous cities, well built houses, temples and public buildings of brick and many other amenities enjoyed at that period by the peoples of Mesopotamia and Egypt. Both at Mohenjo-daro and Harappa there are the remains of some 5 or 6 cities superimposed one upon the ruins of another.

The structures that have so far been exposed at Mohenjo-daro belong to the three latest cities on the site. Those of the third or earliest are the best in style; those of the first the poorest. Most of the structures are dwelling houses or shops, but there are others which appear to have been temples and one—of particularly massive proportions—is a large bath, surrounded by fenestrated galleries and halls. All were built of well burnt brick and most of them were of two or more storeys with staircases giving access to the upper rooms. In and around the ruins have been found many minor antiquities including gold and silver jewellery, engraved seals of stone and ivory and paste copper implements and vessels, terracotta figurines and toys, shell ornaments and potteries both painted and plain.

These discoveries establish the existence in Sind and the Punjab during the 4th and 3rd millennia B.C. of a highly developed city life; and the presence, in many of the houses, of wells and bathrooms as well as an elaborate drainage system betoken a social condition of the citizens at least equal to that found in Sumer and superior to that prevailing in contemporary Babylonia and Egypt. The inhabitants of these cities lived largely no doubt by agriculture and it is a point of interest that the specimens of wheat found at Mohenjo-daro resemble the common variety grown in the Punjab to-day. Besides bread, their food appears to have included beef, mutton, and pork, the flesh of tortoises, turtles and gharial, fresh fish from the Indus and dried fish from the sea coast. Among their domesticated animals were the humped Indian bull, the buffalo, a short horned bull, the sheep, pig, dog and elephant. Besides gold and silver they used copper, tin, bronze and lead; they were familiar with the arts of spinning and weaving and with the cultivation of cotton and had attained a high degree of proficiency in the jeweller's and potter's arts.

That they possessed a well developed system of writing is evidenced by the discovery of over a thousand tablets engraved with well-executed animal devices and pictographic legends in an unknown script. The method of disposal of the dead at Mohenjo-daro is uncertain but at Harappa two types of burial have been met with, namely, complete burials along with funerary pottery, and "pot burials." Only 27 of the latter have been examined and these were found to contain skulls and human bones and are seemingly fractional burials.

This Indus Valley culture has now been traced as far as Rupar in the Ambala District, relatively close to the watershed of the Sutlej and Jumna and it is therefore highly improbable that this civilization was confined to the Indus Valley and there can hardly be any reasonable doubt that future researches will trace it into the valley of the Ganges. Of the long period of more than 2,000 years that separates the pre-historic monuments referred to above from the historic period of India, little or nothing is yet known but there is every hope that this gap in our knowledge may be filled in by further excavations. From the time of the Mauryas, *i.e.*, 3rd century B.C., the history of architecture and the formative arts of India is clear and can be traced with relative precision.

Monumental Pillars.—The monuments which have come down to us from the Maurya period, include, besides the caves to be referred to below, the wooden palisade (4th century B.C.) which surrounded the ancient city of Pataliputra (modern Patna), and of which a large section has been exposed, the rock and pillar edicts of Asoka (*Circa* 250 B.C.), the remains of a large pillared hall constructed by the same emperor at Pataliputra, a number of brick stupas and a monolithic rail which originally surmounted an Asoka *stupa* at Sarnath near Benares. Altogether thirteen pillars of Asoka are known besides the Elephant capital of a 14th at Sankisa and a fragment of a 15th at Benares. Ten of them bear his inscriptions. Of these the Lauriya-Nandangarh column in the Champaran District, Tirhut, is practically uninjured. The capital of each column, like the shaft, was monolithic, and comprised three members, viz., a Persepolitan bell, abacus, and crowning sculpture in the round. By far the best capital of Asoka's time was that exhumed at Sarnath near Benares. The four lions standing back to back on the abacus are carved with extraordinary precision and accuracy, and originally supported a wheel symbolizing the law of piety preached by the Buddha. Several pieces of this wheel were found and are now preserved in the Archæological Museum at Sarnath. Of the post-Asokan period one pillar (B.C. 150) stands to the north-east of Besnagar in the Gwalior State, another in front of the cave of Karli (A.D. 70), and a third at Eran in Central Provinces belonging to the 5th Century A.D. All these are of stone; but there is one of iron also. It is near the Qutb Minar at Delhi, and an inscription on it speaks of its having been erected by a king called Chandra identified with Chandragupta II. (A.D. 375,

413) of the Gupta dynasty. It is wonderful "to find the Hindus at that age forging a bar of iron larger than any that have been forged even in Europe to a very late date, and not frequently even now." Pillars of later style are found all over the country, especially in the Madras Presidency. No less than twenty exist in the South Kanara District. A particularly elegant example faces a Jaina temple at Mudabidri, not far from Mangalore.

Topes.—*Stupas*, known as *dagabas* in Ceylon and commonly called Topes in North India, were constructed either for the safe custody of relics hidden in a chamber often near the base or to mark the scene of notable events in Buddhist or Jaina legends. Though we know that the ancient Jainas built *stupas*, no specimen of Jaina *stupas* is now extant. A notable structure of this kind which existed until recent times, was the Jaina *stupa* which stood on the Kankali Tila site at Muttra and yielded a large number of Jaina sculptures now deposited in the Provincial Museum at Lucknow. Of those belonging to the Buddhists, the great Tope of Sanchi in Bhopal is the most intact and entire of its class. It consists of a low circular drum supporting a hemispherical dome of less diameter. Round the drum is an open passage for circumambulation, and the whole is enclosed by a massive stone railing with lofty gates facing the cardinal points. The gates are essentially wooden in character, and are carved inside and out, with elaborate sculptures. The original *stupa*, which was of brick and not more than half the present dimensions, was apparently erected by Asoka at the same time as his lion-crowned pillar near the south gate, but as Sir John Marshall's recent explorations have conclusively shown, its outer casing of stone, the railing and the gateways were at least 150 and 200 years later, respectively. Other famous Buddhist *stupas* that have been found are those of Sarnath, Bharhut between Allahabad and Jubbulpore, Amravati in the Madras Presidency, and Piprahwa on the Nepalese frontier. The tope proper at Bharhut has entirely disappeared, having been utilised for building villages, and what remained of the rail has been removed to the Calcutta Museum. The bas-reliefs on this rail which contain short inscriptions and thus enable one to identify the scenes sculptured with the *Jatakas* or Birth Stories of the Buddha give it a unique value. The *stupa* at Amravati also no longer exists, and portions of its rail, which is unsurpassed in point of elaboration and artistic merit, are now in the British and Madras Museums. The *stupa* at Piprahwa was opened by Mr. W. C. Peppe in 1898, and a steatite or soap-stone reliquary with an inscription on it was unearthed. The inscription, according to many scholars, speaks of the relics being of the Buddha himself and enshrined by his kinsmen, the Sakyas. If this interpretation is correct, we have here one of the *stupas* that were erected over the ashes of Buddha immediately after his demise.

Caves.—Of the rock excavations which are one of the wonders of India, nine-tenths belong to Western India. The most important groups of caves are situated in Bhaja, Bedsa, Karli, Kanheri, Junnar, and Nasik in the Bombay Presidency, Ellora and Ajanta in Nizam's Dominions, Barabar and Nagarjuni 16 miles north of Gaya, and Udayagiri and Khandagir 20 miles from Cuttack in Orissa. The caves belong to the three principal sects into which ancient India was divided, *viz.*, the Buddhists, Hindus and Jainas. The earliest caves so far discovered are those of Barabar and Nagarjuni which were excavated by Asoka and his grandson Dasaratha, and dedicated to Ajivikas, a naked sect founded by Mankhali putta Gosala. The next earliest caves are those of Bhaja, Pitalkhora and cave No. 9 at Ajanta and No. 19 at Nasik. They have been assigned to 200 B.C. by Fergusson and Dr. Burgess. But there is good reason to suppose from Sir John Marshall's recent researches and from epigraphic considerations that they are considerably more modern. The Buddhist caves are of two types—the *chaityas* or chapel caves and *viharas* or monasteries for the residence of monks. The first are with vaulted roofs and horse-shoe shaped windows over the entrance and have interiors consisting of a nave and side aisles with a small *stupa* at the inner circular end. They are thus remarkably similar to Christian basilicas. The second class consist of a hall surrounded by a number of cells. In the later *viharas* there was a sanctum in the centre of the back wall containing a large image of Buddha. Hardly a *chaitya* is found without one or more *viharas* adjoining it. Of the Hindu cave temples that at Elephanta near Bombay is perhaps the most frequented. It is dedicated to Siva and is not earlier than the 7th century A.D. But by far the most renowned cave-temple of the Hindus is that known as Kailasa at Ellora. It is on the model of a complete structural temple but carved out of solid rock. It also is dedicated to Siva and was excavated by the Rashtrakuta king, Krishna I, (A. D. 768), who may still be seen in the paintings in the ceilings of the upper porch of the main shrine. Of the Jaina caves the earliest are at Khandagiri and Udayagiri; those of the mediæval type, in Indra Sabha at Ellora; and those of the latest period, at Ankai in Nasik. The ceilings of many of these caves were once adorned with fresco paintings. Perhaps, the best preserved among these are those at Ajanta, which were executed at various periods between 350-650 A.D. and have elicited high praise as works of art. Copies were first made by Major Gill, but most of them perished by fire at the Crystal Palace in 1866. The lost ones were again copied by John Griffiths of the Arts School, Bombay, half of whose work was similarly destroyed by a fire at South Kensington. They were last copied by Lady Herringham during 1909-11. Her pictures, which are in full scale, are at present exhibited at the Indian Section of the Victoria and Albert Museum, South Kensington, and have been reproduced in a volume brought out by the India Society. Another group of caves where equally interesting though less well preserved paintings exist is found at Bagh in Gwalior State. These caves form the subject of a monograph issued by the India Society.

Gandhara Monuments.—On the north-west frontier of India, anciently known as Gandhara, are found a class of remains, ruined monasteries and buried *stupas*, among which we notice for the first time representations of Buddha and the Buddhist pantheon. The free use of Corinthian capitals, friezes of nude Erotes bearing a long

garland, winged Atlantes without number, and a host of individual motifs clearly establish the influence of Hellenistic art. The mound at Peshawar, locally known as Shah-ji-ki-Dheri, which was explored in 1909, brought to light several interesting sculptures of this school together with a reliquary casket, the most remarkable bronze object of the Gandhara period. The inscription on the casket left no doubt as to the mound being the *stupa* raised over a portion of the body relics of Buddha by the Indo Scythian king Kanishka. They were presented by Lord Minto's Government to the Buddhists of Burma and are now enshrined at Mandalay. To about the same age belong the *stupas* at Manikyala in the Punjab opened by Ranjit Singh's French Generals, Ventura and Court, in 1830. Some of them contained coins of Kanishka.

Structural Temples.—Of this class the earliest examples are the Varaha temple at Deogarh, District Jhansi, another temple at Sanchi, the brick temples at Bhitargaon in the district of Cawnpore, and the temples at Tigowa, Nachna, Eran and Bhumara all of which belong to the Gupta period and a later one at Tigowa in the Central Provinces. In South India we have two more examples, *viz.*, Lad Khan and Durga temples at Aihole in Bijapur, the latter of which cannot be later than the eighth century A.D. The only common characteristic is flat roofs without spires of any kind. In other respects they are entirely different and already here we mark the beginning of the two styles, Indo-Aryan and Dravidian, whose differences become more and more pronounced from the 7th century onwards. In the Indo-Aryan style, the most prominent ones tend to the perpendicular, and in the Dravidian to the horizontal. The salient feature of the former again is the curvilinear steeple, and of the latter, the pyramidal tower. The most notable examples of the first kind are to be found among the temples of Bhubaneswar in Orissa, Khajuraho in Bundelkhand, Osia in Jodhpur, and Dilwara on Mount Abu. One of the best known groups in the Dravidian style is that of the Mamallapuram Raths, or 'Seven Pagodas,' on the seashore to the south of Madras. They are each hewn out of a block of granite, and are rather models of temples than *raths*. They are the earliest examples of typical Dravidian architecture, and belong to the 7th century. To the same age has to be assigned the temple of Kailasanath at Conjeeveram, and to the following century some of the temples at Aihole and Pattadkal of the Bijapur District, Bombay Presidency, and the monolithic temple of Kailasa at Ellora, referred to above. Of the later Dravidian style the great temple at Tanjore and the Srirangam temple near Trichinopoly are the best examples.

Intermediate between these two main styles comes the architecture of the Deccan, called Chalukyan by Fergusson. In this style the plan becomes polygonal and star-shaped instead of quadrangular; and the high-storeyed spire is converted into a low pyramid in which the horizontal treatment of the Dravidian is combined with the perpendicular of the Indo-Aryan. Some fine examples of this type exist at Dambal, Rattihali, Tilliwalli and Hangal in Dharwar, Bombay Presidency, and at Ittagi and Warangal in Nizam's Dominions. But it is in Mysore among the temples at Hallebid Belur, and Somnathpur that the style is found in its full perfection.

Inscriptions.—We now come to inscriptions, of which numbers have been brought to light in India. They have been engraved on varieties of materials, but principally on stone and copper. The earliest of these are found incised in two distinct kinds of alphabet, known as Brahmi and Kharoshthi, the latter being confined to the north-west of India. The Brahmi was read from left to right, and from it have been evolved all the modern vernacular scripts of India. The Kharoshthi was written from right to left, and was a modified form of the ancient Aramaic alphabet introduced into the Punjab during the period of the Persian domination in the 5th century B.C. It was prevalent up to the 4th century A.D., and was supplanted by the Brahmi. The earliest dateable inscriptions are the celebrated edicts of Asoka to which a reference has been made above. One group of these has been engraved on rocks, and another on pillars. They have been found from Shahbazgarhi 40 miles north-east of Peshawar to Nigliva in the Nepal Tarai, from Girnar in Kathiawar to Dhauli in Orissa, from Kalsi in the Lower Himalayas to Siddapur in Mysore, showing by the way the vast extent of territory held by him. The reference in his Rock Edicts to the five contemporary Greek Princes, Antiochus II. of Syria, Ptolemy Philadelphus, and so forth is exceedingly interesting, and fixes B.C. 269 as the date of his coronation. His Rummindei pillar inscription, again, discovered in Nepal Tarai, now settles, beyond all doubt, the birth-place of Buddha which was for long disputed. Another noteworthy record is the inscription of the Besnagar pillar. The pillar had been known for a long time, but Sir John Marshall was the first to notice the inscription on it. It records the erection of this column, which was a Garuda pillar, in honour of the god Vasudeva by one Heliodoros, son of Dion, who is described as an envoy of King Antialkidas of Taxila. Heliodoros is herein called a *Bhagavata*, which shows that though a Greek he had become a Hindu and presumably a Vaishnava. Another inscription worth noticing and especially in this connection is that of Cave No. 10 at Nasik. The donor of this cave, Ushavadata, who calls himself a Saka and was thus an Indo-Scythian, is therein spoken of as having granted three hundred thousand kine and sixteen villages to gods and Brahmans and as having annually fed one hundred thousand Brahmans. Here is another instance of a foreigner having embraced Hinduism. Thus for the political, social, economical and religious history of India at the different periods the inscriptions are invaluable records, and are the only light but for which we are 'forlorn and blind.'

Saracenic Architecture.—This begins in India with the 13th century after the permanent occupation of the Muhammadans. Their first mosques were constructed of the materials of Hindu and Jaina temples, and sometimes with comparatively slight alterations. The mosque called *Arhai-din-ka-jhompra* at Ajmer and that near the Qutb Minar are instances of this kind. The Muhammadan architecture of India varied at different periods and under the various dynasties, imperial and local. The

early Pathan architecture of Delhi was massive and at the same time was characterised by elaborate richness of ornamentation. The Qutb Minar and tombs of Altamsh and Ala-ud-din Khilji are typical examples. Of the Sharqi style we have three mosques in Jaunpur with several tombs. At Mandu in the Dhar State, a third form of Saracenic architecture sprang up, and we have here the Jami Masjid, Hoshang's tomb, Jahaz Mahal and Hindola Mahal as the most notable instances of the secular and ecclesiastical styles of the Malwa Pathans. The Muhammadans of Bengal again developed their own style, and Pandua, Malda, and Gaur teem with the ruins of the buildings of this type, the important of which are the Adina Masjid of Sikandar Shak, the Eklakhi mosque, Kadam Rasul Masjid, and so forth. The Bahmani dynasty of Gulbarga and Bidar were also great builders, and adorned their capitals with important buildings. The most striking of these is the great mosque of Gulbarga, which differs from all mosques in India in having the whole central area covered over so that what in others would be an open court is here roofed by sixty-three small domes. "Of the various forms which the Saracenic architecture assumed," says Fergusson, "that of Ahmedabad may probably be considered to be the most elegant." It is notable for its carved stone work; and the work of the perforated stone windows in Sidi Sayyid's mosque, the carved niches of the minars of many other mosques, the sculptured *Mihrabs* and domed and panelled roofs is so exquisite that it will rival anything of the sort executed elsewhere at any period. No other style is so essentially Hindu. In complete contrast with this was the form of architecture employed by the Adil Shahi dynasty of Bijapur. There is here relatively little trace of Hindu forms or details. The principal buildings now left at Bijapur are the Jami Masjid, Gagan Mahal, Mihtar Mahal, Ibrahim Rauza and mosque and the Gol Gumbaz. Like their predecessors, the Pathans of Delhi, the Moghuls were a great building race. Their style first began to evolve itself during the reign of Akbar in a combination of Hindu and Muhammadan features. Noteworthy among the emperor's buildings are the tomb of Humayun, and the palaces at Fatehpur Sikri and Agra. Of Jehangir's time his mosque at Lahore and the tomb of Itimad-ud-daula are the most typical structures. "The force and originality of the style gave way under Shah Jahan to a delicate elegance and refinement of detail." And it was during his reign that the most splendid of the Moghul tombs, the Taj Mahal at Agra, the tomb of his wife Mumtaz Mahal, was constructed. The Moti Masjid in Agra Fort is another surpassingly pure and elegant monument of his time.

Archæological Department.—As the archæological monuments of India must attract the attention of all intelligent visitors, they would naturally feel desirous to know something of the Archæological Department. The work of this Department is primarily two-fold, conservation, and research and exploration. None but spasmodic efforts appear to have been made by Government in these directions till 1870 when they established the Archæological Survey of India and entrusted it to General (afterwards Sir) Alexander Cunningham, who was also the first Director-General of Archæology. The next advance was the initiation of the local Surveys in Bombay and Madras three years after. The work of these Surveys, however, was restricted to antiquarian research and description of monuments, and the task of conserving old buildings was left to the fitful efforts of the local Governments, often without expert guidance or control. It was only in 1878 that the Government of India under Lord Lytton awoke to this deplorable condition, and sanctioned a sum of 3½ lakhs to the repair of monuments in United Provinces, and soon after appointed a conservator, Major Cole, who did useful work for three years. Then a reaction set in, and his post and that of the Director-General were abolished. The first systematic step towards recognising official responsibility in conservation matters was taken by Lord Curzon's Government, who established seven of the eight Archæological Circles that now obtain, placed them on a permanent footing and united them together under the control of a Director-General, provision being also made for subsidising local Governments out of imperial funds, when necessary. The Ancient Monuments Preservation Act was passed for the protection of historic monuments and relics especially in private possession and also for State control over the excavation of ancient sites and traffic in antiquities. Under the direction of Sir John Marshall, Kt., C.I.E., late Director-General of Archæology, a comprehensive and systematic campaign of repair and excavation has been prosecuted, and the result of it is manifest in the present altered conditions of many old and historic buildings and in the scientific excavation of buried sites such as Taxila, Pataliputra, Sanchi in the Bhopal State, Sarnath near Benares, Nalanda in Bihar, Pharapur in Bengal and Nagarjunikonda in Madras and in the Indus Valley at Harappa in the Punjab and Mohenjo-daro in Sind. Of all these works those of most general interest are the Mohenjo-daro excavations, for here the Archæological Department have unearthed remains of prehistoric cities dating back to 3000 B.C. and further. The Archæological Survey has devoted considerable attention to the organization and development of museums as centres of research and education. It maintains the archæological section of the Indian Museum at Calcutta, small museums at the Taj, and at the Forts at Agra, Delhi and Lahore, the Central Asian Antiquities Museum at New Delhi and has erected local museums at the excavated sites of Taxila, Sarnath, Nalanda, Mohanjo-daro and Harappa with the object of keeping the small movable antiquities recovered at these sites in close association with the structural remains to which they belong, so that they may be studied amid their natural surroundings and not lose focus and meaning by being transported to some distant place.

The epigraphical material dealt with by the Archæological Survey has enabled the history and chronology of the various dynasties of India to be established on a firmer basis and in greater detail. The "Epigraphia Indica" is now in the 21st volume, a revised edition of the Asoka inscriptions has been recently published while the companion volume of post Asokan Brahmi inscriptions is under preparation. A volume of non-Asokan Kharoshthi inscriptions was published two years ago.

Indian Time.

For many years Indian time was in a state of chaotic confusion. What was called Madras or Railway time was kept on all the railways: and each great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed to the Local Governments, and through them to all local bodies, a long letter which reviewed the situation and made suggestions for the future. The essential points in this letter are indicated below:

"In India we have already a standard time, which is very generally, though by no means universally, recognised. It is the Madras local time, which is kept on all railway and telegraph lines throughout India and which is 5h. 21m. 10s. in advance of Greenwich. Similarly, Rangoon local time is used upon the railways and telegraphs of Burma, and is 6h. 24m. 47s. ahead of Greenwich. But neither of these standards bears a simple and easily remembered relation to Greenwich time.

"The Government of India have several times been addressed by Scientific Societies, both in India and in England, and urged to fall into line with the rest of the civilised world. And now the Royal Society has once more returned to the attack. The Committee of that Society which advises the Government of India upon matters connected with its observatories, writes:—'The Committee think that a change from Madras time to that corresponding to a longitude exactly 5½ hours east of Greenwich would be an improvement upon the existing arrangements; but that for international scientific purposes the hourly zone system, making the time 5 hours in advance of Greenwich in the west, and 6 hours in advance in the east of India would be preferable.'

"Now if India were connected with Europe by a continuous series of civilised nations with their continuous railway systems all of which had adopted the European hour-zone system, it would be imperative upon India to conform and to adopt the second suggestion. But as she is not, and as she is as much isolated by uncivilised States as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated colonies and to adopt the first suggestion.

"It is believed that this will be the better solution. There are obvious objections to drawing an arbitrary line right across the richest and most populous portions of India, and so as to bisect all the main lines of communication, and keeping times differing by an hour on opposite sides of that line. India has become accustomed to a uniform standard in the Madras time of the railways; and the substitution for it of a double standard would appear to be a retrograde step; while it would, in all probability, be strongly opposed by the railway authorities. Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike; and it is certain that the double standard would puzzle the latter greatly; while by emphasising the fact that railway differed from local time, it might postpone or even altogether prevent the acceptance of the former instead of the latter by people generally over a large part of India. The one great advantage which the second possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour: whereas under the latter it will even exceed an hour in the extreme cases of Karachi and Quetta. But this inconvenience is believed to be smaller than that of keeping two different times on the Indian system of railways and telegraphs.

"It is proposed, therefore, to put on all the railway and telegraph clocks in India by 8m. 50s. They would then represent a time 5½ hours faster than that of Greenwich, which would be known as **Indian Standard Time**: and the difference between standard and local time at the places mentioned below would be approximately as follows, the figures representing minutes, and F. and S. meaning that the standard time is in advance of or behind local time respectively:—Dibrugarh 51 S., Shillong 38 S., Calcutta 24 S., Allahabad 2 F., Madras 9 F., Lahore 33 F., Bombay 39 F., Peshawar 44 F., Karachi 62 F., Quetta 62 F.

"This standard time would be as much as 54 and 55 minutes behind local time at Mandalay and Rangoon, respectively; and since the railway system of Burma is not connected with that of India, and already keeps a time of its own, namely, Rangoon local time, it is not suggested that Indian Standard Time should be adopted in Burma. It is proposed, however, that instead of using Rangoon Standard Time as at present, which is 6h. 24m. 47s. in advance of Greenwich, a Burma Standard Time should be adopted on all the Burmese railways and telegraphs, which would be one hour in advance of Indian Standard Time, or 6½ hours ahead of Greenwich time, and would correspond with 97° 30′ E. longitude. The change would bring Burma time into simple relation both with European and with Indian time, and would (among other things) simplify telegraphic communication with other countries.

"Standard time will thus have been fixed for railways and telegraphs for the whole of the Indian Empire. Its general adoption for all purposes, while eminently advisable, is a matter which must be left to the local community in each case."

It is difficult to recall, without a sense of bewilderment, the reception of this proposal by various local bodies. To read now the fears that were entertained if Standard Time was adopted is a study in the possibilities of human

error. The Government scheme left local bodies to decide whether or not they would adopt it. Calcutta decided to retain its own local time, and to-day Calcutta time is still twenty-four minutes in advance of Standard Time. In Bombay the first reception of the proposal was hostile; but on reconsideration the Chamber of Commerce decided in favour of it and so did the Municipality. Subsequently the opposing element in the Municipality brought in a side resolution, by which the Municipal clocks were put at Bombay time which is thirty-nine minutes behind Standard Time. On the 1st January 1906 all the railway and telegraph clocks in India were put at Indian Standard Time; in Burma the Burma Standard Time became universal. Calcutta retains its former Calcutta time; but in Bombay local time is retained only in the clocks which are maintained by the Municipality and in the establishments of some orthodox Hindus. Elsewhere Standard Time is universal.

TIDAL CONSTANTS.

The approximate standard time of High Water may be found by adding to, or subtracting from, the time of High Water at London Bridge, given in the calendar, the corrections given as below:—

PROVING OF WILLS.

In British India if a person has been appointed executor of the will of a deceased person, it is always advisable to prove the will as early as possible. If the will is in a vernacular it has to be officially translated into English. A petition is then prepared praying for the grant of probate of the will. All the property left by the deceased has to be disclosed in a schedule to be annexed to the petition. The values of immovable properties are usually assessed at 16⅔ years purchase on the nett Municipal assessment. For estate under Rs. 1,000 no probate duty is payable; up to Rs. 9,000 in excess of first Rs. 1,000 the duty is at 2%, between Rs. 10,000 and Rs. 50,000 the duty payable is at 3 % and between Rs. 50,000 and 1,00,000 the duty payable is at 4% and over Rs. 1,00,000 the duty payable is @ 5%. In determining the amount of the value of the estate for the purposes of probate duty the following items are allowed to be deducted:

1. Debts left by the deceased including mortgage encumbrances.
2. The amount of funeral expenses.
3. Property held by the deceased in trust and not beneficially or with general power to confer a beneficial interest.

The particulars of all these items have to be stated in a separate schedule. It is the practice of the High Court to send a copy of these schedules to the Revenue authorities and if the properties particularly immovable properties have not been properly valued, the Revenue department require the petition to be amended accordingly. In certain cases the Court then requires citations to be published and served on such persons as the Court thinks are interested in the question of the grant of probate. If no objection is lodged by any person so interested within 14 days after the publication or service of citation and if the will is shown to have been properly executed and the petitioner entitled to probate, probate is ordered to be granted.

Coinage, Weights and Measures.

As the currency of India is based upon the rupee, statements with regard to money are generally expressed in rupees, nor has it been found possible in all cases to add a conversion into sterling. Down to about 1873 the gold value of the rupee (containing 165 grains of pure silver) was approximately equal to 2s., or one-tenth of a £, and for that period it is easy to convert rupees into sterling by striking off the final cipher (Rs. 1,000=£100). But after 1873, owing to the depreciation of silver as compared with gold throughout the world, there came a serious and progressive fall in the exchange, until at one time the gold value of the rupee dropped as low as 1s. In order to provide a remedy for the heavy loss caused to the Government of India in respect of its gold payments to be made in England, and also to relieve foreign trade and finance from the inconvenience due to constant and unforeseen fluctuations in exchange, it was resolved in 1893 to close the mints to the free coinage of silver, and thus force up the value of the rupee by restricting the circulation. The intention was to raise the exchange value of the rupee to 1s. 4d., and then introduce a gold standard at the rate of Rs. 15=£1. From 1899 onwards the value of the rupee was maintained, with insignificant fluctuations, at the proposed rate of 1s. 4d. until February 1920 when the recommendation of the Committee appointed in the previous year that the rupee should be linked with gold and not with sterling at 2s. instead of 1s. 4d. was adopted. This was followed by great fluctuations. (See article on Currency System).

Notation.—Another matter in connection with the expression of money statements in terms of rupees requires to be explained. The method of numerical notation in India differs from that which prevails throughout Europe. Large numbers are not punctuated in hundreds of thousands and millions, but in lakhs and crores. A **lakh** is one hundred thousand (written out as 1,00,000), and a **crore** is one hundred lakhs or ten millions (written out as 1,00,00,000). Consequently, according to the exchange value of the rupee, a lakh of rupees (Rs. 1,00,000) may be read as the equivalent of £10,000 before 1873, and as the equivalent of (about) £6,667 after 1899, while a crore of rupees (Rs. 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 1873, and as the equivalent of (about) £666,667 after 1899. With the rupee at 1s. 6d. a lakh is equivalent to £7,500 and a crore is equivalent to £750,000.

Coinage.—Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both Indians and Europeans. The anna was formerly reckoned as 1½d., it may now be considered as exactly corresponding to 1d. The anna is again sub-divided into 12 pies.

Weights.—The various systems of weights used in India combine uniformity of scale with immense variations in the weight of units. The scale used generally throughout Northern India, and less commonly in Madras and Bombay, may be thus expressed one maund = 40 seers, one seer=16 chittaks or 80 tolas. The actual weight of a seer varies greatly from district to district, and even from village to village, but in the standard system the tola is 180 grains Troy (the exact weight of the rupee), and the seer thus weighs 2·057 lb., and the maund 82·28 lb. The standard is used in official reports.

Retail.—For calculating retail prices, the universal custom in India is to express them in terms of seers to the rupee. Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quantity to be obtained for the same amount of money. In other words, prices in India are quantity prices, not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight perplexing to an English reader. It may, however, be mentioned that quantity prices are not altogether unknown in England, especially at small shops, where pennyworths of many groceries can be bought. Eggs, likewise, are commonly sold at a varying number for the shilling. If it be desired to convert quantity prices from Indian into English denominations without having recourse to money prices (which would often be misleading), the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb., and that the value of the rupee remains constant at 1s. 4d., 1 seer per rupee=(about) 3 lb. for 2s., 2 seers per rupee=(about) 6 lb. for 2s., and so on.

The name of the unit for square measurement in India generally is the *bigha*, which varies greatly in different parts of the country But areas have been expressed in this work either in square miles or in acres.

Proposed Reforms.—Indian weights and measures have never been settled upon an organised basis suitable for commerce and trade characteristic of the modern age. They vary from town to town and village to village in a way that could only work satisfactorily so long as the dealings of towns and villages were self-contained and before roads and railways opened up trade between one and the other. It is pointed out that in England a hogshead of wine contains 63 gallons and a hogshead of beer only 54 gallons; that a bushel of corn weighs 46 lbs. in Sunderland and 240 lbs. in Cornwall; that the English stone weight represents 14 lbs. in popular estimation, but only 5 lbs., if we are weighing glass, and eight for meat, but 6 lbs. for cheese. Similar instances are multiplied in India by at least as many times as India is bigger than England. If we take, for instance, the maund denomination of weight common all over India, we shall find that in a given city there are nearly as many maunds as there are articles to weigh. If we consider the maund as between district and district the state of affairs is worse. Thus in the United Provinces alone, the maund of sugar weighs 48½ seers in

Cawnpore, 40 in Muttra, 72½ in Gorakhpur, 40 in Agra, 50 in Moradabad, 43¾ in Saharanpur, 50 in Bareilly, 46 in Fyzabad, 48¼ in Shahjehanpur, 51 in Goshangunze. The maund varies throughout all India from the Bengal or railway maund of 82-2/7 lbs. to the Factory maund of 74 lbs. 10 oz. 11 drs., the Bombay maund of 28 lbs., which apparently answers to the Forest Department maund in use at the Fuel Depot, and the Madras maund, which some authorities estimate at 25 lbs. and others at 24 lbs. and so on.

Committees of Inquiry.—These are merely typical instances which are multiplied indefinitely. There are variations of every detail of weights and measures in every part of India. The losses to trade arising from the confusion and the trouble which this state of things causes are heavy. Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform. The Supreme and Provincial Governments have made various attempts during 40 years past to solve the problem of universal units of weights and measures and commerce and trade have agitated about the question for the past century. The Indian railways and Government departments adopted a standard tola (180 grains), seer (80 tolas) and maund (40 seers) and it was hoped that this would act as a successful "lead" which would gradually be followed by trade throughout the empire, but the expectation has not been realised.

The Government of India considered the whole question in consultation with the provincial Governments in 1890-1894 and various special steps have at different times been taken in different parts of India. The Government of Bombay appointed a committee in 1911 to make proposals for reform for the Bombay Presidency. Their final report has not been published, but they presented in 1912 an *ad interim* report which has been issued for public discussion. In brief, it points out the practical impossibility of proceeding by compulsory measures affecting the whole of India. The Committee stated that over the greater part of the Bombay Presidency a standard of weights and measures would be heartily welcome by the people. They thought that legislation compulsorily applied over large areas subject to many diverse conditions of trade and social life would not result in bringing about the desired reform so successfully as a "lead" supplied by local legislation based on practical experience. The want of coherence, *savoir faire*, or the means of co-operation among the people at large pointed to this conclusion. The Committee pointed out that a good example of the results that will follow a good lead is apparent in the East Khandesh District of the Presidency, where the District Officer, Mr. Simcox, gradually, during the course of three years, induced the people to adopt throughout the district uniform weights and measures, the unit of weight in this case being a tola of 180 grains. But the committee abstained from recommending that the same weights and measures should be adopted over the whole Presidency, preferring that a new system started in any area should be as nearly as possible similar to the best system already prevailing there.

Committee of 1913.—The whole problem was again brought under special consideration by the Government of India in October, 1913, when the following committee was appointed to inquire into the entire subject anew:—

Mr. C. A. Silberrard (*President*).
Mr. A. Y. G. Campbell.
Mr. Rustomji Fardoonji.

This Committee reported, in August 1915, in favour of a uniform system of weights to be adopted in India based on the 180 grain tola. The report says:—Of all such systems there is no doubt that the most widespread and best known is that known as the Bengal or Indian Railway weights. The introduction of this system involves a more or less considerable change of system in parts of the United Provinces (Gorakhpur, Bareilly and neighbouring areas), practically the whole of Madras, parts of the Punjab (rural portions of Amritsar and neighbouring districts), of Bombay (South Bombay, Bombay city and Gujarat), and the North-West Frontier Province. Burma has at present a separate system of its own which the committee think it should be permitted to retain. The systems recommended are:—

FOR INDIA.

8 khaskhas	= 1 chawal
8 chawals	= 1 ratti
8 rattis	= 1 masha
12 mashes or 4 tanks	= 1 tola
5 tolas	= 1 chatak
16 chataks	= 1 seer
40 seers	= 1 maund

FOR BURMA.

2 small ywes	= 1 large ywe
4 large ywes	= 1 pe
2 pes	= 1 mu
5 pes or 2½ mus	= 1 mat
1 mat	= 1 ngamu
2 ngamus	= 1 tikal [viss.
100 tikals	= 1 peiktha or

The tola is the tola of 180 grains, equal to the rupee weight. The viss has recently been fixed at 3·60 lbs. or 140 tolas.

Government Action.—The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they again, for the present and subject to the restrictions imposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think advisable to standardise dry and liquid measures of capacity within their provinces. Similarly, they announced their decision not to adopt all-India standards of length or area.

As regards weights they decided in favour of the standard mentioned under the heading "Weights", near the commencement of this article, this having been recommended by a majority of the Weights and Measures Committee and having received the unanimous support of the Local Governments. At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that "if subsequently, opinion develops strongly in favour of the Imperial standardisation of weights, the Government of India will be prepared to undertake such legislation, but at present they consider that any such step would be premature.

The History of India in Outline.

No history of India can be proportionate and the briefest summary must suffer from the same defect. Even a wholesale acceptance as history of mythology, tradition, and folklore will not make good, though it makes picturesque; the many gaps that exist in the early history of India: and, though the labours of modern geographers and archæologists have been amazingly fruitful, it cannot be expected that these gaps will ever be filled to any appreciable extent. Approximate accuracy in chronology and an outline of dynastic facts are all that the student can look for up to the time of Alexander, though the briefest excursion into the by-ways of history will reveal to him many alluring and mysterious fields for speculation. There are, for example, to this day castes that believe they sprang originally from the loins of a being who landed "from an impossible boat on the shores of a highly improbable sea"; and the great epic poems contain plentiful statements equally difficult of reconciliation with modern notions of history as a science. But from the Jataka stories and the Puranas, much valuable information is to be obtained, and, for the benefit of those unable to go to these and other original sources, it has been distilled by a number of writers.

The orthodox Hindu begins the political history of India more than 3,000 years before Christ, with the war waged on the banks of the Jumna between the sons of Kuru and the sons of Pandu. Recent excavations by the Archæological Department in the Indus Valley at Harappa in the Punjab, but more particularly at Mohenjc Daro in Sind, carry us back even further. They have uncovered sites of cities bearing the marks and containing the relics of a high civilisation stated by the Department to be Sumerian. The excavations are proceeding under special direction and have excited the greatest interest in scientific circles throughout the world, but the general critic omits several of those remote centuries and takes 600 B.C., or thereabouts as his starting point. At that time much of the country was covered with forest, but the Aryan races, who had entered India from the north, had established in parts a form of civilization far superior to that of the aboriginal savages and to this day there survive cities, like Benares, founded by those invaders. In like manner the Dravidian invaders from an unknown land, who overran the Deccan and the Southern part of the Peninsula, crushed the aborigines, and at a much later period, were themselves subdued by the Aryans. Of these two civilizing forces, the Aryan is the better known, and of the Aryan kingdoms the first of which there is authentic record is that of Magadha, or Bihar, on the Ganges. It was in, or near, this powerful kingdom that Jainism and Buddhism had their origin, and the fifth King of Magadha, Bimbisara by name, was the friend and patron of Gautama Buddha. The King mentioned was a contemporary of Darius, autocrat of Persia (521 to 485 B.C.) who annexed the Indus valley and formed from his conquest an Indian satrapy which paid as tribute the equivalent of about one million sterling. Detailed history, however, does not become possible until the invasion of Alexander in 326 B.C.

Alexander the Great.

That great soldier had crossed the Hindu Kush in the previous year and had captured Aornos, on the Upper Indus. In the spring of 326 he crossed the river at Ohind, received the submission of the King of Taxila, and marched against Porus who ruled the fertile country between the rivers Hydaspes (Jhelum) and Akesines (Chenab). The Macedonian carried all before him, defeating Porus at the battle of the Hydaspes, and crossing the Chenab and Ravi. But at the River Hyphasis (Bias) his weary troops mutinied, and Alexander was forced to turn back and retire to the Jhelum where a fleet to sail down the rivers to the sea was nearly ready. The wonderful story of Alexander's march through Mekran and Persia to Babylon, and of the voyage of Nearchus up the Persian Gulf is the climax to the narrative of the invasion but is not part of the history of India. Alexander had stayed nineteen months in India and left behind him officers to carry on the Government of the kingdoms he had conquered: but his death at Babylon, in 323, destroyed the fruits of what has to be regarded as nothing but a brilliant raid, and within two years his successors were obliged to leave the Indian provinces, heavily scarred by war but not hellenized.

The leader of the revolt against Alexander's generals was a young Hindu, Chandragupta, who was an illegitimate member of the Royal Family of Magadha. He dethroned the ruler of that kingdom, and became so powerful that he is said to have been able to place 600,000 troops in the field against Seleucus, to whom Babylon had passed on the death of Alexander. This was too formidable an opposition to be faced, and a treaty of peace was concluded between the Syrian and Indian monarchs which left the latter the first paramount Sovereign of India (321 B.C.) with his capital at Pataliputra, the modern Patna and Bankipore. Of Chandragupta's court and administration a very full account is preserved in the fragments that remain of the history compiled by Megasthenes, the ambassador sent to India by Seleucus. His memorable reign ended in 297 B.C. when he was succeeded by his son Bindusara, who in his turn was succeeded by Asoka (269—231 B.C.) who recorded the events of his reign in numerous inscriptions. This king, in an unusually bloody war, added to his dominions the kingdom of Kalinga (the Northern Circars) and then becoming a convert to Buddhism, resolved for the future to abstain from conquest by force of arms. The consequences of the conversion of Asoka were amazing. He was not intolerant of other religions, and did not endeavour to force his creed on his "children". But he initiated measures for the propagation of his doctrine with the result that "Buddhism" which had hitherto been a merely local sect in the valley of the Ganges, was transformed into one of the greatest religions of the world—the greatest, probably, it measured by the number of adherents. This is Asoka's claim to be remembered; this it is which makes his reign an epoch, not only in the history of India, but

in that of the world." The wording of his edicts reveal him as a great king as well as a great missionary, and it is to be hoped that the excavations now being carried on in the ruins of his palace may throw yet more light on his character and times. On his death the Maurya kingdom fell to pieces. Even during his reign there had been signs of new forces at work on the borderland of India; where the independent kingdoms of Bactria and Parthia had been formed, and subsequent to it there were frequent Greek raids into India. The Greeks in Bactria, however, could not withstand the overwhelming force of the westward migration of the Yueh-chi horde, which, in the first century A.D., also ousted the Indo-Parthian kings from Afghanistan and North-Western India.

The first of these Yueh-chi kings to annex a part of India was Kadphises II (A.D. 85—125), who had been defeated in a war with China, but crossed the Indus and consolidated his power eastward as far as Benares. His son Kanishka (whose date is much disputed) left a name which to Buddhists stands second only to that of Asoka. He greatly extended the boundaries of his empire in the North, and made Peshawar his capital. Under him the power of the Kushan clan of the Yueh-chi reached its zenith and did not begin to decay until the end of the second century, concurrently with the rise in middle India of the Andhra dynasty which constructed the Amaravati stupa, "one of the most elaborate and precious monuments of piety ever raised by man."

The Gupta Dynasty.

Early in the fourth century there arose, at Pataliputra, the Gupta dynasty which proved of great importance. Its founder was a local chief, his son Samudragupta, who ruled for some fifty years from A.D. 326, was a king of the greatest distinction. His aim of subduing all India was not indeed fulfilled but he was able to exact tribute from the kingdoms of the South and even from Ceylon, and, in addition to being a warrior, he was a patron of the arts and of Sanskrit literature. The rule of his son, Chandragupta, was equally distinguished and is commemorated in an inscription on the famous iron pillar near Delhi, as well as in the writings of the Chinese pilgrim Fa-hien who pays a great tribute to the equitable administration of the country. It was not until the middle of the fifth century that the fortunes of the Gupta dynasty began to wane—in face of the onset of the White Huns from Central Asia—and by 480 the dynasty had disappeared. The following century all over India was one of great confusion, apparently marked only by the rise and fall of petty kingdoms, until a monarch arose, in A. D. 606, capable of consolidating an Empire. This was the Emperor Harsha who, from Thanasar near Ambala, conquered Northern India and extended his territory South to the Nerbudda. Imitating Asoka in many ways, this Emperor yet "felt no embarrassment in paying adoration in turn to Siva, the Sun, and Buddha at a great public ceremonial." Of his times a graphic picture has been handed down in the work of a Chinese "Master of the Law," Hiuen Tsiang by name. Harsha was the last native paramount sovereign of Northern India; on his death in 648 his throne was usurped by a Minister, whose treacherous conduct towards an embassy from China was quickly avenged and the kingdom so laboriously established lapsed into a state of internecine strife which lasted for a century and a half.

The Andhras and Rajputs.

In the meantime in Southern India the Andhras had attained to great prosperity and carried on a considerable trade with Greece, Egypt and Rome, as well as with the East. Their domination ended in the fifth century A.D. and a number of new dynasties, of which the Pallavas were the most important, began to appear. The Pallavas made way in turn for the Chalukyas, who for two centuries remained the most important Deccan dynasty, one branch uniting with the Cholas. But the fortunes of the Southern dynasties are so involved, and in many cases so little known, that to recount them briefly is impossible. Few names of note stand out from the record except those of Vikramaditya (11th century) and a few of the later Hindu rulers who made a stand against the growing power of Islam; of the rise of which an account is given below. In fact the history of mediæval India is singularly devoid of unity. Northern India was in a state of chaos from about 650 to 950 A.D. not unlike that which prevailed in Europe of that time, and materials for the history of these centuries are very scanty. In the absence of any powerful rulers the jungle began to gain back what had been wrested from it: ancient capitals fell into ruins from which in some cases they have not even yet been disturbed, and the aborigines and various foreign tribes began to assert themselves so successfully that the Aryan element was chiefly confined to the Doab and the Eastern Punjab. It is not therefore so much for the political as for the religious and social history of this anarchical period that one must look. And the greatest event—if a slow process may be called an event—of the middle ages was the transition from tribe to caste, the final disappearance of the old four-fold division of Brahmans; Kshattriyas, Vaisyas, and Sudras, and the formation of the new division of pure and impure largely resting upon a classification of occupations. But this social change was only a part of the development of the Hindu religion into a form which would include in its embrace the many barbarians and foreigners in the country who were outside it. The great political event of the period was the rise of the Rajputs as warriors in the place of the Kshattriyas. Their origin is obscure but they appeared in the 8th century and spread, from their two original homes in Rajputana and Oudh, into the Punjab, Kashmir, and the Central Himalayas, assimilating a number of fighting clans and binding them together with a common code. At this time Kashmir was a small kingdom which exercised an influence on India wholly disproportionate to its size. The only other kingdom of importance was that of Kanauj—in the Doab and Southern Oudh—which still retained some of the power to which it had reached in the days of Harsha, and of which the renown extended to China and Arabia.

With the end of the period of anarchy, the political history of India centres round the Rajputs. One clan founded the kingdom of Gujarat, another held Malwa, another (the Chauhans) founded a kingdom of which Ajmer was the capital, and so on. Kanauj fell into the hands of the Rathors (circ 1040 A.D.) and the dynasty then founded by that branch of the Gaharwars of Benares became one of the most famous in India. Later in the same century the Chauhans were united, and by 1163 one of them could boast that he had conquered all the country from the Vindhyas to the Himalayas, including Delhi already a fortress a hundred years old. The son of this conqueror was Prithwi Raj, the champion of the Hindus against the Mahomedans. With his death in battle (1192) ends the golden age of the new civilization that had been evolved out of chaos; and of the greatness of that age there is a splendid memorial in the temples and forts of the Rajput states and in the two great philosophical systems of Sankaracharya (ninth century) and Ramanuja (twelfth century). The triumph of Hinduism had been achieved, it must be added, at the expense of Buddhism, which survived only in Magadha at the time of the Mahomedan conquest and speedily disappeared there before the new faith.

Mahomedan India.

The wave of Mahomedan invaders that eventually swept over the country first touched India, in Sind, less than a hundred years after the death of the Prophet in 632. But the first real contact was in the tenth century when a Turkish slave of a Persian ruler founded a kingdom at Ghazni, between Kabul and Kandahar. A descendant of his, Mahmud (967-1030) made repeated raids into the heart of India, capturing places so far apart as Multan, Kanauj, Gwalior, and Somnath in Kathiawar, but permanently occupying only a part of the Punjab. Enduring Mahomedan rule was not established until the end of the twelfth century, by which time, from the little territory of Ghor, there had arisen one Mahomed Ghori capable of carving out a kingdom stretching from Peshawar to the Bay of Bengal. Prithwi Raj, the Chauhan ruler of Delhi and Ajmer, made a brave stand against, and once defeated, one of the armies of this ruler, but was himself defeated in the following year. Mahomed Ghori was murdered at Lahore (1206) and his vast kingdom, which had been governed by satraps, was split up into what were practically independent sovereignties. Of these satraps, Qutb-ud-din, the slave ruler of Delhi and Lahore, was the most famous, and is remembered by the great mosque he built near the modern Delhi. Between his rule and that of the Mughals, which began in 1526, only a few of the many Kings who governed and fought and built beautiful buildings, stand out with distinction. One of these was Ala-ud-din (1296-1316), whose many expeditions to the south much weakened the Hindu Kings, and who proved himself to be a capable administrator. Another was Firoz Shah, of the house of Tughlaq, whose administration was in many respects admirable, but which ended, on his abdication, in confusion. In the reign of his successor, Mahmud (1398-1413), the kingdom of Delhi went to pieces and India was for seven months at the mercy of the Turkish conqueror Taimur. It was the end of the fifteenth century before the kingdom, under Sikandar Lodi, began to recover. His son, Ibrahim, still further extended the kingdom that had been recreated, but was defeated by Babar, King of Kabul, at Panipat, near Delhi, in 1526, and there was then established in India the Mughal dynasty.

The Mahomedan dynasties that had ruled in capital other than Delhi up to this date were of comparative unimportance, though some great men appeared among them. In Gujarat, for example, Ahmad Shah, the founder of Ahmedabad, showed himself a good ruler and builder as well as a good soldier, though his grandson, Mahmud Shah Begara, was a greater ruler—acquiring fame at sea as well as on land. In the South various kings of the Bahmani dynasty made names for themselves especially in the long wars they waged on the new Hindu kingdom that had arisen which had its capital at Vijayanagar. Of importance also was Adil Khan, a Turk, who founded (1490) the Bijapur dynasty of Adil Shahis. It was one of his successors who crushed the Vijayanagar dynasty, and built the great mosque for which Bijapur is famous.

The Mughal Empire.

As one draws near to modern times it becomes impossible to present anything like a coherent and consecutive account of the growth of India as a whole. Detached threads in the story have to be picked up one by one and followed to their ending, and although the sixteenth century saw the first European settlements in India, it will be convenient here to continue the narrative of Mahomedan India almost to the end of the Mughal Empire. How Babar gained Delhi has already been told. His son, Humayun, greatly extended his kingdom, but was eventually defeated (1540) and driven into exile by Sher Khan, an Afghan of great capabilities, whose short reign ended in 1545. The Sur dynasty thus founded by Sher Khan lasted another ten years when Humayun having snatched Kabul from one of his brothers, was strong enough to win back part of his old kingdom. When Humayun died (1556) his eldest son, Akbar, was only 13 years old and was confronted by many rivals. Nor was Akbar well served, but his career of conquest was almost uninterrupted and by 1594 the whole of India North of the Nerbudda had bowed to his authority and he subsequently entered the Deccan and captured Ahmednagar. This great ruler, who was as remarkable for his religious tolerance as for his military prowess, died in 1605, leaving behind him a record that has been surpassed by few. His son, Jehangir, who married the Persian lady Nur Jahan; ruled until 1627, bequeathing to an admiring posterity some notable buildings—the tomb of his father at Sikandra, part of the palace of Agra, and the palace and fortress of Lahore. His son, Shahjahan, was for many years occupied with wars in the Deccan, but found time to make his court of incredible magnificence and to build the most famous and beautiful of all tombs, the Taj Mahal, as well as the fort, palace and Juma Masjid at Delhi. The quarrels of his sons led to the deposition of

Shahjahan by one of them, Aurangzeb, in 1658. This Emperor's rule was one of constant intrigue and fighting in every direction, the most important of his wars being a twenty-five years' struggle against the Marathas of the Deccan who, under the leadership of Shivaji, became a very powerful faction in Indian politics. His bigoted attitude towards Hinduism made Aurangzeb all the more anxious to establish his Empire on a firm basis in the south, but he was unable to hold his many conquests, and on his death (1707) the Empire; for which his three sons were fighting could not be held together. Internal disorder and Maratha encroachments continued during the reigns of his successors, and in 1739 a fresh danger appeared in the person of Nadir Shah, the Persian conqueror, who carried all before him. On his withdrawal, leaving Mahomed Shah on the throne, the old intrigues recommenced and the Marathas began to make the most of the opportunity offered to them by puppet rulers at Delhi and by almost universal discord throughout what had been the Mughal Empire. There is little to add to the history of Mahomedan India. Emperors continued to reign in name at Delhi up to the middle of the 19th century, but their territory and power had long since disappeared, being swallowed up either by the Marathas or by the British.

European Settlements.

The voyage of Vasco da Gama to India in 1498 was what turned the thoughts of the Portuguese to the formation of a great Empire in the East. That idea was soon realized, for from 1500 onwards, constant expeditions were sent to India and the first two Viceroys in India—Almeida and Albuquerque—laid the foundations of a great Empire and of a great trade monopoly. Goa, taken in 1510, became the capital of Portuguese India and remains to this day in the hands of its captors, and the countless ruins of churches and forts on the shores of Western India, as also farther East at Malacca, testify to the zeal with which the Portuguese endeavoured to propagate their religion and to the care they took to defend their settlements. There were great soldiers and great missionaries among them—Albuquerque, da Cunha, da Castro in the former class, St. Francis Xavier in the latter. But the glory of Empire loses something of its lustre when it has to be paid for, and the constant drain of men and money from Portugal, necessitated by the attacks made on their possessions in India and Malaya, was found most intolerable. The junction of Portugal with Spain, which lasted from 1580 to 1640, also tended to the downfall of the Eastern Empire and when Portugal became independent again, it was unequal to the task of competing in the East with the Dutch and English. The Dutch had little difficulty in wresting the greater part of their territory from the Portuguese, but the seventeenth century naval wars with England forced them to relax their hold upon the coast of India, and during the French wars between 1795 and 1811 England took all Holland's Eastern possessions, and the Dutch have left in India but few traces of their civilisation and of the once powerful East India Company of the Netherlands.

The first English attempts to reach India date from 1496 when Cabot tried to find the North-West passage, and these attempts were repeated all through the sixteenth century. The first Englishman to land in India is said to have been one Thomas Stephens (1579) who was followed by a number of merchant adventurers, but trade between the two countries really dates from 1600 when Elizabeth incorporated the East India Company which had been formed in London. Factories in India were founded only after Portuguese and Dutch position had been overcome, notably in the sea fight off Swally (Suvali) in 1612. The first factory, at Surat, was for many years the most important English foothold in the East. Its establishment was followed by others, including Fort St. George, Madras, (1640) and Hughli (1651). In the history of these early years of British enterprise in India the cession of Bombay (1661) as part of the dower of Catherine of Braganza stands out as a land-mark; it also illustrates the weakness of the Portuguese at that date, since in return the King of England undertook to protect the Portuguese in India against their foes—the Marathas and the Dutch. Cromwell, by his treaty of 1654, had already obtained from the Portuguese an acknowledgment of England's right to trade in the East; and that right was now threatened, not by the Portuguese, but by Sivaji and by the general disorder prevalent in India. Accordingly, in 1686, the Company turned its attention to acquiring territorial power, and announced its intention to establish such a policy of civil and military power, and create and secure such a large revenue.....as may be the foundation of a large, well-grounded, sure English dominion in India for all time to come. Not much came of this announcement for some time, and no stand could be made in Bengal against the depredations of Aurangzeb. The foundations of Calcutta (1690) could not be laid by Job Charnock until after a humiliating peace had been concluded with that Emperor, and, owing to the difficulties in which the Company found itself in England, there was little chance of any immediate change for the better. The union of the old East India Company with the new one which had been formed in rivalry to it took place in 1708, and for some years peaceful development followed; though Bombay was always exposed by sea to attacks from the pirates, who had many strongholds within easy reach of that port, and on land to attacks from the Marathas. The latter danger was felt also in Calcutta. Internal dangers were numerous and still more to be feared. More than one mutiny took place among the troops sent out from England, and rebellions like that led by Keigwin in Bombay threatened to stifle the infant settlements. The public health was bad and the rate of mortality was at times appalling. To cope with such conditions strong men were needed, and the Company was in this respect peculiarly fortunate; the long list of its servants, from Oxenden and Aungier to Hastings and Raffles, contains many names of men who proved themselves good rulers and far-sighted statesmen, the finest Empire-builders the world has known.

Attempts to compete with the English were made of course. But the schemes of the Emperor Charles VI to secure a share of the Indian trade were not much more successful than those made by Scotland, Denmark, Sweden, and Russia. By the French, who founded Pondicherry and Chandernagore towards the end of the 17th century, much more was achieved, as will be seen from the following outline of the development of British rule.

The French Wars.

When war broke out between England and France in 1744, the French had acquired a strong position in Southern India, which had become independent of Delhi and was divided into three large States—Hyderabad, Tanjore, and Mysore—and a number of petty states under local chieftains. In the affairs of these States Dupleix, when Governor of Pondicherry, had intervened with success, and when Madras was captured by a French squadron, under La Bourdonnais (1746) Dupleix wished to hand it over to the Nawab of Arcot—a deputy of the Nizam's who ruled in the Carnatic. The French, however, kept Madras, repelling an attack by the disappointed Nawab as well as the British attempts to recapture it. The treaty of Aix-la-Chapelle restored Madras to the English. The fighting had shown the Indian powers the value of European troops, and this was again shown in the next French war (1750-54) when Clive achieved enduring fame by his capture and subsequent defence of Arcot. This war arose from Dupleix supporting candidates for the disputed successions at Arcot and Hyderabad while the English at Madras put forward their own nominees. One of Dupleix's officers, the Marquis de Bussy, persuaded the Nizam to take into his pay the army which had established his power, and in return the Northern Circars, between Orissa and Madras, was granted to the French. This territory, however, was captured by the English in the seven years' war (1756-63). Dupleix had by then been recalled to France. Lally, who had been sent to drive the English out of India, captured Fort St. David and invested Madras. But the victory which Colonel (Sir Eyre) Coote won at Wandiwash (1760) and the surrender of Pondicherry and Gingee put an end to the French ambitions of Empire in Southern India. Pondicherry passed more than once from the one nation to the other before settling down to its present existence as a French colony in miniature.

Battle of Plassey.

While the English were fighting the third French war in the South they became involved in grave difficulties in Bengal, where Siraj-ud-Daula had acceded to power. The headquarters of the English at Calcutta were threatened by that ruler who demanded they should surrender a refugee and should cease building fortifications. They refused and he marched against them with a large army. Some of the English took to their ships and made off down the river, the rest surrendered and were cast into the jail known as the "Black Hole." From this small and stifling room 23 persons, out of 146, came out alive the next day. Clive who was at Madras, immediately sailed for Calcutta with Admiral Watson's squadron; recaptured the town (1757), and, as war with the French had been proclaimed, proceeded to take Chandernagore. The Nawab Siraj-ud-Daula then took the side of the French, and Clive, putting forward Mir Jafar as candidate for the Nawab's throne, marched out with an army consisting of 900 Europeans, 2,000 sepoys and 8 pieces of artillery against the Nawab's host of over 50,000. The result was the historic battle of Plassey (June 23) in which Clive, after hesitating on the course to be pursued, routed the Nawab. Mir Jafar was put on the throne at Murshidabad, and the price of this honour was put at £2,340,000 in addition to the grant to the Company of the land round Calcutta now known as the District of the twenty-four Parganas. In the year after Plassey, Clive was appointed Governor of Bengal and in that capacity sent troops against the French in Madras and in person led a force against the Oudh army that was threatening Mir Jafar, in each case with success. From 1760 to 1765 Clive was in England. During his absence the Council at Calcutta deposed Mir Jafar and, for a price, put Mir Kasim in his place. This ruler moved his capital to Monghyr, organized an army, and began to intrigue with the Nawab Wazir of Oudh. He soon found, in a dispute over customs dues, an opportunity of quarrelling with the English and the first shots fired by his followers were the signal for a general rising in Bengal. About 200 Englishmen and a number of sepoys were massacred, but his trained regiments were defeated at Gheria and Oodeynullah, and Mir Kasim sought protection from the Nawab of Oudh. But in 1764, after quelling a sepoy mutiny in his own camp by blowing 24 ringleaders from the guns, Major (Sir Hector) Munro defeated the joint forces of Shah Alam, the Mughal Emperor, and the Nawab of Oudh in the battle of Buxar. In 1765 Clive (now Baron Clive of Plassey) returned as Governor; "Two landmarks stand out in his policy. First, he sought the substance, although not the name, of territorial power, under the fiction of a grant from the Mughal Emperor. Second, he desired to purify the Company's service, by prohibiting illicit gains, and by guaranteeing a reasonable pay from honest sources. In neither respect were his plans carried out by his immediate successors. But our efforts towards a sound administration date from this second Governorship of Clive as our military supremacy dates from his victory at Plassey." Before Clive left India; in 1767, he had readjusted the divisions of Northern India and had set up a system of Government in Bengal by which the English received the revenues and maintained the army while the criminal jurisdiction was vested in the Nawab. The performance of his second task, the purification of the Company's service, was hotly opposed but carried out. He died in 1774 by his own hand, the House of Commons having in the previous year censured him, though admitting that he did render "great and meritorious services to his country."

Warren Hastings.

The dual system of government that Clive had set up proved a failure and Warren Hastings was appointed Governor, in 1772, to carry out the reforms settled by the Court of Directors

which were to give them the entire care and administration of the revenues. Thus Hastings had to undertake the administrative organization of India, and, in spite of the factious attitude of Philip Francis, with whom he fought a duel and of other members of his Council, he reorganized the civil service, reformed the system of revenue collection, greatly improved the financial position of the Company, and created courts of justice and some semblance of a police force. From 1772 to 1774 he was Governor of Bengal, and from 1774 to 1775 he was the first Governor-General, nominated under an Act of Parliament passed in the previous year. His financial reforms, and the forced contributions he enacted from the rebellious Chet Singh and the Begam of Oudh, were interpreted in England as acts of oppression and formed, together with his action in the trial of Nuncomar for forgery, the basis of his seven years' trial before the House of Lords which ended in a verdict of not guilty on all the charges. But there is much more for which his administration is justly famous. The recovery of the Marathas from their defeat at Panipat was the cardinal factor that influenced his policy towards the native states. One frontier was closed against Maratha invasion by the loan of a British brigade to the Nawab Wazir of Oudh, for his war against the Rohillas, who were intriguing with the Marathas. In Western India he found himself committed to the two Maratha wars (1775-82) owing to the ambition of the Bombay Government to place its own nominee on the throne of the Peshwa at Poona, and the Bengal troops that he sent over made amends, by the conquest of Gujrat and the capture of Gwalior, for the disgrace of Wadgaon where the Marathas overpowered a Bombay army. In the South—where interference from Madras had already led (1769) to what is known as the first Mysore war, a disastrous campaign against Hyder Ali and the Nizam—he found the Madras Government again in conflict with those two potentates. The Nizam he won over by diplomacy, but against Hyder Ali he had to despatch a Bengal army under Sir Eyre Coote. Hyder Ali died in 1782 and two years later a treaty was made with his son Tipu. It was in these acts of intervention in distant provinces that Hastings showed to best advantage as a great and courageous man, cautious, but swift in action when required. He was succeeded after an interregnum, by Lord Cornwallis (1786-93) who built on the foundations of civil administration laid by Hastings, by entrusting criminal jurisdiction to Europeans and establishing an Appellate Court of Criminal Judicature at Calcutta. In the Civil Service he separated the functions of the District Collector and Judge and organized the "writers" and "merchants" of the Company into an administrative Civil Service. This system was subsequently extended to Madras and Bombay. Lord Cornwallis is better known for his introduction, on orders from England, of the Permanent Settlement in Bengal. (See article on Land Revenue). A third Mysore war was waged during his tenure of office which ended with the submission of Tipu Sultan. Sir John Shore (Lord Teignmouth), an experienced Civil Servant, succeeded Lord Cornwallis, and, in 1798, was followed by Lord Wellesley, the friend of Pitt, whose projects were to change the map of India.

Lord Wellesley's Policy.

The French in general, and "the Corsican" in particular, were the enemy most to be dreaded for a few years before Lord Wellesley took up his duties in India, and he formed the scheme of definitively ending French schemes in Asia by placing himself at the head of a great Indian confederacy. He started by obtaining from the Nawab of Oudh the cession of large tracts of territory in lieu of payment; overdue as subsidies for British troops, he then won over the Nizam to the British side, and, after exposing the intrigues of Tipu Sultan with the French, embarked on the fourth Mysore war which ended (1799) in the fall of Seringapatam and the gallant death of Tipu. Part of Mysore, the Carnatic, and Tanjore roughly constituting the Madras Presidency of to-day then passed to British rule. The five Maratha powers—the Peshwa of Poona; the Gaekwar of Baroda, Sindhia of Gwalior; Holkar of Indore and the Raja of Nagpur—had still to be brought into the British net. The Peshwa, after being defeated by Holkar, fled to British territory and signed the Treaty of Bassein which led to the third Maratha war (1802-04) as it was regarded by Sindhia and the Raja of Nagpur at a betrayal of Maratha independence. In this the most successful of British campaigns in India; Sir Arthur Wellesley (the Duke of Wellington) and General (Lord) Lake carries all before them, the one by his victories of Assaye and Argaum and the other at Aligad, and Laswari. Later operations, such as Colonel Monson's retreat through Central India, were less fortunate. The great acquisitions of territory made under Lord Wellesley proved so expensive that the Court of Directors, becoming impatient, sent out Lord Cornwallis a second time to make peace at any price. He, however, died soon after his arrival in India; and Sir George Barlow carried on the government (1805-7) until the arrival of a stronger ruler, Lord Minto. He managed to keep the peace in India for six years, and to add to British dominions by the conquest of Java and Mauritius. His foreign policy was marked by another new departure, inasmuch as he opened relations with the Punjab, Persia, and Afghanistan, and concluded a treaty with Ranjit Singh, at Lahore, which made that Sikh ruler the loyal ally of the British for life.

The successor of Lord Minto was Lord Moira who found himself obliged almost at once to declare war on the Gurkhas of Nepal, who had been encroaching on British territory. After initial reverses, the English, under General Ochterlony, were successful and the Treaty of Sagauli (1816) was drawn up which defines British relations with Nepal to the present day. For this success Lord Moira was made Marquis of Hastings. In the same year he made preparations for the last Maratha war (1817-18) which was made necessary by the lawless conduct of the Pindaris, gangs of Pathan or Rohilla origin, whose chief patrons were the rulers of Native States. The large number of 120,000 that he collected for this purpose destroyed the Pin-

daris, annexed the dominions of the rebellious Peshwa of Poona, protected the Rajput States, made Sindhia enter upon a new treaty, and compelled Holkar to give up part of his territory. Thus Lord Hastings established the British power more firmly than ever, and when he resigned, in 1823, all the Native States outside the Punjab had become parts of the political system and British interests were permanently secured from the Persian Gulf to Singapore. Lord Amherst followed Lord Hastings, and his five years' rule (1823-28) are memorable for the first Burmese war and the capture of Bharatpur. The former operation was undertaken owing to the insolent demands and raids of the Burmese, and resulted in the Burmese ceding Assam, Aracan, and the coast of Martaban and their claims to the lower provinces. The capture of Bharatpur by Lord Combermere (1826) wiped out the repulse which General Lake had received there twenty years earlier. A disputed succession on this occasion led to the British intervention.

Social Reform.

A former Governor of Madras, Lord William Bentinck, was the next Governor-General. His epitaph by Macaulay, says: "He abolished cruel rites; he effaced humiliating distinctions; he gave liberty to the expression of public opinion; his constant study was to elevate the intellectual and moral character of the nations committed to his charge."

Some of his financial reforms, forced on him from England, and his widening of the gates by which educated Indians could enter the service of the Company, were most unpopular at the time, but were eclipsed by the acts he took for the abolition of *Sati*, or widow-burning, and the suppression—with the help of Captain Sleeman—of the professional hereditary assassins known as *Thags*. In 1832 he annexed Cachar, and, two years later, Coorg. The incompetence of the ruler of Mysore forced him to take that State also under British administration—where it remained until 1881. His rule was marked in other ways by the despatch of the first steamship that made the passage from Bombay to Suez, and by his settlement of the long educational controversy in favour of the advocates of instruction in English and the vernaculars. Lord William Bentinck left India (1835) with his programme of reforms unfinished. The new Charter Act of 1833 had brought to a close the commercial business of the Company and emphasized their position as rulers of an Indian Empire in trust for the Crown. By it the whole administration, as well as the legislation of the country, was placed in the hands of the Governor-General in Council, and authority was given to create a Presidency of Agra. Before his retirement Bentinck assumed the statutory title of Governor-General of India (1834), thus marking the progress of consolidation since Warren Hastings in 1774 became the first Governor-General of Fort William. Sir Charles Metcalfe, being senior member of Council, succeeded Lord William Bentinck, and during his short tenure of office carried into execution his predecessor's measures for giving entire liberty to the press.

Afghan Wars.

With the appointment of Lord Auckland as Governor-General (1836-42) there began a new era of war and conquest. Before leaving London he announced that he looked with exultation to the prospect of "promoting education and knowledge, and of extending the blessings of good Government and happiness to millions in India;" but his administration was almost exclusively comprised in a fatal expedition to Afghanistan, which dragged in its train the annexation of Sind, the Sikh wars, and the inclusion of Baluchistan in the protectorate of India. The first Afghan war was undertaken partly to counter the Russian advance in Central Asia and partly to place on the throne at Kabul the dethroned ruler Shah Shuja in place of Dost Mahomed. The latter object was easily attained (1839) and for two years Afghanistan remained in the military occupation of the British. In 1841 Sir Alexander Burnes was assassinated in Kabul and Sir William Macnaghten suffered the same fate in an interview with the son of Dost Mahomed. The British Commander in Kabul, Gen. Elphinstone, was old and feeble, and after two months' delay he led his army of 4,500 and 12,000 camp followers back towards India in the depth of winter. Between Kabul and Jallalabad the whole force perished, either at the hands of the Afghans or from cold, and Dr. Brydon was the only survivor who reached the latter city. Lord Ellenborough succeeded Lord Auckland and was persuaded to send an army of retribution to relieve Jallalabad. One force under Gen. Pollock relieved Jallalabad and marched on Kabul, while Gen. Nott, advancing from Kandahar, captured Ghazni and joined Pollock at Kabul (1842). The bazaar at Kabul was blown up, the prisoners rescued, and the army returned to India leaving Dost Mahomed to take undisputed possession of his throne. The drama ended with a bombastic proclamation from Lord Ellenborough and the parade through the Punjab of the (spurious) gates of Somnath taken from the tomb of Mahmud of Ghazni.

Sikh Wars.

Lord Ellenborough's other wars—the conquest of Sind by Sir Charles Napier and the suppression of an outbreak in Gwalior—were followed by his recall, and the appointment of Sir Henry (1st Lord) Hardinge to be Governor-General. A soldier Governor-General was not unacceptable, for it was felt that a trial of strength was imminent between the British and the remaining Hindu power in India, the Sikhs. Ranjit Singh, the founder of the Sikh Kingdom, had died in 1839, loyal to the end to the treaty he had made with Metcalfe thirty years earlier. He left no son capable of ruling, and the *khalsa*, or central council of the Sikh army, was burning to measure its strength with the British sepoys. The intrigues of two men, Lal Singh and Fej Singh, to obtain the supreme power led to their crossing the Sutlej and invading British territory. Sir Hugh Gough, the Commander-in-Chief, and the Governor-General hurried to the frontier, and within three weeks four pitched battles were fought—at Mudki, Ferozeshah, Aliwal and Sobraon. The Sikhs were driven across the

Sutlej and Lahore surrendered to the British, but the province was not annexed. By the terms of peace the infant Dhuleep Singh was recognized as Rajah; Major Henry Lawrence was appointed Resident, to assist the Sikh Council of Regency, at Lahore; the Jullundur Doab was added to British territory; the Sikh army was limited; and a British force was sent to garrison the Punjab on behalf of the child Rajah. Lord Hardinge returned to England (1848) and was succeeded by Lord Dalhousie, the greatest of Indian proconsuls.

Dalhousie had only been in India a few months when the second Sikh war broke out. In the attack on the Sikh position at Chillianwala the British lost 2,400 officers and men besides four guns and the colours of three regiments: but before reinforcements could arrive from England, bringing Sir Charles Napier as Commander-in-Chief, Lord Gough had restored his reputation by the victory of Gujrat which absolutely destroyed the Sikh army. As a consequence the Punjab was annexed and became a British province (1849), its pacification being so well carried out, under the two Lawrences that on the outbreak of the Mutiny eight years later it remained not only quiet but loyal. In 1852 Lord Dalhousie had again to embark on war, this time in Burma, owing to the ill-treatment of British merchants in Rangoon. The lower valley of the Irawaddy was occupied from Rangoon to Prome and annexed, under the name of Pegu, to those provinces that had been acquired in the first Burmese war. British territories were enlarged in many other directions during Lord Dalhousie's tenure of office. His "doctrine of lapse" by which British rule was substituted for Indian in States where continued misrule on the failure of a dynasty made this change possible, came into practice in the cases of Satara, Jhansi, and Nagpur (which last-named State became the Central Provinces) where the rulers died without leaving male heirs. Oudh was annexed on account of its misrule. Dalhousie left many other marks on India. He reformed the administration from top to bottom, founded the Public Works Department, initiated the railways, telegraphs and postal system, and completed the great Ganges canal. He also detached the Government of Bengal from the charge of the Governor-General, and summoned representatives of the local Governments to the deliberations of the Government of India. Finally, in education he laid down the lines of a department of public instruction and initiated more practical measures than those devised by his predecessors. It was his misfortune that the mutiny, which so swiftly followed his resignation, was by many critics in England attributed to his passion for change.

Sepoy Mutiny.

Dalhousie was succeeded by Lord Canning in 1856, and in the following year the sepoys of the Bengal army mutinied and all the valley of the Ganges from Delhi to Patna rose in rebellion. The causes of this convulsion are difficult to estimate, but are probably to be found in the unrest which followed the progress of English civilisation; in the spreading of false rumours that the whole of India was to be subdued; in the confidence the sepoy troops had acquired in themselves under British leadership; and in the ambition of the educated classes to take a greater share in the government of the country. Added to this, there was in the deposed King of Delhi, Bahadur Shah, a centre of growing disaffection. Finally there was the story—not devoid of truth—that the cartridges for the new Enfield rifle were greased with fat that rendered them unclean for both Hindus and Mahomedans. And when the mutiny did break out it found the Army without many of its best officers who were employed in civil work, and the British troops reduced, in spite of Lord Dalhousie's warnings; below the number he considered essential for safety. On May 10 the sepoys at Meerut rose in mutiny, cut down a few Europeans, and, unchecked by the large European garrison, went off to Delhi where next morning the Mahomedans rose. From that centre the mutiny spread through the North-Western Provinces and Oudh into Lower Bengal. Risings in the Punjab were put down by Sir John Lawrence and his subordinates who armed the Sikhs, and with their help reduced the sepoys, and Lawrence was subsequently able to send a strong body of Sikhs to aid in the siege of Delhi. The native armies of Madras and Bombay remained for the most part true to their colours. In Central India, the contingents of some of the great chiefs joined the rebels, but Hyderabad was kept loyal by the influence of its minister, Sir Salar Jung.

The interest of the war centres round Delhi; Cawnpore and Lucknow, though in other places massacres and fighting occurred. The siege of Delhi began on June 8 when Sir Henry Barnard occupied the Ridge outside the town. Barnard died of cholera early in July, and Thomas Reed; who took his place, was obliged through illness to hand over the command to Archdale Wilson. In August Nicholson arrived with a reinforcement from the Punjab. In the meantime the rebel force in Delhi was constantly added to by the arrival of new bodies of mutineers, attacks were frequent and the losses heavy; cholera and sunstroke carried off many victims on the Ridge: and when the final assault was made in September the Delhi army could only parade 4,720 infantry, of whom 1,960 were Europeans. The arrival of siege guns made it possible to advance the batteries on September 8, and by the 13th a breach was made. On the following day three columns were led to the assault, a fourth being held in reserve. Over the ruins of the Kashmir Gate, blown in by Home and Salkeld, Col. Campbell led his men and Nicholson formed up his troops within the walls. By nightfall the British, with a loss of nearly 1,200 killed and wounded, had only secured a foothold in the city. Six days' street fighting followed and Delhi was won; but the gallant Nicholson was killed at the head of a storming party. Bahadur Shah was taken prisoner, and his two sons were shot by Captain Hudson.

Massacre at Cawnpore.

At Cawnpore the sepoys mutinied on June 27 and found in Nana Sahib, the heir of the last Peshwa, a willing leader in spite of his former professions of loyalty. There a European force of 240 with six guns had to protect 870

non-combatants, and held out for 22 days, surrendering only on the guarantee of the Nana that they should have a safe conduct as far as Allahabad. They were embarking on the boats on the Ganges when fire was opened on them, the men being shot or hacked to pieces before the eyes of their wives and children and the women being mutilated and murdered in Cawnpore to which place they were taken back. Their bodies were thrown down a well just before Havelock, having defeated the Nana's forces, arrived to the relief. In Lucknow a small garrison held out in the Residency from July 2 to September 25 against tremendous odds and enduring the most fearful hardships. The relieving force, under Havelock and Outram, was itself invested, and the garrison was not finally delivered until Sir Colin Campbell arrived in November. Fighting continued for 18 months in Oudh, which Sir Colin Campbell finally reduced, and in Central India, where Sir Hugh Rose waged a brilliant campaign against the disinherited Rani of Jhansi—who died at the head of her troops—and Tantia Topi.

Transfer to the Crown.

With the end of the mutiny there began a new era in India, strikingly marked at the outset by the Act for the Better Government of India (1858) which transferred the entire administration from the Company to the Crown. By that Act India was to be governed by, and in the name of, the Sovereign through a Secretary of State, assisted by a Council of fifteen members. At the same time the Governor-General received the title of Viceroy. The European troops of the Company, numbering about 24,000 officers and men were—greatly resenting the transfer—amalgamated with the Royal service, and the Indian Navy was abolished. On November 1, 1858, the Viceroy announced in Durbar at Allahabad that Queen Victoria had assumed the Government of India, and proclaimed a policy of justice and religious toleration. A principle already enunciated in the Charter Act of 1833 was reinforced, and all of every race or creed, were to be admitted as far as possible to those offices in the Queen's service for which they might be qualified. The aim of the Government was to be the benefit of all her subjects in India—"In their prosperity will be our strength, in their contentment our security, and in their gratitude our best reward." Peace was proclaimed in July 1859, and in the cold weather Lord Canning went on tour in the northern provinces, to receive the homage of loyal chiefs and to assure them that the "policy of lapse" was at an end. A number of other important reforms marked the closing years of Canning's Viceroyalty. The India Councils Act (1861) augmented the Governor-General's Council, and the Councils of Madras and Bombay by adding non-official members, European and Indian, for legislative purposes only. By another Act of the same year, High Courts of Judicature were constituted. To deal with the increased debt of India Mr. James Wilson was sent from England to be Financial Member of Council, and to him are due the customs system, income tax, license duty, and State paper currency. The cares of office had broken down the Viceroy's health. His successor, Lord Elgin, lived only a few months after his arrival in India, and was succeeded by Sir John (afterwards Lord) Lawrence, the "saviour of the Punjab."

Sir John Lawrence.

The chief task that fell to Sir John Lawrence was that of reorganising the Indian military system, and of reconstructing the Indian army. The latter task was carried out on the principle that in the Bengal army the proportion of Europeans to Indians in the infantry and cavalry should be one to two, and in the Madras and Bombay armies one to three: the artillery was to be almost wholly Europeans. The re-organisation was carried out in spite of financial difficulties and the saddling of Indian revenues with the cost of a war in Abyssinia with which India had no direct concern; but operations in Bhutan were all the drain made on the army in India while the re-organising process was being carried on. Two severe famines—in Orissa (1866) and Bundelkhand and Upper Hindustan (1868-9)—occurred, while Sir John Lawrence was Viceroy, and he laid down the principle for the first time in Indian history, that the officers of the Government would be held personally responsible for taking every possible means to avert death by starvation. He also created the Irrigation Department under Col. (Sir Richard) Strachey. Two commercial crises of the time have to be noted. One seriously threatened the tea industry in Bengal. The other was the consequence of the wild gambling in shares of every description that took place in Bombay during the years of prosperity for the Indian cotton industry caused by the American Civil War. The "Share Mania," however, did no permanent harm to the trade of Bombay, but was, on the other hand, largely responsible for the series of splendid buildings begun in that city during the Governorship of Sir Bartle Frere. Sir John Lawrence retired in 1869, having passed through every grade of the service, from an Assistant Magistracy to the Viceroyalty. Lord Mayo, who succeeded him, created an Agricultural Department and introduced the system of Provincial Finance, thus fostering the impulse to local self-government. He also laid the foundation for the reform of the salt duties, thereby enabling his successors to abolish the inter-provincial customs lines. Unhappily his vast schemes for the development of the country by extending communications of every kind were not carried out to the full by him, for he was murdered in the convict settlement of the Andaman Islands, in 1872. Lord Northbrook (Viceroy 1872-6) had to exercise his abilities chiefly in the province of finance. A severe famine which threatened Lower Bengal in 1874 was successfully warded off by the organization of State relief and the importation of rice from Burma. The following year was notable for the deposition of the Gaikwar of Baroda for mis-government, and for the tour through India of the Prince of Wales (the late King Edward VII). The visit of the Duke of Edinburgh to India when Lord Mayo was Viceroy had given great pleasure to those with whom he had come in touch, and had established a kind of personal link between India and the Crown. The Prince of Wales tour aroused unprecedented enthusiasm for and

loyalty to the British Raj, and further encouragement was given to the growth of this spirit when, in a durbar of great magnificence held on January 1st, 1877, on the famous Ridge at Delhi, Queen Victoria was proclaimed Empress of India. The Viceroy of that time, Lord Lytton, had, however, to deal with a situation of unusual difficulty. Two successive years of drought produced, in 1877-78, the worst famine India had known. The most strenuous exertions were made to mitigate its effects, and eight crores of rupees were spent in importing grain; but the loss of life was estimated at 5½ millions. At this time also Afghan affairs once more became prominent.

Second Afghan War.

The Amir, Sher Ali, was found to be intriguing with Russia and that fact, coupled with his repulse of a British mission led to the second Afghan War. The British forces advanced by three routes—the Khyber, the Kurram, and the Bolan—and gained all the important vantage points of Eastern Afghanistan. Sher Ali fled and a treaty was made with his son Yakub Khan, which was promptly broken by the murder of Sir Louis Cavagnari, who had been sent as English envoy to Kabul. Further operations were thus necessary, and Sir F. (now Lord) Roberts advanced on the capital and defeated the Afghans at Charasia. A rising of the tribes followed, in spite of Sir D. Stewart's victory at Ahmed Kheyl and his advance from Kabul to Kandahar. A pretender, Sirdar Ayub Khan, from Herat prevented the establishment of peace, defeated Gen. Burrows' brigade at Maiwand, and invested Kandahar. He was routed in turn by Sir F. Roberts who made a brilliant march from Kabul to Kandahar. After the British withdrawal fighting continued between Ayub Khan and Abdur Rahman, but the latter was left undisputed Amir of Afghanistan until his death in 1901.

In the meantime Lord Lytton had resigned (1880) and Lord Ripon was appointed Viceroy by the new Liberal Government. Lord Ripon's administration is memorable for the freedom given to the Press by the repeal of the Vernacular Press Act, for his scheme of local self-government which developed municipal institutions, and for the attempt to extend the jurisdiction of the criminal courts in the Districts over European British subjects, independently of the race or nationality of the presiding judge. This attempt, which created a feeling among Europeans in India of great hostility to the Viceroy, ended in a compromise in 1884. Other reforms were the re-establishment of the Department of Revenue and Agriculture, the appointment of an Education Commission with a view to the spread of popular instruction on a broader basis, and the abolition by the Finance Minister (Sir Evelyn Baring, now Lord Cromer) of a number of customs duties. Lord Dufferin, who succeeded Lord Ripon in 1884, had to give his attention more to external than internal affairs: one of his first acts was to hold a durbar at Rawalpindi for the reception of the Amir of Afghanistan which resulted in the strengthening of British relations with that ruler. In 1885 a third Burmese war became necessary owing to the truculent attitude of King Thibaw and his intrigues with foreign Powers. The expedition, under General Prendergast, occupied Mandalay without difficulty and King Thibaw was exiled to Ratnagiri, where he died on 16th December 1916. His dominions of Upper Burma were annexed to British India on the 1st of January, 1886.

The Russian Menace.

Of greater importance at the time were the measures taken to meet a possible, and as it then appeared a probable, attack on India by Russia. These preparations, which cost over two million sterling, were hurried on because of a collision which occurred between Russian and Afghan troops at Penjdeh, during the delimitation of the Afghan frontier towards Central Asia, and which seemed likely to lead to a declaration of war by Great Britain. War was averted, but the Penjdeh incident had called attention to a menace that was to be felt for nearly a generation more; it had also served to elicit from the Princes of India an unanimous offer of troops and money in case of need. That offer bore fruit under the next Viceroy, Lord Lansdowne, when the present system of Imperial Service Troops was organised. Under Lord Lansdowne's rule also the defences of the North-Western Frontier were strengthened, on the advice of Sir Frederick (now Earl) Roberts, who was then Commander-in-Chief in India. Another form of precautionary measure against the continued aggression of Russia was taken by raising the annual subsidy paid by the Indian Government to the Amir from eight to twelve lakhs.

On the North-Eastern Frontier there occurred (1891) in the small State of Manipur a revolution against the Raja that necessitated an inquiry on the spot by Mr. Quinton, the Chief Commissioner of Assam. Mr. Quinton, the commander of his escort, and others, were treacherously murdered in a conference and the escort ignominiously retreated. This disgrace to British arms led to several attacks on frontier outposts which were brilliantly defeated. Manipur was occupied by British troops and the government of the State was reorganised under a Political Agent. Lord Lansdowne's term of office was distinguished by several other events such as the passing of the Parliamentary Act (Lord Cross's Act, 1892), which increased the size of the Legislative Councils as well as the number of non-officials in them: legislation aimed at social and domestic reform among the Hindus: and the closing of the Indian Mints to the free coinage of silver (1893).

Frontier Campaigns.

Lord Elgin, who succeeded Lord Lansdowne in 1894, was confronted at the outset with a deficit of Rs. 2½ crores, due to the fall in exchange. (In 1895 the rupee fell as low as 1*s.* 1*d.*) To meet this the old five per cent. import duties were reimposed on a number of commodities, but not on cotton goods: and within the year the duty was extended to piece-goods, but not to yarn. The re-organisation of the Army, which involved the abolition of the old system of Presidency Armies, had hardly been carried out when a number of risings

occurred along the North-West Frontier. In 1895 the British Agent in Chitral—which had come under British influence two years previously when Sir H. M. Durand had demarcated the southern and eastern boundaries of Afghanistan—was besieged and had to be rescued by an expeditionary force. Two years after the Wazirs, Swatis, and Mohmands attacked the British positions in Malakand, and the Afridis closed the Khyber Pass. Peace was only established after a prolonged campaign (the Tirah campaign) in which 40,000 troops were employed, and over 1,000 officers and men had been lost. This was in itself a heavy burden on the finances of India, which was increased by the serious and widespread famine of 1896-97 and by the appearance in India of bubonic plague. The methods taken to prevent the spread of that disease led, in Bombay, to rioting, and elsewhere to the appearance in the vernacular press of seditious articles which made it necessary to make more stringent the law dealing with such writings.

Lord Curzon's Viceroyalty.

With famine and plague Lord Curzon also, who succeeded Lord Elgin in 1899, had to deal. In 1901 the cycle of bad harvests came to an end; but plague increased, and in 1904 deaths from it were returned at over one million. Of the many problems to which Lord Curzon directed his attention, only a few can be mentioned here: some indeed claim that his greatest work in India was not to be found in any one department but was in fact the general gearing up of the administration which he achieved by his unceasing energy and personal example of strenuous work. He had at once to turn his attention to the North-West Frontier. The British garrisons beyond our boundary were gradually withdrawn and replaced by tribal levies, and British forces were concentrated in British territory behind them as a support. An attempt was made to check the arms traffic and work on strategic railways was pushed forward. The fact that in seven years he only spent a quarter of a million upon repressive measures and only found it necessary to institute one blockade (against the Mahsud Waziris) is the justification of this policy of compromise between the Lawrence and Forward schools of thought. In 1901 the trans-Indus districts of the Punjab were separated from that Province, and together with the political charges of the Malakand, the Khyber, Kurram, Tochi, and Wana were formed into the new North-West Frontier Province, under a Chief Commissioner directly responsible to the Government of India. That year also witnessed the death of Abdur Rahman, the Amir of Afghanistan, and the establishment of an understanding with his successor Habibullah. In 1904 the attitude of the Dalai Lama of Tibet being pro-Russian and anti-British, it became necessary to send an expedition to Lhasa under Colonel (Sir Francis) Younghusband. The Dalai Lama abdicated and a treaty was concluded with his successor.

In his first year of office Lord Curzon passed the Act which, in accordance with the recommendations of the Fowler Commission, practically fixed the value of the rupee at 1*s.* 4*d.*, and in 1900 a Gold Reserve fund was created. The educational reforms that marked this Viceroyalty are dealt with elsewhere: chief among them was the Act of 1904 reorganising the governing bodies of Indian Universities. Under the head of agrarian reform must be mentioned the Punjab Land Alienation Act, designed to free the cultivators of the soil from the clutches of money-lenders, and the institution of Agricultural banks. The efficiency of the Army was increased (Lord Kitchener was Commander-in-Chief) by the re-armament of the Indian Army, the strengthening of the artillery, and the reorganisation of the transport service. In his relations with the Feudatory Chiefs, Lord Curzon emphasized their position as partners in administration, and he founded the Imperial Cadet Corps to give a military education to the sons of ruling and aristocratic families. In 1902 the British Government obtained from the Nizam a perpetual lease of the Assigned Districts of Berar in return for an annual payment of 25 lakhs. The accession of King Edward VII was proclaimed in a splendid Durbar on January 1, 1903. In 1904 Lord Curzon returned to England for a few months but was re-appointed to a second term of office, Lord Ampthill, Governor of Madras, having acted as Viceroy during his absence. The chief act of this second term was the partition of Bengal and the creation of a new Province of Eastern Bengal and Assam—a reform, designed to remove the systematic neglect of the trans-Gangetic areas of Bengal, which evoked bitter and prolonged criticism. In 1905 Lord Curzon resigned, being unable to accept the proposals of Lord Kitchener for the re-adjustment of relations between the Army headquarters and the Military Department of the Government, and being unable to obtain the support of the Home Government. Lord Curzon was succeeded by **Lord Minto**, the grandson of a former Governor-General. It was a stormy heritage to which Lord Minto succeeded, for the unrest which had long been noticed developed in one direction into open sedition.

Outside Bengal attempts to quell the disaffection by the ordinary law were fairly successful. But scarcely any province was free from disorder of some kind and, though recourse was had to the deportation of persons without reason assigned under an Act of 1818, special Acts had to be passed to meet the situation, *viz*:—an Explosives Act, a Prevention of Seditious Meetings Act, and a Criminal Law Amendment Act which provides for a magisterial inquiry in private and a trial before three judges of the High Court without a jury. Concurrently with these legislative measures steps were taken to extend representative institutions. In 1907 a Hindu and a Mahomedan were appointed to the Secretary of State's Council, and in 1909 a Hindu was appointed for the first time to the Viceroy's Council. The Indian Councils Act of 1909 carried this policy farther by reconstituting the legislative councils and conferring upon them wider powers of discussion. The executive councils of Madras and Bombay were enlarged by the addition of an Indian member.

As regards foreign policy, Lord Minto's Viceroyalty was distinguished by the conclusion (1907) between Great Britain and Russia of an agreement on questions likely to disturb the friendly relations of the two countries in

Asia generally, and in Persia, Afghanistan and Tibet in particular. Two expeditions had to be undertaken on the North-West Frontier, against the Zakka Khels and the Mohmands; and ships of the East Indies Squadron were frequently engaged off Maskat and in the Persian Gulf in operations designed to check the traffic in arms through Persia and Mekran to the frontier of India.

Visit of the King and Queen.

Sir Charles (Lord) Hardinge was appointed to succeed Lord Minto in 1910. His first year in India was marked by the visit to India of the King Emperor and the Queen, who arrived at Bombay on December 2, 1911. From there they proceeded to Delhi where, in the most magnificent durbar ever held in India, the coronation was proclaimed and various boons, including an annual grant of 50 lakhs for popular education, were announced. At the same ceremony His Majesty announced the transfer of the capital of India from Calcutta to Delhi; the reunion of the two Bengals under a Governor-in-Council; the formation of a new Lieutenant-Governorship for Behar, Chota Nagpur and Orissa and the restoration of Assam to the charge of a Chief Commissioner.

In August, 1913, the demolition of a lavatory attached to a mosque in Cawnpore was made the occasion of an agitation among Indian Mahomedans and a riot in Cawnpore led to heavy loss of life. Of those present at the riot, 106 were put on trial but subsequently released by the Viceroy before the case reached the Sessions, and His Excellency was able to settle the mosque difficulty by a compromise that was acceptable to the local and other Mahomedans.

Still more serious trouble occurred in September, 1914, when a riot at Budge-Budge among a number of Sikh emigrants returned from Canada gave a foretaste of the revolutionary plans entertained by those men. The sequel, revealed in two conspiracy trials at Lahore, showed that the "Ghadr" conspiracy was widespread and had been consistently encouraged by Germany.

India after the War.

Post-war India has a strange and baffling history. In 1919 Englishmen troubled little about affairs in the East: they were engrossed by the settlement of peace and the refusal of the United States either to ratify the Treaty of Versailles or to join the League of Nations. In 1930, however, the eyes not only of the British Empire but of the entire world were set upon India, when Mr. Gandhi and his followers for the second time attempted to make the non-co-operation movement effective.

Ideas rule the world. India had participated in the "war to end war". It was a war waged in defence of Belgium and it ended in a peace ostensibly proclaiming the sanctity of national aspirations throughout the world. For the sake of nationalism the structure of Europe had been broken into fragments. What then was to be India's share in the spoils of peace? The Montagu-Chelmsford Reforms did not satisfy extremist opinion. They were the result of an agreed policy at home, and an agreed policy meant concessions to reactionary opinion.

The Montagu-Chelmsford Reforms worked and in some Provinces they worked well. Because they worked well, it was never possible to withhold reforms. Because experience revealed their shortcomings, it was imperative that greater reforms should be made. Lord Morley and Lord Minto expressly denied that their reforms allowed Parliamentary institutions. Yet the logical conclusion of these reforms was the Montagu-Chelmsford Report, which definitely established Parliamentary institutions, and that report prepared the way to Dominion Status. Ten years after the war we find the Viceroy and Mr. Gandhi working by different methods for the same end.

Yet to one living through those fevered years the issues were not always clear. Mahomedan and Hindu aspirations did not always coincide. The evil mischances that persuaded Turkey to associate with the Central Powers in the European War sorely tried Mahomedan loyalty. The Khilafatist movement assumed great proportions; and the consequence was war; for King Amanullah, who had just ascended the throne of Afghanistan, believed that India was in open revolt. He decided, therefore, to invade the country. **The Afghan War** was unfortunately a prolonged campaign, and increased the sense of post-war exhaustion in this country. A few years later King Amanullah visited India on an errand of peace. His country had entered the comity of nations, and he would tour Europe as an enlightened monarch. In 1928 he returned to his country, which, however, he was destined soon to leave. The pace of his reforms had been too rapid for his country. He abdicated in favour of his brother Inayatullah, who abdicated himself a few hours later. It was not until General Nadir Khan was elected King in the summer of 1929 that peace came to the unhappy land; but the keenness with which India followed the progress of the revolution showed how closely were the fortunes of the two countries associated.

The appointment of **Lord Reading** to be Viceroy in 1921 was a landmark in Indian history. Throughout his tenure of office there was opposition and disorder. The Duke of Connaught came to open the new council; and the *Swarajists* did their utmost to boycott the visit. The Prince of Wales came a year later on a non-political visit; but his arrival in Bombay was the signal for severe rioting.

Mr. Gandhi's weapons of attack were boycott and the wearing of *Khaddar*. *Khaddar*, as an Indian cloth, weakened the importation of foreign cloth. The boycott was directed not only against British goods, but against the entire machinery of Government. In 1923 Lord Reading's certification doubled the Salt-Tax, thus showing that the Legislative Assembly had no real control over finance. The responsibilities of the Assembly were few. Since the Government could override its decisions, its decisions became irresponsible. In the Provinces, however, there was less irresponsibility, and consequently the members of the Legislative Councils were often the allies of Government. But it took time for Indian opinion to realise that the Legislative Councils, however imperfect, were the instruments of order and good government. Some years later, the boycott broke

down. Mr. C. R. Das, one of Mr. Gandhi's chief lieutenants, decided to associate with the Legislature—ostensibly to destroy the reforms, but actually because he and many others had grown tired of a policy of mere negation. The downfall of non-co-operation was further signalled by the election of a great Swarajist, Mr. V. J. Patel, to be President of the Legislative Assembly—an office which he held until the summer of 1930.

When **Lord Irwin** succeeded Lord Reading in 1926, the prospects of peace improved. It was ordained by Statute that a Commission should examine the Indian Reforms within ten years of the inception of the Government of India Act. In 1927 both the British Government and the Government of India agreed that the Commission should be appointed as early as possible. Accordingly, in the autumn, it was announced that Sir John Simon and other members of Parliament should be members of a new **Statutory Commission.** Their appointment was the occasion of a new outburst. Neither Mr. Gandhi's followers nor the moderates would support the Commission. It was to be boycotted from the start. The chief complaint was that all the members of the Commission were Europeans. The Congress party, and even the moderates, demanded in its place a Round Table Conference and the promise, if not the immediate offer, of Dominion Status. The boycott, however, was not very effective. One by one the Provincial Councils decided to co-operate with the Simon Commission: the Legislative Assembly, almost alone among the Legislatures, stood consistently for boycott. Yet it is significant that before the Simon Commission had published its report, the Viceroy not only announced that the goal of Government in India was Dominion Status, but invited representatives of India to a Round Table Conference in London: he stood where the moderates and half the Congress had stood two years before. Meanwhile, Congress became still more extremist. In January 1929, Mr. Gandhi announced that if India was not given Dominion Status within a year, he would lead the campaign for Independence. He kept his word, and the Lahore Congress of December 1929, under the guidance of Pandit Jawharlal Nehru rather than Mr. Gandhi, voted in favour of Independence.

The new struggle began in earnest in March 1930. Mr. Gandhi first decided to break the Salt Laws. He made an imposing march from Ahmedabad to the coast, where he ceremoniously manufactured salt that could not be taxed. Non-co-operation was in full swing. For a short time Bombay was virtually a Congress City. There were numerous arrests, and before the year closed, there were to be in India no less than fifty thousand people incarcerated for political offences.

The Government of Lord Irwin was assailed on all sides. Some condemned it because it was weak: others condemned it because it was repressive. Its conduct had a curious reaction upon political opinion in England, which possessed the dubious advantage of a minority Government. At one time the Conservatives were demanding the recall of Lord Irwin. Similarly, Provincial Governors were criticised for alleged inactivity. In the summer few predicted any success for the Round Table Conference. The Simon Commission published a Report that was condemned by practically every party in India: it was practically a still-born Report. Events had moved too rapidly. The Round Table Conference, however, proved to be the culminating point of a world-wide interest in the Indian political struggle. The Princes, at first, assumed the lead. They stood for a Federal Government in which the States and British India should be partners. At once the extremists, who had intended to ignore the Conference, showed the keenest concern. The Conference, despite all evil prognostications, represented the voice of India.

In February 1931 the Round Table Conference delegates returned to India on the understanding that there was to be a second Round Table Conference in London, but that meanwhile certain problems, such as that of separate communal electorates, were to be worked out among themselves in India. The first thing they did on their return was to attempt to persuade Congress to call off the Civil Disobedience Movement and participate in the Conference. Congress, however, were in bitter mood; many local committees even did their best to prevent the decennial census in February from being an accurate index to the state of the population. There were a number of feverish conferences between Lord Irwin, Mr. Gandhi, and Sir Tej Bahadur Sapru. Mr. Gandhi and other prominent Congress leaders were released from prison specially to confer with Government officials and the conferences were conducted in a friendly and informal fashion. The upshot was the signing of the Irwin-Gandhi Pact at Delhi in March which provided on the one hand for Congress to call off the civil disobedience movement, the no-tax campaign, the boycott of British goods, and other cognate activities, and on the other hand for Government to extend an amnesty to political prisoners, to permit the manufacture of salt on the coast, and make a number of similar concessions.

When in April **Lord Willingdon** arrived in India to take up his duties as Viceroy and Governor-General, Lord Irwin left the country amid many tributes to his statesmanship. Lord Willingdon's first few months were spent in preparing the way for the second Round Table Conference, the opening of which was fixed for November. At first Congress refused to participate, alleging that Government had broken the Irwin-Gandhi agreement, but after much wavering Mr. Gandhi set sail for England at the end of August. The Conference almost broken down over the communal problem. Mr. Gandhi was frankly dissatisfied and landed in India on December 28 hinting at a renewal of the civil disobedience campaign. Early in January 1932 the struggle began again. Mr. Gandhi and the Congress leaders were imprisoned.

The Viceroy soon made it clear that there could be no compromise with those who were determined to persist in a fresh campaign of civil disobedience and proclaimed his determination to use to the full the resources of the State in fighting and defeating a movement which would otherwise remain a perpetual menace to orderly Government and individual liberty. His Excellency's policy quickly met with success. The arrest of the principal leaders of the campaign was followed up with the imprisonment after trial of over 30,000 followers of the Congress. The special Ordinances devised to deal with the menace were renewed for another six months,

being replaced at the end of the year by more permanent legislation which the Legislative Assembly and the Council of State endorsed, the former by a surprisingly good majority. All the Provincial Councils passed complementary legislation embodying Ordinance regulations to suit local conditions. Thus by the end of the year the Ordinances had ceased to exist, their place being taken by legislation for a limited period. Nothing showed the rally of the country against civil disobedience better than these measures.

The economic position of the country continued to be abnormal throughout the year and Government refused to contemplate any relaxation of that stern policy of rigorous economy in public expenditure outlined in 1931. The success of that policy was reflected in the budget of 1933-34, though public opinion in the country was disappointed with the absence of any relief from taxation, particularly in view of the partial restoration of the cut in the salaries of the Services. An outstanding feature of the year was the rapid improvement in India's credit notwithstanding the economic stress. Government floated three loans, one in sterling and two in rupees, of the total amount of Rs. 58 crores. The last of these was oversubscribed in about four hours though it gave a return of only 5½ per cent. Government also succeeded in substantially reducing their floating debt.

An event of great importance during the year was the tariff agreement between India and Great Britain at the **Ottawa Conference.** In the entirely new circumstances created by the departure of the British Government from the old policy of universal free trade and by the substitution for it of a tariff coupled with the grant of preference to countries, the Government of India were invited to send a delegation to the Imperial Conference primarily to consider and discuss with representatives of Great Britain the question whether it would be in the interests of both countries to enter into a tariff agreement involving the reciprocal grant of preferences to each other's products. In the negotiations and discussions which took place first in London and subsequently at Ottawa the Indian delegation to the Conference headed by Sir Atul Chatterjee were given the freest possible hand and the agreement which they concluded embodies only such measures as are in the best interests of India. After prolonged discussion it was endorsed by the Central Legislature.

Discussions relating to the future constitution of India were in progress throughout the year. The publication of the communal award made by His Majesty's Government marked a new stage in their progress. This award in so far as it affected the Depressed Classes in the Hindu community was modified as a result of Mr. Gandhi's fast at the Yeravda prison. He undertook this fast after due warning to Government and threatened to die of starvation if the plan to create special constituencies for the depressed classes was not given up. Hindu leaders in their anxiety to save Mr. Gandhi agreed upon an alternative scheme of reserved seats for the Depressed Classes in the general constituencies. This agreement was subsequently endorsed by His Majesty's Government. In November the third Round Table Conference met in London, the session lasting till the end of the year.

The year 1933 saw the publication of the White Paper embodying the proposals of His Majesty's Government for constitutional advance in India (See Round Table Conference Chapter). It served to thrust India into the forefront of British politics. At no other period perhaps in recent times has India figured so largely in Britain, which was flooded by die-hard propaganda against "the danger of forcing democracy down the throats of the dumb millions of India."

With the complete stultification of the Congress following the collapse of civil disobedience, and the shifting of interest to London where the Joint Parliamentary Committee was in session examining the White Paper, political activity in the country was at a standstill. To make up for this there was a great upheaval in the social sphere. The plight of the depressed classes (called Harijans by Mr. Gandhi) attracted much attention, thanks to the aggressive measures adopted by Mr. Gandhi, his two fasts, release from jail and whirlwind tour of the country. Although there was much orthodox opposition to the admission of untouchables into caste temples and other demonstrational aspects of the uplift movement, the upper classes' conscience was roused to activity and directed towards the amelioration of the general condition of the untouchables.

India's increasing status among the nations of the world was exemplified by the privilege accorded to her of negotiating direct with a Foreign Power (Japan) for a commercial treaty. To meet the stifling competition from Japan, India decided to cancel the most-favoured-nation treatment to Japan, whereupon the latter retaliated by placing a boycott on Indian cotton. The tug-of-war ended as the result of a series of conversations at Simla and Delhi between representatives of the Indian and Japanese Governments. Equally important was the visit paid by a delegation from Lancashire, which also was productive of an agreement with Bombay millowners for the regulation of trade and avoidance of cut-throat competition—an agreement which was later ratified by the Indian legislature.

For the first time in history, **Mount Everest** was conquered from the air. An aeroplane expedition financed by Lady Houston achieved this marvel which, apart from its spectacular nature, is believed to be of great scientific value. A climbing expedition which followed, however, had to abandon the attempt owing to unkind weather.

India lost this year two outstanding personalities, H. H. the Jam Sahib (the famous "Ranji" of the cricket world) and Mrs. Annie Besant who was held in great esteem by all India for her services in the cause of the country's constitutional advance.

The Frontier tribes again gave trouble. The Bajauris chose to harbour a "pretender" to the Afghan throne and, as a friendly neighbouring state, India had to curb such hostile activities on the border. The operations lasted a few months, but the issue was never in doubt. Air operations settled the trouble and, incidentally, served to demonstrate how the British Empire could not altogether give up air bombing.

The Government of India.

The impulse which drove the British to India was not conquest but trade. The Government of India represents the slow evolution from conditions established to meet trading requirements. On September 24, 1599, a few years before the deaths of Queen Elizabeth and Akbar, the merchants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorporation. The Government of this Company in England was vested in a Governor with a General Court of Proprietors and a Court of Directors. The factories and affairs of the Company on the East and West Coasts of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort St. George), Bombay and Calcutta (Fort William), by a President or Governor and a Council consisting of the senior servants of the Company. The three "Presidencies" were independent of each other and subordinate only to the Directors in England.

Territorial Responsibility Assumed.

The collapse of government in India consequent on the decay of Mogbul power and the intrigues of the French on the East Coast forced the officers of the Company to assume territorial responsibility in spite of their own desires and the insistent orders of the Directors. Step by step the Company became first the dominant, then the paramount power in India. In these changed circumstances the system of government by mutually independent and unwieldy councils of the merchants at the Presidency towns gave rise to grave abuses. Parliament intervened, and under the Regulating Act of 1773, a Governor-General and four councillors were appointed to administer the Presidency of Fort William (Bengal), and the supremacy of that Presidency over Madras and Bombay was for the first time established. The subordinate Presidencies were forbidden to wage war or make treaties without the previous consent of the Governor-General of Bengal in Council, except in cases of imminent necessity. Pitt's Act of 1784, which established the Board of Control in England, vested the administration of each of the three Presidencies in a Governor and three councillors, including the Commander-in-Chief of the Presidency Army. The control of the Governor-General-in-Council was somewhat extended, as it was again by the Charter Act of 1793. Under the Charter Act of 1833 the Company was compelled to close its commercial business and it became a political and administrative body holding its territories in trust for the Crown. The same Act vested the direction of the entire civil and military administration and sole power of legislation in the Governor-General-in-Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments. After the Mutiny, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown. This Act made no important change in the administration in India, but the Governor-General, as representing the Crown became known as the Viceroy. The Governor-General is the sole representative of the Crown in India; he is assisted by a Council, composed of high officials, each of whom is responsible for a special department of the administration.

Functions of Government.

The functions of the Government in India are perhaps the most extensive of any great administration in the world. It claims a share in the produce of the land and in the Punjab and Bombay it has restricted the alienation of land from agriculturists to non-agriculturists. It undertakes the management of landed estates where the proprietor is disqualified. In times of famine it undertakes relief work and other remedial measures on a great scale. It manages a vast forest property and is the principal manufacturer of salt and opium. It owns the bulk of the railways of the country, and directly manages a considerable portion of them; it has constructed and maintains most of the important irrigation works; it owns and manages the post and telegraph systems; it has the monopoly of the Note issue, and it alone can set the mints in motion. It lends money to municipalities, rural boards, and agriculturists and occasionally to owners of historic estates. It controls the sale of liquor and intoxicating drugs and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate character. The Government has also close relations with the Indian States which collectively cover more than one-third of the whole area of India and comprise more than one-fifth of its population. The distribution of these great functions between the Government of India and the provincial administrations has fluctuated and was definitely regulated by the Reform Act of 1919.

THE REFORMS OF 1919.

Great changes were made in the system of government in British India by the Government of India Act, 1919, which, together with the rules framed under it—almost as important in their provisions as the Act itself—came into general operation in January 1921. The Act was the outcome of an inquiry conducted in India in the winter of 1917-18 by the Secretary of State (Mr. Montagu) and the Viceroy (Lord Chelmsford), the results of which were

embodied in their Report on Indian Constitutional Reform issued in the spring of 1918. The recommendations in this report were supplemented by those of two Committees which toured in India in the winter of 1918-19, and which issued their Reports in the spring of 1919. A third Committee was appointed during the latter year to make recommendations for the modification of the system of administration of Indian affairs in the United Kingdom, and issued their Report while the Government of India Bill was under examination by a Joint Select Committee of both Houses of Parliament. The Joint Select Committee in their turn issued an exhaustive Report on the Bill, which was passed in a form practically identical with that recommended by the Joint Committee, and received the Royal Assent on the 23rd December 1919.

The Divisions.—British India for administrative purposes is divided into 15 provinces, each with its separate Local Government or administration. In nine of the provinces—the three Presidencies of Madras, Bombay and Bengal, the United Provinces of Agra and Oudh, the Punjab, Bihar and Orissa, the Central Provinces, Burma, and Assam—the Local Government consists of a Governor, an Executive Council of not more than four members, and two or more Ministers. In 1922 Burma, which was excluded from the original scheme, was brought into line with it. An Act of Parliament was passed, constituting Burma a Governor's Province, with a Governor, an Executive Council and Ministers and a Legislative Council elected on a very democratic franchise, which gave the vote to women. The remaining six provinces are directly administered by Chief Commissioners, who are technically mere agents of the Central Government of India. No change has been made by the Act of 1919 in the system of administration in these six minor provinces.

Dyarchy.—In these nine provinces the executive Government is a dual organism which owes its unity to the Governor. One half of the organism consists of the Governor and his executive Council, all of whom are appointed by the King. This body is responsible for the administration of those subjects which are "reserved." The other half of the executive organism is the Governor acting with the advice of Ministers who are appointed by him, hold office during his pleasure, and must be elected members of the Provincial Legislative Council. To the Governor acting with Ministers is entrusted the administration of "transferred" subjects.

The Object.—The framers of the Act of 1919 had a twofold object in view. Their primary object was to devise a plan which would render possible the introduction by successive stages of a system of responsible government in British India in modification of the previous system under which the Governments in India both central and provincial, received their mandates from the British Parliament acting through the Secretary of State for India, the Cabinet Minister responsible to Parliament for the administration of Indian affairs.

The Provinces.—Starting from the premise that it was in the provinces that the first substantial steps must be taken towards the development of a system of responsible government, the framers of the Act of 1919 provided for a statutory demarcation of the functions to be exercised by the Government of India and the Provincial Governments respectively, in their administrative capacity. No attempt was made in this connection to limit the field open to the Indian Legislature, which still retains a concurrent (though not an overriding) power of legislation for the affairs of the provinces in general and of individual provinces; but the rules under the Act provide specifically for the exercise of this right in certain specified provincial matters, and the theory upon which the Act proceeds assumes that a convention will be established and rigorously observed which will confine intervention by the Indian Legislature in provincial affairs to matters so specified.

Finance.—The "revenues of India"—or, rather, their sources—are definitely divided between the Central and Provincial Governments; the Provincial Governments have now almost complete control over the administration of their "allocated" revenues, they have power to supplement them by raising loans on the security of these revenues, and their right, subject in certain cases to the Governor-General's sanction, to initiate new taxation measures is formally recognised.

It was found impossible to devise any scheme of allocation of revenues between the Central and Provincial Governments which did not leave the former with a deficit. This deficit is to be met in part by an annual contribution from seven of the eight Governors' provinces, the province of Bihar and Orissa, owing to the comparative exiguousness and inelasticity of its own revenues, having been exempted from this contribution. The aggregate sum thus due from the provinces to the Government of India at the outset is Rs. 983 lakhs, of which Madras contributes Rs. 348 lakhs, the United Provinces Rs. 240 lakhs, the Punjab Rs. 175 lakhs, and the other four provinces sums ranging from Rs. 15 lakhs to Rs. 64 lakhs. The annual contribution is in no case to be subject to increase in the future, and if reduction of the aggregate is found possible by the Government of India, reductions are to be made in fixed proportions from the quota of the several provinces.

Responsibility.—The first steps towards responsibility were to transform the Provincial Legislative Council into a body of sufficient size and with a sufficiently large elected majority (which the Act fixes at 70 per cent. as a minimum) to represent adequately public opinion in the province, and to create an electorate. The first franchise rules have given the vote to about 5,000,000 of the adult male population, and have enabled the Legislative Council of any "Governor's province" to extend the franchise to women.

The following table shows the strength and composition of each of the Provincial Councils:—

Province.	Elected.	Nominated and *ex-officio*.		Total.
		Officials.	Non-officials.	
Madras	98	23	6	127
Bombay	86	20	5	111
Bengal	113	20	6	139
United Provinces	100	18	5	123
Punjab	71	16	6	93
Bihar and Orissa	76	18	9	103
Central Provinces	53	10	5	68
Assam	39	9	5	53
Burma	78	15	8	101

The figures for officials in this table are maxima in every case, and where less than the maximum number of officials is nominated to any Council, the number of nominated non-officials must be increased in proportion; *e.g.*, if there are only 16 officials (nominated and *ex-officio*) on the United Provinces Council, there must be seven nominated non-officials. The official members who have seats *ex-officio* are the members of the Executive Council, who are at present four in number, the statutory maximum in Madras, Bombay, and Bengal, three in Bihar and Orissa, and two in each of the remaining provinces. These Executive Councils contain an equal number of Indian and British members except in Bihar and Orissa where two of the three members are British officials.

Electorates.—The electorates in each province are arranged for the most part on a basis which is designed to give separate representation to the various races, communities, and special interests into which the diverse elements of the Indian population naturally range themselves. Although there are minor variations from province to province, a table showing their character in one province (Bengal) will give a sufficiently clear idea of the general position.

Class of Electorate.	No. of Electorates of this Class.	No. of Members returnable by Electorates of this Class.
Non-Muhammadan	42	46
Muhammadan	34	39
European	3	5
Anglo-Indian (in the technical sense of persons of mixed European and Asiatic descent).	1	2
Landholders	5	5
University	1	1
Commerce and Industry	8	15
Total	94	113

Of the 94 constituencies in Bengal, all but nine (those representing the University and Commerce and Industry) are arranged on a territorial basis, *i.e.*, each constituency consists of a group of electors, having the prescribed qualifications which entitle them to a vote in a constituency of that class, who inhabit a particular area. The normal area for a "Muhammadan" or "non-Muhammadan" constituency is a district (or where districts are large and populous, half a district) in the case of rural constituencies, and, in the case of urban constituencies, a group of adjacent municipal towns. Some large towns form urban constituencies by themselves, and the City of Calcutta provides eight separate constituencies, six "non-Muhammadan" and two "Muhammadan", the latter, of course, being coterminous with the former.

Throughout the electoral rules there runs a general classification of the various kinds of constituencies into two broad categories, those which are designed to represent special interests such as Landholders, Universities, Planters or Commerce being described as "special" constituencies, and those which are based on a racial distinction—Muhammadan, European, Sikh, etc.—being known as "general" constituencies.

Voters' Qualifications.—The qualifications for electors (and consequently for candidates) vary in detail from province to province, chiefly on account of variations in the laws and regulations which form the basis of assessment of income or property values. Generally speaking, both in rural and urban areas the franchise is based on a property qualification as measured by the payment of a prescribed minimum of land revenue or of its equivalent, or of income tax, or of municipal taxes, but in all provinces retired, pensioned or discharged officers and men of the regular army are entitled to the vote, irrespective of the amount of their income or property.

Election Results.—A Parliamentary Paper (Cmd. 3922), published in 1931, gives the following summary of election results. This return

relates to the fourth General Election under the Act of 1919. In two cases, however, those of the Council of State and the Burma Legislative Council, it relates to the third election under that Act, held in the case of the Council of State in 1930 and in the case of the Burma Council in 1928. These divergencies are due to the statutory duration of the Council of State being five instead of three years, and to the fact that the Reforms were introduced in Burma two years later than in other Provinces.

In the ordinary course of events the fourth general election would have been held in 1929. In two Provinces, Bengal and Assam, the elections to the Provincial Legislature were in fact held in that year, since in those provinces the local political situation had led to dissolutions in that year. But in the case of the Legislative Assembly and of the remainder of the Provincial Councils the statutory three year period was extended under the powers conferred by the Government of India Act in order to postpone the general election until after the publication of the Report of the Indian Statutory Commission in the Summer of 1930. The elections were therefore held in the autumn of 1930.

The figures given for the number of electors who voted and the percentages of the number who voted to the number on the electoral roll are, in the case of plural member constituencies, approximate only. In these constituencies, each elector has as many votes as there are seats to be filled, and the figures are calculated on the assumption that each elector used all his votes; that is, the figure given as the number of Electors who voted is the result of dividing the number of votes polled by the number of seats to be filled.

Class of Constituency.	No. of Seats.	No. of Seats filled without Contest.	No. of Candidates for contested Seats.	Percentage of Votes polled to No. of Electors in contested Constituencies.	Percentage in 1926.

‡ One candidate retired.

POWERS OF PROVINCIAL LEGISLATIVE COUNCILS.

In origin the legislative authority in British India was a meeting of the Governor-General (or, in the case of the Presidencies of Madras and Bombay, of the Governor) with his Executive Council, "for the purpose of legislation." When met for this purpose there were added to the Executive Council certain "additional members," at first very few in number, and those few all nominated by the Governor-General or the Governor, as the case might be. A Council so constituted had originally no powers or duties beyond those immediately arising out of the discussion of the particular legislative measure which at the time was engaging its attention, and its functions were confined strictly to the discussion and enactment of legislative measures. In course of time the number of "additional" members, and the proportion of these who were non-official Indians, were steadily increased, the principle of election was gradually substituted for nomination as the means of selecting non-official members, and the functions of the Councils were extended so as to include the right of interpellation, of the discussion of matters of general public interest, and of criticising and discussing the budget proposals of the Executive Government. This extension of the powers of the Councils was in the main the result of the "Morley-Minto Act" of 1909. The Indian Councils Act of 1892 had given power to discuss the budget but not to divide the Council upon it. Lord Morley's Act went further and provided that notwithstanding the terms of the Indian Councils Act of 1861 which had restricted the powers of all Councils to the discussion of legislative measures, the Local Government might make rules authorising the discussion of the annual financial statement, of any matter of general public interest, and the asking of questions under such conditions and restrictions as might be imposed by the rules, and these rules recognised the right of the Councils to vote on motions thus submitted for their discussion. The other results of the Act of 1909 were definitely to recognise the principle of election as the means of selecting non-official members of all Councils (although the method adopted was mainly that of indirect election), a considerable increase in the number of both non-official and official members, and the setting up in every province of a non-official (though not, save in one province, an elected) majority. A further important, though indirect, result of the Morley-Minto Act was the appointment of an Indian member to the Executive Council of the Governor-General and to such Provincial Executive Councils as were then in existence and subsequently created.

Old System.—But although the Legislative Councils (which, originally created in two provinces only in addition to the Governor-General's Legislative Council, existed in 1919 in nine provinces) had steadily acquired a more and more representative character and a large share of the normal functions of a legislative assembly as generally understood, they still remained in theory up to the passing of the Act of 1919 mere accretions to the Executive Government of the provinces for the purpose of advising on, and enacting, legislation. It is true that the non-official element in the Provincial Councils as constituted by Lord Morley's Act of 1909 had acquired a considerable measure of control over legislation, in view of the fact that in most provinces that Act and the rules framed under it placed the non-official members in a slight majority over their official colleagues; but for various reasons this control, even in the sphere of legislation, can hardly be described as definite popular control, and over matters outside the legislative sphere the Councils had no controlling voice at all.

The Changes.—The most important changes made by the Act of 1919 in the powers of the Provincial Councils were—

(*i*) the power to vote (and consequently to withhold) supplies;

(*ii*) a greatly enhanced freedom of initiation in the matter of legislation; and

(*iii*) power to frame their own rules of procedure in matters of detail, subject to the Governor's concurrence.

A further right which the Councils will acquire after four years from the time of their commencement is the right to elect their own President. At the outset the President is nominated by the Governor, but from the start every Council has an elected Deputy President. The Governor (who formerly was *ex-officio* President of his Legislative Council) no longer has any direct connection with its proceedings. The first-named of these newly acquired powers is of sufficient importance to require a detailed explanation of its scope, which can best be given in the terms of the Act itself (section 72D).

72D.—(1) The provisions contained in this section shall have effect with respect to business and procedure in governors' legislative councils.

(2) The estimated annual expenditure and revenue of the province shall be laid in the form of a statement before the council in each year and the proposals of the local government for the appropriation of provincial revenues and other moneys in any year shall be submitted to the vote of the council in the form of demands for grants. The council may assent, or refuse its assent, to a demand, or may reduce the amount therein referred to either by a reduction of the whole grant or by the omission or reduction of any of the items of expenditure of which the grant is composed:—

Provided that—

(*a*) the local government shall have power, in relation to any such demand, to act as if it had been assented to, notwithstanding the withholding of such assent or the reduction of the amount therein referred to, if the demand relates to a reserved subject, and the governor certifies that the expenditure provided for by the demand is essential to the discharge of his responsibility for the subject; and

(*b*) the governor shall have power in cases of emergency to authorise such expenditure as may be in his opinion necessary for the safety or tranquillity of the province, or for the carrying on of any department; and

(c) no proposal for the appropriation of any such revenues or other moneys for any purpose shall be made except on the recommendation of the governor communicated to the council.

(3) Nothing in the foregoing sub-section shall require proposals to be submitted to the council relating to the following heads of expenditure :—

(*i*) Contributions payable by the local government to the Governor-General in Council ; and

(*ii*) Interest and sinking fund charges on loans ; and

(*iii*) Expenditure of which the amount is prescribed by or under any law ; and

(*iv*) Salaries and pensions of persons appointed by or with the approval of His Majesty or by the Secretary of State in Council and

(*v*) Salaries of judges of the high court of the province and of the advocate-general.

If any question arises whether any proposed appropriation of moneys does or does not relate to the above heads of expenditure, the decision of the governor shall be final.

Executive and Legislature.—In the light of these facts it is now possible to explain more exactly the relationship between the provincial executive and the provincial legislature. The dual character of the former has already been mentioned, and the corresponding bifurcation of provincial subjects into "reserved" and "transferred" categories. The rules under the act prescribe a list of 20 subjects which are transferred to the administration of the Governor acting with Ministers, the more important of which are Local Self-Government, Medical Administration, Public Health, Education (with certain reservations), Public Works, Agriculture, Excise, and Development of Industries. The "reserved" subjects comprise all those in the list of "provincial" (as distinct from "central") subjects which are not transferred.

Machinery.—No change has been made by the Act of 1919 in the machinery and methods of administration by the Governor in Council ; decisions are taken at the Council Board, as before, by a majority vote, and the Governor is entitled, as before, to overrule such a vote in certain specified circumstances if he disagrees with it. For such decisions the Governor in Council remains, as before, responsible to the Secretary of State and Parliament, and on questions of legislation and supply he has the power of enforcing them despite opposition by a majority of the Legislative Council. But, the whole spirit of the Act and the existence of a large non-official elected majority in every Provincial Legislative Council is an important factor in determining the policy to be pursued by the official half of the Government in its administration of reserved subjects. A further and not less important factor is the existence in the Government, side by side with the Executive Council, of two or more Ministers appointed from the elected members of the legislature, who, though they are not charged by law with, and in fact are legally absolved from, any responsibility for decisions on matters outside the transferred sphere, will necessarily be able, and in fact are expected, to make their opinions felt by their colleagues in the Executive Council. But these factors, while they will doubtless lead to constant endeavour on the part of the official half of the Government to accommodate its policy to the wishes of its ministerial colleagues and of the majority of the legislature, and to avoid situations which involve resort to the enforcement of its decisions in the face of popular opposition, are not intended to obscure the responsibility to Parliament in the last resort of the Governor in Council for the administration of reserved subjects and the right of His Majesty's Government and of the Secretary of State as a member thereof, to lay down and require the observance of any principles which they regard as having the support of Parliament and in the last resort of the British electorate.

Transfer of Control.—With regard to transferred subjects the position is very different. Here there has been an actual transfer of control from the British elector and the British Parliament to the elector and the Legislative Council in the Indian province. The provincial subjects of administration are grouped into portfolios, and just as each member of the Executive Council has charge of a portfolio consisting of a specified list of "reserved" subjects or "departments," so each Minister is directly responsible for the administration of those particular transferred "departments" which are included in his portfolio. But his responsibility lies, not, as in the case of a member of the Executive Council, to the Government of India, the Secretary of State and Parliament, but to the Provincial Legislative Council of which he is an elected member and from which he is selected by the Governor as commanding or likely to command the support of the majority of that body. He holds office during the Governor's pleasure, but his retention of office is contingent on his ability to retain the confidence not only of the Governor, but also of the Legislative Council, upon whose vote he is directly dependent for his salary. Further, the control of the Legislative Council over transferred subjects, both as regards supplies and legislation, is almost entirely free from the restrictions just noticed which necessarily qualify its control over the "reserved" subjects. It is thus within the power of the Provincial Council to insist on the pursuit of a policy of its own choice in the administration of transferred subjects by withdrawing its confidence from a Minister who departs from that policy and bestowing it only on a successor who will follow its mandate: and this power is dependent on the provincial elector in virtue of his freedom to control the composition of the Legislative Council by the use which he makes of his vote. No doubt this statement requires some qualification before it can be accepted as literally accurate, for, technically, the authority charged with the administration of transferred subjects is "*the Governor acting with Ministers* appointed under this Act," not the Ministers acting on their own initiative, and, further the Governor, who is not, of course, subject to removal from office by the Legislative Council, is charged personally with responsibility for the peace and tranquillity of his province, and would be entitled, and indeed bound, to recommend the removal of a department from the transferred list if he found the legislature bent on pursuing a policy in its administration which, in his judgment, was incompatible

with the maintenance of peace and tranquillity; yet the powers of control vested in the Legislative Council over the transferred sphere are undoubtedly great, and it was the opinion at all events of the Joint Select Committee that legislature and Ministers should be allowed to exercise them with the greatest possible freedom. "If after hearing all the arguments," observed the Committee, "Ministers should "decide not to adopt his advice, then in the "opinion of the Committee the Governor should "ordinarily allow Ministers to have their way, "fixing the responsibility upon them, even if "it may subsequently be necessary for him to "vote any particular piece of legislation. It "is not possible but that in India, as in all other "countries, mistakes will be made by Ministers "acting with the approval of a majority of the "Legislative Council, but there is no way of "learning except through experience and "the realisation of responsibility."

Provision of Funds.—The terms of the Act leave the apportionment of the provincial revenues between the two halves of the executive for the financing of reserved and transferred subjects respectively to be settled by rules, merely providing that rules may be made "for "the allocation of revenues or moneys for the "purpose of such 'administration' *i.e.*, the "administration of transferred subjects by the "Governor acting with Ministers". Probably the best description available of the method adopted by the rules for the settlement of this matter is the recommendation of the Joint Select Committee whose proposals have been followed with one modification only to enable the Governor to revoke at any time, at the desire of his Council and Ministers an "order of allocation" or to modify it in accordance with their joint wishes. The passage is as follows:—

"The Committee have given much attention to the difficult question of the principle on which the provincial revenues and balances should be distributed between the two sides of the provincial governments. They are confident that the problem can readily be solved by the simple process of common sense and reasonable give-and-take, but they are aware that this question might, in certain circumstances, become the cause of much friction in the provincial government, and they are of opinion that the rules governing the allocation of these revenues and balances should be framed so as to make the existence of such friction impossible. They advise that, if the Governor, in the course of preparing either his first or any subsequent budget, find that there is likely to be a serious or protracted difference of opinion between the Executive Council and his Ministers on this subject he should be empowered at once to make an allocation of revenue and balances between the reserved and transferred subjects which should continue for at least the whole life of the existing Legislative Council. The Committee do not endorse the suggestion that certain sources of revenue should be allocated to reserved and certain sources to transferred subjects, but they recommend that the Governor should allocate a definite proportion of the revenue, say, by way of illustration, two-thirds to reserved and one-third to transferred subjects, and similarly a proportion, though not necessarily the same fraction of the balances. If the Governor desires assistance in making the allocation, he should be allowed at his discretion to refer the question to be decided to such authority as the Governor-General shall appoint. Further, the Committee are of opinion that it should be laid down from the first that, until an agreement which both sides of the Government will equally support has been reached, or until an allocation has been made by the Governor, the total provisions of the different expenditure heads in the budget of the province for the preceding financial year shall hold good.

The Committee desire that the relation of the two sides of the Government in this matter as in all others, should be of such mutual sympathy that each will be able to assist and influence for the common good the work of the other, but not to exercise control over it. The budget should not be capable of being used as a means for enabling Ministers or a majority of the Legislative Council to direct the policy of reserved subjects; but on the other hand the Executive Council should be helpful to Ministers in their desire to develop the departments entrusted to their care. On the Governor personally will devolve the task of holding the balance between the legitimate needs of both sets of his advisers."

THE CENTRAL GOVERNMENT.

The structural changes made by the Act of 1919 in the system of government outside the nine "Governors provinces" are of comparatively minor scope, though the spirit of the Act requires, as has already been shown, considerable modification of the relationship hitherto subsisting between the Provincial Governments on the one hand and the Government of India and the Secretary of State in Council on the other. The only concrete changes made in the constitution of the Central Government are the removal of the statutory bar to the appointment of more than six members of the Governor-General's Executive Council (which, however, has had the far-reaching consequence that three of the eight members of the Council are now Indians), and the reconstitution in a much more enlarged representative and independent form of the central legislature. It has already been observed that this body was, in origin, like all other legislative bodies in India, the Governor-General's Executive Council with the addition of certain "additional members" appointed to assist the Executive Council in the formulation of legislation. Despite its steady growth in size and influence, and despite the introduction of the elective system, the existence of "additional members," who of course under Lord Morley's Act greatly preponderated in numbers over the members proper, *i.e.*, the Executive Councillors, still persisted up to the passing of the Act of 1919. That Act, however, has entirely remodelled the "Indian Legislature," as it is now called, which has become, like the Legislative Council in a Governor's province a legislature with all the inherent powers ordinarily attributed to such a body save such

as are specifically withheld by the terms of the Act. It consists of two Chambers. The "Council of State" contains 60 members, of whom 34 are elected (including one member to represent Berar, who, though technically nominated, is nominated as the result of elections held in Berar) and 26 nominated, of whom not more than 20 may be officials. The "Legislative Assembly" consists of 144 members, of whom 104 are elected (including in the case of the Council of State, one Berar member who, though actually elected, as technically a nominee). Of the 40 nominated members, 26 are required to be officials. The members of the Governor-General's Executive Council are not *ex-officio* members of either Chamber, but each of them has to be appointed a member of one or other Chamber, and can vote only in the Chamber of which he is a member. Any member of the Executive Council may, however, speak in either Chamber. The President of the Upper Chamber is a nominee of the Governor-General, as also, for the first four years after the constitution of the Chamber, is the President of the Legislative Assembly. But after that period the Lower Chamber is to elect its own President, and it elects its own Deputy-President from the outset. The normal lifetime of each Council of State is five years, and of each Legislative Assembly three years; but either Chamber, or both simultaneously, may be dissolved at any time by the Governor-General.

Election.—The method of election for both Chambers is direct, and although the number of electors is considerably smaller than for the Provincial Councils, it is a great advance on the very restricted and for the most part indirect franchise established under the Act of 1909 for the unicameral central legislature which no longer exists. Generally speaking, the electoral scheme for the Lower Chamber is on the same model as that for the Provincial Councils already described except that, *firstly*, the property qualification for voters (and consequently for candidates) is higher in order to obtain manageable constituencies, and past service with the colours is not *per se* a qualification for the franchise, and *secondly*, that the constituencies necessarily cover a considerably larger area than constituencies for the Provincial Council. The distribution of seats in both Chambers, and the arrangement of constituencies, are on a provincial basis; that is a fixed number of the elective seats in each Chamber is assigned to representatives of each province, and these representatives are elected by constituencies covering an assigned area of the province.

The following table shows the allotment of the elective seats:—

	Legislative Assembly.	Council of State.
Madras	16	5
Bombay	16	6
Bengal	17	6
United Provinces ..	16	5
Punjab	12	4
Bihar and Orissa ..	12	3
Central Provinces ..	6	2
Assam	4	1
Burma	4	2
Delhi	1	..
	104	34

Since the area which returns perhaps 80 members to a Provincial Council is the same as the area which returns perhaps 12 members to the Legislative Assembly—namely, the entire province in each case—it follows that on the direct election system this area must be split into constituencies which are much larger than the constituencies for the local Councils, and just as it is generally correct to say that the normal area unit for those rural constituencies for the latter which are arranged on a territorial basis is the district, it may be said that the normal area unit in the case of the Legislative Assembly is the Division (the technical term for the administrative group of districts controlled by a Divisional Commissioner).

The Franchise.—The general result of the first franchise arrangements under the Act is thus that there is in each province a body of electors qualified to vote for, and stand for election to, the Provincial Council, and that a selected number of these voters are qualified to vote for and stand for election to those seats in the Legislative Assembly which are assigned to the province. The qualifications for candidature for the Legislative Assembly are the same in each province, *mutatis mutandis*, as for candidature for the Provincial Council, except that in all provinces, so long as the candidate can show that he resides somewhere within the province, no closer connection with his particular constituency is insisted upon.

The franchise for the Council of State differs in character from that for the Provincial Council and the Legislative Assembly. The concern of the framers of the Act and rules was to secure for the membership of this body a character as closely as possible approximating to a "Senate of Elder Statesmen" and thus to constitute a body capable of performing the function of a true revising Chamber. With this object, in addition and as an alternative to a high property qualification—adopted as a rough and ready method of enfranchising only persons with a stake in the country—the rules admit as qualifications certain personal attributes which are likely to connote the possession of some past administrative experience or a high standard of intellectual attainment. Examples of these qualifications are past membership of either Chamber of the Legislature as now constituted, or of its predecessor, or of the Provincial Council, the holding of high office in local bodies (district boards, municipalities and corporations), membership of the governing bodies of Universities, and the holding of titles conferred in recognition of Indian classical learning and literature.

Powers.—The powers and duties of the Indian legislature differ but little in character within the "central" sphere from those of the provincial Councils within their provincial sphere, and it has acquired the same right of voting supplies for the Central Government. But as no direct attempt has yet been made to introduce responsible government at the centre, the step in that direction having been avowedly confined to the provinces and as consequently

the Executive Government of India remains legally responsible as a whole for the proper fulfilment of its charge to the Secretary of State and Parliament, it follows that the powers conferred on provincial Governors to disregard an adverse vote of the Legislative Council on legislation or supplies are, as conferred on the Governor-General in his relationship with the Indian Legislature, less restricted in their operation than in the provinces; that is to say, they cover the whole field and are not confined in their application to categories of subjects.

THE INDIA OFFICE.

The Act makes no structural changes in the part played by the India Office in the administration of Indian affairs. Slight alterations have been effected in the number and tenure of office of the members of the Secretary of State's Council, and some relaxations have been made in the statutory rigidity which formerly bound their procedure and that of the Office in general. But provisions now exist which will undoubtedly as time goes on have a material effect on the activities of the Office as it is now constituted. A High Commissioner for India has been appointed for the purpose of taking over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative supervision and control. The process of separation of staff and functions for the purpose of this transfer will necessarily be somewhat slow, but a substantial beginning has been made by handing over to the direct control of the High Commissioner the large departments which are concerned with the ordering and supply of stores and stationery in England for Government use in India, with the payment of pensions to retired members of Indian services resident in the United Kingdom, and with the assistance of Indian students in England. Concurrently with this change, it is now possible to defray from British revenues the salaries of the Secretary of State and of the Parliamentary Under-Secretary, and that portion of the cost of salaries of India Office staff and general maintenance which is attributable to the exercise of its administrative as distinct from purely agency functions.

In due course the apportionment to British estimates will be the cost of the India Office as it exists after the transfer of functions to the High Commissioner has been completely effected; then the salaries of the High Commissioner and his staff will be the only expenses in the United Kingdom chargeable to Indian revenues. Until that time arrives, however, an estimate was the only basis for settlement, and for five years from 1920-21, the cost of the India Office payable from British revenues has been fixed at 136,500*l*., which includes the salaries of the Secretary of State and of the Parliamentary Under-Secretary, and a contribution of 40,000*l*., which has for some years been made by the Treasury towards Indian expenditure, as the result of the recommendations of the Welby Commission.

PERSONNEL AND PROCEDURE.

The Governor-General and the "Executive" members of his Council are appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it at five years. There are seven Executive Members of Council. These Members hold respectively the portfolios of Education, Health and Land; Home; Finance; Commerce; Industries and Labour; Law. The Viceroy acts as his own member in charge of Foreign affairs. Railways are administered by a Chief Commissioner, with the assistance of a Railway Board; and are for administrative purposes grouped under the ægis of the Commerce Department. The Commander-in-Chief may also be and in practice always is, an "Ordinary" member of the Council. He holds charge of the Army Department. The Governors of Madras, Bombay and Bengal become "extraordinary" members if the Council meets within their Presidencies. The Council may assemble at any place in India which the Governor-General appoints in practice it meets only in Delhi and Simla.

In regard to his own Department each Member of Council is largely in the position of a Minister of State, and has the final voice in ordinary departmental matters. But any question of special importance, and any matter in which it is proposed to over-rule the views of a Local Government; must ordinarily be referred to the Viceroys. Any matter originating in one department which also affects another must be referred to the latter, and in the event of the Departments not being able to agree, the case is referred to the Viceroy. The Members of Council meet periodically as a Cabinet—ordinarily once or twice a week—to discuss questions which the Viceroy desires to put before them, or which a member who has been over-ruled by the Viceroy has asked to be referred to Council. If there is a difference of opinion in the Council the decision of the majority ordinarily prevails, but the Viceroy can over-rule a majority if he considers that the matter is of such grave importance as to justify such a step. Each departmental office is in the subordinate charge of a Secretary, whose position corresponds very much to that of a permanent Under-Secretary of State in the United Kingdom; but with these differences—that the Secretary is present though does not speak, at Council meetings at which cases under his cognisance are discussed: that he attends on the Viceroy, usually once a week, and discusses with him all matters of importance arising in his Department; that he has the right of bringing to the Viceroy's special notice any case in which he considers that the Viceroy's concurrence should be obtained to action proposed by the Departmental Member of Council; and that his tenure of office is usually limited to three years. The Secretaries have under them Deputy, Under and Assistant Secretaries, together with the ordinary clerical establishments. The Secretaries and Under-Secretaries are often, though by no means exclusively, members of the Indian Civil Service. The Government of India has no Civil Service of its own as distinct from that of the Provincial Governments, and officers serving under the Government of India are borrowed from the Provinces, or, in the case of Specialists, recruited direct by contract.

THE DIVISION OF FUNCTIONS.

The keynote of the scheme is effective provincial autonomy and the establishment of an immediate measure of responsibility in the provinces all of which are raised to the status of Governors in Council. This demanded a sharp division between Imperial and Provincial functions. The following subjects are reserved to the Government of India, with the corollary that all others vest in the Provincial Governments:—

1. (*a*) Defence of India, and all matters connected with His Majesty's Naval, Military, and Air Forces in India, or with His Majesty's Indian Marine Service or with any other force raised in India, other than military and armed police wholly maintained by local Governments.

(*b*) Naval and military works cantonments.

2. External relations, including naturalisation and aliens, and pilgrimages beyond India.

3. Relations with States in India.

4. Political charges.

5. Communications to the extent described under the following heads, namely:—

(*a*) railway and extra-municipal tramways in so far as they are not classified as provincial subjects under entry 6 (*d*) of Part II of this Schedule;

(*b*) aircraft and all matters connected therewith; and

(*c*) inland waterways, to an extent to be declared by rule made by the Governor-General in Council or by or under legislation by the Indian legislature.

6. Shipping and navigation, including shipping and navigation on inland waterways in so far as declared to be a central subject in accordance with entry 5 (*c*).

7. Light-houses (including their approaches) beacons, lightships and buoys.

8. Port quarantine and marine hospitals.

9. Ports declared to be major ports by rule made by the Governor-General in Council or by or under legislation by the Indian legislature.

10. Posts, telegraph and telephones, including wireless installations.

11. Customs, cotton excise duties, income-tax, salt, and other sources of all-India revenues.

12. Currency and coinage.

13. Public debt of India.

14. Savings Banks.

15. The Indian Audit Department and excluded Audit Departments, as defined in rules framed under section 96-D (1) of the Act.

16. Civil law, including laws regarding status, property, civil rights and liabilities and civil procedure.

17. Commerce, including banking and insurance.

18. Trading companies and other associations.

19. Control of production, supply and distribution of any articles in respect of which control by a central authority is declared by rule made by the Governor-General in Council or by or under legislation by the Indian legislature to be essential in the public interest.

20. Development of industries, in cases where such development by a central authority is declared by order of the Governor-General in Council, made after consultation with the local Government or local Governments concerned expedient in the public interest.

21. Control of cultivation and manufacture of opium, and sale of opium for export.

22. Stores and stationery, both imported and indigenous, required for Imperial Departments.

23. Control of petroleum and explosives.
24. Geological survey.

25. Control of mineral development, in so far as such control is reserved to the Governor-General in Council under rules made or sanctioned by the Secretary of State, and regulation of mines.

26. Botanical Survey.
27. Inventions and designs.
28. Copyright.

29. Emigration from, and immigration into British India, and inter-provincial migration.

30. Criminal law, including criminal procedure.

31. Central police organisation.
32. Control of arms and ammunition.

33. Central agencies and institutions for research (including observatories), and for professional or technical training or promotion of special studies.

34. Ecclesiastical administration including European cemeteries.
35. Survey of India.
36. Archæology.
37. Zoological Survey.
38. Meteorology.
39. Census and statistics.
40. All-India services.

41. Legislation in regard to any provincial subject in so far as such subject is in Part II of this Schedule stated to be subject to legislation by the Indian legislature, and any powers relating to such subject reserved by legislation to the Governor-General in Council.

42. Territorial changes, other than inter-provincial, and declaration of law in connection therewith.

43. Regulation of ceremonial, titles, orders, precedence, and civil uniform.

44. Immovable property acquired by, and maintained at the cost of, the Governor-General in Council.

45. The Public Service Commission.

GOVERNMENT OF INDIA.

VICEROY AND GOVERNOR-GENERAL OF INDIA.

(*f*) Afterwards (by creation) Earl Canning.

NOTE.—The Governor-General ceased to be the direct Head of the Bengal Government from the 1st May, 1854, when the first Lieutenant-Governor assumed office. On 1st April 1912, Bengal was placed under a separate Governor and the appointment of Lieutenant-Governor was abolished.

VICEROYS AND GOVERNORS-GENERAL OF INDIA.

Name.	Assumed charge of office.
Viscount Canning, P.C. (*a*) ..	1 Nov. 1858
The Earl of Elgin and Kincardine, KT., G.C.B., P.C.	12 March 1862
Major-General Sir Robert Napier, K.C.B. (*b*) (*offg.*)	21 Nov. 1863
Colonel Sir William T. Denison, K.C.B. (*offg.*)	2 Dec. 1863
The Right Hon. Sir John Lawrence, Bart, G.C.B., K.C.S.I. (*c*) ..	12 Jan. 1864
The Earl of Mayo, K.P.	12 Jan. 1869
John Strachey (*d*) (*offg.*) ..	9 Feb. 1872
Lord Napier of Merchistoun, KT. (*e*) (*offg.*)	23 Feb. 1872
Lord Northbrook, P.C. (*h*) ..	3 May 1872
Lord Lytton, G.C.B. (*g*)	12 Apl. 1876
The Marquess of Ripon, K.G., P.C.	8 June 1880
The Earl of Dufferin, K.P., G.C.B., G.C.M.G., P.C. (*i*)	13 Dec. 1884
The Marquess of Lansdowne, G.C. M.G.	10 Dec. 1888
The Earl of Elgin and Kincardine, P.C.	27 Jan. 1894
Baron Curzon of Kedleston, P.C.	6 Jan. 1899
Baron Ampthill (*offg.*)	30 Apl. 1904
Baron Curzon of Kedleston P.C. (*j*)	13 Dec. 1904
The Earl of Minto, K. G., P.C., G.C. M.G.	18 Nov. 1905
Baron Hardinge of Penshurst, P.C., G.C.B., G.C.M.G., G.C.V.O., I.S.O. (*j*)	23 Nov. 1910
Lord Chelmsford..	Apl. 1916
Marquess of Reading	Apl. 1921
Baron Irwin	Apl. 1926
The Earl of Willingdon.. ..	Apl. 1931

(*a*) Created Earl Canning, 21 May 1859.
(*b*) Afterwards (by creation) Baron Napier of Magdala.
(*c*) Afterwards (by creation) Baron Lawrence.
(*d*) Afterwards Sir John Strachey, G.C.S.I., C.I.E.
(*e*) Afterwards (by creation) Baron Napier of Ettrick.
(*f*) Afterwards (by creation) Earl of Northbrook.
(*g*) Created Earl of Lytton, 28 April 1880.
(*h*) Created Marquis of Dufferin and Ava, 12 Nov. 1888.
(*i*) Created an Earl .. .. June 1911.
(*j*) During tenure of office, the Viceroy is Grand Master and First and Principal Knight of the two Indian Orders (G.M.S.I. and G.M.I.E.) On quitting office, he becomes G.C.S.I. and G.C.I.E.; with the date of his assumption of the Viceroyalty.

The Imperial Legislatures.

The gradual evolution of the Indian constitution is fully traced in the article on "The Government of India," which precedes this; so also are the great changes made by the Reform Act of 1919. For the purposes of easy reference the powers of the Legislatures, as well as the special powers reserved to the Governor-General for the discharge of his responsibilities, which are fully set out in the Act, are reproduced below:—

21. (1) Every Council of State shall continue for five years, and every Legislative Assembly for three years, from its first meeting.

Provided that—

(*a*) either chamber of the legislature may be sooner dissolved by the Governor-General and

(*b*) any such period may be extended by the Governor-General if in special circumstances, he so thinks fit; and

(*c*) after the dissolution of either chamber the Governor-General shall appoint a date not more than six months, or with the sanction of the Secretary of State, not more than nine months after the date of dissolution for the next session of that chamber.

22. (1) An official shall not be qualified for election as a member of either chamber of the Indian legislature, and, if any non-official member of either chamber accepts office in the service of the Crown in India his seat in that chamber shall become vacant.

(4) Every member of the Governor-General's Executive Council shall be nominated as a member of one chamber of the Indian legislature, and shall have the right of attending in and addressing the other chamber, but shall not be a member of both chambers.

24. (3) If any Bill which has been passed by one chamber is not, within six months after the passage of the Bill by that chamber, passed by the other chamber either without amendments or with such amendments as may be agreed to by the two chambers, the Governor-General may in his discretion refer the matter for decision to a joint sitting of both chambers, Provided that standing orders made under this section may provide for meetings of members of both chambers appointed for the purpose, in order to discuss any difference of opinion which has arisen between the two chambers.

(4) Without prejudice to the powers of the Governor-General under section sixty-eight of the principal Act, the Governor-General may where a Bill has been passed by both chambers of the Indian legislature, return the Bill for reconsideration by either chambers.

(7) Subject to the rules and standing orders affecting the chamber, there shall be freedom of speech in both chambers of the Indian legislature. No person shall be liable to any proceeding in any court by reason of his speech or vote in either chamber, or by reason of anything contained in any official report of the proceedings of either chamber.

25. INDIAN BUDGET:—(1) The estimated annual expenditure and revenue of the Governor-General in Council shall be laid in the form of a statement before both chambers of the Indian legislature in each year.

(2) No proposal for the appropriation of any revenue or moneys for any purpose shall be made except on the recommendation of the Governor-General.

(3) The proposals of the Governor-General in Council for the appropriation of revenue or moneys relating to the following heads of expenditure shall not be submitted to the vote of the legislative assembly, nor shall they be open to discussion by either chamber at the time when the annual statement is under consideration, unless the Governor-General otherwise directs—

(*i*) interest and sinking fund charges on loans and

(*ii*) expenditure of which the amount is prescribed by or under any law; and

(*iii*) salaries and pensions of persons appointed by or with the approval of His Majesty or by the Secretary of State in Council; and

(*iv*) salaries of chief commissioners and judicial commissioners; and

(*v*) expenditure classified by the order of the Governor-General in Council as—

(*a*) ecclesiastical;

(*b*) political;

(*c*) defence.

(4) If any question arises whether any proposed appropriation of revenue of money, does or does not relate to the above heads the decision of the Governor-General on the question shall be final.

(5) The proposals of the Governor-General in Council for the appropriation of revenue or moneys relating to heads or expenditure not specified in the above heads shall be submitted to the vote of the legislative assembly in the form of demands for grants.

(6) The legislative assembly may assent or refuse its assent to any demand or may reduce the amount referred to in any demand by a reduction of the whole grant.

(7) The demands as voted by the legislative assembly shall be submitted to the Governor-General in Council, who shall, if he declares that he is satisfied that any demand which has been refused by the legislative assembly is essential to the discharge of his responsibilities, act as if it had been assented to, notwithstanding the withholding of such assent or the reduction of the amount therein referred to, by the legislative assembly.

(8) Notwithstanding anything in this section the Governor-General shall have power, in cases of emergency, to authorise such expenditure as may, in his opinion, be necessary for the safety or tranquillity of British India or any part thereof.

26. EMERGENCY POWERS:—(1) Where either chamber of the Indian legislature refuses leave to introduce or fails to pass in a form recommended by the Governor-General any Bill, the Governor-General may certify that the passage of the Bill is essential for the safety, tranquillity or interests of British India or any part thereof, and thereupon—

(*a*) if the Bill has already been passed by the other chamber, the Bill shall, on signature by the Governor-General, notwithstanding that it has not been consented to by both chambers, forthwith become an Act of the Indian legislature in the form of the Bill as originally introduced or proposed to be introduced in the Indian legislature, or (as the case may be) in the form recommended by the Governor-General; and

(*b*) if the Bill has not already been so passed, the Bill shall be laid before the other chamber, and, if consented to by that chamber in the form recommended by the Governor-General, shall become an Act as aforesaid on the signification of the Governor-General's assent, or, if not so consented to shall, on signature by the Governor-General, become an Act as aforesaid.

(2) Every such Act shall be expressed to be made by the Governor-General and shall, as soon as practicable after being made, be laid before both Houses of Parliament, and shall not have effect until it has received His Majesty's assent, and shall not be presented for His Majesty's assent until copies thereof have been laid before each House of Parliament for not less than eight days on which that House has sat; and upon the signification of such assent by His Majesty in Council and the notification thereof by the Governor-General, the Act shall have the same force and effect as an Act passed by the Indian legislature and duly assented to:

Provided that, where in the opinion of the Governor-General a state of emergency exists which justifies such action, the Governor-General may direct that any such Act shall come into operation forthwith, and thereupon the Act shall have such force and effect as aforesaid, subject, however, to disallowance by His Majesty in Council.

27. SUPPLEMENTAL PROVISIONS:—(1) In addition to the measures referred to in sub-section (2) of section sixty-seven of the principal Act, as requiring the previous sanction of the Governor-General it shall not be lawful without such previous sanction to introduce at any meeting of either chamber of the Indian legislature any measure—

(*a*) regulating any provincial subject, or any part of a provincial subject, which has not been declared by rules under the principal Act to be subject to legislation by the Indian legislature;

(*b*) repealing or amending any Act of a local legislature;

(*c*) repealing or amending any Act or ordinance made by the Governor-General.

(2) Where in either chamber of the Indian legislature any Bill has been introduced or is proposed to be introduced, or any amendment to a Bill is moved, or proposed to be moved, the Governor-General may certify that the Bill or any clause of it, or the amendment affects the safety or tranquillity of British India, or any part thereof, and may direct that no proceedings, or that no further proceedings, shall be taken by the chamber in relation to the Bill, clause, or amendment and effect shall be given to such direction.

THE LEGISLATIVE ASSEMBLY.

President:—Sir R. K. Shanmukham Chetty, K.C.I.E.

Deputy President:—Mr. Abdul Matin Chaudhury.

A. ELECTED MEMBERS (104).

The Bombay Presidency.

The Bombay Presidency stretches along the west coast of India, from Sind in the North to Kanara in the South. It has an area of 123,623 square miles and a population of 23,040,506. Geographically included in the Presidency but under the Government of India is the first class Native State of Baroda, with an area of 8,164 square miles and a population of 2,443,007.

Baroda Population.

There are no States in political relations with the Government of Bombay, as they are all now under the Government of India.

The Presidency embraces a wide diversity of soil, climate and people. In the Presidency Proper are the rich plains of Gujarat, watered by the Nerbudda and the Tapti, whose fertility is so marked that it has long been known as the Garden of India. South of Bombay City the province is divided into two sections by the Western Ghats, a range of hills running parallel to the coast. Above Ghats are the Deccan Districts, south of these come the Karnatic districts. On the sea side of the Ghats is the Konkan, a rice-growing tract, intercepted by creeks which make communication difficult. Then in the far north is Sind, totally different from the Presidency Proper, a land of wide and monotonous desert except where irrigation from the Indus has brought abounding fertility.

The People.

The population varies as markedly as soil and climate. In Sind Mahomedans predominate. Gujarat has remained true to Hinduism although long under the dominion of powerful Mahomedan kings. Here there is an amplitude of caste divisions, and a people, who although softened by prosperity, are amongst the keenest trading races in the world. The Deccan peasant has been seasoned by adversity; the saying goes that the Deccan expects a famine one year in every three, and gets it; the population is much more homogeneous than in Gujarat, and thirty per cent. are Mahrattas. The Karnatic is the land of the Lingayets, a Hindu reforming sect of the twelfth century, and in the Konkan there is a large proportion of Christians. Four main languages are spoken, Sindi, Gujarati, Marathi and Kanarese, with Urdu a rough *lingua franca* where English has not penetrated. The main castes and tribes number five hundred.

Industries.

The principal industry is agriculture, which supports sixty-four per cent. of the population. In Sind the soils are wholly alluvial, and under the influence of irrigation produce yearly increasing crops of wheat and cotton. In Gujarat they are of two classes, the black cotton soil, which yields the famous Broach cottons, the finest in India, and alluvial, which under careful cultivation in Ahmedabad and Kaira makes splendid garden land. The dominant soil characteristic of the Deccan is black soil, which produces cotton, wheat, gram and millet; and in certain tracts rich crops of sugarcane. The Konkan is a rice land, grown under the abundant rains of the submontane regions, and in the south the Dharwar cotton vies with Broach as the best in India. There are no great perennial rivers suitable for irrigation, and the harvest is largely dependent upon the seasonal rainfall, supplemented by well irrigation. A chain of irrigation works, consisting of canals fed from great reservoirs in the region of unfailing rainfall in the Ghats, is gradually being completed, and this will ultimately make the Deccan immune to serious drought. More than any other part of India the Presidency has been scourged by famine and plague. The evils have not been unmixed, for tribulation has made the people more self-reliant, and the rise in the values of all produce, synchronising with a certain development of industry, has induced a considerable rise in the standard of living. The land is held on what is known as the ryotwari tenure, that is to say, each cultivator holds his land direct from Government under a moderate assessment, and as long as he pays this assessment he cannot be dispossessed.

Manufactures.

Whilst agriculture is the principal industry, others have no inconsiderable place. The mineral wealth of the Presidency is small and is confined to building stone, salt extracted from the sea, and a little manganese. But the handicrafts are widely distributed. The handloom weavers produce bright-coloured saris, and to a diminishing extent the exquisite kincobs of Ahmedabad and Surat. Bombay silverware has a place of its own, as well as the brass work of Poona and Nasik. But the tendency is to submerge the indigenous handicrafts beneath industry organised on modern lines. Bombay is the great centre in India of the textile trade. This is chiefly found in the headquarter city, Bombay.

Number of Looms in Bombay Island.	76,950
Number of Spindles in Bombay Island.	34,41,856
Number of hands employed in the Textile Industry in Bombay Island. (daily average.)	1,29,534
Consumption of Cotton by the Mills in Bombay Island .. .. (in candies of 784 lbs.)	4,60,365
Number of Spindles in Ahmedabad.	18,32,683
Number of Looms in Ahmedabad ..	42,503
Number of Spindles in Sholapore ..	3,19,304
Number of Looms in Sholapore ..	6,026
Number of Spindles in the Bombay Presidency (excluding Bombay Island)	30,01,633
Number of Looms in the Bombay Presidency (excluding Bombay Island)..	64,292

Great impetus has been given to Bombay industries by the provision of electric power generated fifty miles away on the Ghats, and the year 1919 witnessed a phenomenal flotation of new industrial companies of almost every description.

The recent political movement has given considerable impetus to indigenous industry particularly to the textile trade which has shown much expansion. About four mills are in the course of construction in Ahmedabad..

The situation of Bombay on the western sea-board in touch at once with the principal markets of India and the markets of the West has given Bombay an immense sea-borne trade. The older ports, Surat, Broach, Cambay and Mandvie, were famous in the ancient days, and their bold and hardy mariners carried Indian commerce to the Persian Gulf and the coasts of Africa. But the opening of the Suez Canal and the increasing size of ocean steamers have tended to concentrate it in modern ports with deep water anchorages, and the sea-borne trade of the Presidency is now concentrated at Bombay and Karachi, although attempts are being made to develop Mormugao in Portuguese territory into an outlet for the trade of the Southern Mahratta Country, and Port Okha as a port of considerable importance for Kathiawar and Gujarat.

Administration.

The Presidency is administered by a Governor and an Executive Council of two members, with the assistance of two Ministers. The exact change made in the functions of the Provincial Governments is indicated in the section on the Provincial Governments (*q. v.*) where a description is given of the division of the administration into two branches, the Reserved Subjects, administered by the Governor and his Council and the Transferred Subjects, administered by the Governor and his Ministers, the whole Government commonly meeting and acting as one. In another part of that section the division between Reserved and Transferred subjects is shown. This new form of administration under the Reform Act of 1919 came into operation in January 1921. All papers relating to public service business reach Government through the Secretariat, divided into seven main departments, each under a Secretary (*a*) Finance; (*b*) Revenue; (*c*) Home and Ecclesiastical (*d*) Political and reforms; (*e*) General and Educational; (*f*) Legal; (*g*) Public Works. The senior of the Civilian Secretaries is entitled the Chief Secretary. The Government is in Bombay from November to the end of May; and in Poona from June to November; but the Secretariat is always in Bombay. Under the Governor-in-Council the Presidency is administered by four Commissioners. The Commissioner in Sind has considerable independent powers. In the Presidency Proper there are Commissioners for the Northern Division, with headquarters at Ahmedabad; the Central Division at Poona; and the Southern Division at Belgaum. Each district is under a Collector, usually a Covenanted Civilian, who has under him one or more Civilians as Assistant Collectors, and one or more Deputy Collectors. A collectorate contains on an average from eight to ten talukas, each consisting of from one to two hundred villages, whose whole revenues belong to the State. The village officers are the patel, who is the head of the village both for revenue and police purpose; the talati or kulkarni, clerk and accountant; the messenger and the watchman. Over each Taluka or group of villages is the mamlatdar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukas. The Collector and Magistrate is over the whole District. The Commissioners exercise general control over the Districts in their Divisions.

Justice.

The administration of justice is entrusted to the High Court sitting in Bombay, and comprising a Chief Justice, who is a barrister, and nine puisne judges, either Civilians, Barristers, or Indian lawyers. In Sind the Court of the Judicial Commissioner (The Judicial Commissioner and three Additional Judicial Commissioners) is the highest court of civil and criminal appeal. The growing importance of Karachi and Sind has, however, necessitated the raising of the status of the Judicial Commissioner's Court and the passing of the Sind Courts Act in August 1926, which contemplates the creation of a Chief Court for Sind with a Chief Judge and three or more Puisne Judges. The Act, however, has not yet been put into effect owing to financial difficulties. Of the lower civil courts the court of the first instance is that of the Subordinate Judge recruited from the ranks of the local lawyers. The Court of first appeal is that of the District or Assistant Judge, or of a first class subordinate judge with special powers. District and Assistant Judges are Indian Civilians, or members of the Provincial Service or the Bar. In cases exceeding Rs. 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge and from the decision of the District Judge in all original suits lies to the High Court. District and Assistant Judges exercise criminal jurisdiction throughout the Presidency but original criminal work is chiefly disposed of by the Executive District Officers and Resident and City Magistrates. Capital sentences are subject to confirmation by the High Court. In some of the principal cities Special Magistrates exercise summary jurisdiction (Bombay has six Presidency Magistrates, as well as Honorary Magistrates exercising the functions of English Justices of the Peace) and a Court of Small Causes, corresponding to the English County Courts.

Local Government.

Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former exercising authority over a District or a Taluka, and the latter over a city or town. These bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements. Their funds are derived from cesses on the land revenue, the toll, ferry funds and local taxes. The tendency of recent years has

been to increase the elective and reduce the nominated element, to allow these bodies to elect their own chairmen, whilst larger grants have been made from the general revenues for water supply and drainage.

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self-Government in the Presidency. The Act provides more adequate basis for Municipal Administration in the larger cities of the Bombay Presidency. The larger municipalities are now styled as Municipal Boroughs which are now 29 in number. The executives of these Borough Municipalities are invested with larger powers than hitherto exercised. Another important change introduced by the Act was the extension of municipal franchise to occupiers of dwellings or buildings with annual rental values of Rs. 12 or with capital value of not less than Rs. 200.

Public Works.

The Public Works Department is under the control of two Chief Engineers who act as Secretaries to the Government; one for Roads, Buildings, Railways, etc., and the other for Irrigation. Under them are Superintending Engineers in charge of Circles and Executive Engineers in charge of divisions, the Consulting Architect and the Electrical Engineer. The chief irrigation works are in Sind and consist of a chain of canals fed by the annual inundations from the Indus. The Lloyds Barrage and canals project which was inaugurated in 1923 is the greatest Irrigation Scheme in the world and is designed to ensure the vast areas of fertile land in Sind a regular and constant supply of water. It will enable about 6 million acres of crops to be irrigated annually, *i.e.*, about as much area irrigated in Egypt. The scheme is not only vital to the future of Sind but of indirect benefit to the whole of India. The whole scheme is estimated to cost over 15 million sterling or 20 crores of rupees. The Barrage was formally opened by the Viceroy and Governor General of India on 13th January 1932. In the Presidency proper there is a chain of protective irrigation works, originating in reservoirs in the Ghat regions. The principal works are the Nira Canals fed by Lake Whiting impounded by the Lloyd Dam at Bhatgar, the Pravara Canals fed by Lake Arthur Hill, impounded by Wilson Dam at Bhandardara, the Mutha Canals fed by Lake Fife at Khadakvasla, the Godavari Canals fed by Lake Beale at Nandur Madhmeshwar and the Gokak Canal. The Mutha Canals and the Gokak Canal were completed in 1896-97, the Nira Left Bank Canal in 1905-06, the Godavari Canals in 1915-16 and the Pravara Canals in 1926-27. The Nira Right Bank Canal which has been under construction since 1912 is nearing completion. The Wilson Dam at Bhandardara the second highest yet constructed by Engineers the world over was opened by His Excellency the Governor on 10th December 1926. The Lloyd Dam at Bhatgar which is 5,333 feet in length, 190 feet in height and 124 feet in width was opened by H. E. Sir Leslie Wilson on 27th October 1928. It cost Rs. 172 lakhs. It is remarkable as being the largest Dam in volume hitherto constructed and contains 21½ million cubic feet of masonry. The Assuan Dam in Egypt is popularly supposed to be the largest Dam in existence but that contains 19 million cubic feet. It cost also nearly 50 per cent. more than the Lloyd Dam. An idea of the magnitute of the Lloyd Dam can be gathered from the fact that if a wall 6 feet high and 15 inches thick were constructed from the masonry in the Dam it would stretch a distance of 520 miles, say from Bombay to Nagpur. These projects will irrigate certain tracts most liable to famine.

Police.

The Police Force is divided into 3 categories, *viz.*, District Police, Railway Police and the Bombay City Police. The District and Railway Police in the Presidency proper are for the purpose of control under the Inspector-General of Police who is assisted by three Deputy Inspectors-General, of whom two are in charge of Ranges and the third is in charge of the Criminal Investigation Department and the Finger Print Bureau. District and Railway Police in Sind are under the Deputy Inspector-General of Police for Sind, subject to the control of the Commissioner-in-Sind. The executive management of the Police in each district and on Railways in the Presidency proper as well as in Sind is vested in a Superintendent of Police under the general direction of the Magistrate of the District concerned except in the case of the Railway Police. For the purposes of effective supervision over the investigation and prevention of crime, some of the larger districts are divided into one or more sub-divisions each under a Sub-Divisional Officer who is either an Assistant Superintendent of Police, or an Inspector of Police, a Deputy Superintendent of Police. Sub-Inspectors are the officers in charge of Police Stations and are primarily responsible under the law, for the investigation of offences reported at their Police Stations. Officers appointed directly to the posts of Assistant Superintendents of Police, Deputy Superintendents of Police, Inspectors and Sub-Inspectors undergo a course of training at the Central Police Training School at Nasik before being posted to Districts for executive duty. The Bombay City Police is a separate force under the Commissioner of Police who is directly responsible to Government.

Education.

Education is imparted partly through direct Government agency, and partly through the medium of grants-in-aid. Government maintain Arts Colleges at Bombay, Andheri, Poona, Ahmedabad and Dharwar; the Grant Medical College, the Poona College of Engineering, the Agricultural College, Veterinary College, School of Art, Law College and a College of Commerce. Most of the secondary schools are in private hands. The primary schools are maintained by Local Authorities, with a grant-in-aid. The Bombay Municipality is responsible for primary education in Bombay City (*q. v.*, Education).

The Quinquennial Report on Public Instruction in the Bombay Presidency for the years 1927-1932 reveals much information regarding the progress of education in recent years. The passing in 1923, of the Primary Education Act was perhaps the most important event in the history of Primary Education in the Bombay Presidency during the last 30 or 40

years whereby the control of Primary Education was transferred from the Department to the Local Authorities. Most of the Boards have prepared schemes for the expansion of education, some of them on a compulsory basis, and many boards have levied additional taxation but the finances of Government have not permitted them to perform to the full the part contemplated by the Act. The fact, however, must not be lost sight of that during the quinquennium the assignments of Government to Primary Education fell from Rs. 1,21,59,848 to Rs. 1,18,17,308 the decrease was mainly due to retrenchment in Government grants during 1931-32.

"Reports on Public instruction in this presidency during the last five or six years however point to the fact that there has been considerable decline in the efficiency of Primary Education since the transfer of control" says the Director of Public Instruction. "It will be seen from these reports that the factor which has militated more than any other against efficiency has been communalism.** The composition of the various District Local Boards has had its effect on the working of the Primary Education Act. The majority of School Boards which came into existence developed communal tendencies and this attitude influenced the selection of the supervising and teaching staff and their tranfers and promotions."

The quinquennium has been noticeable for the greater recognition given to the Educational needs of the backward classes especially in Primary Education and a very liberal system for these classes has been introduced by Government since 1924.

Lack of funds has cramped the activities of Government in the field of Primary and Secondary Education. Economy has been the dominating note of the Educational policy throughout the quinquennium. In view of the present financial stringency which precludes Government from providing additional funds for Secondary Education there would appear to be some grounds for raising the fees in Government Schools; but Government have decided not to take any action in this direction at present. In the case of Primary Education Government were compelled to apply a cut of 5 per cent. to the grants payable to local authorities in 1931-32. Since then it has become necessary to increase the cut to 20 per cent. So far from it being possible to provide the funds required for the expansion of Secondary and Higher Education, it has been necessary to excreise retrenchment, and that too in directions in which it could not be applied without educational loss. As one instance only, the Director of Public Instruction mentions the discontinuation of the scheme of Medical Inspection after it had been in existence for a year. Among the chief purposes for which additional funds are required, perhaps the most important is that for additional provision for Technical and Industrial Education, including the expansion of the College of Engineering and the establishment of a Technological institution of an advanced nature. The total expenditure on Education increased from Rs. 3,81,49,449 in 1926-27 to Rs. 3,99,27,898 in 1931-32 or an increase of 4.7 per cent. against 29.6 per cent. during the last quinquennium.

The total number of institutions increased during the quinquennium from 16,211 to 17,159. Recognised institutions increased by 1,145 to 15,929 while unrecognised institutions decreased by 197 to 1,230. Of the recognised institutions, 16 are Arts and 11 Professional Colleges and 689 Secondary Schools, 14,827 Primary Schools and 386 Special Schools.

The total number of recognised and unrecognised educational institutions during the year 1931-32, was 17,159 and the number of pupils 1,332,693.

Out of a total of 26,813 towns and villages 10,831 possessed schools, the average area served by each town or village with a school being 11.4 square miles. The percentage of male scholars under instruction in all kinds of institutions to the total male population was 8.9 while that of female scholars under instruction to the female population was 2.8 in 1931-32.

Hindu pupils in recognised and unrecognised institutions numbered 964,123, Muhammadans 252,679, Indian Christians 36,902, Parsis 17,051, Europeans and Anglo-Indians 5,235. The rest comprised 24,953 Jains, 1,325 Sikhs, and 1,470 Jews and others.

The total expenditure on education in 1931-32 was Rs. 399 lakhs, of which 47.5 per cent. was met from Government funds, 19.5 per cent. from Board funds, 20.3 per cent. from fees, and 12.7 per cent. from other sources. Primary schools absorbed over Rs. 205 lakhs, exclusive of expenditure on inspection, construction, and repairs.

The Educational Department is administered by a Director, with an Inspector in each Division and a Deputy or Assistant Inspector in each district.

Higher education in the Presidency is controlled by the Bombay University which was established in 1857. The constitution of the University has recently undergone, however, considerable changes in virtue of a new enactment known as the Bombay University Act of 1928. This Act altered the whole constitution of the University so as to make it adequately representative with a view to bringing into closer association with the public the industrial commercial and civic life of the people of the Presidency to enable it to provide greater facilities for higher education in all branches of learning including Technology and to undertake on a larger scale than heretofore post-graduate teaching and research, while continuing to exercise due control over the teaching given by colleges affiliated to it from time to time. The new University Department of Chemical Technology was formally inaugurated by His Excellency the Governor of Bombay on 15th November 1933. The authorities of the University, as now constituted, are chiefly the Chancellor, Vice-Chancellor, the Syndicate, the Academic Council and the Senate. The Senate consisting of fellows is the supreme governing body of the University. The number of fellows is 144 of whom 40 are nominated by the Chancellor and 11 are ex-officio. The Academic Council consisting of educational experts deals with all purely academical questions. This body works in collaboration with the Syndicate which is the principal executive of the University.

The principal educational institutions are:—

Government Arts Colleges—

Elphinstone College. Bombay, Principal, Mr. H. Hamill, M.A.

Ismail College, Andheri (Bombay). Principal, Dr. M. B. Rehman, M.A. (Punjab), Ph. D. (Cambridge).

Deccan College, Poona, Principal, Mr. E. A. Wodehouse.

Gujarat College, Ahmedabad, Principal G. Findlay Shirras, M.A., F.S.S. (Offg.)

Karnatak College, Dharwar, Principal, Mr. A. C. Farren.

Royal Institute of Science, Bombay. Principal, Dr. Thomas S. Wheeler, F.I.C., Ph.D., F.R.C.S.I.

Private Arts Colleges—

St. Xavier's, Bombay (Society of Jesus). Principal, Rev. Father Duhr, S.J.

Wilson College, Bombay (Scottish Mission). Principal, Rev. J. Mackenzie, M.A.

Fergusson College, Poona (Deccan Educational Society). Principal, G. S. Mahajani, M.A., B.Sc.

Baroda College, Baroda (Baroda State). Principal, S. G. Burrow, B.Sc.

Samaldas College, Bhavnagar (Bhavnagar State). Principal, Mr. T. K. Shahani, M.A.

Bahauddinbhai College, Junagadh State, Principal, Mr. Charles Saldanha.

Sir Parashurambhau College, Principal, R. D. Karmarkar, Poona.

M. T. B. Arts College, Suart, Principal, N. M. Shah.

D. J. Sind College, Karachi, Principal, S. B. Butani.

Sind National College, Hyderabad, Principal, B. R. Kumar.

Gokhale Education Society's H.P.T., Arts College, Nasik, Principal, T. A. Kulkarni.

Willingdon College, Kupwad (Sangli), Principal, P. M. Limaye.

Special Colleges—

Grant Medical College, Bombay (Government), Dean, Major S. L. Bhatia, I.M.S.

College of Engineering, Poona (Government), Principal, Mr. C. Graham Smith, O.B.E.

Agricultural College, Poona (Government), Principal, Dr. William Burns.

Chiefs' College, Rajkot, Principal, Mr. A. C. Miller, O.B.E.

College of Science, Ahmedabad.

Law College, Bombay. Principal, Mr. A. A. A. Fyzee, M.A., (Cantab.), Bar-at-Law.

College of Commerce. Bombay, Principal, Mr. M. J. Antia. (*Offg*).

Veterinary College, Bombay, Principal, Mr. V. R. Phadke, G.B.V.C., J.P.

Haffkine Institute, Bombay, Director, Lt. Col. Sahib Singh Sokhey, I.M.S., (Offg.).

Sir J. J. School of Art, Bombay (Government), Director, Mr. W. E. G. Solomon.,

Victoria Technical Institute, Bombay, Principal, G. W. Burley, D.Sc.

Private Professional Colleges—

Seth G. S. Medical College, Bombay, Principal, Dr. V. R. Khanolkar.

N.E.D. Civil Engineering College, Karachi Principal, Mr. G. W. Gokhale.

Law College, Poona, Principal, Mr. J. R. Gharpure.

Sir Lallubhai Shah Law College, Ahmedabad, Principal, Mr. D. S. Setna.

Sind Collegiate Board's Law College, Karachi, Principal, Mr. C. Lobo.

Medical.

The Medical Department is in the charge of the Surgeon-General who is a member of the I. M. S., and Public Health in that of the Director of Public Health, who is usually a non I.M.S. Officer. Civil Surgeons stationed at each district headquarters are responsible for the medical work of the district: whilst sanitationis entrusted to one of the Assistant Directors of Public Health. Four large hospitals are maintained by the Government in Bombay, and the accommodation in them has been recently increased by 300 beds in one hospital and 180 beds in another hospital. A number of beds in the Bombay City had to be closed during 1931-32 owing to shortage of funds. Well-equipped hospitals exist in all important up-country stations. Over 3,814,816 persons including 112,564 in-patients are treated during the year 1930. The Presidency contains 6 Lunatic Asylums and 16 institutions for the treatment of Lepers. Vaccination is carried out by a staff under the direction of the Director of Public Health. Sanitary work has received an immense stimulus from the large grants made by the Government from time to time.

Finance.

Under the Reform Scheme of 1919 Provincial Finance entered on a new phase. Before the passing of this Act Provincial finance was incorporated in Imperial Finance. The Provinces had certain heads of revenue of their own and other heads which they divided with the Government of India. By the new constitution a comparatively clean cut was made between the finances of the Government of India and those of the Provinces. Such revenues as they enjoy the Provinces enjoy in full, and in return they make cash contributions to the Government of India, fixed for a term of years. The general principle underlying this settlement is that those contributions shall gradually disappear. These contributions have now been remitted.

The financial situation in the Presidency has been one of the greatest difficulty during the year 1932-33. There has been estimated deficit of 27 lakhs during 1933-34. The difficulties have partly arisen on account of world factors over which Government has no control, but the latter is endeavouring to meet the situation by drastic economies and retrenchment. Government have set themselves that task of reconstruction and re-organisation so as to secure the greatest efficiency with the least cost in every branch of Public administration of the Presidency. Government have already secured a very considerable achievement in realising 28 lakhs a year as a result of orders passed on the recommendations of the Re-organisation Committee. A proposal to raise extra taxation by imposition of a succession duty was rejected by the Legislative Council.

Estimated Revenue for 1933-34.

PRINCIPAL HEADS OF REVENUE.

		Rs.
V	Land Revenue	4,82,42,000
VI	Excise	3,49,46,000

Governor and President-in-Council.

Capt. The Hon. Michael Herbert Knatchbull, M.C., 5th Baron Brabourne,

Personal Staff.

Private Secy.—H. R. Gould, C.I.E., I.C.S., J.P.

Mily. Secretary—Major H. C. Vaux, C.S.I. C.I.E., M.V.O., J.P.

Surgeon—Major P. A. Opie, M.B., R.A.M.C.

Aides-de-Camp.—J. G. Maxwell-Gumbleton, Esq. Indian Police; Lt. M. V. Milbank, the Coldstream Guards; Lieut. J. H. Alms, The Somerset Light Infantry; Lieut. I. D. Elliot, Royal Navy.

Hon. Aides-de-Camp.—Engineer Captain W. W. Collins, M.I.N.A., R.I.M; H. E. Butler, Esq., Dy. Comr. of Police, Bombay City; Meherban Shankarrao Parashramrao Ramchandra *alias* Appa Saheb Patwardhan, Chief of Jamkhandi; Honorary Captain Meherban Malojirao Mudhojirao *alias* Nana Saheb Naik Nimbalkar, Chief of Phaltan; Hony. Capt. Kumar Shri Naharsinghji of Baria; Sardar Ghulam Jilani Bijlikhan of Wai; Hony. Capt. Shaikh Yasin, Sardar Bahadur, I.D.S.M., late 110th Mahratta Light Infantry; Capt. F. W. Brett, Light Motor Petrol, Bombay Bn. A. F. I.

Commandant, H. E. the Governor's Bodyguard.—Captain T. C. Crichton, M.C., Hon. Lieut. 3rd Cavalry.

Indian Aide-de-Camp—Risaldar Hony. Lt. Natha Singh, I.D.S.M.

Members of Council and Ministers.

The Hon. Sir Gulam Husain Hidayatallah, K.C.S.I., B.A., LL.B., J.P., Finance and Revenue; The Hon'ble Mr. R. D. Bell, C.I.E., I.C.S., J.P., Home and General.

The Hon. Mr. D. B. Cooper, (Local Self-Govt.) and The Hon. Diwan Bahadur S. T. Kambli, B.A., LL.B., J.P., (Education).

The Local Self-Government portfolio includes, among other subjects, Medical Administration, Public Health, Sanitation, Forests, and Public Works (transferred). The Minister of (Education) also deals with the Civil Veterinary Department, Excise, Co-operative Societies and Agriculture.

SECRETARIES TO GOVERNMENT.

Chief Secretary, Political and Reforms Department.—C. W. A. Turner, C.I.E., I.C.S.

Home and Ecclesiastical Department.—R. M. Maxwell, C.S.I., C.I. E., I.C.S., J.P.

Revenue Department.—S. H. Covernton, M.A., I.C.S. (Offg.)

General and Educational Departments—H. E. Knight, I.C.S.

Finance Department.—C. G. Freke, I.C.S., J.P.

Legal Department and Remembrancer of Legal Affairs.—G. Davis, Bar-at-Law, I.C.S.

Public Works Department.—C. M. Lane, I.S.E., J.P.

Public Works Department, Joint Secretary—P. L. Bowers, C.I.E., M.C.

MISCELLANEOUS APPOINTMENTS.

Commissioner of Income Tax.—Khan Bahadur J. B. Vachha, C.I.E.

Director of Veterinary Services.—E. S. Farbrother, M.R.V. C.V.S., I.V.S.

Advocate-General—Sir Jamshedji Behramji Kanga, Kt., M.A., LL.B.

Inspector-General of Police—H. E. Turner. (Offg.)

Director of Public Instruction—W. Grieve, M.A., B.Sc.

Surgeon-General—Major General H. R. Nutt, I.M.S.
Oriental Translator—Abdul Kadir M. Hussein, J.P.
Chief Conservator of Forests—P. E. Aitchison.
Talukdari Settlement Officer—J. B. Irwin, I.C.S.
Inspector-General of Registration—J. P. Brander, I.C.S.
Director of Agriculture—Dr. W. Burns, D.S.C.
Registrar of Co-operative Societies—K. L. Punjabi, I.C.S.
Municipal Commissioner, Bombay—H. K. Kirpalani, I.C.S.
Vice-Chancellor, Bombay University—V. N. Chandavarkar, Bar-at-Law.
Registrar, Bombay University—S. R. Dongerkery, B.A., LL.B.
Commissioner of Police, Bombay— W. R. G. Smith.
Director of Public Health—Major A. Y. Dabholkar, I.M.S., (*Officiating.*)
Accountant-General—N. B. Dean, O.B.E., J.P.
Inspector-General of Prisons—Lt.-Col. E. E. Doyle, D.S.O., I.M.S.
Postmaster-General—C. D. Rae.
Collector of Salt Revenue, and Collector of Customs—M. Slade, I.C.S.
Commissioner of Excise—J. P. Brander, M.A., I.C.S.
Consulting Surveyor to Government—T. H. G. Stamper, F. S. I.
Registrar of Companies—H. C. B. Mitchell.
Commissioner of Labour and Director of Information:—J. F. Gennings, C.B.E., Bar-at-Law.
Sheriff—The Honorable Sir Sirdar Haji Suleman Cassim Mitha, C.I.E., O.B.E.

Governors of Bombay.

Sir Abraham Shipman 1662
Died on the island of Anjediva in Oct. 1664
Humfrey Cooke 1665
Sir Gervase Lucas 1666
Died, 21st May 1667.
Captain Henry Garey (*Officiating*) .. 1667
Sir George Oxenden 1668
Died in Surat, 14th July 1669.
Gerald Aungier 1669
Died in Surat, 30th June 1677.
Thomas Rolt 1677
Sir John Child, Bart. 1681
Bartholomew Harris 1690
Died in Surat, 10th May 1694.
Daniel Annesley (*Officiating*) 1694
Sir John Gayer 1694
Sir Nicholas Waite 1704
William Aislabie 1708
Stephen Strutt (*Officiating*) 1715
Charles Boone 1715
William Phipps 1722
Robert Cowan 1729
Dismissed.
John Horne
Stephen Law 1734
John Geekie (*Officiating*) 1739
William Wake 1742
Richard Bourchier 1742
Charles Crommelin 1750
Thomas Hodges 1760
Died, 23rd February 1771 1767
William Hornby
Rawson Hart Boddam 1771
Rawson Hart Boddam 1784
Andrew Ramsay (*Officiating*) 1785
Major-General William Medows 1788
Major-General Sir Robert Abercromby, K.C.B. (*a*). 1788
George Dick (*Officiating*) 1790
John Griffith (*Officiating*) 1792
Jonathan Duncan 1795
Died, 11th August 1811.
George Brown (*Officiating*) 1795
Sir Evan Nepean, Bart. 1811
The Hon. Mountstuart Elphinstone .. 1812
Major-General Sir John Malcolm, G.C.B. .. 1819
Lieut.-General Sir Thomas Sidney Beckwith, K.C.B. .. 1827
Died, 15th January 1831. .. 1830
John Romer (*Officiating*) 1831
The Earl of Clare 1831
Sir Robert Grant, G.C.H. 1831
Died, 9th July 1838.
James Farish (*Officiating*) 1835
Sir J. Rivett-Carnac, Bart. 1838
Sir William Hay Macnaghten, Bart. (*b*) 1839
George William Anderson (*Officiating*) .. 1841
Sir George Arthur, Bart., K.C.H. 1841
Lestock Robert Reid (*Officiating*) .. 1842
George Russell Clerk 1846
Viscount Falkland 1847
Lord Elphinstone, G.C.H., P.C. 1848
Sir George Russell Clerk, K.C.B. (2nd time) 1853
Sir Henry Bartle Edward Frere, K.C.B. 1860
The Right Hon. William Robert Seymour Vesey FitzGerald. 1862
Sir Philip Edmond Wodehouse, K.C.B. .. 1867
Sir Richard Temple, Bart., K.C.S.I. .. 1872
Lionel Robert Ashburner, C.S.I. (*Acting*) .. 1877
The Right Hon. Sir James Fergusson, Bart., K.C.M.G. 1880
James Braithwaite Peile, C.S.I. (*Acting*) .. 1880
Baron Reay 1885
Baron Harris 1885
Herbert Mills Birdwood, C.S.I. (*Acting*) .. 1890
Baron Sandhurst 1895
Baron Northcote, C.B. 1895
Sir James Monteath, K.C.S.I. (*Acting*) .. 1900
Baron Lamington, G.C.M.G., G.C.I.E. .. 1903
J. W. P. Muir-Mackenzie, C.S.I. (*Acting*). 1903
Sir George Sydenham Clarke, G.C.M.G., G.C.I.E. (*c*). 1907
Baron Willingdon, G.C.I.E. 1913
Sir George Ambrose Lloyd, G.C.I.E., D.S.O. (*d*) 1918
Sir Leslie Orme Wilson, P.C., G.C.I.E., C.M.G., D.S.O. 1923
Sir Frederick Hugh Sykes, P.C., G.C.I.E., G.B.E., K.C.B., C.M.G. 1928
The Rt. Hon. Michael Herbert Rudolf Knatchbull, Lord Brabourne, G.C.I.E., M.C. 1933.
Sir Ernest Hotson, K.C.S.I., O.B.E., I.C.S. Acted for six months for Sir F. H. Sykes.

(*a*) Proceeded to Madras on duty in Aug. 1793 and then joined the Council of the Governor-General as Commander-in-Chief in India on the 28th Oct. 1793.
(*b*) Was appointed Governor of Bombay by the Honourable the Court of Directors on the 4th Aug. 1841, but, before he could take charge of his appointment, he was assassinated in Cabul on the 23rd Dec. 1841.
(*c*) Afterwards (by creation) Baron Sydenham.
(*d*) Afterwards (by creation) Baron Lloyd.

THE BOMBAY LEGISLATIVE COUNCIL.

The Hon. Sir Ali Mahomed Khan Dehlavi, Kt., *President.*
Mr. Namdeo Eknath Navle, *Deputy President.*

ELECTED MEMBERS.

Name and class of Constituency.	Name of Member.

The Madras Presidency.

The Madras Presidency occupies the whole southern portion of the Peninsula, and, excluding the Indian States, all of which have now come under the direct control of the Government of India, has an area of 142,260 square miles. It has on the east, on the Bay of Bengal, a coast line of about 1,250 miles; on the South on the Arabian Sea, a coast line of about 450 miles. In all this extent of coast, however, there is not a single natural harbour of any importance; the ports, with the exception of Madras, and perhaps of Cochin, are merely open roadsteads. A plateau, varying in height above sea-level from about 1,000 to about 3,000 feet and stretching northwards from the Nilgiri Hills, occupies the central area of the Presidency; on either side are the Eastern and the Western Ghats, which meet in the Nilgiris. The height of the western mountain-chain has an important effect on the rainfall. Where the chain is high, the intercepted rain-clouds give a heavy fall, which may amount to 150 inches on the seaward side, but comparatively little rain falls on the landward side of the range. Where the chain is low, rain-clouds are not checked in their westward course. In the central table land on the east coast the rainfall is small and the heat in summer excessive. The rivers, which flow from west to east, in their earlier course drain rather than irrigate the country; but the deltas of the Godavari, Kistna and Cauvery are productive of fair crops even in time of drought and are the only portions of the east coast where agriculture is not dependent on a rainfall rarely exceeding 40 inches and apt to be untimely.

Population.

The population of the Presidency was returned at the census of 1931 as 47,193,602, an increase of 10.4 per cent. over the figure of 1921. The increase was not uniform. The districts which had suffered most in 1921 tended to show large increases in 1931—Bellary and Agencies were marked illustrations. As a natural corollary to an increase in population the Presidency density has risen. Hindus account for 88 per cent. of the Madras population, Muhammadans 7 per cent. and Christians 3.8 per cent. The actual number in other communities is inconsiderable. The vast majority of the population is of the Dravidian race and the principal Dravidian languages, Tamil and Telugu are spoken by 19 and 18 million persons respectively. 40 per cent. of the population talk Tamil, 37½ per cent. Telugu, 7·9 per cent. Malayalam, Oriya, Kanarese, Hindustani, Tulu follow in that order with percentages above 1.

Government.

The Madras Presidency is governed on the system generally similar to that obtaining in Bombay and Bengal. There are associated with the Governor four members of the Executive Council in charge of the Reserved Subjects and three Ministers in charge of the Transferred Subjects. Madras administration differs, however, in some important respects from that of other major provinces. There is no intermediate local authority between the Collector of the District and the authorities at headquarters, Commissioners of Divisions being unknown in Madras. Another feature peculiar to the Southern Presidency is the manner of choice of the ministers. Following the practice of the Mother of Parliaments, Madras Governors have, ever since the inception of the Reforms, called upon the leader of the dominant party to form a ministry, giving him freedom to select his colleagues on the ministry. Consequently he enjoys the status of Chief Minister—unknown in other provinces in India.

Agriculture and Industries.

The principal occupation of the province is agriculture engaging about 68 per cent. of the population. The principal food crops are rice, cholam, ragi and kambu. The Industrial crops are cotton, sugarcane and groundnuts. The agricultural education is rapidly progressing in the Presidency. The activities of the Agricultural Department in matters educational consist in the running of a college at Coimbatore affiliated to the University of Madras, three farm labourers' schools numerous demonstrations farms. As it was found that the present course of middle school education does not satisfy the needs of the ryots, the only school maintained by the department at Taliperemba was closed with effect from 1st April 1932. The institution of short practical courses in farm management and allied subjects in the Agricultural College at Coimbatore have been sanctioned. While paddy which is the staple food of the population, occupies the largest cultivable area, cotton and sugarcane are by no means inconsiderable crops of the province and are receiving close attention at the hands of the local agricultural authorities. The area under cotton irrigated and unirrigated is estimated at 1,949,664 acres and, as in the case of paddy, efforts are being made to produce better strains of cotton suited to different localities by means of both selection and hybridization. Side by side with an increase in the area under cotton, from existing good staple areas, improved varieties have been systematically introduced. A special feature of the agricultural activities in the Presidency is the large industry which the planting community have built up, contributing substantially to the economic development of the province. They have organised themselves as a registered body under the title of "The United Planters' Association of South India," on which are represented coffee, tea, rubber and a few other minor planting products. The aggregate value of seaborne trade of the Presidency which was Rs. 878,306,466 in 1930-31 has declined to Rs. 714,496,917 in 1931-32. As in other provinces, the forest resources are exploited by Government. There are close upon 19,000 square miles of reserved forests.

Twenty seven spinning and weaving mills were at work during the year and they employed 38,918 operatives. The number of jute mills at work was three. At the close of the year 1932 the number of the other factories in the Presidency was 1,006. These consisted of oil mills, rope works, tile works, etc. Tanning is one of the principal industries of the Presidency, and there is considerable export trade in skins and hides although hide tanners have not been doing well of late and suffered from the present commercial depression. The manufacturing activities which are at present under the direction of the Department of Industries are mainly confined to the production of soap. The match making industry is just raising its head in Madras. There are a number of indigenous match factories run on cottage lines. In 1927, the Council complied with a demand made by the Minister in charge of Industries for funds for appointing a special officer to conduct an exhaustive survey of the existing and potential cottage industries in the Presidency. The Special Officer has concluded his survey. His reports have been published. The report of the Cottage Industries Committee appointed at the instance of the Legislative Council, to examine the Special Officer's report and to submit proposals to Government for an effective organisation of such of the industries as deserve encouragement has also been published for general information. The recommendations of the Committee were carefully considered by Government but owing to financial stringency they decided that such of the recommendations as involved additional expenditure should be postponed for the present. They have however passed orders on those recommendations which are merely administrative in character and do not involve additional expenditure.

Education.

The Presidency's record in the sphere of education has been one of continuous progress. There are at present about 51,000 public Institutions, ranging from village primary schools to arts and professional colleges, their total strength being about 2,865,000. Special efforts are being made to provide education for boys belonging to the Depressed Classes. The Council passed a resolution in the year 1927 at the instance of a nominated member that poor girls reading in any educational institution in the province—Government, local fund, Municipal or aided—should be exempted from School fees in any Standard up to III Form. The total expenditure of the province on Education is in the neighbourhood of Rs. 531 lakhs. The principal educational institutions in the province are the Madras, Andhra and Annamalai Universities, the Presidency College, the Christian College, the Loyola College, the Pachaiyappa's College, the Law College, and the Queen Mary's College for Women, Madras; the St. Joseph's College, Trichinopoly; the American College, Madura; the Government College, Kumbakonam; the Government College, Rajahmundry; the Agricultural College, Coimbatore; the Medical Colleges at Madras and Vizagapatam and the Engineering College at Madras (Guindy).

Cochin Harbour Scheme.

The importance of this project lies in the fact that a good harbour at Cochin would lead to the development of a valuable hinterland and provide a ready outlet for agricultural and other produce from an area which is at present not adequately served by a convenient or well-equipped harbour. The scheme involves cutting a passage through the bar which hitherto blocked the entrance from the sea to an extensive backwater and by dredging and reclamation, forming a sheltered harbour accessible and giving full protection and facilities at all seasons of the year. An agreement has been reached between the Government of Madras and the Darbars of Travancore and Cochin States indicating how the work is to be carried out and outlining the financial arrangements necessary. A trial cut was made in 1923 and the effects of the monsoon thereon were observed. The results recorded were examined by a Committee of Harbour Engineers in England who reported favourably on the prospects of the scheme.

The first cut through the bar 400 feet wide by 32½ feet deep was completed on 30th March 1928. The channel through the outer bar is now 3 miles long by 450 feet wide and has an average depth of 35 feet at low water. The dredging of the mooring area has been completed. Since March 1930 the Harbour has been in constant and regular use by all ships. Details of the berthing accommodation inside the harbour at the end of 1931-32 were:—

	Draft ft.	Length ft.
Mooring Buoy No. 1 ..	30.6	500
,, ,, 2 ..	27.6	450
,, ,, 3 ..	27.0	250
,, ,, 4 ..	29.0	475
,, ,, 5 ..	28.3	475
,, ,, 6 ..	29.0	475
,, ,, 7 ..	30.6	475
,, ,, 8 ..	37.6	500
,, ,, 9 ..	37.0	500

Two fare and after moorings will shortly be laid down in the Mattancherry Chawl. Proposals have been formulated for the next stage of the works which include the construction of deep water jetties with railway connections, construction of godowns and transit sheds, the installation of rapid handling cranes and other transport facilities. These improvements are to be made on the new reclamation of which about 300 acres have been formed already by dredging from the harbour. It is intended to connect this to the mainland by a railway bridge across the backwater. Reclamation is still in progress and when completed it will provide sufficient space for about 20 or 30 large vessels to load or unload at the same time. The Shoranur-Ernakulam line is being converted from metre to broad-gauge, and is to be extended to the wharves at the reclamation. The possibility of providing further facilities by carrying the metre-gauge system through to the harbour is under investigation. These developments will enhance the utility of the port to the planting and agricultural areas in that part of the Presidency.

Vizagapatam Harbour Project.

Even more pregnant with future possibilities is the scheme for the development of the Vizagapatam Harbour. The Vizagapatam Harbour is constructed under the control of the Government of India. Proposals for the development of the port at this place have been under consideration since 1859; but the success of the project is bound up with the construction of direct railway communication between Vizagapatam and the Central Provinces; for the quantity of trade which could be obtained from the littoral itself is insufficient to justify the capital expenditure which would be required. In May 1925 the Government of India declared Vizagapatam a major port thereby enabling the development of the port under the directions of the Central Government. Preliminary operations commenced at the end of the year and were continued vigorously in 1926 with the aid of dredgers and rock-breakers. It is expected that the construction of the harbour will take four or five years. The surrounding hill-sides and adjacent areas will meanwhile be developed for industrial trading and residential purposes.

Local Self-Government.

Local bodies in the Madras Presidency are administered under the following Acts:—

The Madras City Municipal Act, 1919;

The Madras District Municipalities Act, 1920, as amended by Madras Act X of 1930; and

The Madras Local Boards Act, 1920, as amended by the Madras Act XI of 1930.

The amending Acts of 1930, which came into force on the 26th August 1930, provide, *inter alia*, for the abolition of the system of nominations to local bodies, for the inclusion of village panchayats within the scope of the Madras Local Boards Act with a view to making the village the unit of local self-government, for direct elections to district boards, for the creation of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the cessation of office of the President or Chairman on a motion of non-confidence being passed against him by a prescribed majority. The Acts have undergone subsequent amendments. The question of abolition of Board is under the consideration of the Legislative Council.

Local bodies are now enabled under the Madras Local Authorities Entertainments Tax Act, 1926, to levy a tax on entertainments given within their jurisdiction.

Irrigation.

In March 1925, the Secretary of State sanctioned the Cauvery Reservoir Project, the estimated cost of which amounted to about £ 4½ millions. The project has been framed with two main objects in view. The first is to improve the existing fluctuating water supplies for the Cauvery Delta irrigation of over a million acres; the second is to extend irrigation to a new area of 301,000 acres, which will, it is estimated, add 150,000 tons of rice to the food supply of the country. The scheme which is expected to be completed in 1934 provides for a large dam at Metur on the Cauvery to store 93,500 million cubic feet of water and for a canal nearly 88 miles long with a connected distributary system. Owing to the necessity for providing adequate surplus arrangements to dispose of floods similar to the phenomenal floods of 1924 and to other causes the estimate had to be revised and the revised estimate stands at about £ 5½ millions. Another important project is the Periyar project which is intended not only for irrigation purposes but also for providing water power for generating electricity. Taking its rise in the Western Ghats, the river flows into the Arabian Sea through Travancore State territory. After prolonged negotiations, the Travancore Durbar consented to the water being caught and stored in the Travancore hills for being diverted towards the East. Some three thousand feet above sea-level a concrete and masonry dam has been constructed and nearly 50 feet below the crest-level of the dam a channel through the summit of the range carries the waters into the eastern water-shed where they are led into the river Vaigai. The total quantity of water impounded to crest level is 15,660 million cubic feet. By this work, a river ordained by Nature to flow into the Arabian Sea has been led across the Peninsula into the Bay of Bengal irrigating in its way well over 100,000 acres of land. The irrigable area commanded by the Periyar system is 143,000 acres, while the supply from the lake was sufficient only for 130,000 acres. To make up for this deficit, a scheme for increasing the effective capacity of the lake by lowering the water-shed cutting is in progress. The area already under irrigation in the Madras Presidency total about 7.5 million acres. Of this over 3 million acres are served by petty irrigation works numbering about 36,000.

Electric Schemes.

The first stage of the Pykara Hydro-Electric project which was under construction by the Government of Madras has now been completed and is in operation from 1st April 1933. It consists in utilising a fall of over 3,000 ft. in the Pykara river as it descends the Nilgiris Plateau for the generation of electrical energy and its transmission for supply to the neighbouring districts, *viz.*, the Nilgiris, Coimbatore, Salem and Trichinopoly. The Glen Morgan scheme started in 1928 with the object of supplying power to the main construction works of the Pykara project has now been merged with it. In its present completed form the project consists of the main power house at Singara with an installed plant capacity of 33,000 B.H.P. and the transformer station, the receiving station at Coimbatore, 7 other sub-stations, 49 miles of 66 K.V. line, 58 miles of 22 K.V. Tower line and 130 miles of 22 K.V. pole line. The booked cost upto 31st March 1933 against an original estimate of Rs. 1,33,36,640 is Rs. 1,07,13,580 and the revised estimates for 1933-34 include an expenditure of Rs.1,55,600. The revenue anticipated during 1933-34 is about Rs. 4 lakhs against an estimated revenue of Rs. 3,38,160. The following places

receive supply from the Pykara Project at present :—

The towns of Ootacamund, Coonoor, Methupalaiyam, Karamadai, Pollachi, Tiruppur, Ananashi, Bhavani, Erode, Salem, and Palghat, besides the tea estates of Deverkhola, Prospect, Parkside, Ibex and Nonsuch, Bhavani and Glendale in the Nilgiris District and Kallayar, Akkamalais, Karimalai, Vellamalia, and Pachimalains in the Anamalais.

The Government of Madras have also a proposal under consideration to start a Hydro-Electric Scheme at Mettur about which they are awaiting a report from their Chief Engineer for Electricity.

Co-operation.

On account of the continued general economic depressions, overdues in Societies showed a further small increase during the year 1932-33. For mainly the same reason there was a large fall in the amount of loans discussed by societies. The result was the accumulation of large amounts of surplus which in Central Banks amounted to more than a crore of rupees. With a view to reducing the surplus, the Government have since directed that Central Banks should restrict their borrowings and return deposits made, if possible. The attention of the department was paid for the last few years more to the consolidation of existing societies than to the expansion of the movement. Only 107 societies were registered during the year as against 127,320 and 534 in the previous three years, whereas the number of societies whose registration was cancelled rose to 691 from 629 in the preceding year. Under the scheme of subvention to Central Banks for carrying on rectification and consolidation work, the Provincial Bank paid Rs. 36,624 to 27 Central Banks which in their turn spent Rs. 84,817 on the work. In the previous year a total sum of Rs. 1,43,390 including the Provincial Banks' subvention was spent by the Central Banks for the purpose. The progress in rectification is however slow as complete rectification is aimed at. The South India Co-operative Insurance Society started in March 1932 was able to do satisfactory work during the year. The Central Land Mortgage Bank which was started in 1929 for the purpose of financing primary land mortgage Bank by floating debentures has now been firmly established and was able to declare a profit of Rs. 15,223 for the year.

Social Legislation.

The Hindu Religious Endowments Act which has for its object the better administration and governance of certain Hindu religious endowments came into force early in 1925. It provides for the appropriation of the surplus funds of the endowments to religious, educational and charitable purposes not inconsistent with the objects of the institutions to which they are attached. The Act has been working satisfactorily. Doubts having been raised to the validity of the Act it was re-enacted and passed into law as Act No. II of 1927. The new Act came into force on 8th February 1927. Another piece of legislation—a non-official Bill—which has raised a heated controversy is the Malabar Tenancy Bill, which aims to confer, subject to certain conditions, occupancy rights on "kanom" tenants and actual cultivators of the soil. As there was a sharp difference of opinion on the very principles of the Bill, the Governor withheld his assent and a committee was appointed to go into the matter thoroughly and its findings were submitted and the same were published with a view to receive objections and suggestions. "The recommendations of the Committee were placed before a Round Table Conference consisting of the representatives of the Jenmies, Tenants and of the Government. The objections and suggestions made by the representatives at the Conference were carefully considered by the Government and the Government re-drafted the Bill and introduced it in the Council on 6th August 1929. The Bill was passed by the Council on 15th October 1929. His Excellency the Governor was of opinion that changes were expedient in respect of certain clauses of the Bill passed by the Council and accordingly returned parts of the Bill to the Legislative Council, under Section 81-A (1) of the Government of India Act, for reconsideration." The Bill was finally passed by the Legislative Council on the 1st March 1930, and received the assent of His Excellency the Governor on the 28th March 1930. The assent of His Excellency the Governor-General was given on the 18th November 1930, and the Act came into force on the 1st December 1930. Noteworthy amongst other efforts at legislation for social reform was the non-official resolution passed by the Council recommending to Government to undertake legislation or to recommend the Government of India to do so to put a stop to the practice of dedicating young women and girls to Hindu temples which has generally resulted in exposing them to immoral purposes under the pretext of caste. Mrs. Muthulakshmi Reddi, Ex-Deputy President of the Legislative Council, introduced a bill in the Legislative Council on 5th September 1928 so as to enfranchise or free the lands held by inam-holding Devadasis on condition of service in Hindu temples from such condition. The bill was passed into law on 1st February 1929. The Act received the assent of the Governor on 12th April 1929 and of the Governor-General on 13th May 1929. Rules have been framed to give effect to the provisions of the Act and the enfranchisement of Devadasi inams is now in progress. On 24th January 1930 Mrs. Muthulakshmi Reddi introduced another bill in the Legislative Council with the object of putting an end to the dedication of young women and girls not only among inam-holding Devadasis but among Devadasis as a whole. The bill was discussed in the Council and circulated to elicit opinion. As in the meantime Mrs. Muthulakshmi Reddi resigned her membership in the Council, the bill was not proceeded with. Subsequently, the Council also dissolved and the bill lapsed. A bill for the suppression of brothels and of traffic in women and girls was introduced in the Council by Mr. K. R. Venkataramа Ayyar on 5th September 1928 and was passed into law on 31st January 1930. The Act received the assent of the Governor on 24th February 1930 and of the Governor-General on 28th March 1930. It could not however be brought into force immediately owing to certain practical difficulties. To obviate these difficulties, an amending Act was passed by the Legislative Council on 30th October 1931 and received the assent of the Governor on 3rd December 1931 and of the Governor-General on 25th

December 1931. The amending act enables the Local Government to bring the Act into force in selected areas and to extend it gradually to other areas as circumstances permit and also to bring into force such of its provisions as may be practicable in any particular area. The Act, excepting sections 6, 7, 8 and 16, was accordingly brought into force in the City of Madras and its environs within a distance of ten miles from the limits of the City with effect from 1st April 1932 and in the Municipalities of Trichinopoly, Srirangam and Madura and their environs within a distance of 5 miles from the limits of those Municipalities with effect from 1st January 1933. The Act except sections 5, 6, 7, 8 and 16 has also been brought into force with effect from 1st October 1933 in the Municipalities of Bezwada, Calicut, Coconada, Rajahmundry, Tanjore, Vizagapatam, Coimbatore and Erode and their environs within a distance of 5 miles from the limits of the Municipalities. It was also resolved to ask Government to fix as their goal total prohibition of drink in the presidency within 20 years. In pursuance of this resolution and of the recommendations of the Excise Advisory Committee thereon, Government in 1929 sanctioned a scheme of propaganda against the use of alcoholic liquors and intoxicating drinks. But owing to financial stringency, the work carried on by the Central propaganda Board Temperance Publicity Committee and the District Propaganda Committees had to be discontinued from August 1931. The Provisions of the Mussalman Wakf, Act, 1923 (India Act XLII of 1923) were brought into force in this Presidency on 1st January 1932. This Act makes provision for the better management of Mussalman Wakf properties and for ensuring the maintenance and publication of proper accounts in respect of such properties.

Law and Order.

The Superior Court for Civil and Criminal Judicial work in the Presidency is the High Court at Madras, which consists of a Chief Justice and thirteen puisne judges. The existing law provides for a maximum of 20 High Court Judges. For the administration of criminal justice there are 29 Sessions Judges in the Mufassal, (including three for agency tracts) Additional and Assistant Sessions Judges being provided to assist Courts in which the work is heavy. Then there are the District Magistrates, the Subordinate Magistrates and Honorary Magistrates. The administration of civil justice is carried on by 26 District Judges, and 41 Subordinate Judges and 145 District Munsiffs. In the Presidency Town there are a City Civil Court consisting of one Judge and Small Causes Court consisting of a Chief Judge and two other Judges. Madras is a litigious province and the records show one suit for every 72 persons. The Police department is under an Inspector-General who has four deputies in four ranges of the Presidency, a Superintendent being stationed at each District. The sanctioned strength of the permanent police force is about 28,200.

The Bengal Presidency.

The Presidency of Bengal, as constituted on the 1st April 1912, comprises the Burdwan and Presidency divisions and the district of Darjeeling which were formerly administered by the Lieutenant-Governor of Bengal, and the Rajshahi, Dacca and Chittagong divisions which by the partition of the old Province had been placed under the administration of the Lieutenant-Governor of Eastern Bengal and Assam. The area of the Presidency is 82,955 square miles, and it possesses a population of 51,087,338 persons; included within this area are the two Indian States of Cooch Behar and Tripura, which are now placed in direct political relations with the Government of India. The Governor of Bengal in Council acts as Agent to the Governor-General of India for these States. The area of the British territory is 77,521 square miles. Bengal comprises the lower valleys and deltas of the Ganges and Brahmaputra, and in the main consists of a great alluvial plain intersected in its southern portion by innumerable waterways. In the north are the Himalayan mountains and submontane tracts of Darjeeling and Jalpaiguri and on the south-east the hills in Tripura and Chittagong, while on the west the Chota Nagpur plateau is continued by an undulating tract running through the western portions of Midnapur, Bankura, Burdwan and Birbhum. The general range of the country however is very low, and a great fertile plain extends southward from Jalpaiguri to the forests and swamps known as the Sunderbans, which lie between the area of cultivation and the Bay of Bengal.

The People.

Of the inhabitants of the Presidency 27,810,100 or 54.44 per cent. are Mahomedans and 22,212,069 Hindus. These two major religions embrace all but 2.09 per cent. of the population, Christians, Buddhists and Animists combined, number 1,043,049.

Bengali is spoken by ninety-two per cent. of the population of the Presidency and Hindi and Urdu by 3.7 per cent. The Oriya-speaking people number 159,854 and Nepali is the tongue of 134,147 persons principally resident in the Darjeeling and Jalpaiguri districts. The great majority of the speakers of the Munda languages are Santals in West and North Bengal.

Industries.

According to the returns of the census of 1931 10,593,384 persons or 20.7 per cent. of the population derive their support from pasture and agriculture, and of these 6,041,495 are cultivators, and 2,718,939 are agricultural labourers. The area under jute in 1933 is estimated at 2,168,700 acres against 1,845,700 in 1932. Bengal is the most important rice-producing area in Northern India, and it is computed that 87 per cent. of the cultivated area of the Presidency is devoted to its production. Other crops include barley, wheat, pulses and oil-seeds, the area devoted to the last named in 1932-33 being 1,045,900 acres. Sugar is produced both from the sugar-cane and from the date-palm, and tobacco is grown for local consumption in nearly every district of Bengal. The area under tea in 1931 was 207,600 acres. There were 393 plantations employing a daily average of 184,539 permanent and 7,410 temporary hands.

Manufacture and Trade.—Agriculture is the principal industry of Bengal. In addition to this there are the jute mill industry, the tea industry (confined to the districts of Jalpaiguri including the Dooars and Darjeeling), and the coal mining industry. The jute mills in and around Calcutta and in the triparian tracts of the districts of Howrah and Hooghly constitute the principal manufacturing industry of the Presidency.

There was no improvement in the jute trade of Bengal (which began to decline since the year 1928-29) due mainly to the low prices prevailing during the year.

General.—The world-wide economic depression coupled with the instability of certain foreign exchange continued to affect the normal course of the trade of this province during the year 1932-33, and the total value of private merchandise was the lowest for the last thirty years. Exports were hampered by the low prices offered for raw materials and agricultural produce, and by tariff barriers which have been raised in many countries.

The aggregate value of the total trade of the province (excluding treasure) with foreign countries and other Indian ports declined from Rs. 1,32,73 crores in 1931-32 to Rs. 1,22.99 crores during the year 1932-33. This decline was due mainly to the heavy fall under foreign exports, which receded from Rs. 65.14 crores in 1931-32 to Rs. 56.43 crores. Foreign imports alone showed slight improvement, viz., from Rs. 35.48 crores to Rs. 35.83 crores. In the coasting trade there was a general falling off; the imports declining from Rs. 19.74 crores to Rs. 18.90 crores, and exports from Rs. 12.35 crores to 11.82 crores.

Imports.—The import of liquors of all description declined from 1,591,815 gallons valued at Rs. 66.71 lakhs to 1,569,718 gallons valued at Rs. 63.72 lakhs. Due to high protective duties imports of sugar continued to be on the decline, the total quantity coming in amounted to 118,150 tons value at Rs. 1.22 lakhs as against 196,640 tons valued at Rs. 1.89 lakhs. The total quantity of salt imported during the year from all sources rose from 472.11 tons valued at Rs. 108.66 lakhs in 1931-32 to 528,802 tons valued at Rs. 121.53 lakhs.

The total quanity of tobacco imported during the year rose from 1,895,772 lbs. valued at Rs. 39.20 lakhs to 3,269,840 lbs. valued at Rs. 43.75 lakhs. This improvement of the trade was due to the increase in the imports of unmanufactured tobacco, which rose from 1,114,252 lbs. to 2,948,248 lbs. The import of manufactured tobacco (including cigars and cigarettes) receded from 781,520 lbs. valued at Rs. 11.93 lakhs to 321,592 lbs. valued Rs. 11.93 lakhs. Most of the unmanufactured

Rs. 11.93 lakhs. Most of the unmanufactured tobacco came from the United States of America, and the cigarettes and pipe tobacco from the United Kingdom.

The total quantity of mineral oils imported during the year declined from 123,478,479 gallons valued at Rs. 7,19.22 lakhs in 1931-32 to 105,752,461 gallons at Rs. 5,62.05 lakhs. Of this total decrease of 17,726,018 gallons, kerosene alone was responsible for 13,491,558 gallons. Imports of petrol also declined by 4¾ million gallons and fuel oil by over a million gallons. Imports from Burma remained constant. The share of the United States of America fell most.

The motor vehicles trade continued its downward course. The number of vehicles imported during the year was, motor cars, 1,618; motor cycles 202, motor omnibuses, vans and lorries 187, as against 1,783; 285; and 439 respectively in the previous year. The total value of all kinds dropped from Rs. 66.49 lakhs to Rs. 54.80 lakhs. Imports of tyres and tubes also showed a similar decline both in value and quantity. Most of the motor cars and motor cycles came from the United Kingdom, whose share in the trade improved considerably at the expense of the United States of America.

During the year under report there was some improvement in the imports of durgs, medicines and chemicals, and also in those of glassware and earthernware, the value of the former rising from Rs. 1,62.75 lakhs to Rs. 1,67.13 lakhs, and that the latter from Rs. 41.12 lakhs to Rs. 42.56 lakhs.

Imports of machinery and millwork improved in value from Rs. 3,11 lakhs to Rs. 3.81 lakhs. The progress of the indigenous sugar industry is reflected in the large increase in the import of sugar machinery, which was valued at Rs. 1,31.5 lakhs compared with Rs. 27.6 lakhs in 1931-32. Imports of tea machinery also improved from Rs. 5.9 lakhs to Rs. 11.9 lakhs. About 72 per cent of the total imports were of British manufacture, the balance supplied by Germany, the United States of America and Belgium.

The total quantity of iron and steel goods imported during the year rose from 102,038 tons to 102,833 tons but the value dropped from Rs. 178.00 lakhs to Rs. 163.58 lakhs. This improvement was due to larger imports of non-protected goods of iron manufacture. The figures for protected and non-protected goods were 55,295 tons valued at Rs. 86.82 lakhs, and 47,538 tons valued at Rs. 76.76 lakhs respectively. Metals and ores other than iron and steel recorded the highest quantity imported since 1927-28, viz., 519,847 tons, but their value was just about the lowest figures recorded since that year, viz. Rs. 140.43 lakhs as against Rs. 98.62 lakhs in 1931-32. The United Kingdom had, as usual, the biggest share in this trade.

Imports of paper improved from 526,097 cwts. valued at Rs. 62.36 to 601,943 cwts. valued at Rs. 68.36 lakhs. The trade in pasteboard, etc., also improve considerably, the quantity rising from 69,683 cwts. to 129,975 cwts., and the value from Rs. 6.80 lakhs to Rs. 12.48 lakhs. The imports of wood pulp, however, declined from 404,996 cwts. valued at Rs. 32.71 lakhs to 283,181 cwts. at Rs. 19.75 lakhs.

The total value of the cotton goods imported during the year recorded an improvement of Rs. 189.23 lakhs over the preceding years' figure of Rs. 252.32 lakhs. The values of the more important kinds of cotton goods were twists and yarns Rs. 1,10.63 lakhs; piece-goods Rs. 554.68 lakhs and other cotton fabrics Rs. 57.24 lakhs, as against the preceding year's figures of Rs. 84.66 lakhs, Rs. 386.70 lakhs, and Rs. 51.96 lakhs respectively. In quantity, twist and yearn showed a distinct improvement the figure being 16,018,061 lbs., the highest on record since 1927-28. Piece-goods also improved from 223,456,174 lbs. to 351,191,868 lbs. Of this total quantity of piece-goods, 198,461,127 lbs. were grey; 60,028,434 lbs. white and 92,702,307 lbs. coloured, printed or dyed. China was the chief supplier of twist and yarn with Japan and the United Kingdom coming next to her in order. Japan was the chief supplier of every variety of cotton piece-goods, except grey bordered dhuties which came chiefly from the United Kingdom.

During the year under report silk and artificial silk of the total value of Rs. 50.05 lakhs, were imported as against Rs. 48.09 lakhs in the year 1931-32. This figure included Rs. 8.10 lakhs on account of pure silk goods, Rs. 6.31 lakhs under mixed silk and Rs. 35.64 lakhs under artificial silk. In all these varieties Japan was the principal supplier. The United Kingdom came next to Japan in her supply of artificial silk.

The aggregate value of the woollen goods imported during the year under report rose from Rs. 30.15 lakhs to Rs. 46.75 lakhs. The improvement was shared by all the principal items under this head. The figures for the year were braids 7,159 lbs valued at Rs. 16 lakhs; carpets, rugs and blankets 1,719,306 lbs. valued at Rs. 12.49 lakhs; hosiery 118,845 lbs. valued at Rs. 2.40 lakhs; yarn and knitting wool 229,940 lbs. valued at Rs. 4.74 lakhs; piece-goods 2,182,518 yds. valued at Rs. 23.60 lakhs, and shawls 70,514 pieces valued at Rs. 2.48 lakhs. Fifty per cent of the woollen goods was supplied by Italy, the United Kingdom's supply came next with twenty-five per cent. of the total imports.

Of the articles of minor importance, the articles to show improvement in imports, were non-mineral oils from Rs. 44.62 lakhs to Rs. 65.30 lakhs, hardware by Rs. 10 lakhs, also points, jewellery and precious stones, cycles, dyeing and tanning materials, building and engineering materials and toilet requisites. The trade in instruments, apparatus and appliances remained steady, but Japan increased her share of electrical goods by Rs. 6 lakhs at the expense of the European countries. Imports of stationery, wood and timber and soap also maintained their level of last year. The articles showing heavy fall in the imports were provisions and

oilman's stores; spices, for which betelnuts from the Straits Settlements were mainly responsible; grain, pulse and flour; railway carriages, and arms and ammunition, which dropped from Rs. 17.13 lakhs to Rs. 9.66 lakhs. There were also slight decreases in the imports of rubber, tea-chests, boots and shoes, books, apparel and umbrellas. The value of unspecified articles imported by post fell by Rs. 14.62 lakhs to Rs. 65.63 lakhs.

Exports.—The total quantity of grains, pulses and flour exported during the year under report fell below the preceding year's figure of 150,849 tons by 526 tons only, but the value dropped from Rs. 190.24 lakhs to Rs. 162.27 lakhs. This decline was attributed to the fall in the exports of rice from 123,178 tons valued at Rs. 157.87 lakhs to 120,794 tons valued at Rs. 131.18 lakhs, and wheat flour from 2,222 tons valued at Rs. 2.59 lakhs to 950 tons valued at Rs. 1.32 lakhs. Exports of pulse, though increased in quantity from 24,285 tons to 25,664 tons, dropped in value from Rs. 28.87 lakhs to Rs. 27.83 lakhs. The export of cereals, other than rice, rose both in value and quantity, namely, from 1,164 tons valued Rs. 91 lakhs in 1931-32 to 2,915 tons valued at Rs. 1.94 lakhs. Mauritius was again the biggest purchaser of rice.

Although the exports of tea rose in quantity from 294,294,196 lbs. to 323,824,706 lbs., the value, due to a fall in prices on account of over production, dropped from Rs. 1549.80 lakhs to Rs. 1253.26 lakhs. The demand from the United Kingdom rose from 170,176,247 lbs. to 190,000,374 lbs. Canada from 14,090,187 lbs. to 16,676,087 lbs. and the United States of America from 9,608,653 lbs. to 10,915,598 lbs. Imperial preference was an important factor in the improved trade registered with Canada, but the expected response from Australia did not materialise, shipments being the lowest recorded for many years past.

The total quantity of coal exported during the year dropped from 514,943 tons to 451,564 tons and the value from Rs. 54.47 lakhs to Rs. 43.68 lakhs. The exports of lac also showed considerable decline, the total quantity (both manufactured and unmanufactured) falling from 456,572 tons to 415,588 tons, and the total value from Rs. 182.68 lakhs to Rs. 123.81 lakhs. The United Kingdom, the United States of America, Germany and Japan were again the chief customers of Bengal lac, but their purchases were considerably below those of the previous year.

The hides and skins trade of Bengal continued on the decline. The total quantity exported during the year under report was 15,417 tons and the value received amounted to Rs. 196.95 lakhs against 19,368 tons and Rs. 240.45 lakhs respectively in the previous year. The decline was mainly attributed to the fall in the exports of raw hides from 10,710 tons valued at Rs. 63.77 lakhs to 8,349 tons valued at Rs. 43.09 lakhs, and raw skins from 8,544 tons valued at Rs. 169.48 lakhs to 6,911 tons valued at Rs. 143.53 lakhs. Trade in cuttings of raw hides and skins, however, improved from 43 tons to 50 tons, but the value dropped from Rs. .06 lakhs to Rs. .03 lakhs. The exports of dressed hides and skins also showed a rise from 71 tons valued at Rs. 7.14 lakhs to 107 tons valued at Rs. 10.30 lakhs. Germany was again the chief customer of raw hides, with Italy following next. The United States of America and the United Kingdom were the best customers for raw skins.

Considerable decline was also recorded in the exports of metals and ores, the figures for the year being 483,094 tons valued at Rs. 150.04 lakhs, as against 610,870 tons valued at Rs. 200.92 lakhs in 1931-32. This decline was due to less exports of the two principal items under this head, *viz.*, manganese ore, and iron and steel, the former dropped from 149,348 tons valued at Rs. 42.93 lakhs to 137,224 tons valued at Rs. 37.29 lakhs, and the latter from 451,289 tons valued at Rs. 148.72 lakhs to 329,775 tons valued at Rs. 110.02 lakhs. The quantity of pig iron exported during the year was 218,374 tons valued at Rs. 74.30 lakhs as against 350,858 tons valued at Rs. 122.70 lakhs in 1931-32. The United Kingdom was again the best purchaser of metals and ores but her share of the manganese trade came down from 46,967 tons valued at Rs. 14.22 lakhs in 1931-32 to 37,402 tons valued at Rs. 10.28 lakhs. In manganese ore, Japan's trade expanded from 5,979 tons to 30,598 tons. France also increased her demand for manganese from 31,902 tons to 36,921 tons.

There was a further setback in the trade in mica, the total quantity exported during the year was 34,354 cwts valued at Rs. 26.03 lakhs, as against 46,108 cwts. valued at Rs. 31.77 lakhs in 1931-32. Of the total quantity exported during the year under report, black mica amounted to 6,467 cwts. valued at Rs. 13.58 lakhs and mica splittings 27,887 cwts. valued at Rs. 12.45 lakhs. The major part of the decline was shared by the United Kingdom and the United States of America, whose purchases shrank from 18,410 cwts. valued at Rs. 14.93 lakhs and 12,678 cwts. valued at Rs. 7.32 lakhs in 1931-32 to 13,431 cwts. valued at Rs. 12.58 lakhs and 7,881 cwts. valued at Rs. 4.40 lakhs, respectively. Germany's share in the trade, however, rose from 3,301 cwts. valued at Rs. 1.43 lakhs to 5,281 cwts. valued at Rs. 2.41 lakhs. Japan's share also improved slightly, from 4,053 cwts. valued at Rs. 2.06 lakhs to 4,268 cwts. valued at Rs. 2.84 lakhs.

The exports of oilseeds, vegetable oils, and oilcakes declined in value from Rs. 161.19 lakhs in the previous year to Rs. 107.80 lakhs. The total quantity of oilseeds exported during the year was 50,794 tons, valued at Rs. 57.79 lakhs as against 87,428 tons valued at Rs. 107.40 lakhs in 1931-32. Of this total quantity, oilseeds alone formed 47,159 tons valued at Rs. 52.24 lakhs; castor seeds 3,347 tons valued at Rs. 4.52 lakhs as against 10,391 tons valued at Rs. 13.00 lakhs; tea seeds, 52 tons valued at Rs. .65 lakhs as against 609 tons valued at Rs. 7.36 lakhs, and other seeds 236 tons valued at Rs. .38 lakhs, as against 848 tons valued at Rs. 1.36 lakhs. Vegetable oils of the aggregate quantity of 382,832 gallons valued at Rs. 5.91

lakhs were shipped during the year, compared with 437,210 gallons valued at Rs. 7.02 lakhs in 1931-32.

Exports of raw cotton recorded a fall from 4,004 tons valued at Rs. 22.32 lakhs in 1931-32 to 3,749 tons valued at Rs. 21.83 lakhs during the year under report. The United States of America made considerable reduction in her purchases during the year.

Exports of hemp during the year showed a little improvement, the total quantity amounted to 201,650 cwts. valued at Rs. 22.69 lakhs, compared with 169,777 cwts. valued at Rs.19.22 lakhs in 1931-32. Germany was the best purchaser of raw hemp with the United Kingdom coming next.

The jute trade of Bengal, which is practically her monopoly trade, did not fare any better during the year under report. Although the total exports of jute and jute manufactures improved in quantity by 7,312 tons over the preceding year's figure of 1,213,672 tons, the value realised fell by Rs. 124.66 lakhs below the preceding year's figure of Rs. 32,24.77 lakhs. In spite of the low level of prices, exports of raw jute declined slightly, in particular to the United Kingdom. Shipments from Calcutta dropped from 551,284 tons to 542,462 tons, and from Chittagong, from 33,395 tons to 19,147 tons. The average shipment price was Rs. 30-12-4 per bale of 400 lbs. as compared with Rs. 33-10-3 in 1931-32, Rs. 37-1-2 in 1930-31, and Rs. 59-14-6 in 1929-30. There was a slight improvement in the exports of gunny bags, from 387,854,629 pieces valued at Rs. 10,91.31 lakhs in 1931-32, to 414,360,740 pieces valued at Rs. 11,13.27 lakhs, but this was counterbalanced by smaller shipments of gunny cloth, which receded from 1,019,692,002 yds. worth Rs. 10,41.78 lakhs to 1,010,258,684 yds. worth Rs. 10,21.31 lakhs. Germany was the biggest purchaser of raw jute, and next to her came the United Kingdom and then France. Australia took the largest number of gunny bags, with the United Kingdom a close second. Most of the gunny cloth went to the United States of America.

Dyeing and tanning substances of the aggregate quantity of 499,190 cwts. worth Rs. 29.57 lakhs were exported during the year as against 561,857 cwts. valued at Rs. 32.94 lakhs in the previous year. Smaller demand for Myrobalans were responsible for this decline in the trade. The total quantity of Myrobalans exported during the year was 467,790 cwts. valued at Rs. 25.27 lakhs as against 549,915 cwts. valued at Rs. 29.85 lakhs in the previous year. The United Kingdom was the principal purchaser of this commodity.

Of the articles of minor importance, woollen manufacture showed the marked improvement of Rs. 6.26 lakhs due mainly to a better demand for carpets and rugs from the United Kingdom and the United States of America. Exports of paraffin wax also recovered as the result of large shipments to Portuguese East Africa partly counterbalanced by smaller shipments to China. Shipments of drugs and medicines to Hongkong rose from Rs. 6.99 lakhs to Rs. 13.25 lakhs. The demand from Belgium for bones dropped from Rs. 26.59 lakhs to Rs 13.33 lakhs. Exports of provisions and oilman's stores declined by Rs. 3.67 lakhs mainly due to smaller quantities of *ghi* shipped to the Straits Settlements. Exports of opium due to restricted consumption, dropped to Rs. 11.24 lakhs. Shipments of unmanufactured tobacco, manures, saltpetre and apparel also declined. The value of articles exported by post fell from Rs. 22.1 lakhs to Rs. 18.80 lakhs.

Trade of Chittagong.—Chittagong is the only other port of Bengal open to foreign trade. The total value of imports into this port from foreign countries dropped further from Rs. 82.01 lakhs to Rs. 72.46 lakhs. Imports of Salt mostly from Aden expanded from 27,053 tons to 48,698 tons. Tea chests and chemicals maintained their importance but practically all other articles, particularly galvanized sheets, and plates, wrought iron tubes, etc., cotton goods and railway carriages and wagons, showed substantial decrease. About 75 per cent. of the imports came from the United Kingdom.

Exports from Chittagong to the foreign countries also dropped heavily from Rs. 6,21.93 lakhs to Rs. 3,80.75 lakhs. Although exports of tea increased in quantity from 78 million lbs. to nearly 90 million lbs. but as the prices ruled low, the value realised declined by Rs. 1,83.84 lakhs. Export of jute dropped from 33,395 tons to 18,147 tons and of paraffin from 10,031 tons to 4,950 tons. Approximately 94 per cent. of this trade was with the United Kingdom.

Coasting Trade.—The total value of the trade of Calcutta with other Indian ports, British as well as non-British, was Rs. 27,85.22 lakhs, as compared with Rs. 27,95.77 lakhs in 1931-32. The value of the total imports was Rs. 17,27.62 lakhs against Rs. 17,08.95 lakhs in 1931-32, and exports Rs. 10,57.60 lakhs against Rs. 10,86.82 lakhs.

Imports of grey piece-goods from Bombay advanced from Rs. 3,40 lakhs to Rs. 4,90 lakhs. Imports of wheat, flour and salt from Karachi improved. Imports of raw cotton and manufactured tobacco from Madras improved considerably but those of cotton goods, ground-nuts and cocoanut declined. There was also considerable falling off in the imports of rice, mineral oils and timber from Burma. Imports from non-British Indian ports improved from Rs. 49.44 lakhs to Rs. 69.28 lakhs.

The decline in the exports to Bombay was due to smaller shipments of jute manufactures, paper and tea. There was improvement in the exports of gunny bags, copper and iron. Madras purchased larger quantities of rice and iron but took less coal, paper and gunny bags. Exports to Burma were affected by smaller demands for gunny bags, coal, spices and tobacco. Exports to non-British Indian ports improved considerably from Rs. 18,96 lakhs to Rs. 36,83 lakhs.

Administration.

The present form of administration in Bengal, dates from January 1921. In 1912 the Government of the Province underwent an important change, when, in accordance with the Proclamation of His Majesty the King-Emperor at Delhi, the Province was raised from the status of a Lieutenant-Governor to that of a Governor-in-Council, thus bringing it into line with the Presidencies of Madras and Bombay. In 1921, under the Reform Scheme, the Local Government was reconstituted, certain of the departments being placed under the control of Ministers appointed from among elected members of the Legislative Council. There are normally four members of the Executive Council who are in charge of the "reserved subjects", and three Ministers, who are in charge of the "transferred subjects."

Bengal is administered by five Commissioners, the divisions being those of the Presidency Burdwan, Rajshahi, Dacca and Chittagong. The unit of administration is the District Magistrate and Collector. As Collector he supervises the ingathering of the revenue and is the head of all the Departments connected with it, while as District Magistrate he is responsible for the administration of criminal justice in the district. The immediate superior of the District Magistrate is the Divisional Commissioner. Commissioners are the channels of communication between the local officers and the Government. In certain revenue matters they are, in their turn, subject to the Board of Revenue in Calcutta; in other matters they are under the direct control of Government.

Justice.

The administration of justice is entrusted to the High Court of Calcutta which consists of the Chief Justice who is a Barrister and 15 Puisne Judges including one additional judge who are Barristers, Civilians or Vakils. Below the High Court are the District and Additional Judges, the Small Causes Court and Subordinate Judges and Munsifs. Of these officers, the District and Additional Judges and a certain number of Subordinate Judges are also endowed with the powers of a Criminal Court while the remainder have jurisdiction in Civil matters only. Criminal Justice is administered by the High Court, the Courts of Session and the Courts of the various classes of Magistrates On its appellate side, the High Court disposes of appeals from the order of a Court of Session, and it also confirms, modifies or annuls sentences of death passed by Sessions Courts. Calcutta has six Stipendiary Presidency Magistrates, including one temporary Additional Magistrate in charge of the Traffic Court. One of the Presidency Magistrates is in charge of the Children's Court, is helped by Hony. Women Magistrates. It has also two Municipal Magistrates and it possesses a Court of Small Causes with Judges who dispose of cases of the class that are usually heard in County Courts in England.

In addition a number of Union Benches and Courts have been established in selected rural areas for the disposal by honorary agency of petty criminal cases and civil disputes.

Local Self-Government.

By Bengal Act III of 1884, and its subsequent amendments, which hitherto regulated municipal bodies in the interior, the powers of Commissioner of municipalities were increased and the elective franchise was extended. Bengal Act III of 1884 was repealed by Act XV of 1932 by which material changes have been introduced, *e.g.*, the franchise of the electors have been further widened, women have been enfranchised, the proportion of elected commissioners has been increased and the term of office of the Commissioner has been extended from three to four years. Municipal expenditure now comprises a large number of objects, including veterinary institutions, employment of health officers, vaccinators and sanitary inspectors, the training and employment of female medical practitioners, the provision of model dwelling houses for the working classes, the holding of industrial, sanitary and health exhibitions and the improvement of breed of cattle. The Commissioners also have large powers in regard to the water supply and the regulation of buildings.

The Municipal Government of Calcutta is governed by Act III of 1923. This Act, which replaces Act III of 1899, makes the Corporation paramount in matters relating to municipal administration. The Act provides for the appointment of a Mayor, who replaces the chairman of the old Act, a Deputy Mayor, and Executive Officer, and Deputy Executive officers, all elected by the Corporation. The appointment of the Chief Executive Officer is subject to the approval of Government. The total number of councillors, after the enactment of the Calcutta Municipal (Second Amendment Act, 1932, is 91 with 5 Aldermen elected by the Councillors. Of the 91 seats, 81 are elected, of which 21 are reserved for Muhammadans. Ten of the councillors are nominated by Government and the rest elected by the general or special constituencies. In order to improve the insanitary and congested areas of the city, the Calcutta Improvement Trust has been created with extensive powers. In the mofussil, district and local boards exercise considerable powers, with regard to public works, education and medical relief.

Bengal Act V of 1919 introduces the new system of self-government by the creation of village authorities vested with the powers and duties necessary for the management of village affairs and entrusted with powers of self-taxation. The new village authority, called the union board, replaces gradually the old chaukidari panchayats and the union committees and deals with the village police, village roads, water supply, sanitation, primary schools and dispensaries. The Act also empowers Government to create out of the members of the union boards, village benches and courts for the trial of petty criminal and civil cases arising within the union. The Act has been extended to all districts in the Presidency except Midnapore and up to March 1933 over 4,701 Union Boards were actually constituted.

Public Works.

The Public Works Department consists of Public Works and Railway Departments and is under the charge of Secretary to Government in the Department of Agriculture and Industries,

The Public Works Department deals with questions regarding the construction of public buildings and roads.

The Railway Department deals with questions regarding acquisition of lands required by the several Railways, the alignment of new lines of Railways, and with Tramway projects.

There is a Chief Engineer who is the principal professional adviser of Government.

Marine.

The Marine Department deals with questions connected with the administration of the port of Calcutta and inland navigation, including the control and administration of Government launches except the police launches, and the Government Dockyard, Narayanganj.

Irrigation.

The Irrigation Department deals with irrigation, navigation, flood protection by means of embankments and drainage, the latter including relief from congestion of drainage by regulating the available supplies of water to suit the requirements of agriculture combined with the supply of water for irrigation in cases in which a supply is available.

Police.

The Bengal Police force comprises the Military Police, the District Police, the Railway Police, and the River Police. The Bengal Police are under the control of the Inspector-General of Police, the present Inspector-General being a member of the Imperial Police Service. Under him are Deputy Inspectors-General for the Dacca Range, the Rajshahi range, the Presidency range, the Burdwan range and the Bakarganj range and also one Deputy Inspector-General in Charge of the C.I.D. and the Intelligence Branch. Each district is in charge of a Superintendent, and some of the more important districts have one or more Additional Superintendents. The Railway Police is divided into three distinct charges, each under a Superintendent. The River Police is also under a Superintendent. The cadre comprises Assistant Superintendents, Deputy Superintendents, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, head constables and constables. There is also a Village Police, composed of daffadars and chowkidars, who receive a monthly salary which is collected from the villages or unions by the Panchayat or Union Board. There is a training college and school at Sardah in the district of Rajshahi where newly appointed officers and men of the Bengal Police learn their duties. The Calcutta City Police is a separate force maintained by Government under a Commissioner who is responsible direct to Government. The Commissioner has under him Deputy Commissioners, Assistant Commissioners, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, head constables and constables. A school for the training of recruits for the Calcutta Police force has been established at Calcutta. The annual cost of the Police is over 277 lakhs.

The head of the Medical Department is the Surgeon General with the Government of Bengal. In the districts the Civil Surgeons are responsible for medical work. There are 44 hospitals and dispensaries in Calcutta, 11 of which are supported by the Government and 801,150 persons were treated at these institutions of whom 55,063 were in-patients. In the Mofussil districts there are 1,178 hospitals and dispensaries, the number of patients treated in them as well as in several huts, fairs, melas, subsidised and temporary dispensaries and in various medical centres was 9,190,434. This includes 82,847 in-patients.

Education.

In the Presidency of Bengal education is imparted partly through Government agency and partly through private bodies, assisted to some extent by Government grants-in-aid. Government maintains four Arts Colleges in Calcutta (of which one is a college for women, one is for Mahomedans and one the Sanskrit College), one at Hughli, one at Krishnagar, three, including the Islamic Inter College, at Dacca, one at Rajshahi and one at Chittagong. It also maintains two training colleges, one at Calcutta and one at Dacca, for teachers who teach in secondary schools through the medium of English, and 5 normal schools, one in each division, for the training of teachers in secondary schools who teach through the medium of the vernacular: also an engineering college at Sibpur and an engineering school at Dacca, two medical colleges, a veterinary college, a school of art and a commercial school in Calcutta, and a weaving school at Serampore. It also provides at the headquarters of all districts except Burdwan and Midnapore, and also at certain other mofussil centres, English high schools for the education of boys, while to some Government Arts Colleges high schools are attached. In Calcutta there are five Government high schools for boys, two of which are attached to the Presidency College and one to the Sanskrit College. Government high schools for girls exist only in the headquarters stations of Calcutta, Dacca, Mymensingh, Comilla and Chittagong. The other secondary schools, with the exception of a few middle schools managed either by Government or by municipal and district boards, are under private control. The administration of primary education in all areas, which are not under municipalities, rests with the district boards, grants being given from provincial revenues to the boards, which contribute only slightly from their own funds. Only in backward localities are such schools either entirely managed, or directly aided, by Government. Apart from the institutions referred to above, 80 institutions called Guru Training Schools are maintained by the Department for the training of primary school teachers. For the education of Mahomedans, there are senior Madrasas at Calcutta, Dacca, Chittagong, Hughli and Rajshahi which are managed by Government. There are also certain Government institutions for technical and industrial education. All institutions for technical and industrial education (except B. E. College, the Ahsanullah School of Engineering, Dacca, the Government Commercial Institute and the Government School of Art, Calcutta) are now under the control of the Director of Industries. A large proportion of educational work of every grade is under the control of various missionary bodies, which are assisted by Government grants-in-aid.

The municipalities are required to expend a certain proportion of their ordinary income on education. They are mainly responsible for primary education within their jurisdiction, but schools in these areas are eligible also for grants from Government. These bodies maintain a high school at Burdwan, a high school at Santipur a high school at Kushtia and a high school at Chittagong.

In 1931-32 there were in the Presidency :—

RECOGNISED INSTITUTIONS FOR MALES.

	Institutions.	Scholars.
Universities	2	1,857
Arts Colleges	45	20,359
Professional Colleges ..	15	5,040

Middle Schools	71	8,882
Primary Schools ..	18,076	466,745
Special Schools	44	2,162

UNRECOGNISED SCHOOLS.

Males	1,243	51,327
Females	311	11,377

The Department is administered by a Director of Public Instruction, assisted by an Assistant Director, a special officer appointed temporarily, an Assistant Director for Muhammadan Education and a Director of Physical Education. Each division is in charge of a Divisional Inspector assisted by a certain number of Additional or Second Inspector and Assistant Inspectors for Mahommedan Education according to the requirements of the several divisions. Similarly the administrative charge of the primary education of each district is in the hands of a District Inspector assisted by Sub-Divisional Inspectors and Sub-Inspectors of Schools, the latter class of officers being in some instances helped by officers of humbler status called Assistant Sub-Inspectors and Inspecting Pandits and Maulvis. High education is controlled by the Universities of Calcutta and Dacca established in 1857 and 1921, respectively administered by the Chancellor (the Governor of Bengal), the Vice-Chancellor (appointed by Government) and a number of ex-officio, elected and nominated fellows. The University of Calcutta maintains a Law College, called University Law College, Calcutta. Dacca University also has a Law Department attached to it. Calcutta University is mainly an examining body, but it has now made itself responsible for advanced teaching for which purpose it employs an agency which is mainly distinct from the staffs of the affiliated Colleges.

The percentage of scholars to the total populations :—

	Recognised Schools.	All Schools.
Males	8.46	8.66
Females	2.46	2.52
Total ..	5.58	5.71

The University at Dacca is of the residential type. There is a Board for Secondary and Intermediate Education at Dacca. It conducts the Matriculation and Intermediate Examinations for the students of Institutions at Dacca and also the Islamic Matriculations and Intermediate Examinations.

The Education of Europeans is mainly conducted by private agency, assisted by Government grants. Government however maintain a special Inspector, and also a school for boys, a school for girls (both residential) at Kurseong, and attached to the latter a Training College (for women only).

The United Provinces.

The United Provinces of Agra and Oudh lie in practically the centre of Upper India. They are bounded on the north by Tibet, on the north-east by Nepal, on the east and south-east by Bihar, on the south by two of the Chota-Nagpur States of the Central India Agency and the Saugor district of the Central Provinces, and on the west by the States of Gwalior, Dholpur, Bharatpur, Sirmoor, and Jubbal, and by the Punjab. Their total area amounts to 106,248 square miles, to which may be added the area of the three Indian States of Rampur, Tehri-Garhwal and Benares with an area of 5,943 square miles, giving a total of 112,191 square miles. The total population is 49,614,833.

The Provinces, originally termed the North-Western Provinces and so amalgamated in 1877, receiving their present designation in 1902, include four distinct tracts of country: portions of the Himalayas, including the Kumaon division which consists of three hill districts, two of which are entirely in the hills and one is half in the submontane belt, the sub-Himalayan tract; the great Gangetic plain, and portions of the hill systems of Central India including Bundelkhand. The Gangetic plain is protected by an extensive Canal system, which though somewhat liable to run short of water in extremely dry years, is of great benefit in all ordinary years and years of limited drought. The first two of these tracts are fertile and support a very sparse population and the Central Indian plateau is almost equally infertile, though better populated. The soil of the Gangetic plain, however, possesses an extreme fertility and here the density of population varies from 542 persons per square mile in the west to 555 in the centre and 753 in the east, which gives the Provinces as a whole a greater population pressure on the soil than any other Province in India save Delhi and Bengal. In the south there are low rocky hills, broken spurs of the Vindhyan mountains, covered with stunted trees and jungle, and in the north the lower slopes of the Himalayas, clothed with dense forest, affording excellent big and small game shooting, and rising beyond in a tangled mass of ridges, ever higher and higher, until is reached the line of the eternal snows, but the greater part of the provinces consists of level plain, teeming with highly-cultivated fields and watered by three rivers—the Ganges, Jumna, and Gogra.

The People.

The population is mainly Hindu, 84.4 per cent. ranking as such whilst Mahomedans number 15 per cent., the total of all other religions being 0.6 per cent. composed of Christians (Europeans and Indians), Jains, Sikhs, Parsis, Buddhists and Jews. Included among the Hindus are the Arya Samajists, followers of the Arya Samaj sect, which obtains widely in the Punjab and has extended its influence to the United Provinces. The three main physical types are Dravidian, Aryan and Mongoloid, the latter being confined to the Himalayan and sub-Himalayan districts and the former to South Mirzapur and Bundelkhand, whilst the high-caste Aryans frequent the Western districts of the Provinces. Most of the people, however, show a mixed Arya-Dravidian origin. Three languages are spoken by the great majority of the people in the plains—Western Hindi, Eastern Hindi and Bihari; Urdu, or Hindustani is a dialect of Western Hindi, though it contains a large admixture of Persian and Arabic words, which makes it a *lingua franca*.

Industries.

The chief industry is agriculture, which is the principal source of livelihood of 71.1 per cent. of the population and a subsidiary source of income to a further 8.2 per cent. The soils of the Provinces fall into three groups: the valley soils of the Himalayas, the main alluvium and the Central Indian alluvium; the chief characteristic soil or the Central Indian alluvium is the black soil, with a lighter variant, though here also there are light loams and gravel. The Himalayan soils are of local origin and vary with the nature of the rock from which they have been formed, whilst the main alluvium soils are sand, clay and loam, the loam being naturally the most productive. The soil generally yields excellent crop of rice, millet, maize, linseed, cotton, wheat, sugarcane, pulses, barley and poppy, rice being grown mostly in low-lying, heavy clays. The greater part of the Provinces is highly cultivated, the rainfall varies from 50 to 60 inches in the Hills, to 40 inches in the Benares and Gorakhpur Divisions, whilst the Agra Division receives only about 25 to 30 inches annually. Drought seriously affected Bundelkhand and the Agra Division. in the past, but improved drainage, and irrigation (a protective system of irrigation works exists and is being extended) have enabled a complete recovery to be made. Commodity prices showed a slight but steady upward movement till July when wheat in particular commenced to drop steadily. Generally the position of those solely dependent on agricultural produce is far from satisfactory. In addition to a low level of prices, yields as secured from kharif sown crops have been below par. The only fact offsetting the above is the generally satisfactory prospect of the present rabi crops. Land is held mostly on the ryotwari tenure in Bundelkhand and Kumaon, on zemindari tenure in Agra and taluqdari tenure in Oudh. The principal landowners in Oudh are the Taluqdars, some of whom own very large estates. The area held in taluqdari tenure amounts to 54 per cent. of the total area in Oudh.

Manufactures.

The provinces are not rich in minerals. Iron and copper are found in the Himalayan districts, and there were mines of importance there formerly, but owing to high cost of production and inaccessibility, most of them have been

closed. Gold is found in minute quantities by washing the sands in some of the rivers in the hills. Limestone is found in the Himalayas and in the Etawah district, and stone is largely quarried in the Mirzapur district. Cotton is ginned and spun throughout the Western districts of the provinces as a home industry; and weaving by means of handlooms, is carried on in most districts. Cawnpore is the chief centre for cotton spinning and weaving mills. According to the census of 1931, 45,128 persons were employed on cotton ginning, cleaning and pressing and 408,033 on spinning and weaving. Silk weaving used to be confined to Benares (where the famous 'Kimkhab' brocade is made) but considerable work is now done at Shahjahanpur and Mau and some at Agra as well. Embroidery work is done at Lucknow, where the noted 'Chikan' work of cotton on muslins is produced, and in Benares, where gold and silver work on silk, velvet, crepe and sarsenet obtains. Benares uses local gold thread for embroidery work and 'Kamkhab' weaving. The glass industry is important at Firozabad, Bahjoi, Balawali and Naini (Allahabad). Moradabad is noted for its lacquered brass-work, Benares for brassware-engraving and repousse, Farrukhabad for its calico prints and Agra for its carpets and marble and alabaster articles; glazed pottery is made at Chunar and Khurja and clay figures of men and fruits at Lucknow.

The making of brass utensils at Mirzapur, Farrukhabad and Oel (District Kheri); the carving and inlay work of Nagina and Saharanpur, the art silk industry of Mau, the lock and brass fittings industry of Aligarh, the copper utensil industry of Almora, the durries of Agra and Bareilly, the pottery of Nizamabad (District Azamgarh) and the ivory work of Lucknow also deserve mention.

Cawnpore is the chief industrial centre. It has tanneries, soap factories, oil mills, cotton, woollen and other mills. The woollen mill is the largest in India. Lucknow possesses an important paper-mill. There are cotton ginning and pressing factories at Aligarh, Meerut and Bareilly and cotton mills at Agra, Hathras, Lucknow, Benares and Moradabad. Many sugar mills have been recently started, mainly in the Gorakhpur and Rohilkhand divisions. Excellent furniture is made at Bareilly mostly on cottage lines.

The largest trade centres are Cawnpore, Allahabad, Mirzapur, Benares, Lucknow, Meerut, Aligarh, Hathras, Muttra, Agra, Farrukhabad, Moradabad, Chandausi, Bareilly, Saharanpur, Muzaffarnagar, Ghaziabad, Khurja, Gorakhpur, Ghazipur, Pilibhit and Shahjahanpur.

Administration.

The Province was until the close of 1920 administered by a Lieutenant-Governor, chosen from the ranks of the Indian Civil Service. Under the Reform scheme the Province was raised to the status of a Governor-in-Council, the Governor being assisted by two members of the Executive Council in charge of the Reserved Subjects and two Ministers from Jan. 12, 1926, in charge of the Transferred Subjects. The medium for the transaction of public business is the Secretariat, the Staff of which consists of 7 Secretaries (including Chief Secretary) and 4 Deputy Secretaries including the Director of Public Instruction and the Deputy Legal Remembrancer who are *ex-Officio* Deputy Secretaries in the Education and Judicial Departments respectively. The Chief Secretary is in charge of Appointment, General Administration, Executive, Political, Newspaper and Police Departments; the Finance Secretary deals mainly with the Finance Department; the Revenue Secretary is in charge of the Revenue, Scarcity, Ecclesiastical and Forest Departments and also the Buildings and Roads branch of the Public Works Department; the Education Secretary looks to the Education, Industries, Agriculture and Excise Departments; the L. S. G. Secretary to the local Self-Government, Municipal, Medical and Public Health Departments and the Judicial Secretary is in charge of the Judicial and Legislative Departments. The seventh Secretary belongs to the Public Works Department (Irrigation Branch) and is also Chief Engineer for the Irrigation Branch of the P.W.D. Government spends the cold weather, October to April, in Lucknow and Allahabad, mostly in Lucknow, though the Secretariat remains throughout the year at Allahabad. The Governor and the Secretaries spend the hot weather in Naini Tal, but during the monsoon the Governor tours the plains, as he does also in the cold weather. The Board of Revenue is the highest court of appeal in revenue and rent cases, being the chief revenue authority in the province. There are forty-eight British districts, thirty-six in Agra and twelve in Oudh, average area 2,200 square miles and average population a million. Each district is in charge of a District Officer, termed a Collector and Magistrate in Agra and a Deputy Commissioner in Oudh and Kumaon. The districts are grouped together in divisions. Each division is under a Commissioner, except the Kumaun division, the charge of which is held by the Deputy Commissioner, Naini Tal, in addition to his duties. There are ten divisions, having an average area of nearly 10,600 square miles and an average population of nearly 5 millions. The districts are sub-divided into *tahsils*, with an average area of 500 square miles and an average population of 236,000. Each *Tahsil* is in charge of a *Tahsildar*, who is responsible for the collection of revenue, and also exercises judicial powers. *Tahsils* are divided into *parganas* which are units of importance in the settlement of land revenue. Subordinate to the *Tahsildars* are *naib tahsildars* and *kanungos*. Ordinarily there are three *kanungos* and one *naib tahsildar* to a *tahsil*. The *Kanungos* supervise the work of the *patwaris*, or village accountants, check their papers and form a link direct between the villagers and Government. For judicial purposes (revenue and criminal), the District Officer assigns a sub-division, consisting of one or more *tahsils*, as the case may be to each of his subordinates, who may be covenanted civilians (Joint and Assistant Magistrates and Collectors) or members of the Provincial Service (Deputy Collectors and Magistrates). The Commissioners

of the Rohilkhand Division is Political Agent for the Indian States of Rampur and Tehri-Garhwal and the Commissioner of Benares is the Political Agent for Benares State.

Justice.

Justice is administered by the High Court of Judicature at Allahabad in the province of Agra and by the Chief Court of Oudh sitting at Lucknow which are the final appellate authorities in both criminal and civil cases. The former consists of a Chief Justice and eight permanent and two temporary puisne judges five of whom including the Chief Justice are Indians, and the latter consists of a Chief Judge and four judges four of whom including the Chief Judge are Indians. There are thirty-two posts (twenty-four in Agra including two posts temporarily held in abeyance and eight in Oudh) of district and sessions judges of which nine are held by Indians not belonging to the Indian Civil Service as they have been listed to the provincial service and the bar. They have both original and appellate jurisdiction in civil and criminal cases and occasional appellate jurisdiction in rent cases. District Officers and their assistants including tahsildars, preside in criminal courts as magistrates and as collectors and assistant collectors, in rent and revenue courts and dispose of a good deal of the work. Kumaun has been brought under the Civil jurisdiction of the High Court from 1st April 1926. The deputy and assistant commissioners exercise inferior civil powers in this division which has no separate civil courts. In the rest of the provinces there are subordinate judges, judges of small cause courts and munsifs who dispose of a large number of civil suits. In Agra the jurisdiction of a subordinate judge extends to all original suits without pecuniary limit and a munsif can hear cases ordinarily of a value not exceeding Rs. 2,000, and if specially empowered up to Rs. 5,000. In Oudh the ordinary jurisdiction of a subordinate judge extends to suits valuing not more than Rs. 20,000 and the ordinary jurisdiction of a munsif to suits of Rs. 2,000 value, provided that in special cases the limit of pecuniary jurisdiction can be removed altogether in the case of a subordinate judge and that of the munsif raised up to Rs. 5,000. Appeals from munsif always lie to the district judge while those from the subordinate judges go to the High Court or the Chief Court except in cases of a value of Rs. 5,000 or less which are heard by the district judge. Small cause court judges try suits to the value of Rs. 500. There are also honorary munsifs limited to Rs. 200 suits, and village munsifs whose jurisdiction is fixed at Rs. 20.

Local Self-Government.

The units of local self-government are the district and municipal boards which, with the exception of three municipal boards, have non-official Chairman. The municipal boards having an annual income of Rs. 50,000 or over have executive officers to whom certain administrative powers are reserved. The administrative functions of the municipal and district boards are performed by the Chairman and Executive Officer or the secretary, but the boards themselves are directly responsible for most of the administration. The district boards obtain 45% of their income from Government grants. The other chief sources of income is the local rate levied from the landowners. Some of the boards have recently imposed a tax on circumstance and property. The chief source of municipal income is the octroi or terminal tax and toll which is an octroi in modified form. Local opinion is strongly in favour of indirect as opposed to direct taxation for municipal purposes.

Public Works.

The Public Works Department is divided into the Buildings and Roads branch and the Irrigation branch. The Buildings and Roads branch is administered by a Civilian Secretary and the principal administrative officer is a Chief Engineer. The Irrigation branch is administered by two Secretaries to Government who are also Chief Engineers. The Province is divided into circles and divisions both for buildings and roads and for irrigation purposes. Each circle is in charge of a Deputy Chief Engineer or a Superintending Engineer, or and each division is in charge of an Executive Engineer. The whole of the irrigation works constructed or maintained by Government are administered by the Irrigation branch. All metalled roads maintained from Provincial funds and construction of all buildings costing more than Rs. 20,000 are in charge of the Buildings and Roads branch. In the Irrigation branch one of the Chief Engineers is in charge of Eastern Canals comprising the Sarda Canal and the canals in Bundelkhand and Mirzapur and the other is in charge of Western Canals comprising Ganges Canals, Eastern Jumna Canal and Agra Canal. The Sarda Canal—a work of the first magnitude was opened in 1928 and has introduced irrigation into most of the districts of Oudh. In connection with the Ganges Canal an important hydro-electric scheme the scope of which covers seven western districts of the province is now in operation. It is capable of further development and will ultimately give a total output of 36,900 killowatts. The energy is distributed by means of 882 miles of High Tension lines to provide some 70 towns of 5,000 population and over in the seven districts, with cheap power for light, fans and minor industries. The energy is also used for irrigation pumping from rivers, and low level canals as well as from tube and open wells. The total cost of the first stage of the scheme excluding pumping projects for irrigation is 138 lakhs.

Police.

The Police Force is administered by an Inspector-General, with three Deputies and one Assistant, forty-six Superintendents, forty-one Assistant Superintendents and sixty-five Deputy Superintendents. There is a Police Training School at Moradabad. There is a C. I. D. forming a separate detective department, under a Deputy Inspector-General with three assistants. The armed police of the three police ranges have recently been rearmed with the ·410 musket, the ·476 musket and the Martini Henri rifle having formed their late armament. The administration of the Jail Department is in charge of an Inspector-General of Prisons, who is a member of the Indian Medical Service.

Education.

Education is maintained in part by the State and partly by means of grants-in-aid. There are five universities, the four residential universities of Allahabad, Lucknow, Aligarh (Muslim) and Benares (Hindu) and the affiliating University of Agra. The last named was established in 1927 and consists, besides six affiliated colleges situated outside the United Provinces, of the eight colleges, formerly associated with Allahabad University on its external side, *viz.*, the Agra and St. John's Colleges at Agra, the Christ Church, D.A.V. and Sanatan Dharma Colleges at Cawnpore, the Meerut College, Meerut, the Bareilly College, Bareilly and St. Andrew's College, Gorakhpur. There are Intermediate Colleges which prepare boys for the high school and intermediate examinations conducted by the Board of High School and Intermediate Education, which controls high school and intermediate education. The Isabella Thoburn College at Lucknow and the Crosthwaite Girls' College at Allahabad impart university education to Indian girls and the Theosophical National Girls' School and Women's College at Benares, the Muslim Girls' Intermediate College at Aligarh. Mahila Vidyalaya Intermediate College at Lucknow teach up to the intermediate stage. In addition to these there are A. V. High Schools, English Middle and vernacular Lower Middle schools and primary schools throughout the province for the education of Indian Girls; they are controlled by Chief Inspectrees of Girls. Schools under instructions from the Education Department. The St. George's Intermediate College, Mussoorie, the Philander-Smith College, Naini Tal, the St. Joseph's College, Naini Tal, and the Martiniere College, Lucknow, are the well-known institutions for European and Anglo-Indian children in the province which teach upto the intermediate stage. Besides these, there are many excellent educational institutions for European boys and girls both in the hills and plains which are attended by students from all over India. Government maintain Training Colleges for teachers in Lucknow, Allahabad and Agra, and there are training departments attached to the Aligarh Muslim University and the Benares Hindu University. There is a Government Engineering College at Roorkee (Thomason College), a School of Art and Crafts in Lucknow and an Agricultural College, and a Technological Institute at Cawnpore; there is also a non-Government Agricultural Institute at Naini, Allahabad. Education in law is given at the four residential universities and at the Agra and Meerut colleges, and at the Dayanand Anglo-Vedic and Sanatan Dharma Colleges at Cawnpore and at the Bareilly College. Instruction in commerce for the B. Com. degree of the Agra University is given in the Sanatan Dharma and the D. A. V. Colleges at Cawnpore and in the St. John's College at Agra; a commerce department for B. Com. degree is also attached to Allahabad and Lucknow Universities. The King George's Medical College, Lucknow, now merged in the Lucknow University, prepares candidates for the M.B.B.S. degree of the Lucknow University. Besides this there are two medical schools at Agra for males and females; and also a College of Ayurveda and Tibbiya is attached to the Benares Hindu and the Aligarh Muslim Universities respectively. Public schools for secondary and primary vernacular education are almost entirely maintained or aided by district and municipal boards and vernacular education is almost entirely in their hands.

Medical.

The Medical Department is in charge of an Inspector-General of Civil Hospitals, who is assisted by a lady Superintendent for Medical aid to women in the administration of the Dufferin fund affairs. A Civil Surgeon is in charge and is responsible for the medical work of each district and in a few of the larger stations he has an assistant. In two stations (Ranikhet and Roorkee) Medical Officers in military employ hold collateral civil charge. There are 109 Provincial Medical service officers in charge of important Moffusil dispensaries and on the reserve list and a large number of Provincial subordinate medical service officers. Lady doctors and women sub-assistant surgeons visit *purdanashin* women in their own homes and much good work is done in this manner. Maternity and Child Welfare Centres have been opened in almost all the districts of the province.

The best equipped hospitals for Indian patients are the Thomason Hospital at Agra, King George's Hospital and the Balrampur Hospital at Lucknow, the Prince of Wales Hospital, Cawnpore, King Edward VII Hospital, Benares, the Civil Hospital at Allahabad (for Europeans, Anglo-Indians and Indians living in European style) and Saint Mary's Cottage Hospital, Mussoorie. The Ramsay Hospital for Europeans at Naini Tal is a first class institution and there are also the Lady Dufferin Hospitals. King George's Medical College, Lucknow, is one of the best equipped colleges in the country, with a staff of highly efficient professors, and the hospital attached to it is the first in the Province. The Queen Mary's Hospital for women and children, completed in 1932, is also attached to the King George's Medical College and provides clinical material for the instruction of students in midwifery and gynaecology. There are also male and female medical schools at Agra. As the X-Ray Institute at Dehra Dun has been closed, it is proposed to institute classes of instruction in X-ray diagnosis and therapy at the King George's Medical College, Lucknow, where every facility for such work would be forthcoming. The scheme is, however, held up owing to lack of funds. There are sanatoria for British soldiers in the hills. The King Edward VII Sanatorium at Bhowali in the district of Naini Tal is an up-to-date and well-equipped institution for the treatment of European and Indian consumptives. In addition five centres for the treatment of tubercular patients have been established at Agra, Allahabad, Benares, Cawnpore and Lucknow. There are mental hospitals for Indian non-criminal lunatics at Agra and Bareilly and for criminal lunatics at Benares. Arrangements for the treatment of active cases of Leprosy have been made at most of the headquarters hospitals. The Shrimati Bhagwan Dei Leper Home at Cawnpore provides special facilities for the treatment of leprosy.

THE FINANCES OF THE UNITED PROVINCES.

As explained in the chapters on the new constitution of India, under the Reforms Act of 1919, the financial position of the Provinces underwent a remarkable change. The Provinces are, for all practical purposes, financially independent of the Government of India. The contribution payable by the Local Government has been remitted entirely by the Government of India with effect from the year 1928-29. As the finances of the Provinces thus become of greater importance, the position is set out in some detail in the following pages:—

ESTIMATED REVENUE FOR 1933-34.

Principal Heads of Revenue.

	Rs.
Taxes on Salt	
Taxes on Income	8,000
Land Revenue	....
Excise	5,83,08,140
Stamps	1,30,26,000
Forests	1,81,00,000
Registration	45,55,400
Scheduled Taxes	12,87,000
	....
Total	9,52,84,540

Railways.

Subsidised Companies	90,000

Irrigation.

Works for which capital accounts are kept—	
(1) Productive Works—	
Net receipts	1,17,72,801
(2) Unproductive Works—	
Net receipts	54,700
Total, net receipts	1,18,27,501
Works for which no capital accounts are kept	17,000
Total Irrigation	1,18,44,501

Debt Services.

Interest	13,82,500
Total	13,82,500

Civil Administration.

Administration of Justice	14,05,220
Jails and Convict Settlements	5,24,700
Police	1,69,100
Education	11,05,000
Medical	2,93,100
Public Health	1,42,100

SECRETARY TO THE LEGISLATIVE COUNCIL.

Babu Surendranath Ghosh

Mr. G. S. K. Hydrie, B.A., LL.B., Bar.-at-Law, Superintendent.

The Punjab.

The Punjab or land of the five rivers, is so called from the five rivers by which it is enclosed, namely, the Jhelum, Chenab, Ravi, Beas and Sutlej. Together with the North-West Frontier Province and the Indian State of Jammu and Kashmir which lie to the north, the Punjab occupies the extreme north-western corner of the Indian Empire, and with the exception of the above-mentioned province comprises all of British India north of Sind and Rajputana and west of the river Jumna. Previous to October 1912, the Punjab with its feudatories embraced an area of 136,330 square miles and a population at the Census of 1911 of 24,187,750 (inclusive of 28,587 trans-frontier Baluchis), that is to say, about one-thirteenth of the area and population of the Indian Empire. But the formation of a separate province of Delhi reduced the area and population of the Punjab by about 450 square miles and 380,000 souls, respectively. The total population of the Province in 1931, including the Baloch tribes on the border of the Dehra Ghazi Khan District, was 23,490,857 of whom 4,910,005 were in the Indian States.

Physical Features.

The greater part of the Punjab consists of one vast alluvial plain, stretching from the Jumna in the east to the Suleman Range in the west. The north-east is occupied by a section of the Himalayas and the Salt Range forms its north-western angle. A few small spurs of the Aravalli mountain system traverse the extreme south-east and terminate in the Ridge at Delhi. The Punjab may be divided into five natural divisions. The Himalayan tract includes an area of 22,000 square miles, with a scanty population living scattered in tiny mountain hamlets. The Salt Range tract includes the districts of Attock, Rawalpindi and Jhelum and part of Shahpur district. Its physical configuration is broken and confused and the mountainous tracts of Murree and Kahuta approximate closely in characteristics to the Himalayan tract. Except in the hills, the rainfall leaves little margin for protection against distress in unfavourable seasons and irrigation is almost unknown. Skirting the base of the hills and including the low range of the Siwaliks, runs the narrow sub-montane tract. This tract, secure in an ample rainfall, and traversed by streams from the hills, comprises some of the most fertile and thickly populated portions of the province. Its population of over four millions is almost agricultural and pastoral but it includes one large town in Sialkot. Of the plains of the Punjab, the eastern portion covers an area of some 36,000 square miles with a population of 10¾ millions. East of Lahore, the rainfall is everywhere so far sufficient that cultivation is possible without irrigation in fairly favourable seasons, but over the greater part of the area the margin is so slight that, except where irrigation is employed, any material reduction in the rainfall involves distress, if not actual famine. Within the eastern plains lie the large cities of Lahore and Amritsar, and the population in comparison with the western Punjab is largely urban. The western plains cover an area of 59,000 square miles, with a population of a little over six millions. The rainfall in this area, heaviest in the north and east and decreasing towards the west and south is everywhere so scanty that cultivation is only possible with the aid of artificial irrigation or upon the low-lying river-banks left moist by the retreating floods. In this very circumstance, these tracts find their security against famine, for there cultivation is almost independent of rain, a failure of which means nothing worse than a scarcity of grass. So little rain is sufficient, and absolute drought occurs so seldom that the crops may be said never to fail from this cause. The western plains embrace the great colony areas on the Chenab and Jhelum Canals which now challenge the title of the eastern plains as the most fertile, wealthy and populous portions of the province. Multan and Lyallpur are the largest towns in the western area. Owing to its geographical position, its scanty rainfall and cloudless skies, and perhaps to its wide expanse of untilled plains, the climate of the Punjab presents greater extremes of both heat and cold than any other portion of India. The summer, from April to September, is scorchingly hot, and in the winter, sharp frosts are common. But the bright sun and invigorating air make the climate of the Punjab in the cold weather almost ideal.

States.

The Indian States of the Punjab were formerly in the Political charge of the Punjab Government. In 1921, however, the thirteen most important States, including Patiala, Bahawalpur, Jind and Nabha, were formed into a separate "Punjab States Agency" under the control of the Agent to the Governor-General, Punjab States. The only States remaining in the charge of the Punjab Government are the Simla Hill States, for which the Deputy Commissioner of Simla is Political Officer, and three small States in the Ambala Division, Kalsia, Patandi and Dujana, which are supervised by the Commissioner of Ambala.

The People.

Of the population roughly one-half is Mahomedan, three-eighths Hindu and one-eighth Sikh. Socially the landed classes stand high, and of these the Jats, numbering nearly five millions, are the most important. Roughly speaking, one-half the Jats are Mahomedan, one-third Sikh and one-sixth Hindu. In distribution they are ubiquitous and are equally divided between the five divisions of the province. Next in importance come the Rajputs, who number over a million and a half. The majority of them are Mahomedans by religion,

about a fourth are Hindus and a very few Sikhs. They are widely distributed over the province. Both Jats and Rajputs of the Punjab provide many of the best recruits for the Indian Army. In fact all the agricultural classes of the Punjab, except in the south-western districts, made a magnificent response to the appeal for recruits in the great war and the province's contribution of upwards of 400,000 men to the man power of the Empire speaks for itself. The Gujars are an important agricultural and pastoral tribe, chiefly found in the eastern half of the province and in the extreme north-west. In organisation they closely resemble the Jats and are often absorbed into that tribe. There are many minor agricultural tribes, priestly and religious castes (Brahmans, Sayads and Kureshis), most of whom are landholders, the trading castes of the Hindus (Khatris, Aroras and Banias), the trading castes of the Mahomedans (Khojas, Parachas and Khakhas), and the numerous artisan and menial castes. There are also vagrant and criminal tribes, and foreign elements in the population are represented by the Baluchis of Dera Ghazi Khan and neighbouring districts in the west, who number about half a million and maintain their tribal system, and the Pathans of the Attock and Mianwali districts. Pathans are also found scattered all over the province engaged in horse-dealing, labour and trade. A small Tibetan element is found in the Himalayan districts.

Languages.

The main language of the province is Punjabi, which is spoken by more than half the population. Western Punjabi may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west. The next most important languages are Western Hindi, which includes Hindustani and Urdu (the polished language of the towns) Western Pahari, which is spoken in the hill tracts; and Rajasthani, the language of Rajputana. Baluchi, Pushto, Sindhi and Tibeto-Burman languages are used by small sections of the population.

Agriculture.

Agriculture is the staple industry of the province affording the main means of subsistence to 60·5 per cent. of the population. It is essentially a country of peasant proprietors. About one-sixth of the total area in British districts is Government property, the remaining five-sixths belonging to private owners, and a large part of the Government land is so situated that it cannot be brought under cultivation without extensive irrigation. Thus the Lower Chenab Canal irrigates 1,939,000 acres of what was formerly waste land, the Lower Jhelum Canal, 4,18,000 acres, and the Lower Bari Doab Canal, adds 1,005,000 acres to this total. On account of the opening of the Sutlej Valley canals an area of about 1,213,000 acres more has been brought under cultivation. Large areas in the hills and elsewhere which are unsuited to cultivation are preserved as forest lands, the total extent of which is about 6,000 square miles. Of the crops grown, wheat is the most important and the development of irrigation has led to a great expansion of the wheat area. Next in importance to wheat is gram. Other important staples are barley, rice, millets, maize, oilseeds (rape, toria and sesamum), cotton and sugarcane. In the canal colonies large areas of American cotton are grown but in the cotton-growing districts the short staple indigenous varieties are predominant. The country being preponderantly agricultural, a considerable proportion of the wealth of the people lies in live-stock. Large profits are derived from the cattle and dairy trades and wool is a staple product in Kulu and Kangra and throughout the plains generally. The production of hides and skins is also an important industry.

Industries.

The mineral wealth of the Punjab is small, rock salt, saltpetre and limestone for road building being the most important products. There are some small coal mines in the Jhelum, Shahpur and Mianwali districts. Gold washing is carried on in most of the rivers not without remunerative results. Iron and copper ores are plentiful but the difficulty of carriage and the absence of fuel have hitherto prevented smelting on a large scale. The Punjab is not a large manufacturing province, the total number of factories being only 673 the majority of which are cotton ginning and pressing factories. Blankets and woollen rugs are produced in considerable quantities and the carpets of Amritsar are famous. Silk weaving is also carried on and the workers in gold, silver, brass, copper and earthenware are fairly numerous. Ivory carving is carried on extensively at Amritsar and Leiah and also in the Patiala State. Mineral oil is being extracted and refined in the Attock and Rawalpindi Districts and a cement factory is established at Wah near Hassanabdal. There is also a match factory at Shahdara and a factory for the hydrogenation and refining of oils at Lyallpur.

Administration.

Prior to the amendment of the Government of India Act in 1919 the head of the administration was a Lieutenant-Governor, drawn from the ranks of the Indian Civil Service. Under the amended Act the province was raised to the status of a Governorship, with an Executive Council and Ministers, the Governor-in-Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects. The general system of provincial administration under this scheme is sketched in the section "Provincial Governments" (*q. v.*) where is also given a list of the Reserved and Transferred Subjects. Associated with the Governor and the Council and Ministers is an enlarged Legislative Council, with wide powers, whose scope and authority are given in the section "Legislative Councils" (*q.v.*), the system being common to all the major provinces. The business of Government is carried on through the usual Secretariat which consists of four Secretaries, designated (1) Chief, (2) Home, (3) Finance, and (4) Transferred Departments, one Deputy Secretary, two Under-Secretaries, and one Assistant Secretary. In the Public Works Department, there are five Secretaries (Chief Engineers), one in the Buildings and

Roads Branch, one in the Hydro-Electric Branch and three in the Irrigation Branch, while the Legal Remembrancer is also the Secretary to Government in the Legislative Department. The head of the Police Department is Joint Secretary and of Education Department an Under Secretary to Government. The Government winter in Lahore and the summer (from the middle of May to the middle of October) in Simla. Under the Governor, the province is administered by five Commissioners (for Ambala, Jullunder, Lahore, Rawalpindi and Multan) who exercise general control over the Deputy Commissioners—29 in number—each of whom is in charge of a district.

The principal heads of Department in the province are the two Financial Commissioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Agriculture and the Court of Wards), the five Chief Engineers, the Inspector-General of Police, the Director of Public Instruction, the Inspector-General of Prisons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co-operative Credit Societies and Joint Stock Companies and the Legal Remembrancer.

Justice.

The administration of justice is entrusted to a High Court, which is the final appellate authority to civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil jurisdiction in special cases. The Court sits at Lahore and is composed of a Chief Justice and eight Puisne Judges (either civilians or barristers), and six temporary Additional Judges, including the Inspecting Judge sanctioned each year for six months. Subordinate to the High Court are the District and Sessions Judges (25 in number) each of whom exercise civil and criminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Frontier Crimes Regulation is in force the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment.

Local Self-Government.

Local Self-Government is secured in certain branches of the administration by the constitution of District Boards, each exercising authority over a district; of Municipal, Small Town, and Notified Area Committees each exercising authority over an urban area, and of Panchayats, each exercising authority over a revenue estate or a compact group of revenue estates. The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession taxes and miscellaneous fees, and those of Municipal, Small Town, and Notified Area Committees from octroi or terminal tax and other forms of taxation from Government grants and from rents and miscellaneous fees. The Panchayat system is an attempt to revive the traditional village community organisation, the elected committee or Panchayat possessing certain powers in respect of taxation, local option, civil and criminal justice, the abatement of nuisances and other matters. Most of the members of practically all local bodies are now elected and elections are usually keenly contested.

Police.

The Police force is divided into District Police, Railway Police and Criminal Investigation Department. The combined force is under the control of the Inspector-General, who is a member of the gazetted force and has under him three Deputy Inspectors-General in charge of ranges comprising several districts and a fourth Deputy Inspector-General in charge of the Criminal Investigation Department and of the Finger Print Bureau at Phillaur. There is a Police Training School at Phillaur controlled by a Principal of the rank of Superintendent of Police. The Railway Police are under an Assistant Inspector-General. The District Police are controlled by Superintendents, each of whom is in charge of a district and has under him one or more Assistant Superintendents or Deputy Superintendents.

Education.

The strides which have been made in the past decade especially in the concluding years of the period, have brought the Punjab into line with the older and more forward provinces. The advance has not been confined to any one form of education but is spread over all grades and varieties. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains fifteen arts colleges (including one for Europeans and one for women), three normal schools for males, twelve training classes, and combined institutions for females, one hundred and twenty secondary schools for boys and girls and fifty centres for vocational training. Apart from these institutions for general education, Government maintains six higher grade professional institutions, *viz.*, the King Edward Medical College and Veterinary College at Lahore, the Agricultural College at Lyallpur, the Engineering College at Moghalpura, the Central Training College, Lahore and the Chelmsford Training College at Ghoragali, and two schools, *viz.*, the Medical School at Amritsar and the Engineering School at Rasul. In addition there are thirty-two technical and industrial schools (thirty for males and two for females) scattered over the province.

The Department of Education is in charge of the Minister for Education who is assisted in the work of administration by the Director of Public Instruction.

Medical.

The Medical Department is controlled by the Inspector-General of Civil Hospitals, who is an officer of the Indian Medical Service holding the rank of Colonel. He is assisted by an officer designated the Assistant Inspector General of Civil Hospitals, who is at present an officer of the Indian Medical Department of the rank of a Civil Surgeon.

Public Health.

The Department of Public Health is controlled by the Director of Public Health (a member of the Indian Medical Service) who has, working under him, three Assistant Directors of Public Health, 34 District Medical Officers of Health, and twenty-eight District Sanitary Inspectors. In addition there is a temporary staff of 10 Sub-Assistant Health Officers and 15 Sanitary Inspectors for assistance in combating epidemic diseases. The ancillary services comprise

(1) A Vaccine Institute which is in charge of the Assistant Director of Public Health, Punjab (Technical) Vaccination, assisted by a Superintendent and which prepares sufficient vaccine lymph to meet the needs not only of the Punjab, but of the Army in Northern India and of several provinces and Indian States in and beyond the confines of India.

(2) An epidemiological bureau, which is in charge of the Epidemiologist to Government where, in addition to routine bacteriological examination, research work in matters bearing upon public health problems is carried out.

(3) An Education Bureau, to which is attached a photographer and a draftsman.

(4) A Chemical Laboratory in charge of a fully trained chemist whose duties comprise the chemical analysis of water samples and food stuffs.

(5) A Public Health Equipment Depot which supplies Government Institutions, local bodies, etc., with reliable disinfectants, vaccine sera, etc.

(6) A Public Health School, the staff of which is responsible for the training of health visitors. The Principal, who is also Inspectress of Health Centres, supervises the maternity and child welfare work throughout the province.

In matters connected with sanitary works the Director of Public Health works in close touch with the Superintending Engineer, Public Health Circle, Punjab, who acts as technical adviser of the Public Health Department in engineering matters. This officer and the Director of Public Health are also the technical advisers of the Sanitary Board whose duty it is to examine and report upon sanitary schemes put forward by local bodies.

Burma.

The Province of Burma lies between Assam on the North-West and China on the North-East, and between the Bay of Bengal on the West and South-West and Siam on the South-East. Its area is approximately 261,000 square miles, of which 192,000 are under direct British Administration, 7,000 are unadministered and 62,000 belong to semi-independent Native States. The main geographical feature of the country is the series of rivers and hills running fan-like from North to South with fertile valleys in between widening and flattening out as they approach the Delta. Differences of elevation and rainfall produce great variations in climate. The coastal tracts of Arakan and Tenasserim have a rainfall of about 200 inches, the Delta less than half that amount. The hot season is short and the monsoon breaks early. The maximum shade temperature is about 96°, the minimum about 60°. North of the Delta the rainfall decreases rapidly to 30 inches in the central dry zone which lies in a "rain shadow" and has a climate resembling that of Bihar. The maximum temperature is twenty degrees higher than in the wet zone, but this is compensated by a bracing cold season. To the north and east of the dry zone lie the Kachin hills and the Shan plateau. The average elevation of this tableland is 3,000 feet with peaks rising to 9,000. Consequently it enjoys a temperate climate with a rainfall of about 70 inches on the average. Its area is over 50,000 square miles. There is no other region of similar area in the Indian Empire so well adapted for European colonization. The magnificent rivers, the number of hilly ranges (Yomas) and the abundance of forests, all combine to make the scenery of Burma exceedingly varied and picturesque.

The People.

The total population of Burma at the census of 1931 was 14,667,146. There were 9,092,214 Burmans, 1,037,406 Shans, 1,367,673 Karens, 153,345 Kachins, 348,994 Chins, 534,985 Arakanese and Yanbye, 336,728 Talaings and 138,739 Palaungs. There is also a large alien population of 193,594 Chinese and 1,017,825 Indians, while the European and Anglo-Indian population numbered 30,441, and Indo-Burmans, 182,166.

The Burmans, who form the bulk of the population, belong to the Tibetan group and their language to the Tibeto-Chinese family. They are essentially an agricultural people, 80 per cent. of the agriculture of the country being in their hands. The Burmese and most of the hill tribes also, profess Buddhism, but Arimism, or the worship of nature spirits, is almost universal. The interest taken by the Burmese in the course of the war, their response to the call for recruits and their generous contributions to war loans and charitable funds seem to show that their apathy towards the government of the country is giving way to an intelligent loyalty to British rule.

In appearance the Burman is usually somewhat short and thick set with Mongolian features. His dress is most distinctive and exceedingly comfortable. It consists of a silk handkerchief bound round his forehead, a loose jacket on his body and a long skirt or longyi tied round his waist, reaching to his ankles. The Burmese women, perhaps the most pleasing type of womanhood in the East, lead a free and open life, playing a large part in the household economy and in petty trading. Their dress is somewhat similar to the men's minus the silk kerchief on the head, and the longyi is tucked in at the side instead of being tied in front. A well dressed and well groomed Burmese lady would, for grace and neatness, challenge comparison with any woman in the world.

Communications.

The Irrawaddy, and to a less extent the Chindwin, afford great natural thoroughfares to the country. At all seasons of the year these rivers, especially the Irrawaddy, are full of sailing and steam craft. In the Delta the net-work of waterways is indeed practically the only means of communication. The Irrawaddy Flotilla Company, with a fine fleet of mail, cargo and ferry boats, gives the Irrawaddy and the Delta rivers and creeks a splendid river service.

The Burma Railways has a length of 2,057·25 miles open line. The principal lines are from Rangoon to Mandalay; from Mandalay to Myitkyina, the most northern point in the system; the Rangoon-Prome line; and the Pegu-Martaban line, which serves Moulmein on the further bank of the Salween River.

Industry.

Agriculture is the chief industry of the province and supports nearly three-fourths of the population. The nett total cropped area is 16¼ million acres of which nearly ¾ million acres are cropped more than once. Irrigation works supply water to nearly 1 million acres. India is very largely dependent on Burma for her supplies of kerosene, benzine and petrol which rank second to rice in order of importance. Teak wood is exported in large quantities from Burma to India.

Forests play an important part in the industrial life of the Province. The forest reserves cover some 34,705 square miles, while unclassed forests are estimated at about 1,48,576 square miles. Government extracts some 72,731 tons of teak annually, private firms, of whom the Bombay Burma Trading Corporation and Steel Brothers are the chief, extract over 2,52,297 tons. Other timber extracted by licensees amounts to over 2,37,804 tons and firewood over 10,45,161 tons.

Tin and wolfram are found chiefly in the Tavoy and Mergui Districts. Wolfram and tin are found together in most mining areas in Tavoy, the proportion varying from almost pure tin to almost pure wolfram. There has been on improvement in the price of tin.

There was a slight improvement in the output of tin and wolfram during the year 1932, as compared with the output of 1931. Silver lead

and zinc ore are extracted by the Burma Corporation at Bawdwin in the Northern Shan States. Copper in small quantities is also found there. There are small deposits of Molybdenite in Tavoy and Mergui and of plantinum in Myitkyina. The Burma Ruby Mines, Ltd. which had the sole right to work for precious stones in the Mogok Stone Tract of the Katha District surrendered their lease on the 30th June 1931. Mining is now carried out by native miners working under licenses. There was no output of precious stones from the ruby mines in 1932. The output of amber in 1932 was 11.442 cwt. The output of Burmese Jadeite during 1932 compared with that of the previous year showed an increase of 260.78 cwts. but the value depreciated considerably owing mainly to the inferior quality of mineral obtained. Conditions in China also contributed to a fall in value. The oldest and largest oil field in the province is at Yenangyaung in the Magwe District where the Burma Oil Company has its chief wells. There was a decrease in the output from the wells in the Yenangyaung oilfield due to a natural decline in the production of the wells. There was an increase in the output of the Chindwin District which is ascribed to five new wells in the Indaw Oilfield being brought into operation during the year. There was also an increase in the output in the Pakokku District due to the greater activity of the operators. The output of petroleum during 1932 exceeded that of 1931 by 3,655,727 gallons the increase being mainly from wells in the Pakokku District and the Chauk Oilfield of the Magwe District. The Burma Oil Company take their oil to the refineries at Rangoon by pipe line from the Yenangyaung and Singu Oilfields. Other companies take it down by river flats. The area under rubber is 1,10,445 acres.

Manufactures.

There are 1,093 factories, more than half of which are engaged in milling rice and nearly one-seventh are sawmills. The remainder are chiefly engineering works, cotton ginning mills, oil mills for the extraction of oil from groundnuts, printing presses, ice and aerated water factories and oil refineries connected with the petroleum industry. The total number of persons employed in establishments under the Indian Factories Act in 1932 was 90,578. Perennial factories employed 42,652 and seasonal factories 47,926. At the Census of 1931, 1,850,176 or 29.79 per cent. of the total population were engaged outside agriculture and production.

As is the case in other parts of the Indian Empire, the imported and factory made article is rapidly ousting the home-made and indigenous. But at Amarapura in the Mandalay District a revival has taken place of hand silk-weaving. Burmese wood-carving is still famous and many artists in silver still remain, the finish of whose work is sometimes very fine. Bassein and Mandalay parasols are well known and much admired in Burma. But perhaps the most famous of all hand-made and indigenous industries is the lacquer work of Pagan with its delicate patterns in black, green, and yellow traced on a ground-work of red lacquer over bamboo. A new art is the making of bronze figures. The artists have gone back to nature for their models, breaking away from the conventionalized forms into which their silver work had crystallized and the new figures display a vigour and life that make them by far the finest examples of art the province can produce.

Administration.

Burma, which was at that time administered as a Lieutenant-Governorship, was deliberately excluded from the operation of the Reform Act of 1919. It was felt that the Province differed so markedly from the other Provinces in the Indian Empire that its requirements should be separately considered. After repeated discussions the question was referred to a special Burma Reforms Committee, which in 1922 recommended that all the essential provisions of the Reform Act should be applied to the Province. This recommendation was accepted and its proposals became law. Under this Act Burma became a Governor's Province, with an executive council and ministers, and conforms to the provinces recreated under the Act of 1919 (q.v.). The main difference is in the size of the electorate. Under the franchise accepted, the rural electorate is estimated at 1,979,450 and the urban electorate has been put as high as 99,882. The Legislative Council consists of 103 members, of which 80 are elected and the balance nominated. Owing to the special status of women in Burma, female franchise was adopted from the beginning.

Burma is divided administratively into Upper Burma (including the Shan States and Chin Hills) and Lower Burma. The Shan States are administered by the Chiefs of the States, subject to the supervision of the Commissioner, Federated Shan States, who is also Superintendent for the Southern Shan States, and the Superintendent of the Northern Shan States. The Northern and Southern Shan States were formed into a Federation on the 1st October 1922, and are designated the F. S. States. The other Shan States in Burma are subject to the supervision of the Commissioner, Sagaing Division. The Civil, Criminal and Revenue administration is vested in the Chief of the State, subject to the restrictions contained in the sanad. The law administered is the customary law of the State.

Under the Governor are eight Commissioners of divisions, three in Upper, four in Lower Burma, and one in the Federated Shan States.

Justice.

The administration of Civil and Criminal Justice is under the control of the High Court of Judicature at Rangoon, which consists of a Chief Justice and ten other permanent Judges. The Superior Judicial Service consists of District and Sessions Judges; there are also separate Provincial and Subordinate Judicial Services.

All village headmen have limited magisterial powers and a considerable number are also invested with civil jurisdiction to a limited extent.

In pursuance of the policy of decentralization steps were taken in 1917 to restore to the village headmen the power and influence which they possessed in Burmese times before the centralizing tendencies of British rule made them practically subordinate officers of the administration.

Public Works.

The P.W.D. comprises two Branches, *viz.*, the B. & R. Branch the Irrigation Branch.

The B. & R. Branch of this Department which is under the Ministry of Forests is administered by one Chief Engineer. There is also a Personal Assistant to the Chief Engineer. There are four permanent Superintending Engineers in charge of Circles, two of which are stationed at Rangoon and two at Maymyo. One post of Superintending Engineer has continued to be in abeyance for reasons of retrenchment. These are officers of the administrative rank.

Those of the executive rank are the Executive Engineers and Assistant Executive Engineers who number 25 (twenty five), including the Personal Assistant to the Chief Engineer, on the cadre of the Indian Service of Engineers. Besides this there is also the Burma Engineering Service (Class I) which has been constituted for the purpose of gradually replacing the Indian Service of Engineers in the B. & R. Branch; so far 18 appointments have been made to the latter service. There are 16 officers in service at present.

Further, there are the following officers belonging to the specialist services who are stationed at Rangoon :—

(1) One Superintending Engineer, Public Health Circle.
(2) Two Sanitary Engineers.
(3) One Electrical Inspector.
(4) Two Electrical Engineers.
(5) One Consulting Architect.
(6) One Superintendent of Stores.
(7) One Assistant Superintendent of Stores.

The Irrigation Branch of the P.W.D., which is under the control of the Hon'ble Finance Member, is administered by the Chief Engineer, P.W.D., Burma Irrigation Branch, who is assisted by a Personal Asstt. There are four permanent Superintending Engineers in charge of Circles, two of whom are stationed at Rangoon and two at Maymyo. One of these posts in the headquarters at Rangoon is temporarily held in abeyance on account of the financial stringency. These are officers of the Administrative rank.

Those of the Executive rank are the Executive Engineers and Asst. Executive Engineers who number 20 on this cadre of the Indian Service of Engineers. Besides this there is also the Burma Engineering service, which is a Provincial Service.

Further, there is a River Training Expert. On account of reduction of works due to the financial stringency the number of temporary Engineers recruited locally and in England to augment the permanent staff has been reduced to one each.

Police.

The Police Force is divided into: Civil, Military and Rangoon Town Police. The first two are under the control of the Inspector-General of Police, the latter is under the orders of the Commissioner of Police, Rangoon, an officer of the rank of Deputy Inspector-General. There are five other Deputy Inspectors-General, one each for the Northern, Southern and Western Ranges, one for the Railway and Criminal Investigation Department, and one for the Military Police.

A special feature of Burma is the Military Police. Its officers are deputed from the Indian Army. The rank and file are recruited from natives of India with a few Kachins, Karens and Chins. The experiment of recruiting Burmese on a small scale has been successful. The organisation is military, the force being divided into battalions. The object of the force is to supplement the regular troops in Burma. Their duties, apart from their military work, are to provide escorts for specie, prisoners, etc., and guards for Treasuries, Jails and Courts.

Education.

Under the Minister for Education there is the Director of Public Instruction with an Assistant Director, both belonging to the Indian Educational Service. There are nine Inspectors of Schools drawn from the Indian Educational Service, and the Burma Educational Service (class I) while the Burma Educational Service (class II) provides seven Assistant Inspectors. There is one Asstt. Inspector of School Physical Training, appointed on a Temporary basis. There are also two Inspectresses of Schools. There is a Chief Educational Officer for the Federated Shan States.

A centralized, teaching and residential University for Burma, has been established in Rangoon. It now provides courses in Arts, Science, Law, Education, Economics, Engineering, Medicine and Forestry.

English and A. V. Schools are controlled by the Education Dept. A remarkable feature of education in Burma is the system of elementary education evolved, generations ago, by the genius of the people. Nearly every village has a monastery (hpoongyi-kyaung); every monastery is a village school and every Burman boy must, in accordance with his religion, attend that school, shaving his head and for the time wearing the yellow robe. At the hpoongyi-kyaungs the boys are taught reading and writing and an elementary native system of arithmetic. The result is that there are very few boys in Burma who are not able to read and write. Vernacular education is in the hands of Local Educational authorities.

Among special institutions, the Government Technical Institute, Insein, provides courses in Mechanical, Civil and Electrical Engineering and the Agricultural College, Mandalay, courses in Agriculture. The Mary Chapman Training College for Teachers and School for the Deaf exists in Rangoon and schools for the blind, at Moulmein and Rangoon.

A liberal scheme of State Scholarships provides for the despatch of 12 scholars to Europe each year.

Medical.

The control of the Medical Department is vested in an Inspector-General of Civil Hospitals. Under him are 37 Civil Surgeons. There is also a Director of Public Health, two Assistant Directors of Public Health, the senior of whom is also Director, Public Health Institute, at which there is now a Public Analyst (which post is at present held in abeyance for purposes of economy) and to which is also attached a Malaria Bureau, an Inspector-General of Prisons, three whole time Superintendents of Prisons, a Chemical Examiner and Bacteriologist and a Superintendent of the Mental Hospital. There is also a post of Hygiene Publicity Officer, which for the present is held in abeyance.

The Pasteur Institute was opened in Rangoon in July 1915. The Director is a member of the Indian Medical Service.

THE FINANCES OF BURMA.

In common with the other Provinces of India, the financial arrangements between the Gov-ment of India and the Government of Burma underwent a remodelling in consequence of the onstitution of the Province on the lines of the other Indian Provinces. The Province obtained stantial financial independence. The present position is set out in the following statement:—

ESTIMATED RECEIPTS FOR 1933-34.

REVENUE RECEIPTS—ORDINARY.

	Rs.
tes on Income	....

Bihar and Orissa.

Bihar and Orissa lies between 19°-02′ and 27°-30′ N. latitude and between 82°-31′ and 88°-26′ E. longitude and includes the three provinces of Bihar, Orissa and Chota Nagpur, and is bounded on the north by Nepal and the Darjeeling district of Bengal; on the east by Bengal and the Bay of Bengal; on the south by the Bay of Bengal and Madras; and on the west by the United Provinces of Agra and Oudh and the Central Provinces.

The area of the territories which constitute the Governorship of Bihar and Orissa is 83,180 square miles inclusive of the area of large rivers. The States in Orissa and Chota Nagpur which were included in the Province of Bihar & Orissa have since the 1st April 1933 been transferred to the control of the Agent to the Governor-General, Eastern States and no longer form part of the Province. Two of the provinces of the Governorship of Bihar and Orissa, *viz.*, Bihar and Orissa, consist of great river valleys, the third, Chota Nagpur, is a mountainous region which separates them from the Central Indian Plateau. Orissa embraces the rich deltas of the Mahanadi and the neighbouring rivers and is bounded by the Bay of Bengal on the south-east and walled in on the north-west by the hilly country of the Tributary States. Bihar lies on the north of the Province and comprises the valley of the Ganges from the spot where it issues from the territories of the Governor of the United Provinces of Agra and Oudh till it enters Bengal near Rajmahal. Between Bihar and Orissa lies Chota Nagpur. Following the main geographical lines there are five Civil Divisions with headquarters at Patna, Muzaffarpur (for Tirhut), Bhagalpur, Cuttack (for Orissa) and Ranchi (for Chota Nagpur). The headquarters of Government are at Patna. The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Bankipore is known as "Patna," the old town being called "Patna City."

The People.

The Province has a population of 42,329,583 persons. Even so with 451 persons per square mile, Bihar and Orissa is more thickly populated than Germany. There are only four towns, which can be classed as cities, namely, Patna, Gaya, Jamshedpur and Bhagalpur. During the last ten years the population of Patna has been steadily increasing. Hindus form an overwhelming majority of the population. Though the Muhammadans form about one-tenth of the total population they constitute more than one-fifth of urban population of the province. Animists account for 5·9 per cent. These are inhabitants of the Chota Nagpur plateau and the Santal Parganas, the latter district being a continuation of the plateau in a north-easterly direction.

Industries.*

The principal industry is agriculture, Bihar, more especially North Bihar, being the "Garden of India." Rice is the staple crop but the spring crops, wheat, barley, and the like are of considerable importance. It is estimated that the normal area cultivated with rice is 14,091,300 acres or about 48 per cent. of the cropped area of the Province. Wheat is grown on 1,220,900 acres, barley on 1,356,400 acres, maize or Indian-corn on 1,644,700 the latter being an autumn crop. Oil-seeds are an important crop, the cultivation having been estimated by the demand for them in Europe. It is estimated that 1,876,800 acres of land are annually cropped with oil-seeds in the Province. There is irrigation in Shahabad, Gaya, Patna and Champaran districts in Bihar and in Balasore and Cuttack in Orissa. The Indigo industry is steadily on the decline, the total area sown having decreased from 342,000 acres in 1896 to 25,000 acres in 1923. The principal cause of this was the discovery of the possibilities of manufacturing synthetic or chemically prepared indigo on a commercial scale. Its place as a crop manufactured for export has been largely taken by sugarcane, the cultivation of which has been considerably extended owing to the high prices given by sugar factories. In the district of Purnea and in Orissa, and parts of the Tirhut Division jute is grown, but the acreage varies according to the price of jute. The last serious famine was in 1895-96, but there was a serious shortage of foodstuffs in the south of the Province in 1919. In any year in which monsoon currents from either the Bay of Bengal or the Arabian Sea are unduly late in their arrival or cease abruptly before the middle of September the agricultural situation is very grave. It may be said that for Bihar the most important rainfall is that known as the *hatia*, due towards the end of September or up to middle of October. Rain at this time not only contributes materially to an increased outturn of the rice crop, but also provides the moisture necessary for starting the spring or *rabi* crops.

Manufactures.

Opium was formerly, with indigo, the chief manufactured product of Bihar, but in consequence of the agreement with the Chinese Government the Patna Factory has been closed. At Monghyr the Peninsular Tobacco Company have erected one of the largest cigarette factories in the world and as a result tobacco is being grown much more extensively. The Tata Iron and Steel Works at Jamshedpur in Singhbhum district are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The most important of these are the Tinplate Company of India, Agricultural Implements, Ltd., Enfield

* The figures given in this paragraph relate to British territory only.

Cable Company of India, Enamelled Ironware, Limited, and Indian Steel Wire Products. The population of Jamshedpur is rapidly approaching 100,000 and it consumes 1½ million tons of coal annually. This part of the province has also some of the richest and most extensive iron mines in the world and supplies the iron and steel works in both Bengal and Bihar and Orissa with raw materials, but the raising of coal is still the most important of the mineral industries in the province. The coalfields in the Manbhum District have undergone an extraordinary development in the past twenty years, while valuable new fields are being developed at Ramgarh, Bokaro and Karanpura in Hazaribagh. This same district is the most important mica mining centre in the world both on account of the quality as well as the size of its output. Manbhum, Palamau, Ranchi, the Santal Parganas and Gaya are also the chief centres for the production of lac and the manufacture of shellac, the latter of which is exported from India to the value of ten crores annually.

Administration.

The Province on first constitution was administered by a Lieutenant-Governor-in-Council, thus being unique in India as the only Lieutenant Governorship with a Council. Under the Reform Act of 1919 it was raised to the status of a Governorship, with an Executive Council and Ministers. The principles of the provincial administration are fully explained in the section. The Provincial Governorships, where the division of the administration into Reserved Subjects, in charge of the Governor and his Executive Council, and Transferred Subjects, in charge of the Governor and Ministers chosen from the Legislative Council, is set out in detail. In all these respects Bihar and Orissa is on the same plane as the other Provinces in India.

Public Works.

The Public Works Department in the Province of Bihar and Orissa consists of two separate branches, *viz.*:—(1) the Buildings and Roads which includes Railways and the Public Health Engineering Branch and (2) Irrigation. Each has a Chief Engineer, who is also Secretary to the Local Government with an Engineer Officer as Under-Secretary in the Buildings and Roads branch and a non-professional Assistant Secretary, in the Irrigation branch under him. The Electrical work of the Province is carried out by an Electric Inspector and an Electrical Engineer and a staff of subordinates.

Justice.

The administration of justice is controlled by the High Court of Judicature at Patna. In the administration of civil justice below the High Court are the District Judges as Courts of Appeal, the Subordinate Judges and the Munsiffs. The jurisdiction of a District Judge or Subordinate Judge extends to all original suits cognizable by the Civil Courts. It does not, however, include the powers of a Small Cause Court, unless these be specially conferred. The ordinary jurisdiction of a Munsif extends to all suits in which the amount or value of the subject matter in dispute does not exceed Rs. 1,000 though the limit may be extended to Rs. On the criminal side the Sessions Judge appeals from Magistrates exercising first powers while the District Magistrate is appellate authority for Magistrates exerc second and third class powers. The Di Magistrate can also be, though in point of be very rarely is, a court of first instance. usual in most districts for a Joint Magistra a Deputy Magistrate to receive complaints police reports, cases of difficulty or import being referred to the District Magistrate wi responsible for the peace of the district. In non-regulation districts the Deputy Com sioner and his subordinates exercise civil po and hear rent suits.

Land Tenures.

Estates in the Province of Bihar and O are of three kinds, namely, those permane settled from 1793 which are to be found in Patna, Tirhut and Bhagalpur divisions, t temporarily settled as in Chota Nagpur parts of Orissa, and estates held direct by G ernment as proprietor or managed by the Co of Wards. The passing of the Bengal Tena Act (VIII of 1885) safeguarded the rights of cultivators under the Permanent Settlement Further, the Settlement Department under supervision of the Director of Land Reco makes periodical survey and settlement ope tions in the various districts both permanen and temporarily settled. In the former, rights of the undertenants are recorded and tested, while in the latter there is the re-sett ment of rents. In the re-settlement proceedin rents are fixed not only for the landlords but a for all the tenants. A settlement can be order by Government on application made by lar lords or tenants.

The tenures of Orissa are somewhat differe Under the zamindars, that is, the proprieto who took settlement from Government and p revenue to Government direct, is a class of su ordinate proprietors or proprietary tenu holders, who were originally village headm dealing more or less direct with the reven authorities. They have a variety of name such as *mukadam*, *padhan*, *maurusi*, *sarbarah pursethi*, *khariddar* and *shikmi* zamindar These sub-proprietors or proprietary tenu holders pay their revenue through the zamin dars of the estates within which their land lie. In Chota Nagpur and the Santal Pa ganas, the rights of village headmen have bee recognised. The headman collects the ren and is responsible for them minus a deductio as remuneration for his trouble.

Both Orissa and Chota Nagpur have their ow Tenancy Acts. In the district of the Santa Parganas, the land tenures are governed b Regulations III of 1872 and II of 1886 and i the district of Sambalpur by the Central Pro vinces Land Revenue Act, 1881 and the Centra Provinces Tenancy Act, 1898.

Police.

The Departments of Police, Prisons an Registration are each under the general directio of Government, supervised and inspecte by an Inspector-General with a staff of assis tants. The Commissioner of Excise and Sal is also Inspector-General of Registration.

Under the Inspector-General of Police are four Deputy Inspectors-General and 29 Superintendents. There are also 24 Assistant Superintendents of Police and 28 Deputy Superintendents. The force is divided into the District Police, the Railway Police and the Military Police. A Criminal Investigation Department has also been formed for the collection and distribution of information relating to professional criminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in investigations of crime of this class and other serious action which its assistance may be invoked. There are three companies of Unmounted Military Police and one company of Mounted Military Police which are maintained as reserves to deal with serious and organised disturbances and perform no ordinary civil duties.

Education.

The position of education in the Province, with the numbers attending schools, is set out in the section Education and the tables attached thereto (*q. v.*) showing in great detail the educational status of the administration.

There is a University at Patna, whose functions are described under the Indian Universities. (*q. v.*)

Medical.

The Medical Department is under the control of the Inspector-General of Civil Hospitals who is a Member of the Indian Medical Service. Under him there are 21 Civil Surgeons who are responsible for the medical work of the districts at the headquarters of which they are stationed. 61 Dispensaries are maintained by Government in addition to 611 Dispensaries maintained by Local bodies, Railways, private persons, etc. 7,587,129 patients including 92,544 in-patients were treated in all the dispensaries in 1931. The total income of the dispensaries maintained by Government and Local Bodies including that of the private aided institutions amounted to Rs. 35,05,631.

A large mental hospital for Europeans has been opened at Ranchi which receives patients from Northern India. A similar institution for Indians has been opened at Ranchi since September 1925 for the treatment of patients from Bihar and Orissa and Bengal. A sanitorium at Itki in the district of Ranchi has also been established for the treatment of tuberculosis. An institute for radium treatment has also been established at Patna. Centres for anti-rabic treatment have been started at Patna and Cuttack.

A medical college has been opened at Patna and the Medical School which was in existence at Patna has been transferred to Darbhanga.

THE FINANCES OF BIHAR AND ORISSA.

As Bihar now enjoys practical financial autonomy, the finances are set out in greater detail

(In thousands of Rupees.)

Revenues and Receipts.	*Budget Estimate.* 1933-34.
II.—Taxes on Income ..	3,17
III.—Salt	3,00
V.—Land Revenue ..	1,79,57

Dr. Sir Saiyid Sultan Ahmzad	Nominated (Expert).

The Central Provinces and Berar.

The Central Provinces and Berar compose a great triangle of country midway between Bombay and Bengal. Their area is 133,069 sq. miles, of which 82,149 are British territory proper, 17,808 (*viz.* Berar) held on perpetual lease from H.E.H. the Nizam and the remainder held by Feudatory Chiefs. The population (1931) is 15,507,723 in C. P. British Districts and Berar. Various parts of the Central Provinces passed under British control at different times in the wars and tumult in the first half of the 19th century and the several parts were amalgamated after the Mutiny, in 1861, into the Chief Commissionership of the Central Provinces. Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with H.E.H. the Nizam for the maintenance of the Hyderabad Contingent, and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with H.E.H. the Nizam.

The Country.

The Central Provinces may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the north-west, the Vindhyan plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water-cut ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the more important cotton tracts of India and the wealthiest part of the C. P. proper. The Eastern half of the plain lies in the valley of the Waingan-ga and is mainly a rice growing country. Its numerous irrigation tanks have given it the name of the "lake country" of Nagpur. Further east is the far-reaching rice country of Chattisgarh, in the Mahanadi basin. The south-east of the C. P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The Feudatory States of Bastar and Kankar lie in this region. Berar lies to the south-west of the C. P. and its chief characteristic is its rich black cotton-soil plains.

The People.

The population of the province is a comparatively new community. Before the advent of the Aryans, the whole of it was peopled by Gonds and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home. But successive waves of immigration flowed into the province from all sides. The early inhabitants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of the Central Provinces being found in large numbers in all parts of the province, particularly in the South-east. The main divisions of the newcomers are indicated by the language divisions of the province. Hindi brought in by the Hindustani-speaking peoples of the North, prevails in the North and East, Marathi in Berar and the West and Centre of the Central Provinces. Hindi is spoken by 56 per cent. of the population and is the *lingua franca*. Marathi by 31 per cent. and Gondi by 7 per cent. The effects of invasion are curiously illustrated in Berar, where numbers of Moslems have Hindu names, being descendants of former Hindu officials who on the Mahomedan invasion adopted Islam rather than lose their positions. The last census shows that a gradual Brahmanising of the aboriginal tribes is going on. The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising.

Industries.

When Sir Richard Temple became first Chief Commissioner of the C. P. the province was land-locked. The only road was that leading in from Jubbulpore to Nagpur. The British administration has made roads in all directions, the two trunk railways between Bombay and Calcutta run across the province and in the last few years a great impetus has been given to the construction of subsidiary lines. These developments have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength by a phenomenal growth of the co-operative credit movement. The land tenure is chiefly on the malguzari, or landlord system, ranging with numerous variations, from the great Feudatory chief ships, which are on this basis, to holdings of small dimensions. A system of land legislation has gradually been built up to protect the individual cultivator. Berar is settled on the Bombay raiyatwari system. 16,073 square miles of the C. P. is Government Reserved forest; in Berar the forest area is about 3,339 square miles, the total forest area being one-sixth of the whole Province. The rugged nature of the greater part of the country makes forest conservation difficult and costly. Excluding forest and waste 67 per cent. of the total land is occupied for cultivation; for the two most advanced districts in the Central Provinces, the proportion averages 83 per cent., while the average figure for the Berar Districts is as high as 93 per cent. The cultivated area has extended almost continuously except for the temporary checks caused by bad seasons. Rice is the most extensive single crop of the Central Provinces, covering nearly 30 per cent. of the cropped area. Wheat comes next with over 15 per cent., then pulses and other cereals used for food and oil-seeds with nearly 50 per cent., and cotton with over 7 per cent. In Berar cotton occupies 46 per cent. Next comes juar and then pulses and other cereals and oil seeds of the cropped area, jowar covers 31 per cent., then wheat and oilseeds. In agriculture more than half the working population is female.

Commerce and Manufactures.

Industrial life is only in its earliest development except in one or two centres, where the introduction of modern enterprise along the railway routes has laid the foundations for great future developments of the natural wealth of

the province. Nagpur is the chief centre of a busy cotton spinning and weaving industry. The Empress Mills, owned by Parsi manufacturers, were opened there in 1877 and the general prosperity of the cotton trade has led to the addition of many mills here and in other parts of the province. The total amount of spun yarn exported from the Province during the year ending 31st March 1932 was 1,89,753 maunds, valued at Rs. 56,92,590.

The largest numbers engaged in any of the modern industrial concerns are employed in manganese mining which in 1931 employed 9,508 persons and raised 302,344 tons. Then follow coal mining with an output of 973,040 tons and 8,624 persons employed, the Jubbulpore marble quarries and allied works, the limestone quarries and the mines for pottery clay, soapstone, etc.

The total number of factories of all kinds legally so described was 930 in 1932 the latest period for which returns are available and the number of people employed in them 61,627. The same economic influences which are operative in every progressive country during its transition stage are at work in the C. P. and Berar, gradually sapping the strength of the old village industries, as communications improve, and concentrating industries in the towns. While the village industries are fading away, a large development of trade has taken place. The last pre-war reports showed an increase in volume by one-third in eight years.

Administration.

The administration of the Central Provinces and Berar is conducted by a Governor-in-Council, who is appointed by the Crown. He is assisted by seven Secretaries and four under-secretaries. Under the reform scheme the administration is conducted by a Governor with an Executive Council of two members, one of whom is a non-official and two Ministers, the latter being in charge of the transferred subjects.

The local legislature consists of 73 members distributed as follows:—38 elected from the C.P.; 17 elected from Berar; 2 members of the Executive Council; 8 nominated non-officials; 8 nominated officials. The Governor (who is not a member of the Council) has the right of nominating two additional members with special knowledge on any subject regarding which legislation is before the Council. The C. P. are divided for administrative purposes into three divisions and Berar constitutes a division. Each of these is controlled by a Commissioner. The divisions are sub-divided into districts, each of which is controlled by a Deputy Commissioner, immediately subordinate to the Commissioner. The principal heads of Provincial departments are the Commissioner of Settlements and Director of Land Records, the Chief Conservator of Forests, the Inspector-General of Civil Hospitals, the Director of Public Health, the Inspector General of Police, the Inspector-General of Prisons, the Director of Public Instruction, the Excise Commissioner and Superintendent of Stamps and Inspector General of Registration, and Registrar-General of Births, Deaths and Marriages, the Director of Agriculture, the Registrar of Co-operative Societies, the Director of Industries, the Legal Remembrancer, the Director of Veterinary Services and a Chief Engineer, Public Works Department, Buildings and Roads and Irrigation Branches. The Deputy Commissioners of districts are the chief revenue authorities and District Magistrates and they exercise the usual powers and functions of a district officer. The district forests are managed by a forest officer, over whom the Deputy Commissioner has certain powers of supervision, particularly in matters affecting the welfare of the people. Each district has a Civil Surgeon, who is generally also Superintendent of the District Jail except at Central Jails at Nagpore and Jubbulpore and District Jails at Raipur, Narsinghpur, Amraoti and Akola where there are whole time Superintendents and whose work is also in various respects supervised by the Deputy Commissioner. The Deputy Commissioner is also Marriage Registrar and manages the estates of his district which are under the Court of Wards. In his revenue and criminal work the Deputy Commissioner is assisted by (a) one or more Assistant Commissioners, or members of the Indian Civil Service; (b) one or more Extra Assistant Commissioners, or members of the Provincial Civil Service, including a few Anglo-Indians and (c) by Tahsildars and Naib Tahsildars, or members of the Subordinate service. The district is divided for administrative purposes into tahsils, the average area of which is 1,500 square miles. In each village a lambardar or representative of the proprietary body is executive headman.

Justice.

The Court of the Judicial Commissioner is the highest court of appeal in civil cases, and also the highest court of criminal appeal and revision for the Central Provinces and Berar including proceedings against European British subjects and persons jointly charged with European British subjects.

The Court sits at Nagpur and consists of a Judicial Commissioner and 4 Additional Judicial Commissioners of whom one at least must be an advocate of the Court or a Barrister or pleader of not less than 10 years' standing.

Subordinate to the Judicial Commissioner's Court are the District and Sessions Judges (9 in number) each of whom exercises civil and criminal jurisdiction in a Civil and Sessions district comprising one or more Revenue districts. The civil staff below the District and Sessions Judge consists of Subordinate Judges of the first and second class.

Local Self-Government.

Municipal administration was first introduced under the Punjab Municipal Acts and the Municipality of Nagpur dates from 1864. Several revising Acts extend its scope and the C. P. Municipalities Act passed towards the end of the year 1922 has considerably increased the power of the Municipal Committees. The C. P. Municipalities Act has also been extended to Berar. Viewed generally, municipal self-government is considered to have taken root successfully. The larger towns have municipalities, there being 74 such bodies in the Province.

Under the Central Provinces Local Self-Government Act passed in 1920 as amended in 1931 there is a local Board for each tahsil and a district council for each district exception Hoshangabad, Chhindwara and Saugor districts each of which has two district councils. The local board consists of elected representatives of circle and nominated members other than Government officials not exceeding in numbers one-fourth of the board, and the constitution of the district council is a certain proportion of elected representatives of local boards, of members selected by those representatives and of members, other than Government servants, nominated by Government.

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Councils. The new Central Provinces Local Self-Government Act has also been applied to Berar. The Office Bearers of all the district councils and with few exceptions local boards also are non-officials.

Rural education, sanitation, medical relief and rural communications are among the primary objects to which these bodies direct their attention, while expenditure on famine relief is also a legitimate charge upon the District Council funds.

The Central Provinces Village Panchayat Act was passed in the year 1920. So far 850, Panchayats have been established. As the result of a recommendation of a Committee appointed in 1925 to look into the question of Panchayats, a Village Panchayat Officer was appointed to guide the developments of the Panchayat system. This post was kept vacant on account of financial stringency for more then two years. It has now been filed in with effect from the 24th May 1933.

Public Works.

The Public Works Department, which comprises Buildings and Roads and Irrigation Branches, is under the control of the Chief Engineer who is also Secretary to the Government. There are two Superintending Engineers who between them supervise the work of both branches. The Province is well served by a net-work of roads, but in a number of cases they are not fully bridged and are therefore impassable to traffic at times during the rains. During the last 15 years Government has been pursuing a policy of transfer of certain State roads of local importance and buildings situated thereon to the District Councils for maintenance and up to date 1,127 miles of metalled and 803 miles of unmetalled roads have been transferred.

State irrigation was introduced early in the present century mainly as a result of the recommendations of the Irrigation Commission (1901-03). The Irrigation Branch of the department was separated from the Roads and Buildings Branch in 1920. During the last thirty-three years a sum of Rs. 7.2 crores has been expended on the construction of irrigation works, of which the more important are the Wainganga, Tandula, Mahanadi, Kharung and Maniari canals.

Three works, *viz.*, the Mahanadi and Wainganga Canals and the Asola Mendha tank, were sanctioned originally as productive works and the remainder were all sanctioned as unproductive works. The three works sanctioned as productive have all failed to justify their classification in that category and have now been transferred to the unproductive list. The conditions in the province are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their value as a protection against famine. The normal area of annual irrigation is at present about 387,000 acres, and the income from these works is somewhat less than the expenditure incurred on their maintenance and management.

Police.

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities, is under one force. The strength is equal to one man per nine square miles of area. The superior officers comprise an Inspector-General, whose jurisdiction extends over Berar, three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendents and subordinate officers. On railways special Railway Police are employed under the control of two Superintendents of Railway Police with headquarters at Raipur and Hoshangabad. A Special Armed Force of 870 men is distributed over the headquarters of eight districts, for use in dealing with armed disturbers of the peace in whatever quarter they may appear. There is a small force of Mounted Police. The Central Provinces has no rural police as the term is understood in other parts of India. The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect.

Education.

The Education Department of the Central Provinces and Berar is administered by a Director of Public Instruction, a Registrar, Education Department and Secretary, High School Education Board, four Inspectors and two Inspectresses who in their turn are assisted by an officer under training with eight Assistant Inspectors and four Assistant Inspectresses. Schools are divided into schools for general education and schools for special education. The latter are schools in which instruction is given in a special branch of technical or professional education. The main division of schools for general education is into Primary and Secondary. In the Primary Schools the teaching is conducted wholly in the vernacular and these schools are known as Vernacular Schools. The Secondary Schools are divided into Middle and High Schools. The former may be either Vernacular Middle Schools in which instruction is given (*a*) wholly in the vernacular or (*b*) mainly in the vernacular with an option to take English as an additional language, or Anglo-Vernacular Middle Schools in which instruction is given both in English and the Vernacular. In the High School classes instruction until recently was given in English but the vernacular was adopted as the medium of instruction at the beginning of the school year 1922-23. For the convenience of pupils whose mother tongue is not a recognised vernacular of the locality a few English medium classes are still maintained. For administrative purposes schools are further divided according

to their management into schools (under public management and schools controlled by private bodies). The former consist of (a) schools controlled by Government and (b) schools controlled by Local Bodies or Boards. The latter consist of (a) Schools which are aided by grant from Government or from Local Funds and Municipal Funds and (b) unaided schools. All schools under public management, all aided schools and all unaided recognized schools conform in their courses of study to the standards prescribed by the Education Department or by the High School Education Board. They are subject to inspection by the Department and to the general rules governing schools of this type. They are "recognised" by the Department and their pupils may appear as candidates for any prescribed examination for which they are otherwise eligible. Unrecognized schools do not follow the rules of the Department, nor are they subject to inspection by the Department. They are mostly indigenous schools which have been too recently opened to have acquired "recognition." Their pupils may not appear as candidates at any of the prescribed examinations without the previous sanction of the Department.

The Primary Education Bill which was passed by the Local Legislative Council in March 1920 marks as important stage by giving Local Bodies power to introduce compulsory education in the areas under their jurisdictions.

Higher education is at present given in five colleges. In Nagpur Morris College teaches up to the M. A. standard in Arts and B.A. (Hons). Hislop College is affiliated up to the M.A. standard in Arts, the College of Science teaches up to the M.Sc. standard in Science and Mathematics, and B. Sc. (Hons), City College, Nagpur, has since been affiliated up to the B.A. Standard, and in Civics, Mathematics and Hindi composition up to the Standard of Intermediate examination for the degrees of Bachelor of Arts and Bachelor of Science for a period of 5 years from 1st July 1932. In Jubbulpore Robertson College teaches up to the B.A. and B.Sc. standards and a'so M.A. in Hindi. The King Edward College teaches up to the B.A. degree in Arts and the Intermediate examination in Science. The province contains also a Teachers' Training College at Jubbulpore, a training class at Howbagh, Jubbulpore for the undergraduate women teachers and Normal Schools at different centres in the province and an Engineering School at Nagpur. There is a Technical Institute at Amraoti, which is controlled by the Department of Industries. There is also an Agricultural College at Nagpur under the Department of Agriculture.

Collegiate Education is under the control of the University of Nagpur to which the colleges of the province are affiliated. The University was established by the Nagpur University Act of 1923. A University Law College has been established at Nagpur with effect from the 1st July 1925.

As a corollary to the Central Provinces University Act the Central Provinces High School Education Bill was passed in 1923. Its aim is to free the High Schools of the Province from the control of the University and from this point of view to substitute for the University a Board of Secondary Education for the regulation and control of Secondary Education. In order, however, that the connection between Secondary and University Education may still be maintained the Bill provides that one-third of the members of the Board will be drawn from men experienced in university affairs and that of this one-third not less than two-thirds shall be teachers in the University or in colleges affiliated thereto. At the same time teachers engaged in school work are also represented on the Board.

Medical.

The medical and sanitary services of the province are respectively controlled by an Inspector-General of Civil Hospitals and Director of Public Health. The medical department has made some progress since the year 1911. A striking advance has been made in recent years with urban sanitation, and the opening of a Medical School at Nagpur in 1914 supplied a long-felt need. The principal medical institutions are the Mayo Hospital at Nagpur, opened in 1874 with accommodation for 205 in-patients; the Victoria Hospital at Jubbulpore, opened in 1886 with accommodation for 137 in-patients, the Lady Dufferin Hospital and the Muir Memorial Hospital at Nagpur and the Lady Elgin Hospital and the Crump Children's Hospital at Jubbulpore, these last four being for women and children and containing together accommodation for 265 in-patients. Two important hospitals for women have been recently opened at Chhindwara and Khandwa, and at all district headquarters where no separate women's hospitals exist, sections of the Main Hospitals have been opened for the treatment of women by women. The Mayo Hospital, Nagpur, was provincialised in 1923, the Main Hospital at Amraoti in 1925, the Victoria Hospital at Jubbulpore in 1926, and the Main Hospital at Raipur in 1928. In accordance with recent policy, 121 out of 181 local fund dispensaries have been transferred to the administrative and executive control of local bodies. The Province has one Mental Hospital at Nagpur. Vaccination is compulsory in nearly all Municipal towns to which the Vaccination Act has been extended. The Government in 1913 sanctioned the opening of peripatetic dispensaries in unhealthy areas. There are at present 33 such dispensaries. A school for training health workers has been started at Nagpur and 50 Infant Welfare Centres have been opened. A start in the direction of opening a Health Institute has been made with the initiation of chemical and bacteriological works with a small staff in Nagpur.

Finances.

A combination of adverse circumstances has led to a substantial contraction of the resources of the province during the last three years. In spite of drastic retrenchment all round and the emergency cut in pay, the year opened with an unproductive debt of Rs. 61 lakhs, representing loans taken in 1930-31 and 1931-32 to cover deficits, and a small anticipated balance of about Rs. 3 lakhs. In the face of these circumstances the budget presented this year was intended to mark time and practically has reached the stage beyond which retrenchment is not possible. To replace partially the fall of revenue principally from Excise, a bill to impose license fees on the vend of tobacco was presented to the Council, but it overthrew the motion for its reference to a select committee. It is clear that the local Government will have to explore additional sources of revenue in order to be able to resume measures of development.

FINANCES OF THE CENTRAL PROVINCES.

ESTIMATED REVENUE FOR 1933-34.

Principal Heads of Revenue.

	Rs.
Taxes on Income	....

CENTRAL PROVINCES LEGISLATIVE COUNCIL.

PRESIDENT.

The Hon'ble Mr. S. W. A. Rizvi, B.A., LL.B.

EX-OFFICIO MEMBERS.

The Hon'ble Mr. E. Raghavendra Rao, Barrister-at-Law, Member of the Executive Council.

The Hon'ble Mr. Eyre Gordon, C.I.E., I.C.S., Member of the Executive Council.

MINISTERS.

The Hon. Rai Bahadur K. S. Nayudu, B.A., LL.B.

The Hon. Mr. B. G. Khaparde, B.A., LL.B.

NOMINATED MEMBERS.

Officials.

Mr. Noel James Roughton, C.I.E., I.C.S., J.P., Chief Secretary to the Government of the Central Provinces.

Mr. Thomas Cook Samuel Jayaratnam, I.C.S., Secretary in the Settlement and Land Records Department, Central Provinces.

Mr. Rabindra Nath Banerjee, I.C.S., Revenue Secretary to the Government of the Central Provinces.

Mr. Chintaman Dwarkanath Deshmukh, I.C.S., Financial Secretary to the Government of the Central Provinces.

Mr. Clarence Reid Hemeon, I.C.S., Legal Remembrancer, Legal and Judicial Secretary to the Government of the Central Provinces (*Secretary to the Council*).

Mr. Goverdhan Shankerlal Bhalja, I.C.S., Registrar, Co-operative Societies and Director of Industries, Central Provinces.

Mr. Eustace Alberic Maenee, I.E.S., Director of Public Instruction and Secretary in the Education Department, Central Provinces.

Mr. John Hall Ritchie, I.A.S., Director of Agriculture, Central Provinces.

Non-officials.

Mr. Lalman Singh, Zamindar of Matin, post office Pasan, district Bilaspur (inhabitants of *Zamindari and Jagirdari estates*).

The Rev. G. C. Rogers, M.A., Head-Master, Christ Church School, Jubbulpore (*European and Anglo-Indian Communities*).

Mr. G. A. Gavai, Mal Tekdi Road, Amraoti.

Mr. T. C. Sakhare, Gaddigudam, Nagpur.

Mr. S. G. Naik, Superintendent of the Chokhamela Hostel, Amraoti.

Guru Gosain, Agamdass Malguzar of Mauza Bardi, P. O. Kharora, Tahsil Raipur, district Raipur (T. O. Neora).

} *Depressed Classes.*

Mr. R. W. Fulay, M.A., LL.B., Walker Road, Nagpur City (*Urban Factory Labourers*).

Mrs. Ramaba Tambe, B.A., near Maharajbag Club, Nagpur.

ELECTED MEMBERS.

A.—Members elected from the Central Provinces.

Name.	Constituency.
Mr. Balraj Jaiswara	Jubbulpore City, Non-Muhammadan (Urban).
Mr. Daduram	Jubbulpore Division (Urban).
Mr. Badri Prasad Pujari	Chhattisgarh Division (Urban).
Mr. Chunnu	Nerbudda Division (Urban).
Mr. C. B. Parakh	Nagpur City-cum-Kamptee.
Lala Jainarain	Do. do.
Mr. T. J. Kedar	Nagpur Division (Urban).
Mr. Sheoprasad Pandey	Jubbulpore District (South) Non-Muhammadan (Rural).
Pandit Kashi Prasad Pande	Jubbulpore District (North).
Mr. Jhuninlal Verma	Damoh District.
Mr. Dulichand	Saugor District.
Rai Sahib Dadu Dwarkanath Singh	Seoni District.
Choudhari Malthulal	Mandla District.
Mr. Waman Yado Deshmukh	Raipur District (North).
Mr. Anjore Rao Kirdutt	Raipur District (South).
Pandit Ramsanehi Gaurha	Bilaspur District.
Khan Sahib F. F. Tarapore	Drug District.
Mr. Gajadhar Prasad Jaiswal	Hoshangabad District.
Mr. Gopalrao Rambhau Joshi	Nimar District.
Mr. Arjunlal	Narsinghpur District.
Seth Sheolal	Chhindwara District.
Mr. Chandan Lal	Betul District.
Mr. Ganpat Rao Shanker Rao Deshmukh	Nagpur District (West).
Rao Bahadur K. S. Nayudu	Wardha District.
Mr. Shivramprasad Sultanprasad Tiwari	Wardha Tahsil.
Mr. R. S. Dube	Chanda District.
Mr. Vinayak Damodar Kolte	Bhandara District.
Khan Bahadur M. M. Mullna	Balaghat District.
Mr. Iftikhar Ali	Jubbulpore Division (Rural), Muhammadan (Rural).
The Hon'ble Mr. S. W. A. Rizvi	Chhattisgarh Division (Rural).
Mr. Syed Hifazat Ali	Nerbudda Division (Rural).
Mr. Mahomed Yusuf Shareef	Nagpur Division (Rural).
Beohar Gulab Sing	Jubbulpore and Nerbudda Landholders, Special Constituencies.
Thakur Manmohan Singh	Nagpur and Chhattisgarh Landholders.
Mr. D. T. Mangalmoorti	Nagpur University.
Mr. L. H. Bartlett	Central Provinces and Berar Mining Association.
Seth Thakurdas Goverdhandas	Central Provinces Commerce and Industry.

B.—Members from Berar nominated after election.

Mr. Vithal Bandhuji Chaobal	East Berar (Municipal), Non-Muhammadan (Urban).
Mr. R. A. Kanitkar	West Berar (Municipal).
The Hon'ble Dr. Panjabrao Shamrao Deshmukh.	Amraoti (Central) Non-Muhammadan (Rural).
Mr. Motirao Bajirao Tidake	Amraoti (East).
Rao Sahib Uttamrao Sitaramji Patil	Amraoti (West).
Mr. Sridhar Govind Sapkal	Akola (East).
Mr. Umedsingh Narainsingh Thakur	Akola (North-West).
Mr. Naik Dinkarrao Dharrao Rajurkar	Akola (South).
Mr. Yadav Madhav Kale	Buldana (Central).
Mr. Tukaram Shanker Patil	Buldana (Malkapur and Jalgaon).
Mr. Mahadeo Paikaji Kolhe	Yeotmal (East).
Mr. Ganpat Sitaram Malvi	Yeotmal (West).
Mr. Syed Mobinur Rahman	Berar (Municipal) Muhammadan (Urban).
Mr. Muzaffar Husain (Deputy President)	East Berar (Rural), Muhammadan (Rural).
Khan Bahadur Mirza Raham Beg	West Berar (Rural).
Mr. Balkrishna Ganesh Khaparde	Berar Landholders Special Constituencies.
Rao Bahadur Gajanan Ramchandra Kothare	Berar Commerce and Industry.

North-West Frontier Province.

The North-West Frontier Province, as its name denotes, is situated on the north-west frontier of the Indian Empire. It is in form an irregular strip of country lying north by east and south by west and may generally be described as the tract of country, north of Baluchistan, lying between the Indus and the Durand boundary line with Afghanistan. To the north it extends to the mountains of the Hindu Kush. From this range a long broken line of mountains runs almost due south, dividing the province from Afghanistan, until the Sulaiman Range eventually closes the south of the Province from Baluchistan. The greatest length of the province is 408 miles, its greatest breadth 279 miles and its total area about 36,346 square miles. The territory falls into three main geographical divisions: the Cis-Indus district of Hazara; the narrow strip between the Indus and the Hills, containing the Districts of Peshawar, Kohat, Bannu and Dera Ismail Khan, and the rugged mountainous regions on the north and west between those districts and the border line of Afghanistan. Hazara and the four districts in the second division contain 13,518 square miles. The mountain regions, north and west, are occupied by tribes subject only to the political control of the Chief Commissioner in his capacity as Agent to the Governor-General. The area of this tract is roughly 22,828 square miles and in it are situated, from north to south, the political agencies severally known as the Malakand, Khyber, Kurram, North Waziristan and South Waziristan Agencies. Each of the Deputy Commissioners of the five administered districts is responsible for the management of political relations with certain tribes or sections of the tribes across the frontier. A few hundred miles of the trans-border Territory are internally administered by the Political Agents, but the bulk of the trans-border population is free from any internal interference, so long as offences are not committed and so long as the tribes observe the conditions on which allowances are paid to many of them.

The area of the Province is a little more than half that of Bombay (excluding Sind and Aden) and amounts to more than three-fifths of the size of England without Wales. The density of population throughout the Province equals 99 persons to a square mile, but in the more favoured portions the pressure of population is much greater. In the Hazara District there are 208 persons to a square mile and in the trans-Indus plains tract the number is 156. Density for the 5 rented Districts 5,179 persons per s. mile. The key to the history of the people of the N.-W. F. P. lies in the recognition of the fact that the valley of Peshawar was always more closely connected politically with Eastern Iran than with India, though in pre-Mahomedan times its population was mainly Indian by race. Early history finds the Iranians dominating the whole Indus valley. Then came the Greek invasion under Alexander the Great, in B.C. 327 then the invasions of the Sakas, and of the White Huns and later the two great waves of Muhammadan invasion. Last came the Sikhs invasion beginning in 1818. The Frontier Territory was annexed by the British in 1849 and placed under the control of the Punjab Government. Frequent warfare occurred with the border tribes. The most serious phases of these disturbances were the war provoked by the aggression of Afghanistan in 1919 and the protracted punitive operations against the Waziris in 1919-1920. These have resulted in the establishment at Razmak, a position dominating the Mahsud Waziri country, of a permanent garrison of 10,000 troops drawn mostly from stations lying in the Plains immediately below the hills. A circular road from Bannu, through Razmak to Sararogha, Jandola and back to the Derajat provides communications transport with this force and facilitates its mobility. The effect of this measure has been a marked improvement in the internal peace of the Tribal area.

The division of the Frontier Province from the Punjab has frequently been discussed, with the double object, in the earlier stages of these debates, of securing closer and more immediate control and supervision of the Frontier by the Supreme Government and of making such alterations in the personnel and duties of frontier officials as would tend to the establishment of improved relations between the local British representatives and the independent tribesmen. The province was eventually removed from the control of the Punjab administration in 1901. To it was added the political charge of Dir, Swat and Chitral, the Political Agent of which had never been subordinate to the Punjab. The new Province was constituted under a Chief Commissioner and Agent to the Governor-General, with headquarters at Peshawar, in direct communication with the Government of India in the Foreign and Political Department. In political questions there is no intermediary between the Chief Commissioner and the local officer; an arrangement designed to secure both prompt disposal of references and the utilisation of the expert knowledge of frontier conditions for which the head of the administration is selected. The advisability of re-uniting the Province with the Punjab was much discussed in certain Indian political circles and as a result of the views expressed upon the matter in the Legislative Assembly the Government of India in 1922 appointed a Committee of officials and unofficials to investigate it. The Committee, presided over by Mr. D. de S. Bray, M.L.A., Joint Foreign Secretary, toured the Frontier Province and the Punjab and heard numerous witnesses. Its members were Messrs. Raza Ali, M.C.S., T. Rangacharia, Chaudhri Shahabuddin, N. M. Samarth and K. B. Abdur Rahim Khan, members of the Legislative Assembly, H. N. Bolton, I.C.S. (Foreign Dept.) and A. H. Parker, I.C.S. (Punjab) (members). The inquiry developed practically into a contest between

Mahomedans and Hindus on communal lines. The Hindus, allied in sympathy with their co-religionists in the Punjab demanded the reunion of the administered districts of the Province with the Punjab or, if that were not attainable then the placing of the judicial administration of the Province under the Punjab High Court at Lahore. The Mahomedans on the other hand claimed the right of their Province to a status corresponding with that enjoyed by other Provinces of India and to immediate reforms initiating and providing for progress along that line. The Hindus argued that a separate Pathan Province on the Frontier would cause a dangerous sentimental division from the rest of India, with leanings towards the allied racial elements outside British India. The answer to that was that a contented Pathan Province would be a valuable buttress against hostile feeling across the Border. The Committee's deliberations ended in disagreement, the two Hindu members writing each a separate report favourable to the Hindu viewpoint already explained, and the majority of the Committee, comprised of all its other members, recommending advance on a Provincial basis. Their principal recommendations were for—

Retention of the Settled Districts and Tribal Tracts as a separate unit in charge of a minor administration under the Government of India;

Early creation of a Legislative Council for the Settled District and appointment of Member of Council and Minister;

Appointment of a second Judicial Commissioner which has since been sanctioned and reform of the judicial administration in various directions, including interchange of officers with the Punjab, so that the members of the Service in the smaller Province should have the advantage of experience in the larger one.

"If (concluded the Majority) the Pathan nationality is allowed self-determination and given scope for that self-development within the Indian Empire under the Reforms Scheme after which it is now striving we are assured that with a contented Frontier population India can face with calm resolution the future that the Frontier has in store for her."

The People.

The total population of the N.-W. F. P. (1931) is 4,684,364, made up as follows:—

Hazara	669,636
Trans-Indus Districts ..	1,755,440
Trans-Border Area ..	2,259,288

This last figure is estimated. There are only 361·3 females per 1,000 males in the towns, and 872·2 females per 1,000 males in rural areas.

This disproportion of the sexes cannot at present be explained in the N.-W. F. P. any more than in other parts of Northern India where it also appears. The discrepancy is greater here than in any other Province of India. There is no ground for believing that the neglect of girls in infancy has any effect in causing the phenomenon. On the other hand, the female population has to face many trials which are unknown to men. The evils of unskilled midwifery and early marriage are among them. Both the birth and death-rates of the Province are abnormally low. The birth rate in the administered districts, according to the last available official reports, is 25·6 and the death-rate 21.9.

The dominant language of the Province is Pashtu and the population contains several lingual strata. The most important sections of the population, both numerically and by social position, are the Pathans. They own a very large proportion of the land in the administered districts and are the ruling race of the tribal area to the west. There is a long list of Pathan, Baluch, Rajput and other tribal divisions. Gurkhas have recently settled in the Province. The Mahomedan tribes constitute almost the whole population, Hindus amounting to only 5 per cent. of the total and Sikhs to a few thousands. The occupational cleavage of the population confuses ethnical divisions.

(Under the North-West Frontier Province Law and Justice Regulation of 1901), custom governs all questions regarding successions, betrothal, marriage, divorce, the separate property of women, dower, wills, gifts, partitions, family relations such as adoption and guardianship, and religious usages and institutions, provided that the custom be not contrary to justice, equity or good conscience. In these matters the Mahomedan or Hindu law is applied only in the absence of special custom.

Climate, Flora and Fauna.

The climatic conditions of the N.-W.F.P. which is mainly the mountainous region, but includes the Peshawar Valley and the riverine tracts of the Indus in Dera Ismail Khan District, are extremely diversified. The latter district is one of the hottest areas of the Indian continent, while on the mountain ranges the weather is temperate in summer and intensely cold in winter. The air is generally dry and hence the annual ranges of temperature are frequently very large. The Province has two wet seasons, one the S.-W. Monsoon season, when moisture is brought up from the Arabian Sea and the Bay of Bengal: the other in winter, when storms from Mesopotamia, Persia and the Caspian Districts bring widespread rain and snowfall. Both sources of supply are precarious and not infrequently either the winter or the summer rainfall fails almost entirely. The following description of the Daman, the high ground above the Indus, stretching across Dera Ismail Khan to the mountains on the west, occurs in an account written some years ago by Captain Crosthwaite: "Men drink once a day and the cattle every second day. Washing is an impossible luxury. . . . It is possible in the hot weather to ride thirty miles and neither hear a dog bark nor see the smoke of a single fire." With the exception of the Kunhar River, in Hazara, which flows into the Jhelum, the whole territory drains into the Indus. The flora of the Province varies from the shrubby jungle of the south-eastern plains to barren hills, pine forests and fertile mountain valleys. Tigers used to abound in the forests but are

now quite extinct; leopards, hyenas, wolves, jackals and foxes are the chief carnivora. Bears, deer and monkeys are found; a great variety of fish is caught in the Indus.

The mountain scenery is often magnificent. The frontier ranges contain many notable peaks of which the following are the principal:—

Takht-i-Sulaiman, Sulaiman Range, in Dera Ismail Khan, 11,292 feet.

Pre Ghal, Sulaiman Range, in Mahsud Waziristan, 11,583 feet.

Sika Ram, in the Safed Koh, in the Kurram Agency, 15,621 feet.

Kagan Peaks of the Himalayas, in the Hazara District, 10,000 to 16,700 feet.

Istragh Peak (18,900 ft.), Kachin Peak (22,641 ft.), Tirich Mir (25,426 ft.), all in the Hindu Kush, on the northern border of Chitral Agency.

Trade and Occupations.

The population derives its subsistence almost wholly from agriculture. The Province is practically without manufactures. There is no considerable surplus of commercial products for export. Any commercial importance which the province possesses it owes to the fact that it lies across the great trade routes which connect the trans-border tribal territories and the marts of Afghanistan and Central Asia with India, but the influence of railways is diminishing the importance of these trading interests. Special mention may be made of the railway comparatively recently opened linking Baluchistan, in the south-west of the N.-W. F. P., *via* Nushki with south-east Persia. The line connects with the north-west railway system of India and extends 348 miles to Duzdap, within the Persian border. Two weekly trains run each way and the freight carried largely consists of carpets, wool and dates, from Persia and of tea, sugar and piece-goods from the Indian side. Though the railway is primarily strategic in purpose its commercial and political effects will be considerable. The travelling traders (or Powin dahs) from the trans-frontier area have always pursued their wanderings into India and now, instead of doing their trading in towns near the border, carry it by train to the large cities in India. The Railway line from Pir to Lankitshina which is complete and open to public traffic now will similarly, in course of time, develop both the manner and amount of transport communications and trade. The new roads in Waziristan are already largely utilised by the Tribal inhabitants for motor traffic. Prices of agricultural produce have in recent years been high, but the agriculturists, owing to the poverty of the means of communication, have to some extent been deprived of access to Indian markets and have therefore been unable to profit by the rates prevailing. On the other hand, high prices are a hardship to the non-agricultural classes. The effects of recent extensions of irrigation have been important. Land tenures are generally the same in the British administered districts as in the Punjab. The cultivated area of the land amounts to 25 per cent. and uncultivated to 75 per cent.

The work of civilisation is now making steady progress, both by the improvement of communications and otherwise. Relations with the tribes have improved. trade has advanced, free medical relief has been vastly extended, police administration has been reformed and the desire of people for education has been judiciously and sympathetically fostered, though in this respect there is complaint against the limitations imposed by financial embarrassments. In the British administered districts 19 per cent. males and 7 per cent. females of the total population are returned as literates. The figures for males denote a very narrow diffusion of education even for India. Those for females are not notably low, but they are largely affected by the high literacy amongst Sikh women, of whom 13·3 per cent. are returned as literate. The inauguration of a system of light railways throughout the Province, apart from all considerations of strategy, must materially improve the condition of the people and also by that means strengthen the hold of the administration over them. The great engineering project of the Upper Swat River Canal, which was completed in 1914, and the lesser work of the Paharpur Canal, also completed a few years ago, will bring ease and prosperity to a number of peasant homes.

Administration.

The administration of the North-West Frontier Province is conducted by H. E. the Governor in Council and Agent to the Governor-General. His staff consist of—

(1) The Hon'ble Member of the Executive Council.
(2) The Hon'ble Minister Transferred Departments.
(3) The Hon'ble the President, Legislative Council.
(4) Officers of the Political Department of the Government of India.
(5) Members of the Provincial Civil Service.
(6) Members of the Subordinate Civil Service.
(7) Superintendents and Assistant Superintendents of Police.
(8) Officers recruited for the service of departments requiring special knowledge—Militia, Engineering, Education, Medicine and Forestry.

The cadre posts reserved for officers coming under the fourth head above are :—

Administration.	H. E. the Governor and Agent to the Governor-General	7
	The Hon'ble Member of the Executive Council	
	Chief Secretary	
	Secretary, Transferred Departments	
	Under-Secretary	
	Revenue and Divisional Commissioner and Revenue Secretary	
	Resident in Waziristan	1
	Dy. Commissioners 5 / Political Agents .. 5 / Senior Sub-Judges .. 2	12
	Asst. Commissioners and Asst. Political Agents.	13
Judicial Commr.'s Court & District Judges.	Two Judicial Commissioners.	4
	Two District and Sessions Judges.	
	One Additional ditto.	

The districts under the Deputy Commissioners are divided into from two to five sub-collectorates in charge of tahsildars, who are invested with criminal and civil and revenue powers, and are assisted by naib-tahsildars, who exercise only criminal and revenue powers. Some sub-divisions are in charge of Assistant or Extra Assistant Commissioners. The village community characteristic of some parts of India is not indigenous among the Pathans. Its place as a social unit is to some extent taken by the tribe, which is held together by the ties of kinship and ancient ancestry, real or imaginary. Modern municipal local government has been introduced in the towns. There are also district boards. The district is the unit for police, medical and educational administration and the ordinary staff includes a District Superintendent of Police, a Civil Surgeon, the Superintendent of Jail and a District Inspector of Schools. The Province forms a single educational circle and only possesses one forest division, that of Hazara. The P. W. D. of the Province carries out duties connected with both Irrigation and Buildings & Roads. It is organised in two circles (in all seven Divisions) under a Chief Engineer, P.W.D. who is also *ex-officio* Secretary to H. E. the Governor in Council. The administration of the civil police force of the districts is vested in an Inspector-General. There is a special force of Frontier Constabulary. The revenue and expenditure of the Province are wholly Imperial. Of the Agencies only Kurram and Tochi Valley pay land revenue to the British Government. The revenue administration of all five administered districts is controlled by the Revenue and Divisional Commissioner. For the administration of civil and criminal justice there are two Civil and Sessions districts, each presided over by a District and Sessions Judge. The two Judicial Commissioners are the controlling authority in the Judicial branch of the administration, and their Courts are the highest criminal and appellate tribunals in this Province. The improvements needed to bring the judicial administration up-to-date, in accord with the growth of the business of administration, are dealt with in the Inquiry Committee's report to which reference was made above.

A Governor's Province.—In January 1932 it was announced that the Province would be constituted as a Governor's Province, and the application to the Province of the provisions of the Government of India Act was gazetted, subject to the following modifications:—

(*a*) that the number of members of the Legislative Council shall be forty;

(*b*) that the maximum annual salary of the Governor shall be Rs. 66,000, and of a member of the Executive Council Rs. 42,000; and

(*c*) that Section 58 of the said Act shall cease to have effect in its application to the Province. This notification shall have effect from such date or dates in respect of any or all provisions as may be notified.

Electoral rules were notified in February 1932.

The Administration.

The principal officers in the present Administration are:—

H. E. the Governor and Agent to the Governor-General.—H. E. Lieut.-Col. Sir Ralph Griffith, K.C.S.I., C.I.E. (Assumed charge 18th April 1932).

Private Secretary—Captain L. M. Barlow, M. C.

Aide-de-Camp—Lieut. N. M. W. Kyle.

The Hon'ble Member of the Executive Council—Mr. G. Cunningham, C.S.I., C.I.E., O.B.E., I.C.S.

Resident, Waziristan—Lieut.-Col. A. E. B. Parsons, C.B.E. D.S.O.

Judicial Commissioner—L. Middleton I.C.S.

Additional Judicial Commissioner—Khan Bahadur Saaduddin Khan, B.A., LL.B.

Revenue and Divisional Commissioner—J. S. Thomson.

Chief Secretary to Government, N.W.F.P.—O. K. Caroe, C.I.E. I.C.S.

Secretary to Government, Transferred Departments—A. D. F. Dundas, I.C.S.

Under Secretary to Chief Commissioner—Capt. G. C. L. Crichton

Financial Secretary to Government, N.W.F.P.—Rai Bahadur Lala Chuni Lal.

Asstt. Financial Secy. to Govt., N.W.F.P.—S. Ata Elahi Siddidi.

Indian Personal Assistant, H. E. the Governor—Khan Sahib Haji Gulam Naqshband Khan.

Secretary, Public Works Department—F. H. Burkitt, C.I.E., O.B.E.

Civil Hospitals.

Inspector-General of Prisons.—Col. C. I. Brierley, C.I.E., I.M.S.

Inspector-General of Police—J. H. Adam, O.B.E.

Commandant, Frontier Constabulary—H. Lillie, I.P.

Director of Public Instruction—T. C. Orgill, M.A., I.E.S.

Superintendent, Archæological Survey, Frontier Circle—J. F. Blakiston.

District and Sessions Judge—A. J. Hopkinson, I.C.S. (Peshawar).

J. H. Thompson, I.C.S. (Derajat.)

Political Agents.

L. W. H. D.Bes, O.B.E.T., M.C., Dir Swat and Chitral.

K. B. Risaldar Maghal Bazkhan, O.B.E., I.O.M., I.D.S.M.

Captain K. C. Packman, North Waziristan.

Capt. B. P. Ross Hurst, M.C., Kurram.

Brevet-Major H. H. Johnson, M.M., South Waziristan.

Deputy Commissioners.

Capt. Iskandor Mirza, Hazara.

J. G. Acheson, C.I.E., I.C.S., Peshawar.

Major J. R. L. Bradshaw, Dera Ismail Khan.

Captain C. C. H. Smith, Kohat.

Captain M. C. Sinclair, Bannu.

Former Chief Commissioners.

The Hon'ble Lieutenant-Colonel Sir Harold Deane, K.C.S.I., from 9th November 1901 to 3rd June 1908. Died 7th July 1908.

The Hon. Lieutenant-Colonel Sir George Roos-Keppel, G.C.I.E., K.C.S.I., from 4th June 1908 to 9th September 1919.
The Hon'ble Sir Alfred Hamilton Grant, K.C.S.I., K.C.I.E., from 10th September 1919 to 7th March 1921.
The Hon'ble Sir John Loader Maffey, K.C.V.O., C.S.I., I.C.S., from 8th March 1921 to 6th July 1923.
The Hon'ble Sir Horatio Norman Bolton, K.C.I.E., C.S.I., I.C.S., from 7th July 1923 to 30th April 1930.
The Hon'ble Sir Steuart Pears, K.C.I.E., C.S.I., I.C.S., from 10th May 1930 to 9th September 1931.

N. W. F. PROVINCE LEGISLATIVE COUNCIL.

The Hon'ble K. B. Khan Abdul Ghafur Khan, Khan of Zaida (*President*).
K. B. Abdul Rahim Khan, M.B.E., Bar-at-Law (*Deputy President*).
Sheekh Abdul Hamid, B.A., LL.B. (*Secretary*).

EX-OFFICIO MEMBERS AND MINISTERS.

The Hon'ble Mr. G. Cunningham, C.S.I., C.I.E., O.B.E., Executive Councillor.
The Hon'ble K. B. Nawab Sir Abdul Qayum Khan, K.C.I.E., Minister to the Government, N.W.F.P.

OFFICIALS NOMINATED MEMBERS.

Thompson, Mr. J. S., I.C.S., Revenue and Division Commissioner, 10, The Mall, Peshawar Cantonment.

Dundas, Mr. A. D. F., I.C.S., Secretary to Government, Transferred Departments, 5, Circular Road, Peshawar Cantonment.

Adam, Mr. J. H., O.B.E., Inspector-General of Police, Commissioner Road, Peshawar Cantonment.

Rai Bahadur Chuni Lal, Financial Secretary to Government, Peshawar Cantonment.

Khan Sahib Qazi Mir Ahmed, B.A., LL.B. (Alig.), Legal Remembrancer to Government, Roose-Keppel Lane, Peshawar Cantonment.

NON-OFFICIALS NOMINATED MEMBERS.

Allah Nawaz Khan, Nawabzada, Representative of general interests, Dera Ismail Khan.
Khan Ghulam Rabbani Khan, B.A., LL.B. (Alig.), Representative of general interests, Mansehra, Hazara District.
Hassan Ali Khan, Sultan , Khan Sahib, of Boi, Representative of general interest, Boi, Mansehra Tahsil, Hazara District.
Khan Malik-kur Rahaman Khan, Kayani, M.A., Representative of general interests, Sahpur, Kohat District.
Narinjan Singh Bedi, Baba, B.A., Representative of general interests, Ganj Street, Peshawar City.

ELECTED MEMBERS.

Khan Abdul Ghafur Khan, Hashtnagar (Muhammadan), Bar-at-Law, Peshawar.
Abdul Qayum Khan, Mr., B.A., LL.B. (Alig.), Outer Mansehra (Muhammadan), Mansehra, Hazara District.
Abdur Rahaman Khan, Arbab, Doaba-cum-Daud zai (Muhammadan), Gari Gulla, Post Office, Nahaqui, Peshawar District.
Khan Abdul Hamid Khan, Kundi, B.A., LL.B. (Alig.), North-West Frontier Province (Landholders), Pleader, Gul Imam, Dera Ismail Khan District.
Baz Muhammad Khan, Khan Bahadur Nawab, Kohat East (Muhammadan), Teri, Kohat District.
Ghulam Haider Khan, Khan Bahadur, Bannu North (Muhammadan), Bazar Ahamad Khan, Bannu District.
Ghulam Hassan Ali Shah *alias* Hassan Gul Pir, Kohat West (Muhammadan), Naryab, Kohat District.
Khan Hidayatullah Khan, Peshawar District (Landholders), Umarzai, Tashil Charsadda, Peshawar District.
Khan Habibullah Khan, B.A., LL.B. (Alig.), Bannu South (Muhammadan), Pleader, Lakki, Bannik District.
Hamidullah Khan, Khan Bahadur Nawab, Razzar-cum-Amazai (Muhammadan), Toru, Peshawar District.
Hazara Isher Das, Rai Bahadur Lala, M.A., LL.B., (Non-Muhammadan), Nawanshahr, Hazara District.
Karam Chand, Rai Bahadur, O.B.E., Mardan (Non-Muhammadan), Peshawar Cantonment.
Khuda Baksh Khan, Malik, B.A., LL.B., Other Towns (Muhammadan), Pleader, Dera Ismail Khan.
Ladha Ram, Lala, B.A., LL.B., Kohat-cum-Bannu (Non-Muhammadan), Pleader, Bannu City.
Muhammad Zaman Khan, Khan Sahib, Hazara Central (Muhammadan), Khalabat, Hazara District.
Khan Muhammad Abbas Khan, Inner Mansehra (Muhammadan), Mansehra, Hazara District.
Muhammad Sharif Khan, Arbab, B.A., Khalisa-cum-Bara (Muhammadan), Land Yarghajo, Peshawar District.
Muhammad Ayub Khan, Mr., Mardan Kamalzai-cum -Baizai (Muhammadan), Khandi Khan Khelan, Hoti, Peshawar District.
Mehar Chand Khanna, Rai Sahib Lala, B.A., Peshawar City (Non-Muhammadan), Saddar Bazar, Peshawar Cantonment.
Nur Bakhsh, Maulvi, B.A., LL.B., Dera Ismail Khan East (Muhammadan), Pleader, Dera Ismail Khan.
Pir Bakhsh, Mr., M.A., LL.B. (Alig.), Peshawar City (Muhammadan,) Pleader, Kissa Khani, Peshawar City.
Rajah Singh, Sardar, M.A., LL.B., North-West Frontier Province (Sikh), Advocate, 1, Cavalry Lane, Peshawar Cantonment.
Rochi Ram, Rai Sahib Lala, Dera Ismail Khan (Non-Muhammadan), Contractor, Dera Ismail Khan.
Sultan Muhammad Khan, Khan Bahadur, Hazara South (Muhammadan), Bir, Hazara District.
Samundar Khan, Mr., Hazara East (Muhammadan), Banda Pir Khan, Hazara District.
Taj Muhammad Khan, Khan Bahadur, O.B.E., Nowshera (Muhammadan), Badrashi, Nowshera.

Assam.

The Province of Assam, omitting the partly administered and unadministered tracts on its northern and eastern borders, comprises an area of some 67,334 square miles. It includes the Assam Valley Division, the Surma Valley and Hill Division and the State of Manipur. It owes its importance to its situation on the north-east frontier of India. It is surrounded by mountainous ranges on three sides while on the fourth (the west) lies the Province of Bengal on to the plains of which debouch the two valleys of the Brahmaputra and the Surma which form the plains of Assam. These two valleys are separated from each other by the Assam Range, which projects westward from the hills on the eastern border.

Population.

The total population of the Province in 1931 was 9,247,857, of whom 445,606 were in Manipur. Of the population in 1931, nearly 5½ millions were Hindus, over 2¾ millions were Muslims, a million belonged to tribal religions and a quarter of a million were Christians. 43 per cent. of the population speak Bengali, 21 per cent. speak Assamese: other languages spoken in the province are Hindi, Uriya, Mundari, Nepali and a great variety of languages classified under the general heading of the Tibeto-Chinese languages. Owing to the great areas of waste and rivers the density of the province is only 137, which compared with that of most other parts of India is low.

Agricultural Products.

It has agricultural advantages for which it would be difficult to find a parallel in any part of India, climate, soil, rainfall and river systems all being alike favourable to cultivation. Rice is the staple food crop, nearly 48,70,509 acres being devoted on this crop. Except in the Himalayan Terai irrigation is unnecessary. Tea and jute are the most important crops grown for export. The area under tea consists of 4,28,120 acres. Wheat and tobacco are also grown and about 32,007 acres are devoted to sugarcane.

Meteorological Conditions.

Rainfall is everywhere abundant, and ranges from 23·39 to 241·76 inches. The maximum is reached at Cherrapunji in the Khasi Hills, which is one of the wettest places in the world, having a rainfall of 520·09 inches. The temperature ranges from 59 at Sibsagar in January to 84·8 in July. Earthquakes of considerable severity have taken place, by far the worst being that which occurred in 1897.

Mines and Minerals.

The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil. The most extensive coal measures are in the Naga Hills and the Lakhimpur districts, where about 202,959 tons were raised in 1932. Limestone is quarried in the Khasi and Jaintia Hills. Petroleum is worked only in Lakhimpur and Cachar.

An account of the petroleum occurrences in Assam was recently published in the memoirs of the Geological Survey of India. It states that the petroleum localities in this province are confined to a curved belt of country along the basins of the Brahmaputra and Surma. This belt is traceable over a distance of some 800 miles from N. E. Assam through Cachar and Chittagong to the Arakan coast, where it has a S.S.E. trend.

Manufactures and Trade.

Silk is manufactured in the Assam Valley, the weaving being done by the women. Cotton weaving is also largely practised by the women, and almost every house contains a loom; the cloth is being gradually displaced by imported goods of finer texture and colour. Tea manufacture is the most important industry of the province. Boat building, brass and metal and earthenwares, and limestone burning are the other industries apart from agriculture, which itself employs about 89 per cent. of the population. Assam carries on a considerable trade with the adjoining foreign tribes and countries.

Communications.

Much of the trade of Assam is carried by river. The excellence of its water communications makes the province less dependent upon roads than over parts of India. A large fleet of steamers maintained by the India General Navigation Company and the Rivers Steam Navigation Company plies on the rivers in both Valleys. An alternate day service of passenger-boats runs between Goalundo and Dibrugarh. In recent years the road system has developed. There is an unmetalled trunk road through the length of the Assam Valley and excellent metalled roads from Shillong to Gauhati and to Cherrapunjee and also between Dimapur, on the Assam Bengal Railway, and Imphal, the capital of the Manipur State. A motor road, connecting Shillong with the Surma Valley, has been completed and opened to traffic. The portion between Jaintiapur and Sylhet is being metalled. The Government of Assam have recently launched into a large programme of road improvements but has to be postponed on account of financial depression. About 735 miles are to be bridged throughout and the surface improved by metalling and gravelling where possible. *Kutcha* roads will be maintained by means of mechanical plant which has proved successful in maintaining, throughout the year, a surface fit for motor vehicles. Motor traffic has increased on all sides and the demands for better roads has been insistent. The open mileage of railway has also shown a steady improvement and several branch lines to the Assam Bengal Railway system have been added in recent years. The main Assam Bengal Railway line runs from Chittagong Port, in Bengal, through the North Cachar Hills to Tinsukia, a station on the Dibru-Sadiya Railway and connects the Surma and Brahmaputra Valleys. A branch of the line runs from Badarpur to Silchar at the Eastern end of the Surma Valley and another runs through the west of the Assam Valley from Lumding to Gauhati where it effects a junction with the Eastern Bengal Railway. The Eastern Bengal Railway connects Assam with the Bengal system *viz* the Valley of the Brahmaputra. An extension towards Rangapora from Tangla junction; along the North Bank of the Brahmaputra has been opened to traffic.

THE FINANCES OF ASSAM.

In common with the other Provinces of India, Assam secured substantial financial autonomy under the Reform Act of 1919. The present financial position for 1933-34 is set out in the following table :—

	Trs.
Principal Heads of Revenue—	
Taxes on Income	1,75
Salt	..
Land Revenue	1,13,00
Excise	37,49

Suspense	*nil.*
Expenditure in England	9,97
Total expenditure	2,48,59
Closing balance	*nil*
Grand Total	2,48,59

Administration.

The province of Assam was originally formed in 1874 in order to relieve the Lieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1905, as the result of further deliberations, it was decided to add to the small Province of Assam the eastern portion of its unwieldy neighbour and to consolidate those territories under a Lieutenant-Governor. The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912: the Eastern Bengal Districts were united with the Bengal Commissionerships of Burdwan and the Presidency to form the Presidency of Bengal under a Governor-in-Council, Bihar, Chota-Nagpur and Orissa were formed into a separate province, while the old Province of Assam was re-constituted under a Chief Commissioner.

Under the Indian Reforms Act of 1919 the Province was raised in status to that of administration by a Governor-in-Council and was thereby ranked, with certain minor provinces, to suit its undeveloped character with the older major provinces of India.

The capital is Shillong, a town laid out with great taste and judgment among the pine woods on the slopes of the Shillong Range which rises to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt in a way more likely to withstand the shocks of earthquake.

Governor.

H. E. Sir Michael Keane, K.C.S.I., C.I.E., I.C.S.

Executive Council.

The Hon'ble Maulavi Saiyid Sir Muhammad Saadulla, Kt., M.A., B.L.

The Hon'ble Mr. A. J. Laine, C.I.E., I.C.S.

Ministers.

The Hon'ble Maulavi Abdul Hamid, B.L.

The Hon'ble Rai Bahadur Kanak Lal Barua, B.L.

Personal Staff of His Excellency the Governor.

Private Secretary, Capt. R. C. Cruddas, The Duke of Cornwall's Light Infantry.

Aide-de-Camp, Lieutenant A. E. H. Campbell, The Queen's own Cameron Highlanders.

Honorary Aide-de-Camp, Subadar-Major Sardar Bahadur Nainsing Mall, I.D.S.M.

Honorary Aide-de-Camp, Subadar Krishna Lal Chettie.

Honorary-Aide-de-Camp, Lt.-Col. J. P. Moran, V.D.

Secretaries, etc., to Government.

Chief Secretary, J. A. Dawson, C.I.E., I.C.S.

Secretary to Government (Finance and Revenue), C. K. Rhodes, I.C.S.

Secretary to Government (Transferred Departments), H. G. Dennehy, I.C.S.

Under Secretary to Government, C. B. C. Paine, I.C.S.

Under Secretary (Transferred Departments), N. N. Phukan, B.L.

Secretary to Government (Legislative Department) and Secretary to the Assam Legislative Council, M. H. B. Lethbridge, I.C.S. (offg.)

Secretary to Government in the P. W. D., E. P. Burke, I.S.E.

Superintending Engineer, B. F. Taylor, I.S.E.

Under Secretary, P.W.D., Devi Doyal, I.S.E.

Assistant Secretary, Finance and Revenue Departments, A. V. Jones, V.D.

Registrar, Assam Secretariat (Civil), Ubaid-ur-Rahman.

Registrar, Assam Secretariat (P.W.D.), D. C. Das.

Heads of Departments.

Director of Land Records & Surveys, I. G. Registration, etc., W. L. Scott, C.I.E., I.C.S.

Director of Industries and Registrar of Co-operative Society & Village Authorities, I. Majid, I.C.S., (offg.)

Director of Agriculture, J. N. Chakrabarty, (offg.)

Superintendent, Civil Veterinary Department, G. B. Sen (in-charge).

Conservator of Forests, Assam, A. J. W. Milroy.

Commissioner of Excise, Registrar of Joint Stock Companies, Assam, C. S. Mullan, I.C.S.

Superintendent and Remembrancer of Legal Affairs and Administrator-General, M. H. B. Lethbridge, I.C.S.

Rev. Tanuram Saikia representing the labouring classes.
Subadar-Major Sardar Bahadur Jangbir Lama, O.B.I., I.D.S.M., (representing the inhabitants of Backward Tracts).
Khan Bahadur Maulavi Keramat Ali, Jorhat.

Baluchistan.

Baluchistan is an oblong stretch of country occupying the extreme western corner of the Indian Empire. It is divided into three main divisions: (1) British Baluchistan with an area of 9,476 square miles consisting of tracts assigned to the British Government by treaty in 1879; (2) Agency Territories with an area of 44,345 square miles composed of tracts which have, from time to time, been acquired by lease or otherwise brought under control and placed directly under British officers; and (3) the Native States of Kalat and Las Bela with an area of 80,410 square miles. The Province embraces an area of 134,638 square miles and according to the census of 1931 it contains 868,617 inhabitants.

The country, which is almost wholly mountainous, lies on a great belt of ranges connecting the Safed Koh with the hill system of Southern Persia. It thus forms a watershed the drainage of which enters the Indus on the east and the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a feature of Central Asia. Rugged, barren, sun-burnt mountains, rent by high chasms and gorges, alternate with arid deserts and stony plains, the prevailing colour of which is a monotonous sight. But this is redeemed in places by level valleys of considerable size in which irrigation enables much cultivation to be carried on and rich crops of all kinds to be raised.

The political connection of the British Government with Baluchistan commenced from the outbreak of the First Afghan War in 1839; it was traversed by the Army of the Indus and was afterwards occupied until 1842 to protect the British lines of communication. The districts of Kachi, Quetta and Mastung were handed over to the Amir of Afghanistan and Political Officers were appointed to administer the country. At the close of the First Afghan War, the British withdrew and these districts were assigned to the Khan of Kalat. The founder of the Baluchistan Province as it now exists was Sir Robert Sandeman who broke down the close border system and welded the Baluch and Brahui Chiefs into a close confederacy. In the Afghan War of 1879 Pishin, Shorarud, Sibi, Zawara Valley and Thal-Chotiali were handed over by Yakub Khan to the British Government and retained at Sir Robert Sandeman's strenuous insistence.

Industries.

Baluchistan lies outside the monsoon area and its rainfall is exceedingly irregular and scanty. Shahrig, which has the heaviest rainfall, records no more than 11¾ inches in a year. In the highlands few places receive more than 10 inches and in the plains the average rainfall is about 5 inches, decreasing in some cases to 3. The majority of the indigenous population are dependent for their livelihood on agriculture, care of animals and provision of transport. The majority of the Afghan and the Baluch, as a rule, cultivate their own lands. The Brahuis dislike agriculture and prefer a pastoral life. Previous to the advent of the British, life and property were so insecure that the cultivator was fortunate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked extension of agriculture which accounts for the increase in the numbers of the purely cultivating classes. The Mekran Coast is famous for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing.

Education is imparted in 108 public schools of all kinds with 7,665 scholars. There is a distinct desire for education amongst the more enlightened headmen round about Quetta and other centres; but on the whole education or the desire of it has made little or no advance in the outlying districts. Coal is mined at Sharigh and Harnai on the Sind-Pishin Railway and in the Bolan Pass. The output of coal in 1929-30 was 16,959 tons. Chromite is extracted in the Zhob District near Hindubagh. The chrome output fell off owing to poorer demand. Limestone is quarried in small quantities. The output of chromite during 1929-30 amounted to 17,906 tons.

Administration.

The head of the local administration is the officer styled Agent to the Governor-General and Chief Commissioner. Next in rank comes the Revenue Commissioner who controls the revenue administration and exercises the functions of a High Court as Judicial Commissioner of the Province. The keynote of administration in Baluchistan is self-government by the tribesmen, as far as may be, by means of their Jirgas or Councils of Elders along the ancient customary lines of tribal law, the essence of which is the satisfaction of the aggrieved and the settlement of the feud, not retaliation on the aggressor or the vindictive punishment of a crime. The district levies play an unobtrusive but invaluable part in the work of the Civil administration not only in watch and ward and the investigation of crime, but also in the carrying of the mails, the serving of processes and other miscellaneous work. In addition to these district levies there are ordinarily three irregular Corps in the Province; the Zhob Militia, the Mekran Levy Corps and the Chagai Levy Corps. Fundamentally the Province is not self-supporting, the deficit being met from Imperial Funds.

Agent to the Governor-General and Chief Commissioner in Baluchistan, The Hon'ble Sir Norman Cater, K.C.I.E., I.C.S.
Revenue and Judicial Commissioner, B. J. Gould, C.M.G., C.I.E., I.C.S.
Secretary to the Agent to the Governor-General and Chief Commissioner, H. Weightman, I.C.S.
Secretary to the Agent to the Governor-General in the Public Works Department, Brigadier C. H. Haswell, C.I.E.
Assistant Secretary to the Agent to the Governor-General and Chief Commissioner, Major J. E. Lidierth, M.B.E.
Under Secretary and Personal Assistant to the Agent to the Governor-General and Chief Commissioner, Lieut. A. L. A. Dredge.
Political Agent and Deputy Commissioner, Quetta, H. J. Todd.
Assistant Political Agent and Assistant Commissioner, Quetta, Captain R. L. Bazalgette.
Political Agent in Kalat and Political Agent in charge of the Bolan Pass and of Chagai District, C. P. Skrine, I.C.S.
Assistant to the Political Agent in Kalat and of Chagai, G. F. Squire, Esqr., I.C.S.
Assistant Political Agent, Mekran, Panjgur, Captain S. M. Khurshid.
Political Agent, Sibi, K. B. Sharbat Kahn, C.I.E.
Assistant Political Agent, Sibi, Captain M. O. A. Baig.
Assistant Political Agent and Colonisation Officer, Nasirabad Sub-Division, District Sibi, G. C. S. Curtis, I.C.S.
Political Agent, Loralai, Lt.-Colonel R. G. Hinde.
Assistant Political Agent, Loralai, Lieut. R. K. M. Battye.
Political Agent, Zhob, Fort, Sandeman, Captain N. S. Alington, M.C.
Assistant Political Agent, Zhob, D. J. K. Coghill, I.C.S.
Residency Surgeon and Chief Medical Officer, Lt.-Colonel F. Stevenson, I.M.S.
Civil Surgeon, Quetta, Major R. Hay, I.M.S.
Civil Surgeon, Sibi, Major J. Rodger, M.C., I.M.S.

ANDAMAN AND NICOBAR ISLANDS.

This is a group of islands lying in the Bay of Bengal. Port Blair, the headquarters of the Administration, is 780 miles from Calcutta, 740 miles from Madras, and 360 miles from Rangoon, with which ports there is regular communication by Government chartered steamers.

The total area of the Andaman Islands is 2,508 square miles and that of the Nicobar Islands 635 square miles. Of the former 15.74 square miles are cleared and partly under cultivation, the remaining area being dense forest. The population enumerated at the Census of 1931 was 29,463 of whom 7,631 were convicts. The number of convicts on 31st March 1932 was 7,672.

PORTS :—Port Blair and Bonington in the Andamans and Car Nicobar and Camorta in the Nicobars. Timber and coconuts are exported from the Andamans, and coconuts and their products from the Nicobars.

The Islands are administered by a Chief Commissioner. A penal settlement was established at Port Blair in 1858 and is the largest and most important in India.

Chief Commissioner, J. W. Smyth, C.I.E., I.C.S.

COORG.

Coorg is a small petty Province in Southern India, west of the State of Mysore. Its area is 1,582 square miles and its population 174,976. Coorg came under the direct protection of the British Government during the war with Sultan Tippu of Seringapatam. In May 1834, owing to misgovernment, it was annexed. The Province is directly under the Government of India and administered by the Chief Commissioner of Coorg who is the Resident in Mysore with his headquarters at Bangalore. In him are combined all the functions of a local government and a High Court. The Secretariat is at Bangalore where the Assistant Resident is styled Secretary to the Chief Commissioner of Coorg. In Coorg his chief authority is the Commissioner whose headquarters are at Mercara and whose duties extend to every branch of the administration. A Legislative Council consisting of 15 elected members and five nominated members was created in 1923. The chief wealth of the country is agriculture and especially the growth of coffee. Although owing to overproduction and insect pests coffee no longer commands the profits it once enjoyed, the Indian output still holds its own against the severe competition of Brazil. The bulk of the output is exported to France.

Chief Commissioner, Coorg, The Hon. Lt.-Col. C. T. C. Plowden, C.I.E.

AJMER-MERWARA.

Ajmer-Merwara is an isolated British Province in Rajputana. The Agent to the Governor-General in Rajputana administers it as Chief Commissioner. The Province consists of two small separate districts, Ajmer and Merwara, with a total area of 2,711 square miles and a population of 501,395. At the close of the Pindariwar Daulat Rao Scindia, by a treaty, dated June 25, 1818, ceded the district to the British. Fifty-five per cent. of the population are supported by agriculture, the industrial population being principally employed in the cotton and other industries. The principal crops are maize, millet, barley, cotton, oilseeds and wheat.

Chief Commissioner, The Hon. Lt.-Col. G. D Ogilvie, C.S.I., C.I.E.

Aden.

Aden was the first new territory added to the Empire after the accession of Queen Victoria. Its acquisition was the outcome of an outrage committed by local Arabs upon the passengers and crew of a British Indian buggalow wrecked in the neighbourhood. Negotiations having failed to secure satisfactory reparation the Government of Bombay despatched a force under Major Baillie which captured Aden on January 19th, 1839.

Aden is an extinct volcano, five miles long and three broad, jutting out to sea much as Gibraltar does, having a circumference of about 15 miles and connected with the mainland by a narrow isthmus of flat ground. The highest peak on the wall of precipitous hills that surrounds the old Crater which constitutes Aden is 1,725 feet above sea level. Rugged spurs, with valleys between, radiate from the centre to the circumference of the crater. The peninsula of Little Aden, adjacent to Aden proper, was obtained by purchase in 1868 and the adjoining tract of Shaikh Othman, 39 square miles in extent, was subsequently purchased when, in 1882, it was found necessary to make provision for an overflowing population. Attached to Aden is the island of Perim, 5 square miles in extent, in the Straits of Bab-el-Mandeb at the entrance to the Red Sea. The Kuria Muria islands, which were acquired from the Sultan of Muscat in 1854, were attached to the Aden Residency until 1931, when they were transferred to the control of the British Resident in the Persian Gulf.

The whole extent of the Aden Settlement, including Aden, Little Aden, Shaikh Othman and Perim, is approximately 80 square miles. The 1931 census showed Aden, with Little Aden, Shaikh Othman, and Perim to have a population of 48,338. The population of Perim is 1,700 largely dependent on the Coal Depot maintained there by a commercial firm.

The language of the Settlement is Arabic, but several other Asiatic tongues are spoken. The population is chiefly Arab. The chief industries are salt and cigarette manufacture and dhow building. The crops of the tribal low country adjoining are jowar, sesamum, a little cotton, madder, a bastard saffron and a little indigo. In the hills, wheat madder, fruits, coffee and a considerable quantity of wax and honey are obtained. The difficult problem of water supply has recently been solved. The Asian supply of fresh water has been obtained at Sheikh Othman. Early in 1924 a boring was made with a deep bore and sweet water was found at a depth of 1,545 feet. The natural flow of water now rises from this bore at 250 gallons per hour. A second bore was sunk in 1928-29 and proved more productive than the first. Five more bores have since been sunk, but two bores only are in operation at present and are sufficient to meet the requirements of the public and shipping. Bore water has practically replaced condensed water. Supply mains for distributing water to connections to houses have been laid in and several of the private houses have connected to the mains. The question of a separate water main to Tawahi has preliminary consideration of the Committee of the Aden Settlement. systems at Tawahi and Crater have completed.

Climate.—The average temperature station is 87 degrees in the shade, the range being from 75 in January to 98 in with variations up to 102. The hills between monsoons in May and September are oppressive. But Aden is usually free infectious diseases and epidemics, and absence of vegetation, the dryness of soil and the purity of the drinking water turn efficient safeguards against many maladies common to tropical countries. The rainfall varies from ¼ inch to 8½ inches, with irregular average of 3 inches.

Aden Protectorate.—The principal of the Aden hinterland are in protection relations with the British Government, their territories and dependencies constitute the Aden Protectorate. In April 1902 Anglo-Turkish Boundary Commission a convention specifying a demarcated line between the Aden Protectorate and the Turkish Yemen, stretching from Shaikh Hussain opposite Perim, to the river Bana, some 20 north-east of Dhala', and thence north to the Great Desert (Rub' al Khali). boundary is still in effect the frontier between the Aden Protectorate and the territories the Imam Yrhya bin Muhammad Hamid Din, of Sanaa' whose rule succeeded that the Porte in the (formerly Turkish) after the Great War. The Aden Protectorate stretches eastwards to include the Hadhramaut and the territories of the Sultan of Qishn bordering upon Oman, and comprises in about 42,000 square miles.

The Sultan of Qishn is also Sultan of Socotra an island about 1,382 square miles in extent lying off Cape Guardafui on the African coast. Socotra is included in the Aden Protectorate by virtue of a treaty between the Sultan and the British Government in 1886: its population is said to be about 12,000 mainly pastoral inland and fishing on the coast. The Aden Protectorate which is under the control of the Resident and Commander-in-Chief, Aden, on behalf of the Colonial Office, is not directly administered and since the withdrawal of a small British Garrison from Dhala' in 1906 no military posts have been maintained in tribal territory.

Administration.—The administration of Aden was formerly directly under the Government of Bombay, but new arrangements came into operation in 1928. The Imperial Government is now responsible for the military and

political situation in Aden and the Aden Protectorate. The settlement of Aden itself remains under the Government of India. The financial settlement required by this division of authority provides for the payment by India to Imperial Revenues of £259,000 a year for three years and thenceforward of £150,000 a year. The larger amount is considerably less than the annual expenditure falling upon Indian revenues under the former system of control.

The administrative control of the Settlement of Aden was transferred from the Bombay Government on 1st April 1932, when Aden was formed into a separate province under the direct control of the Government of India.

The administration is vested in a Chief Commissioner who is also Resident and Commander-in-Chief. Since the introduction of the dual control referred to above, the Resident's post is to be held alternatively by an Officer of the Indian Service and a member of the Colonial Service. The District of Aden Court is the Colonial Court of Admiralty under Act XVI of 1891, and its procedure as such is regulated by the provisions of the Colonial Courts of the Admiralty Act, 1890 (53 and 54 Vic. Chapter 27). The laws in force in the Settlement are generally speaking those in force in India, supplemented on certain points by special regulations to suit local conditions. The management of the port is under the control of a Board of Trustees formed in 1888. The principal business of the Port Trust in recent years has been the deepening of the harbour so as to allow vessels of large size to enter and leave at all states of the tide. The police force, consisting of land, harbour and armed police, has been reorganised.

Chief Commissioner and Resident and Commander-in-Chief, Lieutenant-Colonel B. R. Reilly, C.I.E., O.B.E.

Officer Commanding British Forces, Group Captain C. F. A. Portal, D.S.O., M.C.

District and Sessions Judge, E. Weston, I.C.S.

Political Secretary, R. S. Champion.

Chairman of the Port Trust and Settlement, Lieutenant-Colonel D. S. Johnston, C.I.E.

Civil Secretary, Major H. G. Rivett-Carnac.

Civil Administrative Medical Officer, Port Health Officer and Medical Officer in E. G Hospital—Lieut.-Colonel E. S. Phipson, D.S.O., I.M.S.

Commandant of Police, R. H. Haslam, J.P.

Government Agent, Perim, C. Davey.

The island of Kamaran in the Red Sea about 200 miles north of Perim was taken by the British from the Turks in 1915, and is administered by the Government of India through a Civil Administrator under the control of the Chief Commissioner of Aden. It has an area of 22 square miles and a population of about 2,200. A quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Dutch East Indies.

Civil Administrator, Captain G. V. Wickham.

The Home Government.

The Home Government of India represented for sixty years the gradual evolution of the governing board of the old East India Company. The affairs of the Company were originally managed by the Court of Directors and the General Court of Proprietors. In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and affairs relating to the civil and military government, and revenues of India. By degrees the number of the Board was reduced and its powers were exercised by the President, who is the precursor of the Secretary of State for India. With modifications this system continued till 1858, when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change. The Government of India Act of 1858 (merged in the consolidating measure passed in 1915) the Secretary of State is the constitutional adviser of the Crown on all matters relating to India. He controls generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the civil government and revenues of India.

The Secretary of State.

Until the Reform Act of 1919 came into force the Secretary of State had the unqualified power to give orders to every officer in India, including the Governor-General, and to superintend, direct and control all acts, operations and concerns relating to the government or revenues of India. In the relations of the Secretary of State with the Governor-General in Council no express statutory change was made, but Parliament ordained through the Joint Select Committee that in practice the conventions governing these relations should be modified; only in exceptional circumstances should he be called upon to intervene in matters of purely Indian interest where the Government and the Legislature of India are in agreement.

Of the wide powers and duties still vested in the Secretary of State, many rest on his personal responsibility; others can be performed only in consultation with his Council, and for some of these the concurrence of a majority of the members of his Council voting at a meeting is required. The Act of 1919 greatly modified the rigidity of the law maintained for sixty years as to the relations of the Secretary of

Aden.

Aden was the first new territory added to the Empire after the accession of Queen Victoria. Its acquisition was the outcome of an outrage committed by local Arabs upon the passengers and crew of a British Indian buggalow wrecked in the neighbourhood. Negotiations having failed to secure satisfactory reparation the Government of Bombay despatched a force under Major Baillie which captured Aden on January 10th, 1839.

Aden is an extinct volcano, five miles long and three broad, jutting out to sea much as Gibraltar does, having a circumference of about 15 miles and connected with the mainland by a narrow isthmus of flat ground. The highest peak on the wall of precipitous hills that surrounds the old Crater which constitutes Aden is 1,725 feet above sea level. Rugged spurs, with valleys between, radiate from the centre to the circumference of the crater. The peninsula of Little Aden, adjacent to Aden proper, was obtained by purchase in 1868 and the adjoining tract of Shaikh Othman, 39 square miles in extent, was subsequently purchased when, in 1882, it was found necessary to make provision for an overflowing population. Attached to Aden is the island of Perim, 5 square miles in extent, in the Straits of Bab-el-Mandeb at the entrance to the Red Sea. The Kuria Muria islands, which were acquired from the Sultan of Muscat in 1854, were attached to the Aden Residency until 1931, when they were transferred to the control of the British Resident in the Persian Gulf.

The whole extent of the Aden Settlement, including Aden, Little Aden, Shaikh Othman and Perim, is approximately 80 square miles. The 1931 census showed Aden, with Little Aden, Shaikh Othman, and Perim to have a population of 48,338. The population of Perim is 1,700 largely dependent on the Coal Depot maintained there by a commercial firm.

The language of the Settlement is Arabic, but several other Asiatic tongues are spoken. The population is chiefly Arab. The chief industries are salt and cigarette manufacture and dhow building. The crops of the tribal low country adjoining are jowar, sesamum, a little cotton, madder, a bastard saffron and a little indigo. In the hills, wheat madder, fruit, coffee and a considerable quantity of wax and honey are obtained. The difficult problem of water supply has recently been solved. An artesian supply of fresh water has been obtained at Sheikh Othman. Early in 1924 a start was made with a deep bore and sweet water was found at a depth of 1,545 feet. The artesian flow of water now rises from this bore at 750 gallons per hour. A second bore was started in 1928-29 and proved more productive than the first. Five more bores have since been sunk, but two bores only are in operation at present and are sufficient to meet the requirements of the public and shipping. Bore water has practically replaced condensed water. Supply mains for distributing water by pipe connections to houses have been laid at Crater and several of the private houses have been connected to the mains. The question of laying a separate water main to Tawahi has had the preliminary consideration of the Executive Committee of the Aden Settlement. Drainage systems at Tawahi and Crater have been completed.

Climate.—The average temperature of the station is 87 degrees in the shade, the mean range being from 75 in January to 98 in June, with variations up to 102. The lulls between the monsoons in May and September are very oppressive. But Aden is usually free from infectious diseases and epidemics, and the absence of vegetation, the dryness of the soil and the purity of the drinking water constitute efficient safeguards against many maladies common to tropical countries. The annual rainfall varies from ¼ inch to 8¼ inches, with an irregular average of 3 inches.

Aden Protectorate.—The principal Chiefs of the Aden hinterland are in protection treaty relations with the British Government, and their territories and dependencies comprise the Aden Protectorate, etc. In April 1905 an Anglo-Turkish Boundary Commission signed a convention specifying the demarcated frontier between the Aden Protectorate and the (then) Turkish Yemen, stretching from Shaikh Murad, opposite Perim, to the river Bana, some 29 miles north-east of Dhala', and thence north-east to the Great Desert (Rub' al-Khali). This boundary is still in effect the frontier between the Aden Protectorate and the territories of the Imam Yehya bin Muhammad Hamid ud Din, of Sana' whose rule succeeded that on the Porte in the (formerly Turkish) Yemen, after the Great War. The Aden Protectorate stretches eastwards to include the Hadhramaut and the territories of the Sultan of Qishn, all bordering upon Oman, and comprises in all about 42,000 square miles.

The Sultan of Qishn is also Sultan of Sokotra, an island about 1,382 square miles in extent lying off Cape Guardafui on the African coast. Sokotra is included in the Aden Protectorate by virtue of a treaty between the Sultan and the British Government in 1886: its population is said to be about 12,000 mainly pastoral inland, and fishing on the coast. The Aden Protectorate which is under the control of the Resident and Commander-in-Chief, Aden, on behalf of the Colonial Office, is not directly administered, and since the withdrawal of a small British Garrison from Dhala' in 1906 no military posts have been maintained in tribal territory.

Administration.—The administration of Aden was formerly directly under the Government of Bombay, but new arrangements came into operation in 1928. The Imperial Government is now responsible for the military and

political situation in Aden and the Aden Protectorate. The settlement of Aden itself remains under the Government of India. The financial settlement required by this division of authority provides for the payment by India to Imperial Revenues of £259,000 a year for three years and thenceforward of £150,000 a year. The larger amount is considerably less than the annual expenditure falling upon Indian revenues under the former system of control.

The administrative control of the Settlement of Aden was transferred from the Bombay Government on 1st April 1932, when Aden was formed into a separate province under the direct control of the Government of India.

The administration is vested in a Chief Commissioner who is also Resident and Commander-in-Chief. Since the introduction of the dual control referred to above, the Resident's post is to be held alternatively by an Officer of the Indian Service and a member of the Colonial Service. The District of Aden Court is the Colonial Court of Admiralty under Act XVI of 1891, and its procedure as such is regulated by the provisions of the Colonial Courts of the Admiralty Act, 1890 (53 and 54 Vic. Chapter 27). The laws in force in the Settlement are generally speaking those in force in India, supplemented on certain points by special regulations to suit local conditions. The management of the port is under the control of a Board of Trustees formed in 1888. The principal business of the Port Trust in recent years has been the deepening of the harbour so as to allow vessels of large size to enter and leave at all states of the tide. The police force, consisting of land, harbour and armed police, has been reorganised.

Civil Administrator, Captain G. V. Wickham.

The Home Government.

The Home Government of India represented for sixty years the gradual evolution of the governing board of the old East India Company. The affairs of the company were originally managed by the Court of Directors and the General Court of Proprietors. In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and concerns relating to the civil and military government, and revenues of India. By degrees the number of the Board was reduced and its powers were exercised by the President, the lineal precursor of the Secretary of State for India. With modifications this system lasted until 1858, when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change. Under the Act of 1858 (merged in the consolidating measure passed in 1915) the Secretary of State is the constitutional adviser of the Crown on all matters relating to India. He inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the government and revenues of India.

The Secretary of State.

Until the Reform Act of 1919 came into force the Secretary of State had the unqualified power to give orders to every officer in India, including the Governor-General, and to superintend, direct and control all acts, operations and concerns relating to the government or revenues of India. In the relations of the Secretary of State with the Governor-General in Council no express statutory change was made, but Parliament ordained through the Joint Select Committee that in practice the conventions governing these relations should be modified; only in exceptional circumstances should he be called upon to intervene in matters of purely Indian interest where the Government and the Legislature of India are in agreement.

Of the wide powers and duties still vested in the Secretary of State, many rest on his personal responsibility; others can be performed only in consultation with his Council, and for some of these the concurrence of a majority of the members of his Council voting at a meeting is required. The Act of 1919 greatly modified the rigidity of the law maintained for sixty years as to the relations of the Secretary of

State with his Council, and he has fuller power than in the past to prescribe the manner in which business is to be transacted. Though in practice the Council meets weekly (save in vacation periods) this has ceased to be a statutory requirement, the law now providing that there shall be a meeting at least once in every month.

The India Council.

The number of members of the Council was reduced by the Act to not less than eight and not more than 12, the Secretary of State being free to appoint within those limits. The period of office was reduced from 7 to 5 years, though the Secretary of State may, for special reasons of public advantage to be communicated to Parliament, re-appoint a member for another five years. Half the Council must be persons who have served or resided in India for at least ten years, and who have not left India more than five years before their appointment. The Act restored the old salary of £1,200, with an additional subsistence allowance of £600 for any member who was at the time of appointment domiciled in India. Lord Morley opened the door of the Council to Indians, and since 1917 the number of Indian members has been three.

Associated with the Secretary of State and the India Council is a Secretariat known as the India Office, housed at Whitehall. Appointments to the establishment are made by the Secretary of State in Council, and are subject to the ordinary Home Civil Service rules in all respects.

In the past the whole cost of the India Office has been borne by the revenues of India, except that the Home Government made certain grants and remissions in lieu of a direct contribution amounting to £50,000 a year. The total cost now is about £230,000. In conformity with the spirit of the 1919 Act, an arrangement was made whereby the salary of the Secretary of State is placed on the Home estimates and most of the outlay needed for the controlling and political functions exercised in Whitehall is met from British revenues, agency functions being still chargeable to Indian revenues. The contribution from the Treasury to India Office administrative expenses is about £115,000.

The High Commissionership.

The financial readjustment was accompanied by a highly important administrative change provided for by the Act, in the creation of a High Commissioner for India in the United Kingdom with necessary establishments. From October 1st, 1920, the High Commissioner took over control of the purchase of Government stores in England and the Indian Students Branch, together with the supervision of the work of the Indian Trade Commissioner. The further development of the functions and powers of the High Commissioner have included such agency work as the payment of Civil leave allowances and pensions, the recruitment of technical officers, supervision of I. C. S. and Forest probationers after first appointment, the making of arrangements for officers on deputation or study leave repatriation of destitute lascars, sale of Government of India publications, etc. The staff of the Stores Department is located at the Depot off the Thames in Belvedere Road, Lambeth. The High Commissioner and the rest of the staff, are at India House, Aldwych, W. C. 2, built to the designs of Sir Herbert Baker at a cost for construction and equipment of £324,000. There could be no question of adopting a distinctly Oriental style for the exterior; but there are enough Indian features of ornamentation to proclaim the Eastern association of the place. Moreover the Exhibition Hall (typically Indian in design) has five windows on two sides for display specimens of the arts, craft and commerce of India.

Parliament set up in 1920 a Joint Standing Committee consisting of eleven members of each House to keep Parliament in closer touch with Indian affairs but the system has not flourished in the last few years.

The India Council.

The number of members of the Council was reduced by the Act to not less than eight and not more than 12, the Secretary of State being free to appoint within those limits. The period of office was reduced from 7 to 5 years, though the Secretary of State may, for special reasons of public advantage to be communicated to Parliament, re-appoint a member for another five years. Half the Council must be persons who have served or resided in India for at least ten years, and who have not left India more than five years before their appointment. The Act restored the old salary of £1,200, with an additional subsistence allowance of £600 for any member who was at the time of appointment domiciled in India. Lord Morley opened the door of the Council to Indians, and since 1917 the number of Indian members has been three.

Associated with the Secretary of State and the India Council is a Secretariat known as the India Office, housed at Whitehall. Appointments to the establishment are made by the Secretary of State in Council, and are subject to the ordinary Home Civil Service rules in all respects.

In the past the whole cost of the India Office has been borne by the revenues of India, except that the Home Government made certain grants and remissions in lieu of a direct contribution amounting to £50,000 a year. The total cost now is about £230,000. In conformity with the spirit of the 1919 Act, an arrangement was made whereby the salary of the Secretary of State is placed on the Home estimates and most of the outlay needed for the controlling and political functions exercised in Whitehall is met from British revenues, agency functions being still chargeable to Indian revenues. The contribution from the Treasury to India Office administrative expenses is about £115,000.

The High Commissionership.

The financial readjustment was accompanied by a highly important administrative change provided for by the Act, in the creation of a High Commissioner for India in the United Kingdom with necessary establishments. From October 1st, 1920, the High Commissioner took over control of the purchase of Government stores in England and the Indian Students Branch, together with the supervision of the work of the Indian Trade Commissioner. The further development of the functions and powers of the High Commissioner have included such agency work as the payment of Civil leave allowances and pensions, the recruitment of technical officers, supervision of I. C. S. and Forest probationers after first appointment, the making of arrangements for officers on deputation or study leave repatriation of destitute lascars, sale of Government of India publications, etc. The staff of the Stores Department is located at the Depot off the Thames in Belvedere Road, Lambeth. The High Commissioner and the rest of the staff, are at India House, Aldwych, W. C. 2, built to the designs of Sir Herbert Baker at a cost for construction and equipment of £324,000. There could be no question of adopting a distinctly Oriental style for the exterior; but there are enough Indian features of ornamentation to proclaim the Eastern association of the place. Moreover the Exhibition Hall (typically Indian in design) has five windows on two sides for display specimens of the arts, craft and commerce of India.

Parliament set up in 1920 a Joint Standing Committee consisting of eleven members of each House to keep Parliament in closer touch with Indian affairs but the system has not flourished in the last few years.

INDIA OFFICE.

Secretary of State.

The Rt. Hon. Sir Samuel Hoare, Bt., G.C.B., G.C.S.I., C.M.G., M.P.

Permanent Under-Secretary of State.

Sir Findlater Stewart, K.C.B., K.C.I.E., C.S.I., LL.D.

Parliamentary Under-Secretary of State.

R. A. Butler, M. P.

Deputy Under-Secretary of State.

Sir Louis J. Kershaw, K.C.S.I., C.I.E.

Assistant Under-Secretaries of State.

L. D. Wakely, C.B.

Sir Cecil H. Kisch, K.C.I.E., C.B.

Council.

Sir Reginald A. Mant, K.C.S.I., K.C.I.E.

Sir Campbell Rhodes, C.B.E.

Sir Henry Wheeler, K.C.S.I., K.C.I.E.

Colonel Sir Umar Hayat Khan, K.C.I.E., C.B.E., M.V.O., A.D.C.

Sir Denys de S. Bray, K.C.S.I., K.C.I.E., C.B.E.

Sir Henry Strakosch, G.B.E.

Sir Reginald I. R. Glancy, K.C.I.E., C.S.I.

Sir Charles A. Tegart, C.S.I., C.I.E., M.V.O.

Sir Atul C. Chatterjee, G.C.I.E., K.C.S.I.

Clerk of the Council: L. D. Wakely, C.B.

Deputy Clerk of the Council: J. A. Simpson.

Private Secretary to the Secretary of State: W. D. Croft, C.I.E.

Assistant Private Secretary: F. F. Turnbull.

Parliamentary Private Secretary: C. M. Patrick, M.P.

Political A.-D.-C. to the Secretary of State: Lieut.-Col. W. G. Neale, C.I.E.

Asst. to ditto: O. Gruzelier, M.V.O.

Private Secretary to Permanent Under-Secretary of State: H. A. F. Rumbold.

Private Secretary to Parly. Under-Secretary: A. F. Morley.

Heads of Departments.

SECRETARIES.

Financial: R. H. A. Carter, C.B.D.T. Monteath, C.V.O., O.B.E., F. E. Grist (Actg.). G. H. Baxter, (Acting).

Public and Judicial: Sir Vernon Dawson, K.C.I.E., R. T. Peel, M.C. (Acting).

Military: Major-General Sir J. F. S. D. Coleridge, K.C.B., C.M.G., D.S.O.

Personal Assistant: Col. G. L. Pepys, C.B., P.S.O.

Joint Secretary: S. K. Brown, C.B., C.V.O.

Staff Officer attached: Col. J. C. Macrae, D.S.O.

Political: J. C. Walton, C.B., M.C., P. J. Patrick.

Economic and Overseas: E. J. Turner, C.B.E.

Services and General and Establishment Officer, F. W. H. Smith, C.I.E.

Accountant-General, Sidney Turner, C.B.E., F.I.A. *also Director of Funds and Official Agent to Administrators-General in India.*

RECORD DEPARTMENT.—*Superintendent of Records*: W. T. Ottewill, M.B.E.

Auditor: W. A. Sturdy, C.B.E.

Miscellaneous Appointments.

Government Director of Indian Railway Companies: R. Mowbray.

Asst. to ditto: W. Gauld, O.B.E.

Librarian: (Vacant).

Asst. Librarian: H. N. Randle, D.PH., M.A.

Sub-Librarian: J. W. Smallwood, M.A.

President of Medical Board for the Examination of Officers of the Indian Services and Adviser to the Secretary of State on Medical matters: Maj.-Gen. Sir J. W. D. Megaw, K.C.I.E.

Members of the Medical Board: Lt.-Col. G. McI. C. Smith, C.M.G., Lt.-Col. H. R. Dutton, C.I.E.

Legal Adviser and Solicitor to Secretary of State: Sir Herbert G. Pearson.

Asst. Solicitor: F. R. Marten, O.B.E.

Information Officer: H. MacGregor.

Ordnance Consulting Officer: Col. C. E. Vines, R.A.

HIGH COMMISSIONER'S OFFICE

India House, Aldwych, W. C. 2.

The High Commissioner: Sir Bhupendra Nath Mitra, K.C.S.I., K.C.I.E., C.B.E.

Personal Assistant: V. J. G. Eayres.

Private Secretary: W. M. Mather, M.B.E.

Deputy High Commissioner: A. M. Green, I.C.S., C.I.E.

Chief Accounting Officer: G. H. Stoker, C.I.E., O.B.E.

Secretary, General Department: R. E. Montgomery.

Indian Trade Commissioner: Sir H. A. F. Lindsay, K.C.I.E., C.B.E.

Deputy ditto: H. S. Malik, I.C.S.

Secretary, Education Department: T. Quayle, D. LITT. (Lond.).

Store Department Depot at Belvedere Road, Lambeth, S. E. 1.

Director-General: Lieut.-Col. Sir Stanley Paddon, C.I.E., C.I.M.E.

Director of Purchase: R. R. Howlett.

Director of Inspection: F. E. Benest, M.I.E.E.

Secretaries of State for India.

	Assumed charge.
Lord Stanley (Earl of Derby)	1858
Sir Charles Wood, Bart. (Viscount Halifax)	1859
Earl de Grey and Ripon (Marquess of Ripon)	1866
Viscount Cranborne (Marquess of Salisbury)	1866
Sir Stafford Northcote, Bart. (Earl of Iddesleigh)	1867
Duke of Argyll	1868
Marquess of Salisbury	1874
Viscount Cranbrook	1878
Marquis of Hartington (Duke of Devonshire)	1880
Earl of Kimberly	1882
Lord Randolph Churchill	1885
Earl of Kimberley	1886

Austen Chamberlain	1915
E. S. Montagu	1917
Viscount Peel	1922
Lord Olivier	1924
Lord Birkenhead	1924
Viscount Peel	1928
W. Wedgwood Benn	1929
Sir Samuel Hoare	1931

The Indian States.

The area enclosed within the boundaries of India is 1,773,168 square miles, with a population of 315,132,537 of people—nearly one-fifth of the human race. But of this total a very large part is not under British Administration. The area covered in the Indian States is 675,267 square miles with a population of seventy millions. The Indian States embrace the widest variety of country and jurisdiction. They vary in size from petty states like Lawa, in Rajputana, with an area of 19 square miles, and the Simla Hill States, which are little more than small holdings, to States like Hyderabad, as large as Italy, with a population of thirteen millions. They include the inhospitable regions of Western Rajputana, Baroda, part of the Garden of India, Mysore, rich in agricultural wealth, and Kashmir, one of the most favoured spots on the face of the globe.

Relations with the Paramount Power.

So diverse are the conditions under which the Indian States were established and came into political relation with the Government of India, that it is impossible even to summarise them. But broadly it may be said that as the British boundaries expanded, the states came under the influence of the Government and the rulers were confirmed in their possessions. To this general policy however there was, for a brief period, an important departure. During the regime of Lord Dalhousie the Government introduced what was called annexation through lapse. That is to say, when there was no direct heir, the Government considered whether public interests would be secured by granting the right of adoption. Through the application of this policy, the states of Satara and of Nagpur fell in to the East India Company, and the kingdom of Oudh was annexed because of the gross misgovernment of its rulers. Then came the Mutiny. It was followed by the transference of the dominions of the East India Company to the Crown, and an irrevocable declaration of policy toward the Indian States. In the historic Proclamation of Queen Victoria it was set out that "We desire no extension of our present territorial possessions; and while we will permit no aggression on our dominions or our rights to be attempted with impunity, we shall allow no encroachments on those of others. We shall respect the rights, dignity and honour of the Native Princes as our own; and we desire that they, as well as our own subjects, should enjoy that prosperity and that social advancement which can only be secured by internal peace and good government." Since the issue of that proclamation there has been no encroachment on the area under Indian rule by the Government of India. On the contrary, the movement has been in the opposite direction. In 1881 the State of Mysore, which had been so long under British administration that the traditions of Native rule were almost forgotten, was restored to the old Hindu ruling house. In 1911 the Maharajah of Benares, the great taluqdar of Oudh, was granted ruling powers over his extensive possessions. On many occasions the Government of India has had to intervene, to prevent gross misgovernment, or to carry on the administration during a long minority; but always with the undeviating intention of restoring the territories as soon as the necessity for intervention passed. Almost all states possess the right of adoption in default of heirs.

Rights of Indian States.

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer. The Chiefs have, without exception, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Paramount Power acts for them in relation to foreign Powers and other Indian States. The inhabitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India. Criminals escaping to an Indian State must be handed over to it by its authorities; they cannot be arrested by the police of British India without the permission of the ruler of the State. The Indian Princes have therefore a suzerain power which acts for them in all external affairs, and at the same time scrupulously respects their internal authority. The suzerain also intervenes when the internal peace of their territories is seriously threatened. Finally they participate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the railways, the ports, and the markets of British India. Except in rare cases, applied to maritime states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government.

Obligations of Indian States.

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states; the authority of their rulers has no existence outside their territories. Their subjects outside their dominions become for all intents and purposes British subjects. Where foreign interests are concerned, the Paramount Power must act so that no just cause of offence is given by its subordinate allies. All Indian States alike are under an obligation to refer to the British every question of dispute with other states. Inasmuch as the Indian States have no use for a military establishment other than for police, or display, or for co-operation with the Imperial Government, their military forces, their equipment and armament are

prescribed by the Paramount Power. Although old and unaltered treaties declare that the British Government will have no manner of concern with any of a Maharajah's dependents or servants, with respect to whom the Maharajah is absolute, logic and public opinion have endorsed the principle which Lord Canning set forth in his minute of 1860, that the "Government of India is not precluded from stepping in to set right such serious abuses in a Native Government as may threaten any part of the country with anarchy or disturbance, nor from assuming temporary charge of a Native State when there shall be sufficient reason to do so." Of this necessity the Governor-General in Council is the sole judge subject to the control of Parliament. Where the law of British India confers jurisdiction over British subjects or other specified persons in foreign territory, that power is exercised by the British courts which possess it. The subjects of European Powers and the United States are on the same footing. Where cantonments exist in an Indian State, jurisdiction both over the cantonment and the civil station is exercised by the suzerain power.

Political Officers.

The powers of the British Government are exercised through Political Officers who, as a rule, reside in the states themselves. In the larger states the Government is represented by a Resident, in groups of states by an Agent to the Governor-General, assisted by local Residents or Political Agents. These Officers form the sole channel of communication between the Indian States and the Government of India and its Foreign Department, with the officials of British India and with other Indian States. They are expected to advise and assist the Ruling Chiefs in any administrative or other matters on which they may be consulted. Political Agents are similarly employed in the larger States under the Provincial Governments but in the petty states scattered over British India the duties of the Agent are usually entrusted to the Collector or Commissioner in whose district they lie. All questions relating to the Indian States are under the special supervision of the Supreme Government, and in the personal charge of the Governor-General.

Closer Partnership.

Events have tended gradually to draw the Paramount Power and the Indian States into closer harmony. Special care has been devoted to the education of the sons of Ruling Chiefs, first by the employment of tutors, and afterwards by the establishment of special colleges for the purpose. These are now established at Ajmere, Rajkot, Indore and Lahore. The Imperial Cadet Corps, whose headquarters are at Dehra Dun, imparts military training to the scions of the ruling chiefs and noble families. The spread of higher education has placed at the disposal of the Indian States the products of the Universities. In these ways there has been a steady rise in the character of the administration of the Indian States, approximating more closely to the British ideal. Most of the Indian States have also come forward to bear their share in the burden of Imperial defence. Following on the spontaneous offer of military assistance when war with Russia appeared to be inevitable over the Penjdeh incident in 1885, the states have raised a portion of their forces up to the standard of the troops in the Indian Army. These were until recently termed Imperial Service Troops; but are now designated Indian State Forces; they belong to the States, they are officered by Indians; but they are inspected by a regular cadre of British officers under the general direction of an Inspector-General. Their numbers are approximately 22,000 men; their armament is the same as that of the Indian Army and they have done good service often under their own Chiefs, on the Frontier and in China, in Somaliland and in the Great War. Secure in the knowledge that the Paramount Power will respect their rights and privileges, the Ruling Chiefs have lost the suspicion which was common when their position was less assured, and the visits of the Prince of Wales in 1875, of the Prince and Princess of Wales in 1905-06, and of the King and Queen in 1911-12 have tended to seal the devotion of the great feudatories to the Crown. The improvement in the standard of native rule has also permitted the Government of India largely to reduce the degree of interference in the internal affairs of the Indian States. The new policy was authoritatively laid down by Lord Minto, the then Viceroy, in a speech at Udaipur in 1909 when he said:—

"Our policy is, with rare exceptions, one of non-interference in the internal affairs of the Native States. But in guaranteeing their internal independence and in undertaking their protection against external aggression it naturally follows that the Imperial Government has assumed a certain degree of responsibility for the general soundness of their administration and could not consent to incur the reproach of being an indirect instrument of misrule. There are also certain matters in which it is necessary for the Government of India to safeguard the interests of the community as a whole as well as those of the paramount power, such as railways, telegraphs and other services of an Imperial character. But the relationship of the Supreme Government to the State is one of suzerainty. The foundation stone of the whole system is the recognition of identity of interests between the Imperial Government and Durbars and the minimum of interference with the latter in their own affairs.

Education.—The Osmania University at Hyderabad which marks a new departure in Indian education, imparts instruction in all the faculties through the medium of Urdu, English being taught as a compulsory language. It has three First Grade Colleges, four Intermediate Colleges, a Medical College, an Engineering College and a Training College for teachers. The Nizam's College at Hyderabad (first grade), is however, affiliated to the Madras University. In 1931-32 the total number of educational Institutions were 4,510, the number of Primary schools in particular having been largely increased.

Executive Council.—Raja Rajayan Rajah Sir Kishen Pershad Maharaja Bahadur, Yaminus Saltanath, G.C.I.E., President; Nawab Walind Dowlah Bahadur, Education, Medical and Military Departments; Members: Nawab Sir Akbar Hydari, Finance and Railway Member; Lt.-Col. Sir R. H. Chenevix Trench, C.I.E., O.B.E., Revenue and Police Member; Nawab Lutfud Dowlah Bahadur, Judicial Member; Nawab Aqueel, Jung Bahadur, Public Works Member; Nawab Mahdi Yar Jung Bahadur, Political Member.

British Resident.—The Hon'ble Mr. D. G. Mackenzie, C.I.E.

MYSORE.

The State of Mysore is surrounded on all sides by the Madras Presidency except on the north and the north-west where it is bounded by the districts of Dharwar and North Canara respectively and towards the south-west by Coorg. It has two natural divisions each with a distinct character of its own—the hill country (or malnad) on the west and the wide spreading valleys and plains (the maidan) on the east. The State has an area of 29,483 square miles including that of the Civil and Military Station of Bangalore and a population of 6,557,302 of whom over 92 per cent. are Hindus. Kannada is the language of the State.

History.—The ancient history of the country is varied and interesting. Tradition connects the table land of Mysore with many a legend enshrined in the great Indian epics, the Ramayana and the Mahabharata. Coming down to historical times, the north-eastern portion of the country formed part of Asoka's Empire in the third century B.C. Mysore then came under the rule of the Andhra dynasty. From about the third to the eleventh century A.D. Mysore was ruled by three dynasties, the north-western portion by the Pallavas and the central and the southern portions by the Gangas. In the eleventh century, Mysore formed part of Chola dominion, but the Cholas were driven out early in the twelfth century by the Hoysalas, an indigenous dynasty with its capital at Halebid. The Hoysala power came to an end in the early part of the fourteenth century. Mysore was next connected with the Vijayanagar empire. At the end of the fourteenth century Mysore became associated with the present ruling dynasty. At first tributary to the dominant empire of Vijayanagar, the dynasty attained its independence after the downfall of Vijayanagar in 1565. In the latter part of the eighteenth century the real sovereignty passed into the hands of Hyder Ali and then his son, Tippu Sultan. In 1799, on the fall of Seringapatam, the British Government restored the State comprised within its present limits, to the ancient dynasty in the person of Maharaja Sri Krishnaraja Wadayar Bahadur III. Owing to the insurrections that broke out in some parts of the country the management was assumed by the British Government in 1831. In 1881 the State was restored to the dynasty in the person of Sri Chamarajendra Wadayar Bahadur under conditions and stipulations laid down in an Instrument of Transfer. That ruler with the assistance of Mr. (afterwards Sir) K. Seshadri Iyer, K.C.S.I., as Dewan, brought Mysore to a State of great prosperity. He died in 1894, and was succeeded by the present ruler. His Highness Sri Krishnarajendra Wadiyar Bahadur, G.C.S.I., G.B.E., who was installed in 1902. In November 1913 the Instrument of Transfer was replaced by a Treaty which indicates more appropriately the relation subsisting between the British Government and the State of Mysore. In 1927, the Government of India remitted in perpetuity Rs. 10½ lakhs of the annual subsidy which till then had stood at Rs. 35 lakhs.

Administration.—The City of Mysore is the Capital of the State, but Bangalore is the Administrative headquarters. His Highness the Maharaja is the ultimate authority in the State, and the administration is conducted under his control, by the Dewan and two Members of Council. The High Court consisting of three Judges is the highest Judicial tribunal in the State. There are two constitutional Houses in the State—the Representative Assembly and the Legislative Council. The Representative Assembly was established in 1881 by an executive order of Government, and its powers and functions have been increased from time to time by similar orders of Government. Under the scheme of constitutional developments announced in October 1923 the Representative Assembly has been placed on a statutory basis and given a definite place in the constitution by the promulgation of the Representative Assembly Regulation XVIII of 1923. The franchise has been extended and the disqualification of women on the ground of sex, from exercising the right to vote and standing as candidates for election has been removed. The privilege for moving resolutions on the general principles and policy underlying the budget and on matters of public administration has been granted in addition to those already enjoyed of making representations about wants and grievances and of interpellating Government. The Assembly is also to be consulted on all proposals for the levy of new taxes and on the general principles of all measures of legislation before their introduction into the Legislative Council. Besides the Budget Session (formerly Birthday Session) and the Dasara Session, provision has been made for a special session of the Assembly to be summoned only for Government business.

The strength of the Legislative Council has been raised from 30 to 50, of whom 20 are official and 30 are non-official members. The Council which exercised the privileges of interpellation, discussion of the State Budget and the moving of the resolutions on all matters of public ad-

HYDERABAD.

The Nizam exercises full sovereignty within his dominions, grants titles and has the power of life and death over his subjects. Before 1919, the Government consisted of a Prime Minister responsible to the Nizam, with Assistant Minister, but an Executive Council was established which now consists of seven members. A Legislative Council consisting of 20 members of whom 12 are official, 6 non-official, and 2 extraordinary, is responsible for making laws. The administration is carried on by a regular system of departments on lines similar to those followed in British India. The State is divided into two divisions—Telingana and Mahratwara—15 districts and 103 Talukas. Local Boards are constituted in each District and Taluka. The State maintains its own currency which consists of gold and silver coins and a large note issue. The rupee, known as the Osmania Sicca, exchanges with the British Indian rupee at an average ratio of 116-10-8 to 100. There is a State postal service and stamps for internal purposes. The Nizam maintains his own army consisting of 19,759 troops of gall ranks of which 7,200 are classed as regular troops and 12,559 as irregular. In addition to these, there are two battalions of Imperial Service Troops, 1,052 strong.

Finance.—Hyderabad State is by far the wealthiest of the Indian States, having a revenue in its own currency of about 8½ crores, which is approximately the same as that of the Central Provinces and Bihar and Orissa and double that of any other State. After many vicissitudes, its finances are at present in a prosperous condition and it enjoys a large annual surplus of revenue from which a reserve of eight crores has been built up. This is being used partly as a sinking fund for the redemption debt and partly for the development of the resources of the State. The Budget estimates for the present year show a revenue of 802.24 lakhs under service heads and an expenditure of 785.60 lakhs, inclusive of large sums set aside for development, famine insurance and reserve for re-organisation. The capital expenditure programme provides for an expenditure of 60.81 lakhs which includes 21.54 lakhs for completion of large irrigation projects and 26.67 lakhs for open line works and road motor transport. The year opened with a cash balance of 221.14 lakhs which is expected to be about 112.83 lakhs by the end of the year. The Government loans stand at 115 for long term issues.

Production and Industry.—The principal industry of the State is agriculture, which maintains 57 per cent. of the population. The common system of land tenure is ryotwari. About 55 per cent. of the total area is directly administered by the State. The rest consists of private estates of His Exalted Highness the Nizam, which comprise about one-tenth of the total area of the State, and the estates of the Jagirdars and Paigah nobles. The total land revenue is over 3 crores. The principal food crops are millet and rice; the staple money crops cotton, which is grown extensively on the black cotton soils, and oilseeds. Hyderabad is well known for its Gaorani cotton which is the longest staple indigenous cotton in India. The total area under cotton exceeds 3½ million acres. Hyderabad possesses the most southerly of the Indian coal mines and the whole of southern India is dependent on it for such coal as is transported by rail. The chief mine is situated at Singareni, which is not far from Bezwada junction on the Calcutta-Madras line. The chief manufacturing industry is based on the cotton produced in the State. There are four large mills in existence and others are likely to be established, while about one-third of the cloth worn in the Dominions is produced on local hand-looms. There are about 340 ginning pressing and decorticating factories in the cotton tracts and also a number of tanneries and flour mills, the total number of factories (as defined in the Hyderabad Factory Act) of all kinds in the State being 402. The Shahabad Cement Co. which has been established at Shahabad on the Great Indian Peninsula Railway line, not far from Wadi, supplies the whole of southern India with cement and has at present an annua loutput of 134,108 tons.

Taxation.—Apart from the land revenue which, as stated above, brings in about 3.05 crores, the main sources of taxation are excise and customs. The receipts from each are estimated for the present year at 167 lakhs and 106 lakhs respectively. After these come interest on investments (52 lakhs), railways (62 lakhs) and Berar rent (29 lakhs). The customs revenue is derived from an *ad valorem* duty of 5 per cent. on all imports and exports.

Communications.—One hundred and thirty-seven miles of broad gauge line from Bombay to Madras traverse the State; also 33 miles of metre gauge line from Masulipatam to Marmagoa. At Wadi, on this section, the broad gauge system of the Nizam's State Railway takes off and running east through Hyderabad City and Warangal reaches the Calcutta-Madras line at Bezwada, a total length of 352 miles. From Kazipet, near Warangal on this line, a new link to Bellarshah strikes north thus providing the shortest route between Madras and Delhi. From Secunderabad the metre gauge Godaveri Valley railway runs north-west for 386 miles to Manmad on the main line of the Great Indian Peninsula Railway to Calcutta. A metre gauge line also runs south from Secunderabad through Mahbubnagar to the border and is now linked up with Kurnool on the Madras and Southern Mahratta Railway. Branch lines exist from Purna to Hingoli, Parbhani to Purli-Vaijnath Karipalli to Kothagudium and Vikharabad to Bidar, which last was extended to Purli-Vaijnath. Thus, with branch lines, there are now 805 miles of broad gauge and 656 of the metre gauge in the State. The Barsi Light Railway owns a short extension from Kurdwadi on the Bombay-Madras line to Latur in Osmanabad District. The Nizam's Guaranteed State Railway was worked by a company until April, 1930, when it was purchased by the Nizam's Government. The road system is being rapidly extended in accordance with a well-considered programme.

Education.—The Osmania University at Hyderabad which marks a new departure in Indian education, imparts instruction in all the faculties through the medium of Urdu, English being taught as a compulsory language. It has three First Grade Colleges, four Intermediate Colleges, a Medical College, an Engineering College and a Training College for teachers. The Nizam's College at Hyderabad (first grade), is however, affiliated to the Madras University. In 1931-32 the total number of educational Institutions were 4,510, the number of Primary schools in particular having been largely increased.

Executive Council.—Raja Rajayan Rajah Sir Kishen Pershad Maharaja Bahadur, Yaminus Saltanath, G.C.I.E., President; Nawab Walind Dowlah Bahadur, Education, Medical and Military Departments; Members: Nawab Sir Akbar Hydari, Finance and Railway Member; Lt.-Col. Sir R. H. Chenevix Trench, C.I.E., O.B.E., Revenue and Police Member; Nawab Lutfud Dowlah Bahadur, Judicial Member; Nawab Aqueel, Jung Bahadur, Public Works Member; Nawab Mahdi Yar Jung Bahadur, Political Member.

British Resident.—The Hon'ble Mr. D. G. Mackenzie, C.I.E.

MYSORE.

The State of Mysore is surrounded on all sides by the Madras Presidency except on the north and the north-west where it is bounded by the districts of Dharwar and North Canara respectively and towards the south-west by Coorg. It has two natural divisions each with a distinct character of its own—the hill country (or malnad) on the west and the wide spreading valleys and plains (the maidan) on the east. The State has an area of 29,483 square miles including that of the Civil and Military Station of Bangalore and a population of 6,557,302 of whom over 92 per cent. are Hindus. Kannada is the language of the State.

History.—The ancient history of the country is varied and interesting. Tradition connects the table land of Mysore with many a legend enshrined in the great Indian epics, the Ramayana and the Mahabharata. Coming down to historical times, the north-eastern portion of the country formed part of Asoka's Empire in the third century B.C. Mysore then came under the rule of the Andhra dynasty. From about the third to the eleventh century A.D. Mysore was ruled by three dynasties, the north-western portion by the Pallavas and the central and the southern portions by the Gangas. In the eleventh century, Mysore formed part of Chola dominion, but the Cholas were driven out early in the twelfth century by the Hoysalas, an indigenous dynasty with its capital at Halebid. The Hoysala power came to an end in the early part of the fourteenth century. Mysore was next connected with the Vijayanagar empire. At the end of the fourteenth century Mysore became associated with the present ruling dynasty. At first tributary to the dominant empire of Vijayanagar, the dynasty attained its independence after the downfall of Vijayanagar in 1565. In the latter part of the eighteenth century the real sovereignty passed into the hands of Hyder Ali and then his son, Tippu Sultan. In 1799, on the fall of Seringapatam, the British Government restored the State comprised within its present limits, to the ancient dynasty in the person of Maharaja Sri Krishnaraja Wadayar Bahadur III. Owing to the insurrections that broke out in some parts of the country the management was assumed by the British Government in 1831. In 1881 the State was restored to the dynasty in the person of Sri Chamarajendra Wadayar Bahadur under conditions and stipulations laid down in an Instrument of Transfer. That ruler with the assistance of Mr. (afterwards Sir) K. Seshadri Iyer, K.C.S.I., as Dewan, brought Mysore to a State of great prosperity. He died in 1894, and was succeeded by the present ruler. His Highness Sri Krishnarajendra Wadiyar Bahadur, G.C.S.I., G.B.E., who was installed in 1902. In November 1913 the Instrument of Transfer was replaced by a Treaty which indicates more appropriately the relation subsisting between the British Government and the State of Mysore. In 1927, the Government of India remitted in perpetuity Rs. 10½ lakhs of the annual subsidy which till then had stood at Rs. 35 lakhs.

Administration.—The City of Mysore is the Capital of the State, but Bangalore is the Administrative headquarters. His Highness the Maharaja is the ultimate authority in the State, and the administration is conducted under his control, by the Dewan and two Members of Council. The High Court consisting of three Judges is the highest Judicial tribunal in the State. There are two constitutional Houses in the State—the Representative Assembly and the Legislative Council. The Representative Assembly was established in 1881 by an executive order of Government, and its powers and functions have been increased from time to time by similar orders of Government. Under the scheme of constitutional developments announced in October 1923 the Representative Assembly has been placed on a statutory basis and given a definite place in the constitution by the promulgation of the Representative Assembly Regulation XVIII of 1923. The franchise has been extended and the disqualification of women on the ground of sex, from exercising the right to vote and standing as candidates for election has been removed. The privilege for moving resolutions on the general principles and policy underlying the budget and on matters of public administration has been granted in addition to those already enjoyed of making representations about wants and grievances and of interpellating Government. The Assembly is also to be consulted on all proposals for the levy of new taxes and on the general principles of all measures of legislation before their introduction into the Legislative Council. Besides the Budget Session (formerly Birthday Session) and the Dasara Session, provision has been made for a special session of the Assembly to be summoned only for Government business.

The strength of the Legislative Council has been raised from 30 to 50, of whom 20 are official and 30 are non-official members. The Council which exercised the privileges of interpellation, discussion of the State Budget and the moving of the resolutions on all matters of public ad-

ministration is, under the reformed constitution, granted the power of voting on the demands for grants. The Dewan is the Ex-officio President of both the Representative Assembly and the Legislative Council.

The Legislative Council has a Public Accounts Committee which examines the audit and appropriation reports and brings to the notice of Council all deviations from the wishes of the Council as expressed in its Budget grant.

Standing Committees.—With a view to enlarge the opportunities of non-official representatives of the people to influence the everyday administration of the State three Standing Committees consisting of Members of the Representative Assembly and the Legislative Council, have been formed, one in connection with Railway, Electrical and P. W. Departments, the second in connection with Local Self-Government and the Departments of Medicine, Sanitation and Public Health and the third in connection with Finance and Taxation.

All the important branches of the administration are controlled by separate Heads of Departments. The combatant strength of the Military Force at the end of 1930-31 was 2,149 of which 501 were in the Mysore Lancers, 132 in the Mysore Horse, and the remaining 1,516 in the Infantry. Animal Transport Corps, was replaced by the Mechanical Transport which consists of 2 lorries (six wheeler lorries) and 4 commercial lorries with the necessary staff. The total annual cost is about 17 lakhs of rupees. The cost of the Police Administration during 1930-31 was about 19 lakhs.

Agriculture.—Nearly three-fourths of the population are employed in agriculture, and the general system of land tenure is ryotwari. The principal food crops are ragi, rice, jola, millets, gram and sugar cane, and the chief fibres are cotton and sun-hemp. Nearly fifty thousand acres are under mulberry, the silk industry being the most profitable in Mysore next to Gold Mining. The Department of Agriculture is popularising agriculture on scientific lines by means of demonstrations, investigations and experiment. There are seven Government Agricultural Farms at Hebbal, Babbur, Marthur Nagenahally, Hunsur Mandza and the coffee experimental Station at Balehonnur. A live-stock section has been organised which has been taking necessary steps for the improvement of live-stock. A cattle breeding station has been established at Parvatharayanakare, near Ajjampur in the Kadur District, with a sub-station at Basur. A Serum Institute has been opened at Bangalore for the manufacture of serum and virus for inoculation against rinderpest and other contagious diseases there are 63 Veterinary Dispensaries and Hospitals in the State under the control of the Civil Veterinary Department.

Industries and Commerce.—A Department of Industries and Commerce was organised in 1913 with a view to the development of Industries and Commerce in the State. Its main functions are stimulating private enterprise by the offer of technical advice and other assistance for starting new industries, undertaking experimental work for pioneering industries and developing existing industries and serving as a general bureau of information in industrial and commercial matters. The department has under its control the following demonstration factories—The Government Soap Factory, Government Porcelain Factory and the Central Industrial Workshop. The Department has a well-equipped staff to undertake the drilling of boreholes for meeting the requirements of drinking water in the rural areas. Mysore is the largest producer of Silk in India, and the care and development of this industry is entrusted to a Department of Sericulture in charge of a Superintendent subject to the general control of the Director of Industries and Commerce. Arrangements have been made for the supply of disease-free seed and a central and five taluk popular schools have been doing good work. With a view to demonstrate and impart instructions in the utilisation of the high grade silk produced in the State, Government have recently established a silk Weaving Factory and Dyeing and Finishing Works at Mysore. The sandalwood oil factory started on an experimental basis is now working on a commercial scale. A factory is working at Mysore. A large plant at a cost of more than 170 lakhs of rupees has been constructed at Bhadravathi for purposes of manufacturing charcoal, pig-iron, distilling wood-alcohol, and developing subsidiary industries. A new pipe foundry was opened there for the manufacture of pipes which are in great demand in several towns in India. The works are on the borders of an extensive forest area and practically at the foot of the hills containing rich deposits of iron, manganese and bauxite, and are not far from the Gersoppa Water Falls estimated to be capable of producing 100,000 horse-power of electric energy. A Trade Commissioner in London has been appointed to look after the interest of the trade and Industry of the State.

Finances.—The actual total receipts and disbursements charged to Revenue for the past five years together with the revised budget estimate for 1930-31 and budget for 1931-32 were as below :—

Year.	Receipts.	Disbursements.	Surplus.	Deficits.
	Rs.	Rs.	Rs.	Rs.
1925-26	3,46,36,960	3,46,02,636	34,324	....
1926-27	3,38,69,349	3,47,39,906	....	8,70,557
1928-29	3,60,80,973	3,60,40,350	....	40,623
1929-30	3,74,57,981	3,74,02,395	55,586	....
1930-31	3,75,40,314	3,75,34,720	5,594	....
1931-32	3,32,35,293	3,94,29,342	....	61,94,049
1932-33 (Revised) ..	3,37,47,182	3,56,03,763	....	18,56,581
1933-34 (Budget) ..	3,33,16,000	3,54,19,000	....	21,03,000
	3,43,63,000	3,62,33,300	....	18,70,000

Hydro-Electric and Irrigation Works.—The river Cauvery in its course through the State, possesses a natural fall of about 380 feet near the island of Sivasamudram, and this fall was harnessed in the year 1902 for the development of electric power, to the extent of about 12,000 H. P. for supplying power mainly to the Kolar Gold Mining Companies and incidentally for lighting the cities of Mysore and Bangalore. In course of time, the demand for power increased and with a view to protecting the existing supply and augmenting the generation of additional power to meet the growing demands, the "Krishnarajasagara Reservoir" called after the name of the present Maharaja was constructed. The storage from the reservoir besides enabling the generation of electric power up to 46,000 H. P. will also bring under irrigation about 1,20,000 acres of land situated in an area subject to more or less continuous drought. The new Canal Works were started in 1927, and the main canal is named the "Irwin Canal" after Lord Irwin the then Viceroy. Full advantage is being taken of the available electric power for small industries and the electrification of towns and lift irrigation.

Education.—A separate University for Mysore was established on the 1st July 1916. It is of the teaching and residential type composed of the Central and Engineering Colleges at Bangalore and the Medical Maharaja's and Maharani's Colleges at Mysore, and five Intermediate Colleges with headquarters at Mysore. The colleges are efficiently equipped and organised and there is a training college for men located at Mysore. The Maharani's College at Mysore is a College for Women.

There are 36 High Schools of which 6 are for girls, 326 Middle Schools of which 34 are for girls. Provision has been made for teaching several vocational subjects in general schools with a view to giving a bias towards the vocations and in order to enable the pupils to take to such vocations after their High School life. There are 13 Training Institutions for training teachers in Middle and Primary Schools; 3 of them are for women. The control over Primary Education has been made over to the Local Bodies under the Elementary Educational Regulation of 1930, and the Local Bodies are responsible for making due provision for extension of Primary Education in accordance with a definite programme spread over 20 years. There are also schools for imparting instruction in Agricultural, Commercial, Engineering and other Technical subjects. There were altogether 7,736 schools on 31st March 1933 with a strength of 3,11,371 pupils. This gives one school to every 3.81 square miles of the area, and to every 848·02 persons of the population. The total expenditure on Education was Rs. 67,17,951 yielding an average of Rs. 1-0-5 per head of population.

Resident in Mysore and Chief Commissioner of Coorg.—The Hon. Lieut.-Col. C. T. C. Plowden, C.I.E.

Dewan.—Amin-ul-Mulk Sir Mirza M. Ismail, C.I.E., O.B.E.

Members of the Executive Council.—Rajamantrapravina Diwan Bahadur K. Matthan, B.A., First Member of Council, Mr. S. P. Rajagopalachari, B.A., B.L., Second Member of Council.

BARODA.

The State of Baroda is situated partly in Gujerat and partly in Kathiawar. It is divided into four district blocks: (1) the southern district of Navsari near the mouth of the Tapti river, and mostly surrounded by British territory; (2) central district north of the Narbada, in which lies Baroda, the capital city; (3) to the north of Ahmedabad, the district of Mehsana; and (4) to the west, in the peninsula of Kathiawar the district of Amreli, formed of scattered tracts of land. The area of the State is 8,164 square miles; the population is 2,443,007 of whom over four-fifths are Hindus.

History.—The history of the Baroda State as such dates from the break-up of the Mughal Empire. The first Maratha invasion of Gujerat took place in 1705. In later expeditions Pilaji Gaekwar, who may be considered as the founder of the ruling family, greatly distinguished himself. Songhad was the headquarters till 1766. After 1723 Pilaji regularly levied tribute in Gujerat. His son Damaji finally captured Baroda in 1734, since then it has always been in the hands of the Gaikwars; but Mughal authority in Gujerat did not end until the fall of Ahmedabad in 1753, after which the country was divided between the Gaekwar and the Peshwa. In spite of the fact that Damaji was one of the Maratha chiefs defeated at Panipat by Ahmed Shah, he continued to add to his territory. He died in 1768, leaving the succession in dispute between two rival sons. He was succeeded in turn by his sons Sayaji Rao I, Fattesing Rao, Mannaji Rao and Govind Rao. The last died in 1800 and was succeeded by Anand Rao. A period of political instability ensued which was ended in 1802 by the help of the Bombay Government, who established the authority of Anand Rao at Baroda. By a treaty of 1805 between the British Government and Baroda, it was arranged *inter alia* that the foreign policy of the State should be conducted by the British, and that all differences with the Peshwa should be similarly arranged. Baroda was a staunch ally of the British during the wars with Baji Rao Peshwa, the Pindari hordes and Holkar. But from 1820 to 1841, when Sayaji Rao II was Gaikwar, differences arose between the two Governments which were settled by Sir James Carnac, Governor of Bombay, in 1841. Ganpat Rao succeeded Sayaji Rao II in 1847. During his rule the political supervision of Baroda was transferred to the Supreme Government. His successor, Khande Rao, who ascended the gadi in 1856, introduced many reforms. He stood by the British in the Mutiny. He was succeeded by his brother Malhar Rao in 1870. Malhar Rao was deposed in 1875 for "notorious misconduct" and "gross misgovernment," but the suggestion that he had instigated the attempt to poison Col. Phayre, the Resident, was not proved. Sayaji Rao III, a boy of 13 years of age, who was descended from a distant branch of the family was adopted as heir of Khande Rao in 1875 and is the present Gaekwar. He was invested with full powers in 1881.

Administration.—An executive council consisting of the principal officers of the State carries on the administration, subject to the control of the Maharaja, who is assisted by a Dewan and other officers. A number of departments have been formed, which are presided over by officials corresponding to those in British India. The State is divided into five *Prants* each of which is sub-divided into *Mahals* and *Peta Mahals* of which there are in all 42. Attempts have for some years been made to restore village autonomy, and village panchayats have been formed which form part of a scheme for local self-government. There is a Legislative Department, under a Legal Remembrancer, which is responsible for making laws. There is also a Legislative Council, consisting of nominated and elected members. A High Court at Baroda possesses jurisdiction over the whole of the State and hears all final appeals. From the decisions of the High Court appeals lie in certain cases, to the Maharaja who decides them on the advice of the Huzur Nyaya Sabha. The State Army consists of 5,086 Regular forces and 3,806 Irregular forces.

Finance.—In 1931-32, the total receipts of the State were Rs. 2,49,43,000 and the disbursements Rs. 2,61,89,000. The principal Revenue heads were :—Land Revenue, Rs. 1,20,95,000; Abkari, Rs. 25,64,000; Opium Rs. 4,20,000; Railway, Rs. 13,54,000; Interest Rs. 16,67,000; Tribute from other States, Rs. 6,56,000. British Currency was introduced in 1901.

Production and Industry.—Agriculture and pasture support 63 per cent. of the people. The principal crops are rice, wheat, gram, castor-oil, rapeseed, poppy, cotton, san-hemp, tobacco, sugarcane, maize and garden crops. The greater part of the State is held on *ryotwari* tenure. The State contains few minerals, except sandstone, which is quarried at Songar, and a variety of other stones which are little worked. There are 80 industrial or commercial concerns in the State registered under the State Companies' Act. There are four Agricultural Banks and 1,063 Co-operative Societies in the Baroda State.

Communications.—The B. B. & C. I. Railway crosses part of the Navsari and Baroda *prants* and the Rajputana Malwa Railway passes through the Kadi *prant*. A system of branch lines has been built by the Baroda Durbar in all the four *prants* in addition to which the Tapti Valley Railway and the Baroda-Godhra Chord line (B. B. & C. I.) pass through the State. The Railways owned by the State are about 707.59 miles in length. The total mileage of metalled and fair weather roads in the State is 405 and 932 respectively.

Education.—The Education Department controls 2,643 institutions of different kinds in 105 of which English is taught. The Baroda College is affiliated to the Bombay University. There are a number of high schools, technical schools, and schools for special classes, such as the jungle tribes and unclean castes. The State is "in a way pledged to the policy of free and compulsory primary education." It maintains a system of rural and travelling libraries. Eighteen per cent. of the population is returned in the census as literate. Total expense on Education is Rs. 35.18 (lakhs).

Capital City.—Baroda City with the cantonment has a population of 112,862. It contains a public park, a number of fine public buildings, palaces and offices; and it is crowded with Hindu temples. The Cantonment is to the north-west of the city and is garrisoned by an infantry battalion of the Indian Army.

Ruler.—His Highness Farzandi-i-Khas-i-Dowlat-i-Englishia, Maharaja Sir Sayaji Rao III Gaekwar Sena Khas Khel, Samsher Bahadur, G.C.S.I., G.C.I.E., LL.D., Maharaja of Baroda.
Resident.—Lieut.-Col. J. L. R. Weir, C.I.E.
Dewan.—Sir V. T. Krishnamachari, KT., C.I.E.

BALUCHISTAN AGENCY.

In this Agency lies the State of Kalat with its feudatory State of Las Bela.

Kalat is bounded on the North by the Chagai district, on the East by Sindh and the Marri-Bugti tribal territories, on the South by the Arabian Sea and on the West by Persia.

The State includes the tribal territories of the Chiefs of the Brahui Confederacy of which the Khan of Kalat is head. The divisions of the State are, Sarawan or the Highlands, Jhalawan or the Lowlands, Kachhi, Makran, the Khanate of Kharan and the feudatory State of Las Bela. The inhabitants are for the most part Brahuis or Baloch, both being Muhammadans of the Sunni sect. The area of Kalat with Las Bela is 80,410 sq. miles. The country is sparsely inhabited, the total population being about 379,000.

The relations of Kalat with the British Government are governed by the treaties of 1854 and 1876, by the latter of which the independence of Kalat was recognized, while the Khan agreed to act in subordinate co-operation with the British Government. There are also agreements with Kalat in connection with the construction of the Indo-European telegraph line, the cession of jurisdiction on the railways and in the Bolan Pass, and the permanent leases of Quetta, Nushki and Nasirabad.

The Khan is assisted in the administration of the State by a Wazir-i-Azam, at present a European Officer of the Imperial service. The Governor-General's Agent in Baluchistan conducts the relations between the Government of India and the Khan, and exercises general political supervision over the State. The revenue of the State is about Rs.12,50,641, out of which the Khan retains a civil list of Rs. 3,50,000 per annum. The present Khan is His Highness Beglar Begi Lieut. Mir Ahmad Yar Khan. He was born in 1903.

Las Bela is a small State under the suzerainty of Kalat. The Hab river for the Southern part of its course forms the Eastern boundary with Sind, and the greater part of the State consists of the valley and the delta of the Purali river. Area 7,132 square miles; population 50,696, chiefly Sunni Muhammadans. The estimated average revenue is about Rs. 3,03,067. The Chief of Las Bela, known as the Jam, is bound by agreement with the British Government to

conduct the administration of his State in accordance with the advice of the Governor-General's Agent. This control is exercised through the Political Agent in Kalat. The Jam also employs an approved Wazir, to whose advice he is subject and who assists him generally in the transaction of State business.

Agent to the Governor-General for Baluchistan.—The Hon'ble Sir Norman Cater, K.C.I.E., I.C.S.

RAJPUTANA AGENCY.

Rajputana is the name of a great territorial circle with a total area of about 133,886 square miles, which includes 21 Indian States, one chiefship, one estate, and the small British district of Ajmer-Merwara. It is bounded on the west by Sind, on the north-west by the Punjab State of Bahawalpur, on the north and north-east by the Punjab, on the east by the United Provinces and Gwalior, while the southern boundary runs across the central region of India in an irregular zigzag line. Of the Indian States, Chiefship and estate 19 are Rajput, 2 (Bharatpur and Dholpur) are Jat, and two (Palanpur and Tonk) are Mahomedan. The chief administrative control of the British district is vested *ex-officio* in the political officer, who holds the post of Governor-General's Agent for the supervision of the relations between the several Indian States of Rajputana and the Government of India. For administrative purposes they are divided into the following groups:—Bikaner and Sirohi in direct relations with the Agent to the Governor-General. Eastern Rajputana Agency 5 States (Alwar, Bharatpur, Dholpur, Karauli and Kotah). Haraoti and Tonk Agency, 4 States (Bundi, Jhalawar, Shahapura and Tonk); Jaipur and Western Rajputana States Residency 6 States (Danta, Jaipur, Jodhpur, Jaiselmer and Kishangarh, Palanpur and Lawa Estate); Mewar Residency, and Southern Rajputana States Agency 4 States (Mewar, Dangarpur, Banswara and Pratabgarh and the Kushalgarh Chiefship).

The Aravalli Hills intersect the country almost from end to end. The tract to the north-west of the hills is, as a whole, sandy, ill-watered and unproductive, but improves gradually from being a mere desert in the far west to comparatively fertile lands to the north-east. To the south-east on the Aravalli Hills lie higher and more fertile regions which contain extensive hill ranges and which are traversed by considerable rivers.

Communications.—The total length of railways in Rajputana is 3,259 miles, of which about 1000 are the property of the British Government. The B. B. & C. I. (Metre-gauge) (Government) runs from Ahmedabad to Bandikui and from there branches to Agra and Delhi. Of the Indian State railways the most important are the Jodhpur and Bikaner lines from Marwar Junction to Hyderabad (Sind) and to Bikaner. A new Railway line from Manli (on the Udaipur-Chitorgarh Railway) to Marwar Junction is under construction.

Inhabitants.—Over 50 per cent. of the population are engaged in some form of agriculture; about 20 per cent. of the total population are maintained by the preparation and supply of material substances; personal and domestic service provides employment for about 5 per cent. and commerce for 2½ per cent. of the population. The principal language is Rajasthani. Among castes and tribes, the most numerous are the Brahmans, Jats, Mahajans, Chamars, Rajputs, Minas, Gujars, Bhils, Malis and Balais. The Rajputs are, of course, the aristocracy of the country, and as such hold the land to a very large extent, either as receivers of rent or as cultivators. By reason of their position as integral families of pure descent, as a landed nobility, and as the kinsmen of ruling chiefs, they are also the aristocracy of India; and their social prestige may be measured by observing that there is hardly a tribe or clan (as distinguished from a caste) in India which does not claim descent from, or irregular connection with, one of these Rajput stocks.

The population and area of the States are as follows:—

Name of State.	Area in square miles.	Population in 1931.
In direct political relations with A.G.G.—		
Bikaner	23,317	936,218
Sirohi	1,958	216,528
Mewar Residency and S. R. S. Agency.—		
Udaipur	12,694	1,566,910
Banswara	1,606	225,106
Dungarpur	1,447	227,544
Partabgarh	886	66,539
Kushalgarh (Chiefship).	340	35,564
Jaipur and the Western Rajputana States Residency.—		
Danta	347	26,172
Jaipur	15,579	2,631,775
Jodhpur	35,016	2,125,982
Jaisalmer	16,062	76,255
Kishangarh	858	85,744
Palanpur	1,769	264,179
Lawa (Estate) ..	19	2,790
Haraoti and Tonk Agency.—		
Bundi	2,220	216,722
Tonk	2,553	317,360
Jhalawar	810	107,890
Shahpura	405	54,233
Eastern States Agency.—		
Alwar	3,158	749,751
Bharatpur	1,978	486,954
Dholpur	1,221	254,9 6
Karauli	1,242	140,525
Kotah	5,684	68 .804

Udaipur State (also called Mewar) was founded in about 646 A.D. The capital city is Udaipur, which is beautifully situated on the slope of a low ridge, the summit of which is crowned by His Highness the Maharana's palaces, and to the north and west, houses extend to the banks of a beautiful piece of water known as the Pichola Lake in the middle of which stand two island palaces. It is situated near the terminus of the Udaipur-Chittorgarh Railway, 697 miles north of Bombay. His Highness Maharajadhiraj Maharana Sir Bhupal Singhji Bahadur, G.C.S.I., K.C.I.E., who succeeded his father the late Maharana His Highness Maharajadhiraj Maharana Sir Fateh Singhji Bahadur, G.C.S.I., G.C.I.E., G.C.V.O., in 1930, is the Premier Ruling

Prince of Rajputana. The revenue and expenditure of the State are now about 80·6 lakhs. Its archæological remains are numerous, and stone inscriptions dating from the third century have been found.

Banswara State is the southernmost State of Rajputana within the Political Agency of the Southern Rajputana States. The area of the State is 1,946 square miles and the population 2,60,670 souls. It is thus in regard to size eleventh among the States of Rajputana. Banswara with Dungarpur originally formed a country known as Bagar, which was, from the beginning of the thirteenth century until about the year 1529, held by certain Rajput Rulers of the Ghelot or Sishodiya clan, who claimed descent from an elder branch of the family now ruling in Udaipur. After the death of Maha-Rawal Udai Singhji, the Ruler of Bagar, about 1529, his territory was divided between his two sons, Jagmal Singhji and Prithvi Rajji, and the descendants of the two families are now the Rulers of Banswara and Dungarpur respectively. Where the town of Banswara now stands, there was a large Bhil pal or colony under a powerful Bhil Chieftain, named Wasna, who was defeated and slain by Maharawal Jagmal Singhji about 1530. The name of Banswara is by tradition said to be a corruption of Wasnawara or the country of Wasna. Others assert that the word means the country (wara) of bamboos (bans). Nearly three centuries after its foundation by Maharawal Jagmal Singhji, Maharawal Bijai Singhji anxious to get rid of the supremacy of the Mahrattas offered to become a tributary to the British Government. In 1818, a definite treaty was made with his successor, Maharawal Umed Singhji. Banswara has been described as the most beautiful portion of Rajputana; it looks at its best just after the rains. The principal rivers are the Mahi, the Anas, the Eran, the Chap and the Haran.

The present Ruler is His Highness Rayan Rai Maharaja Dhiraj Maharawalji Sahib Shree Sir Pirthi Singhji Bahadur, K.C.I.E., who was born on July 15, 1888, and is the 21st in descent from Maharawal Jagmal Singhji. His Highness was educated in the Mayo College and succeeded his father in 1914. His Highness is entitled to a salute of 15 guns. The State is ruled by His Highness the Maharawalji Sahib Bahadur with the assistance of the Diwan and the Home Minister, and the Judicial and the Legislative Council, of which the Diwan is the President and the heir apparent, Maharaj Raj Kumar Sahib Shri Chandraveer Singhji Sahib, is Senior Member. The revenue of the State is about 7 lakhs and the expenditure is about the same.

Diwan.—Mr. R. K. Chatterjee, B.A., BAR-AT-LAW.

Home Minister.—Mr. Nand Lal Banerjee.

Dungarpur State, with Banswara, formerly comprised the country called the Bagar. It was invaded by the Mahrattas in 1818. As in other States inhabited by hill tribes, it became necessary at an early period of British supremacy to employ a military force to coerce the Bhils. The State represents the *Gadi* of the eldest branch of the Sisodias and dates its separate existence from about the close of the 12th Century. Samant Singh, King of Chitor, when driven away by Kirtipal of Jalor, fled to Bagdad and killed Chowrasimal, Chief of Baroda, and founded the State of Dungarpur. The present Chief is His Highness Raj Rayan Maharajadhiraj Maharawal Shri Lakshman Singhji Bahadur born on 7th March 1908, succeeded on 15th November 1918 and assumed charge of the administration on the 16th February 1928. No railway line crosses the territory, the nearest railway station, Udaipur, being 65 miles distant and Talad on Ahmedabad side, being about 70 miles distant. Revenue about 6¼ lakhs.

Partabgarh State, also called the Kanthal, was founded in the sixteenth century by a descendant of Rana Mokal of Mewar. The town of Partabgarh was founded in 1698 by Partab Singh. In the time of Jaswant Singh (1775-1844), the country was overrun by the Marathas, and the Maharawat only saved his State by agreeing to pay Holkar a tribute of *Salim Shahi* Rs. 72,700 (which then being coined in the State Mint was legal tender throughout the surrounding Native States), in lieu of Rs. 15,000 formerly paid to Delhi. The first connexion of the State with the British Government was formed in 1804; but the treaty then entered into was subsequently cancelled by Lord Cornwallis, and a fresh treaty by which the State was taken under protection was made in 1818. The tribute to Holkar is paid through the British Government, and in 1904 was converted to Rs. 36,350 British currency. The present ruler is His Highness Maharawat Ram Singh Bahadur who was born in 1908 and succeeded in 1929. The State is governed by the Maharawat with the help of the Dewan, and, in judicial matters, of a Committee of members styled the Raj Sabha or State Council. Revenue about 5½ lakhs; expenditure nearly 5½ lakhs. The financial administration is under the direct supervision of the State.

Jodhpur State, is the largest in Rajputana with an area of 36,021 square miles and a population of 2·4 millions, of which 83 per cent. are Hindus, 8 per cent. Musalmans and the rest Jains and Animists. The greater part of the country is an arid region. It improves gradually from a mere desert to comparatively fertile land as it proceeds from West to East. The rainfall is scanty and capricious. There are no perennial rivers and the supply of sub-soil water is very limited. The only important river is Luni.

The Maharaja of Jodhpur is the head of the Rathor clan of Rajputs and claims descent from Rama, the deified King of Ayodhya. The earliest known King of the Clan named Abhimanyu, lived in the fifth century, from which time their history is increasingly clear. After the breaking up of their kingdom at Kanauj they founded this State about 1212, and the foundations of the Jodhpur City were laid by Rao Jodha in 1459. He had abolished the tax levied by Hussain Shah of Jaunpur from Hindu pilgrims at Gaya. His descendant was the famous Rao Maldeva, the most powerful ruler of his time having an army of 80,000 Rajputs and the Emperor Humayun when expelled by Sher Shah in 1542 A.D. had sought refuge with him. Raja Sur Singh, son of Raja Udai Singh, in recognition of his deeds of valour was created a 'Sawai Raja' with a mansab of 5,000 Zat

3,300 Sowars by the Emperor Akbar. Maharaja Jaswant Singh I with whom the secret hostilities of Emperor Aurangzeb are well known was once a pillar of the Indian Empire and a great defender of the Hindus and their temples. He was also a patron of learning and himself wrote books on Philosophy, Prosody and other profound subjects. After his demise, Aurangzeb confiscated Marwar, and Maharaja Jaswant Singh's posthumous son and successor Maharaja Ajit Singh had to pass 8 years in hiding in mountains and subsequent 20 years in constant wars with Aurangzeb's army with the help of his nobles, chief of whom was the famous hero Durga Dass before he ascended the throne of Marwar. In the time of Maharaja Bijey Singh, a later descendant of the same line, one of the richest districts, *viz.*, Godwar, was finally acquired from Mewar and annexed to Marwar. The State entered into a treaty of alliance with the British Government in 1818.

The present ruler, Lieut.-Colonel His Highness Raj Rajeshwar Saramad Rajai Hind Maharaja Dhiraj Maharaja Sri Sir Umaid Singhji Sahib Bahadur, G.C.I.E., K.C.S.I., K.C.V.O., is the head of Rathors, and is the 32nd ruler from Rao Sihaji. His Highness was born on 8th July 1903 and is now in the 30th year of his age. He succeeded his elder brother on 3rd October, 1918. He was educated at the Mayo College, Ajmer, and was invested with full ruling powers on 27th January 1923. In October of the same year he was granted the rank of honorary Captain in the British Army, made a Knight Commander of the Royal Victorian Order in March 1921 was elevated to the rank of Honorary Major in June 1923 and Honorary Lieut.-Colonel in August 1933. He was created K.C.S.I. on 3rd June 1925 and invested with G.C.I.E. on the 1st January 1930. His Highness was married in November 1921, and has four sons and one daughter, the heir-apparent being Maharaj Kumar Sri Hanvant Singhji Sahib born on 16th June 1923. His Highness the Maharaja Sahib Bahadur has one younger brother Maharaja Sri Ajit Singhji Sahib, and two sisters, the elder of whom is Maharani of Jaipur and the younger the Maharani of Rewa.

His Highness is greatly interested in educational, athletic, and progressive institutions generally of modern times, both in India and abroad, and has always exhibited his sympathy with them by liberal donations. An example of this can be easily found in the donation of 3 lakhs made by His Highness for founding the Irwin Chair of Agriculture at the Benares Hindu University. He is a keen sportsman, Polo player and first rate shot. His favourite pasttimes are pig-sticking, fishing, shooting, photography and air-piloting.

His Highness enjoys a salute of 19 guns within his own territories and 17 guns elsewhere.

The administration is carried on with the aid of a State Council composed of His Highness the Maharaja Sahib Bahadur, President, Mr. J. W. Young, O.B.E., (Indian Finance Department), Chief Minister and Finance Minister, Rao Bahadur Thakur Chain Singhji, M.A., LL.B., Judicial Minister; Thakur Madho Singhji, Home Minister; and Mr. J. B. Irwin, D.S.O., M.C., I.C.S., Revenue Minister. There is also an Advisory Committee representing the great body of Sardars who hold as much as five-sixths of the total area, to aid the administration with opinion on matters affecting general customs and usage in the country.

The revenue of the State during the year 1931-32 was Rs. 1,47,43,000 and the expenditure Rs. 1,17,12,000. The Jodhpur Railway extending from Hyderabad (Sind) to Luni Junction and Marwar Junction to Kuchaman Road with its branches on all sides in the territories of the State is the principal railway, while the B. B. & C. I. Railway runs across a portion of the South-Eastern Border. The famous marble quarries of Makrana as well as the salt lake at Sambhar are situated in Jodhpur territory.

Jaisalmer State is one of the largest States in Rajputana and covers an area of 16,062 square miles. The Rulers of Jaisalmer belong to the Jadon clan and are the direct descendants of Sri Krishna. Jaisalmer City was founded in 1156, and the State entered into an alliance of perpetual friendship with the British Government in 1818. In 1844 after the British conquest of Sind the forts of Shahgarh, Garsia and Ghotaru which had formerly belonged to Jaisalmer were restored to the State. The population according to the census of 1931 is 67,652. The present Ruling Prince is His Highness Maharajadhiraj Raj Rajeshwar Maharawalji Sir Jawahir Singhji Saheb Bahadur, Yadukul, Chandrabhal Rukan-ud-Dowla, Muzaffer Jang, Bijaimand, K.C.S.I. Revenue about four Lakhs.

Sirohi State is much broken up by hills of which the main feature is Mount Abu, 5,650 feet. The Chiefs of Sirohi are Deora Rajputs, a branch of the famous Chauhan clan which furnished the last Hindu kings of Delhi. The present capital of Sirohi was built in 1425. The city suffered in the eighteenth century from the wars with Jodhpur and the depredations of wild Mina tribes. Jodhpur claimed suzerainty over Sirohi but this was disallowed and British protection was granted in 1823. The present ruler is His Highness Maharajadhiraj Maharao Shri Sir Sarup Ram Singh Bahadur, G.C.I.E., K.C.S.I. The State is ruled by the Maharao with the assistance of Ministers and other officials. Revenue about 10¾ lakhs.

Jaipur is the fourth largest State in Rajputana. It consists for the most part of level and open country. It was known to the ancients as Matsya Desh, and was the kingdom of the King Virata mentioned in the Mahabharata, in whose court, the five Pandava brothers during their last period of exile resided. Bhairat in the Jaipur State has been identified.

The Maharaja of Jaipur is the head of the Kuchawa clan of Rajputs, which claims descent from Kush, son of Rama, King of Ayodhya, the famous hero of the famous epic poem, the Ramayana. This dynasty in Eastern Rajputana dates as far back as ninth century A. D. Dulha Raj, one of its most early rulers, made Amber the capital of the State in 1037 A. D. About the end of 12th century one of the rulers Pajun at the head of the army of Prithvi Raj, Emperor of Delhi, defeated Shahabuddin Ghori in the Khyber Pass and pursued him as far as Ghazni. Prithvi Raj had given his sister in marriage to him. History of India records several distinguished rulers of Jaipur from amongst whom the following require particular mention. Man Singh, 1590-1615. He was a victorious general, intrepid commander and

tactful administrator, whose fame had spread throughout the country. During most troublous times, he maintained Imperial authority in Kabul and was the brilliant character of Akbar's time. Maharaja Sawai Jai Singh II (1700—44) was the first town planner in India. He removed the capital of the State to Jaipur, so named after him. During his time, the State acquired great power and fame. He was a great mathematician and scientist of his age, and is famous for his astronomical observatories which he built at several important centres in India. His court was visited by foreign astronomers. Maharaja Sawai Ram Singh, 1835-1880. He was one of the most enlightened princes in India at that time. He encouraged art and learning. He embellished the city in various ways and improved the administration and material condition of the people. Maharaja Sawai Madho Singh II, 1880-1922. He was a very wise and intelligent ruler who followed in the foot-steps of his father. He maintained and steadily improved all the useful measures initiated by the late Maharaja. His administration was characterized by great liberality, catholicity and a broad outlook on affairs. His deep religious devotion and piety and unrivalled generosity and genuine and active sympathy are well known. His staunch loyalty and maintenance of the traditions of his house raised him in the estimation of the paramount power. He passed away after a long reign of 41 years. His late Highness' donations and subscriptions to works of charity are enormous and too numerous to detail. His Highness the present Maharaja Sawai Man Singh II Bahadur was born on 21st August 1911. He was adopted by His late Highness on 24th March 1921. He is a scion of the Rajawat House of Isarda, and ascended the gadi on the 7th September 1922, and was married to the sister of the present Maharajah of Jodhpur on the 30th January 1924, from whom he has a daughter and a son and heir (b. 22nd October 1931). His second marriage with the daughter of his late Highness Maharaja Shri Sumer Singhji Bahadur of Jodhpur was celebrated on the 24th April 1932. By this marriage he has a son born in England on May 5, 1933. He studied at the Woolwich Military Academy in England and promises to be an ideal ruler having given abundant evidence already of the keen and sympathetic interest he takes in all that concerns the welfare of his people and mankind in general.

His Highness the Maharaja Sahib Bahadur was invested with full powers on 14th March 1931. A Chief Court of Judicature was established in 1921. The army consists of Cavalry, Infantry, Transport and Artillery. The normal revenue is about one crore and twenty lakhs.

According to the Census of 1931 the population of the State is 26,31,775. In area it is 16,682 square miles.

Kishangarh State is in the centre of Rajputana and consists practically of two narrow strips of land separated from each other with an area of 858 square miles (population 85,744), the northern mostly sandy, the southern generally flat and fertile. The Ruling Princes of Kishangarh belong to the Rathor clan of Rajputs and are descended from Maharaja Kishan Singh (second son of Maharaja Udai Singh of Jodhpur) who founded the town of Kishangarh in 1611. The present ruler is His Highness Umdae Rajhai Buland Makan Maharajah Dhiraj Dikshit Yagnarain Singh Bahadur. He was born on the 26th January, 1896, and was educated at the Mayo College, Ajmer, where he passed the Diploma Examination. He was married to the sister of Raja Bahadur Maksudangarh in May, 1915. He went to England and travelled on the Continent with His Late Highness in 1921. On the demise of His Late Highness on 25th September 1926, he succeeded to the Gadi on the 24th November 1926. He administers the State with the help of a Council. Revenue about 9 lakhs and expenditure 8 lakhs.

Lawa State, or Chief of Rajputana is a separate chiefship under the protection of the British Government and independent of any Native States. It formerly belonged to Jaipur and then became part of the State of Tonk. In 1867, the Nawab of Tonk murdered the Thakur's uncle and his followers, and Lawa was then raised to its present State. The Thakurs of Lawa belonged to the Naruka sect of the Kachwaha Rajputs. The present Thakur, Bansperdeep Singh, was born on September 24, 1923 and succeeded to the chiefship on 31st December 1929. The chiefship is under minority Administration. Revenue about Rs. 50,000.

Bundi State is a mountainous territory in the south-east of Rajputana. The Ruler of Bundi is the head of the Hara sect of the great clan of Chauhan Rajputs and the country occupied by this sect has for the last five or six centuries been known as Haraoti. The State was founded in the early part of the thirteenth century and constant feuds with Mewar and Malwa followed. It threw in its lot with the Mahomedan emperors in the sixteenth century. In later times it was constantly ravaged by the Marathas and Pindaries and came under British protection in 1818. The present ruler of the State is His Highness Maharao Raja Shri Ishwari Singhji Saheb Bahadur. He was born on 8th March 1893 and succeeded to the Gadi on 8th August 1927. His Highness is entitled to a Salute of 17 guns. Revenue about 12½ lakhs Hali and 3½ lakhs Kalder, Expenditure nearly the same.

Tonk State.—Partly in Rajputana and partly in Central India, consists of six Parganas separated from one another. The ruling family belongs to the Salarzai clan of the Bunerwal Afghan tribe. The founder of the State was Nawab Muhammad Amir Khan Bahadur, General of Holkar's Army from 1798-1806. Holkar bestowed grants of land on him in Rajputana and Central India and the land so granted to him was consolidated into the present State. The present Ruler of the State is His Highness Said-ud-Daula, Wazir-ul-Mulk Nawab Hafiz Muhammad Saadat Ali Khan Bahadur, Saulat-i-Jang who ascended the Masnad in 1930. The administration is conducted by the Nawab in consultation with the Council of four members, *viz.*, (1) Major D. de. M. S. Fraser, I.A., Principal Official and Adviser to His Highness, Vice-President, State Council, and Finance Member; (2) Khan Bahadur Sheikh Rahim Bakhsh, O.B.E., Judicial Member; (3) Khan Sahib Mohammad Asad Ullah Khan, Revenue Member; (4) Khan Bahadur Sahibzada Muhammad Abdul Tawwab Khan, Home Member.

Secretary.—M. Hamid Husain, B.A.

Revenue.—Rs. 23,49,282. Expenditure.—Rs. 20,94,060.

Shahpura State.—The ruling family belongs to the Seesodia Clan of Rajputs. The State came into existence about 1629 when the Parganah of Phulia was granted by the Mughal Emperor Shah-i-Jehan to Maharaj Sujan Singh, son of Maharaj Surajmal, the second son of Maharana Amar Singh of Udaipur. Later on Raja Ran Singhji received the paraganah of Kachhola from the Maharana of Udaipur and was recognised as a great noble of the Mewar State.

The present Ruler is Rajadhiraj Sri Umaid Singhji Bahadur. The State enjoys permanent honour of nine gunssalute.

Bharatpur State.—Consists largely of an immense alluvial plain, watered by the Banganga and other rivers.

The present ruling family of Bharatpur are Jats, of the Sinsinwar clan who trace their pedigree to the eleventh century. The family derives its name from its old village Sinsini. Bharatpur was the first State in Rajputana that made alliance with the British Government in 1803. It helped Lord Lake with 5,000 horse in his conquest of Agra and battle of Laswari wherein the Maratha power was entirely broken and received 5 districts as reward for the service. In 1804, however, Bharatpur sided with Jaswant Rao Holkar against the British Government which resulted in a war. Peace was re-established in 1805 under a treaty of alliance and it continues in force. The Gadi being usurped by Darjan Sal in 1825, the British Government took up the cause of the rightful heir Maharaja Balwant Singh Shaib. Bharatpur was besieged by Lord Combermere, and as the faithful subjects of the State also made common cause with the British Army the usurper was quickly disposed of, and Maharaja Balwant Singh, the rightful heir to the Throne, came into his own. Bharatpur also rendered valuable service to the British Government during the Mutiny. During the great War the Bharatpur Durbar gave valuable help to the Imperial Government. The Bharatpur Imperial Service Infantry served in East Africa and the Mule Transport Corps served in all theatres of war except Africa. The following are among the most important contributions made by the State during the great war: (1) reinforcement sent to E. Africa for the Imperial Service Infantry, 714 rank and file, and 64 followers; (2) reinforcements for the Imperial Service Transport Corps, 430 rank and file and 64 followers; (3) State subscriptions to war loans 20 lakhs; (4) State subscriptions to Imperial Indian Relief Funds, Soldiers' Comfort Fund, Aeroplane Fleet Fund, Lord Kitchener's Memorial Fund, St. John's Ambulance, Serbian Relief Fund, and Red Cross, 2 lakhs; (5) public subscriptions to various war funds Rs. 26,000 and (6) public subscriptions to war bonds Rs. 69,000. Immediately upon their return from Europe the Bharatpur Transport Corps went to the North-West Frontier, and remained on active service there during the Afghan War. The Corps returned to Bharatpur at the conclusion of peace in February 1920. The present Ruler is His Highness Shri Maharaja Brijendra Sawai Brijendra Singh Bahadur, Bahadur Jung, who was born in 1918 and succeeded his father, Maharaja Sir Kishen Singh who died on the 27th of March 1929.

Revenue Rs. 30,47,000.

Dholpur State.—The family of the ruling Chiefs of Dholpur belongs to the Bamrolian Jats, the adopted home of one of their ancestors. The family took the name of Bamrolia about the year 1367. They next migrated to Gwalior, where they took the part of the Rajputs in their struggles against the Emperor's Officers. Eventually the Bamrolia Jats settled near Gohad and in 1505 Surjan Deo assumed the title of Rana of Gohad. After the overthrow of the Mahrattas at Panipat, Rana Bhim Singh in 1761 possessed himself of the fortress of Gwalior but lost it six years later. In order to bar the encroachments of the Mahrattas, a treaty was made with the Rana in 1779 by the British Government under Warren Hastings, and the joint forces of the contracting parties re-took Gwalior. In the treaty of the 13th October 1781 between the British Government and Scindia, it was stipulated that so long as the Maharaj Rana observes his treaty with the English, Scindia should not interfere with his territories. The possession of Gohad however led to disputes between the British and Scindia, and in 1805 the Governor-General transferred Gwalior and Gohad to Scindia, and that of Dholpur, Bari, Baseri, Sepau and Rajakhera to Maharaj Rana Kirat Singh. Maharaj Rana Kirat Singh died in 1836 and was succeeded by his son Maharaj Rana Bhagwant Singh on whose death in 1870 his grandson, the late Chief Maharaj Rana Nehal Singh, succeeded to the Gadi. Major His Highness Rais-ud-Daula Sipahdar-ul-Mulk Saramad Rajhai Hind Maharajadhiraj Sri Sawai Maharaj Rana Sir Udai Bhan Singh Lokindra Bahadur Diler Jang Jai Deo, K.C.S.I., K.C.V.O., the present ruler, is the second son of Maharaj Rana Nehal Singh and was born on the 12th February 1893. On the death of his brother Maharaj Rana Ram Singh His Highness succeeded to the gadi on March 1911. He was educated at the Mayo College, Ajmer, where he passed the Diploma Examination and won several prizes. After a short course of training in the Imperial Cadet Corps at Dehra Dun, His Highness went on a tour to Europe in 1912 and was invested with full ruling powers on the 9th October 1913.

By clan and family the Maharaj Rana is connected with the Jat Chiefs of Patiala, Jhind, Nabha and Bharatpur. His mother was the second sister of late Shahzada Basdeo Singh Sahib Bahadur of the family of Maharaj Ranjit Singh of Lahore. His Highness is married to the daughter of the Sardar of Badrukha in the Jhind State.

Karauli State.—A State in Rajputana under the Political control of the Political Agent, Eastern Rajputana States Agency, lying between 26° and 27° north latitude and 76° 30' and 77° 30' east longitude. Area, 1,242 square miles. The river Chambal forms the south-eastern boundary of the State, dividing it from Gwalior (Scindhia's Territory) on the south-west it is bounded by Jaipur; and on the north-east by the States of Bharatpur, Jaipur and Dholpur. The State pays no tribute to Government. Languages spoken Hindi and Urdu.

Ruler—His Highness Maharajadhiraj Maharaja Bhom Pal, Deo Bahadur, Yadukul Chandra Bhal, Heir-apparent, Maharaj Kumar Ganesh Pal. Dewan:— Rao Bahadur Pandit Shanker Nath Sharma.

Kotah State belongs to the Hara section of the clan of Chauhan Rajputs, and the early history of their house is, up to the 17th century, identical with that of the Bundi family from which they are an offshoot. Its existence as a separate State dates from 1625. It came under British protection in 1817. The present ruler is H. H. Lieut.-Colonel Maharao Sir Umed Singhji Bahadur, G.C.S.I., G.C.I.E., G.B.E., who was born in 1873 and invested with full powers in 1896. In administration he is assisted by two members, Rai Bahadur Pandit Bishwambhar Nath, M.A., and Major-General Onkarsingh, C.I.E. The most important event of his rule has been the restoration, on the deposition of the late Chief of the Jhalawar State, of 15 out of the 17 districts which had been ceded in 1838 to form that principality. Revenue 51 lakhs ; Expenditure 47 lakhs.

Jhalawar State consists of two separate tracts in the south-east of Rajputana with an area of 813 square miles yielding a revenue of about 8 lakhs of rupees. The ruling family belongs to the Jhala clan of Rajputs. The present Ruler, Lieutenent His Highness Maharaj Rana Rajendra Singhji, succeeded to the Gadi on 13th April, 1929. He was born in 1900 and educated at the Mayo College, Ajmer, and Oxford University. The heir-apparent Maharaj Kumar Virendra Singh was born in England on 27th September, 1921. Sirdar Mir Maqbul Mahmood, B.A., LL.B., Bar-at-Law, B. Litt. (Oxon.), B. Ag., is the Dewan of the State.

The Bikaner State in point of area is the seventh largest of all the Indian States and the second largest in Rajputna. The population of the State is 9,36,218 of whom 77 per cent. are Hindus, 15 per cent. Mahomedans, 4 per cent. Sikhs and 3 per cent. Jains. The capital city of Bikaner, with its population including the suburbs of 85,927, is the third city in Rajputana.

The northern portion of the State consists of level loam land, whilst the remainder is for the most part sandy and undulating. The average rainfall is about 12 inches. The water level over most of the State is from 150 feet to 300 feet deep.

The Reigning Family of Bikaner is of the Rathore clan of Rajputs, and the State was founded in 1465 A.D. by Rao Bikaji, son of Rao Jodhaji, Ruler of Marwar (Jodhpur), and after him both the Capital and the State are named. Rai Singhji, the first to receive the title of Rajah, was "one of Akbar's most distinguished Generals" and it was during his reign that the present Fort of Bikaner was built in 1593. The title of Maharajah was conferred on Rajah Anup Singhji by the Mughal Emperor in 1687 in recognition of his distinguished services in the capture of Golconda. The conspicuous services of Maharajah Sardar Singhji who in the Indian Mutiny of 1857 personally led his troops to co-operate with the British forces in the field on the outbreak of the Mutiny was acknowledged by the Government of India by the transfer of the Sub-Tehsil of Tibi, consisting of 41 villages from the adjoining Sirsa Tehsil in the Punjab to the Bikaner State.

The present Ruler, Lieutenant-General His Highness Maharajadhiraj Raj Rajeshwar Narendra Shiromani Maharajah Sri Sir Ganga Singhji Bahadur, G.C.S.I., G.C.I.E., G.C.V.O., G.B.E., K.C.B., A.D.C., LL.D., is the 21st of a long line of distinguished rulers renowned for their bravery and statesmanship. He was born on the 13th October 1880, and assumed full ruling powers in December, 1898. He was awarded the first class Kaisar-i-Hind Medal for the active part he took in relieving the famine of 1899-1900, and soon after he went on active service to China in connection with the China War of 1900-1901 in command of his famous Ganga Risala and was mentioned in despatches and received the China Medal and K.C.I.E. The State Forces consist of the Camel Corps, known as 'Ganga Risala,' whose sanctioned strength is 465 strong, an Infantry Battalion known as Sadul Light Infantry 619 strong, a Regiment of Cavalry known as Dungar Lancers 342 strong, including His Highness' Body Guard, a Battery of Artillery (4 guns 2·75), 236 strong and Camel Battery, 20 strong and State Band 35 strong. At outbreak of the Great War in 1914, His Highness immediately placed the services of himself and his State forces and all the resources of the State at the disposal of His Imperial Majesty the King-Emperor, and the Ganga Risala reinforced by the Infantry Regiment, which became incorporated in the Camel Corps in the field, rendered very valuable services in Egypt and Palestine. An extra force was also raised for internal security. His Highness personally went on active service in August 1914 and enjoys the honour of having fought both in France and Egypt, and thus has the distinction of having fought for the British Crown on three Continents, *viz.*, Asia, Europe and Africa. He was mentioned in despatches both in Egypt and France. His Highness also played a very conspicuous political part during the period of the War when he went twice to Europe as the Representative of the Princes of India, once in 1917 to attend the meetings of the Imperial War Cabinet and Conference, and again in 1918-19 to attend the Peace Conference where he was one of the signatories to the treaty of Versailles. His Highness led the Indian Delegation to the 11th Assembly of the League of Nations at Geneva and represented the Indian States at the Imperial Conference in 1930. His Highness also attended the Indian Round Table Conference and the Federal Structure Sub-Committee both in 1930 and 1931.

His Highness enjoys a salute of 19 guns (personal) whilst the permanent local salute of the State is also 19. His Highness has also had the honour of being elected the first Chancellor of the Chamber of Princes, an office which he filled most creditably for 5 years till 1925.

His Highness is assisted in the administration of the State by a Prime Minister and Chief Councillor in the person of Sir Manubhai N. Mehta, Kt., C.S.I., M.A., LL.B., formerly the Dewan of the Baroda State. A Legislative Assembly was inaugurated in 1913, and consists of 45 Members, 20 out of whom are elected Members: it meets twice a year.

The revenues of the State are over a crore of rupees and the State owns a large Railway system, the total mileage being 795·85. The Government have also under contemplation an extension of the Bikaner State Railway from Sadulpur to Rewari and from Bikaner to Sind *Via* Jaisalmer which will have the effect of connecting Delhi with Sind. Hitherto there was practically no Irrigation in the State, the crops depending only on the scanty rainfall; but the Gang Canal taken out from the Sutlej river has now been constructed and opened and will help to protect about 6,20,000 acres of land in the northern part of the State against famine from which it has suffered in the past. 3,35,724 Bighas of the Canal land have already been sold. Even larger expectations are held out from the Bhakra Dam Project from which it is hoped that the remaining level lands in the north of the State will be irrigated. A coal mine is worked at Palana, 14 miles south from the Capital.

Alwar State is a hilly tract of land in the East of Rajputana. The Alwar House is the head in India of the Naruka clan who are descendants of 'Kush', the eldest son of Shri Ram in the Solar dynasty. Raja Udai Karanji was the common ancestor of both the Alwar and Jaipur Houses. Bar Singh, the eldest son of Udai Karanji of Amber, renounced his right of succession in favour of his younger brother Nar Singhji. Nar Singhji's line founded Jaipur which in Bar Singhji's line Maharaj Pratap Singh established the Alwar State. Before his death in 1791 Maharaj Pratap Singh secured possession of large territories. His successor sent a force to co-operate with Lord Lake in the War of 1803. An alliance of mutual friendship was concluded with the British Government in that year. The present Ruler Col. His Highness Shri Sewai Maharaj Raj Rishi Sir Jey Singhji Bahadur, G.C.S.I., G.C.I.E., who is sixth in succession from Maharaj Pratap Singhji was born in 1882, succeeded his father Maharaj Shri Mangal Singhji Dev, G.C.S.I., in 1892 and assumed the Ruling powers in 1903. He carries on the administration with the assistance of 5 Ministers, Members of his Council, and departmental Officers. Normal revenue is about 40 lakhs. His Highness Shri Maharaj Mangal Singhi Dev was the first Prince in Rajputana to offer help in the defence of the Empire in 1888. Alwar State stood first in recruiting in Rajputana at the time of the Great War. His Highness enjoys a salute of 17 guns. The capital Alwar is on the B. B. & C. I. Rly. 98 miles west of Delhi.

Palanpur.—Palanpur is a first class State with an area of 1,76,889 square miles and a population of 264,179. The net revenue of the State calculated on the average of the last five years is about 11 lakhs.

The State is under the rule of Major His Highness Zubd-tul-Mulk Dewan Mahakhan Nawab Shri Taley Muhomed Khan Bahadur, G.C.I.E., K.C.V.O., Nawab Saheb of Palaupur. His Highness is descended from the Usazai Lohani Pathan, an Afghan tribe who appeared in Gujarat in the 14th century. The connection of the British Government with the State dates from 1809, in which year the Ruler was murdered by a body of Sindhi Jamadars. A considerable trade in cloth, wheat, ghee, wool, hides, castor and rape seeds, sugar and rice is carried on in the State. The capital city of Palanpur is situated on the B. B. & C. I. Railway, and is the junction station of the Palanpur-Deesa branch of the B. B. & C. I. Railway. It is a very old settlement of which mention was made in the 8th century.

WESTERN RAJPUTANA STATES.

Resident—A. C. Lothian, I.C.S.

HARAOTI AND TONK.

Political Agent—Capt. D. R. Smith.

SOUTHERN RAJPUTANA STATES.

Political Agent—Lt.-Col. W. A. M. Garstin, C.B.E.

CENTRAL INDIA AGENCY.

Central India Agency is the name given to the country occupied by the Indian States grouped together under the supervision of the Political Officer who is designated the Agent to the Governor-General in Central India with headquarters at Indore. As constituted in 1921—that is, after the separation of the Gwalior Residency—it is an irregularly formed tract lying in two sections, the Eastern comprising Bundelkhand and Baghelkhand Agencies between 22°–38′ and 26°–19′ North and 78°–10′ and 83°–0′ East and the Western consisting of the Bhopal and the Southern States and Malwa Agencies between 21°–22′ and 24°–47′ North and 74°–0′ and 78°–50′ East. The British districts of Jhansi and Saugor and the Gwalior State divide the Agency into two sections. The total area covered is 51,597 square miles and the population (1931) amounts to 6,632,790. The great majority of the people are Hindus. There are 28 Salute States of which the following 10 have direct treaty engagements with the British Government:—Indore, Bhopal, Rewa, Orchha, Datia, Dhar, Dewas Senior Branch, Dewas Junior Branch, Samthar and Jaora. All of these are Hindu except Bhopal Jaora and Baoni which are Muhammadan. Besides these there are 59 Minor States and Guaranteed Estates. Excluding the Indore State and the Hirapur and Lalgarh Estates they are divided into following groups for administrative purposes:—Bhopal Agency, 11 States and Estates (principal States Bhopal), Dewas Senior Branch, Dewas Junior Branch; Bundelkhand Agency, 33 States and Estates (principal Statees Orchha); Southern and Datia States and Malwa Agency, 39 States and Estates (principal States Dhar, Jaora and Ratlam). The Agency may roughly be divided into two natural divisions, Central India West comprising the former Plateau division with such hilly land as lies on this side and Central India

East comprising the former low-lying area and the Eastern hilly tracts." The hilly tracts lie along the ranges of the Vindhyas and Satpuras. They consist of forest areas and agriculture is little practised there, the inhabitants being mostly members of the wild tribes. The territories of the different States are much intermingled and their political relations with the Government of India and each other are very varied.

The following is the size, population and revenue of the ten treaty States mentioned above:—

Name.	Area in square miles.	Population.	Revenue.
			Lakhs Rs.
Indore	9,670	13,18,237	136
Bhopal ..	6,924	7,29,955	80
Rewa	13,000	15,87,445	60
Orchha ..	2,080	3,14,556	10½
Datia	912	1,58,834	16
Dhar	1,784	2,43,430	17½
Dewas, Senior Branch ..	449	83,321	9¼
Dewas, Junior Branch ..	419	70,513	6
Samthar ..	180	33,307	3½
Jaora	602	1,00,166	13½

Gwalior.—The house of Scindia traces its decent to a family of which one branch held the hereditary post of patel in a village near Satara. The head of the family received a patent of rank from Aurangzebe. The founder of the Gwalior House was Ranoji Scindia who held a military rank under the Peshwa Baji Rao. In 1726 the Peshwa granted deeds to Puar, Holkar and Scindia, empowering them to levy "Chauth" and "Sardesmukhi" and retain half the amount for payment to their troops. In 1736 Ranoji Scindia accompanied Baji Rao to Delhi where he and Mulhar Rao Holkar distinguished themselves in military exploits. Ranoji fixed his headquarters at the ancient city of Ujjain, which for the time became the capital of the Scindia dominions. During the time of Mahadji Scindia and Dowlat Rao Scindia Gwalior played an important part in shaping the history of India. Despite the partial reverse which Mahadji Scindia's troops suffered at the hands of the British in 1780, reverses which led to the treaty of Salbai (1782), Scindia's power remained unbroken. For the first time he was now recognized by the British as an independent sovereign and not as a vassal of the Peshwa.

In 1790 his power was firmly established in Delhi. While he was indulging ambitious hopes he fell a prey to fever which ended his remarkable career on 12th February, 1794. Himself a military genius, Mahadji Scindia's armies reached the zenith of their glory under the disciplined training of the celebrated French adventurer—De Boigne. Mahadji was succeeded by his grand nephew Daulat Rao in whose service Perron, a Military Commander of great renown, played a leading part. The strength of Scindi'as Army was, however, considerably weakened by the reverses, sustained at Ahmednagar, Assaye, Asirgarh and Laswari. Daulat Rao Scindia died in 1827. Till his death he remained in undisputed possession of almost all the territory which belonged to him in 1805.

Daulat Rao was succeeded by Jankoji Rao who passed away in the prime of life. On his demise in 1843 intrigue and party spirit were rampant and the Army was in a state of mutiny with the result that it came into collision with the British forces at Maharajpoore and Pannihar.

Jankoji Rao was succeeded by Jiaji Rao whose adherence to the British cause during the dark days of Mutiny, when his own troops deserted him, was unshakable. In 1861 he was created a Knight Grand Commander of the Most Exalted Order of the Star of India and in 1877 was made a Councillor of the Empress. Subsequently he received other titles and entered into treaties of mutual exchange of territories with the British Government. He died on the 20th June 1886 and was succeeded by his son Lieutenant-General H. H. Maharaja Sir Madho Rao Scindia, Alijah Bahadur, G.C.V.O., G.C.S.I., G.B.E., A.D.C., to the King. He succeeded in 1886 and obtained powers in 1894. In 1901 he went to China during the war; he held the rank of honorary Lieutenant-General of the British Army and the honorary degrees of LL.D., Cambridge, and D.C.L., Oxon. He was also a Donat of the Order of St. John of Jerusalem in England. He died in June 1925 and was succeeded by his soñ H. H. Jeewaji Rao Scindia. During His Highness' minority the administration of the State is being conducted by a Council of Regency.

The Ruler of the State enjoys a salute of 21 guns. The State is in direct relations with the Government of India.

The State has an area of 26,367 Sq. miles and population 35,23,070 according to the Census of 1931. Its average rainfall is from 25 to 36 inches. The average revenue is Rs. 2,41,79,000 and average expenditure Rs. 2,06,50,000.

The State has a Police force of 13,897 and Indian State Forces Cavalry 1,615 Infantry and Artillery, besides Regular and Irregular troops.

There is a well equipped State workshop in Lashkar, the capital of the State; there are electric Press, electric Power House, Leather Factory, Tannery and Pottery Works. There are some good cotton mills in Lashkar and Ujjain. The State has its own Light Railway and its own Postal system according to Postal Convention. The G. I. P. Railway traverses through a major portion of the State territories.

Indore.—The founder of the House of the Holkar of Indore was Malhar Rao Holkar, born in 1693. His soldierly qualities brought him to the front under the Peshwa, who took him into his service and employed him for his conquests. When the Maratha power was weakened at the battle of Panipat in 1761, Malhar Rao had acquired territories stretching from the Deccan to the Ganges as a reward for his career as a Military Commander. He was succeeded by his grandson. On his death without issue his mother Ahilya Bai became the Ruler and her administration is still looked upon with admiration and reverence as that of a model ruler. She was succeeded by Tukoji Holkar who had been associated with her to carry the Military Administration and had in course of it distinguished himself in various

battles. Tukoji was succeeded by Kashirao, who was supplanted by Yeshwant Rao, his step-brother, a person of remarkable daring strategy as exhibited in a number of engagements in which he had taken part. The brilliant success he obtained at the battle of Poona against the combined armies of Peshwa and Scindia made him a dictator of Poona for some time and he declared in consequence the independence of Holkar State. During 1804-5 he had a protracted war with the British, closed by a Treaty which recognised the independence of Holkar State with practically no diminution of its territories and rights. Yeshwant Rao showed signs of insanity from 1808 onwards and succumbed to that malady in 1811, when he was succeeded by his minor son Malhar Rao II. During the Regency which followed, the power of the State was weakened by various causes, the most important of which was the refractory conduct of the Military Commanders. On the outbreak of the war between the English and the Peshwa in 1817, some of these Commanders, with a part of the army, rebelled against the authority of the State and were disposed to befriend the Peshwa, while the regent mother and her ministers were for friendship with the British. There was a battle between the British Army and this refractory portion of the Holkar Army which culminated in the latter's defeat. Holkar had to come to terms and to cede extensive territories and rights over the Rajput Princes to the British, but the internal sovereignty remained unaffected. The Treaty of 1818 which embodied these provisions still regulates the relations between the British Government and the State.

Malhar Rao died a premature death in 1833. Then followed the weak administration of Hari Rao and his son. In 1844 Tukoji Rao II ascended the Throne; but as he was a minor the administration was carried on by a Regency under Sir Robert Hamilton, the Resident as its Adviser. The prosperity of the State revived a great deal during this administration and the progress was maintained after the Maharaja assumed powers in 1852. It was interrupted by the out-break of the Mutiny in 1857 in British India. This wave of disaffection did not leave some of the State troops untouched. The Maharaja with his adherents and the remaining troops remained, however, staunch to the British and gave every possible assistance to the British authorities at Indore, Mhow and other places which was recognised by the British Government. The Maharaja died in 1886 after having effected various reforms in the administration and raised the position of the State to a high degree of prosperity and honour. He was succeeded by Shivaji Rao who reigned for 16 years and will be specially remembered for his beneficent measures in matters of education, sanitation, medical relief and abolition of transit duties. Tukoji Rao III succeeded in 1903 while yet a minor. The Regency Administration was continued till 1911 and it effected a number of reforms in all the branches of administration. The policy of the Regency was maintained by the Maharaja. With his assumption of powers the State advanced in education in general, including female education, commerce and industrial developments, municipal franchise and other representative institutions. This prosperity was specially reflected in the Indore City, the population of which rose by 40 per cent.

During the war of 1914 the State placed all its resources at the disposal of the British Government. Its troops took part in the various theatres of war and the contribution of the State towards the war and charitable funds in money was 41 lakhs and its subscriptions to the War Loans amounted to Rs. 82 lakhs, while the contribution from the Indore people amounted to over one crore. This assistance received the recognition of the British Government.

The area of the State is 9,902 square miles with a revenue of about one crore and thirty-eight lakhs. According to the Census of 1931 the population of the State is about 1,325,000, showing an increase of 14.5 per cent. over the Census figures of 1921.

The State now possesses one first grade College teaching up to M.A. and LL.B., 6 High Schools, 1 Sanskrit College and 600 other educational and 71 medical institutions. An Institute of Plant Industry for the improvement of cotton is located at Indore. It has also 9 spinning and weaving mills.

The strength of the State Army is about 3,000. The State is traversed by the Holkar State Railway, the principal station of which is Indore, the B. B. & C. I. Railway and the U. B. Section of the G. I. P. Railway. Besides the trunk roads, there are 600 miles of roads constructed and maintained by the State. The reforms introduced recently are the establishment of State Savings Banks, a scheme of Life Insurance for State officials, establishment of a Legislative Committee consisting of seven elected members out of a total of nine members, introduction of a Scheme of Compulsory Primary Education in the City of Indore, measures for the expansion of education in the mofussil and a scheme for the formation of the Holkar State Executive Service.

His Highness Maharaja Tukoji Rao III abdicated in favour of his son. The present Maharaja Yeshwant Rao Holkar was born on 6th September 1908. He received his education in England during 1920-23 and again at Christ Church College, Oxford, from 1926 till his return in 1929. He married a daughter of the Junior Chief of Kagal (Kolapur) in February 1924. His educational career at Oxford in England having come to an end, he returned to India arriving at Indore on the 12th November 1929, and received administrative training with Mr. C. U. Wills, C.I.E., I.C.S. He assumed full Ruling Powers on the 9th May 1930.

The Chief imports are cloth, machinery, sugar, salt and kerosene oil. The total imports in 1931-32 amounted to Rs. 1,62,12,470.

The chief exports are cotton, cloth, tobacco and cereals. The total exports in 1931-32 amounted to Rs. 56,52,036 exclusive of the exported produce of the Ginning and Pressing factories.

Cloth manufactured at the local mills is valued at over two crores and the local trade in wheat is estimated at one crore.

Cotton excise duty at 3½ per cent. *ad valorem* has been abolished from 1st May 1926 and an industrial tax is levied on the cotton mills from the same date.

Bhopal.—The principal Mohammadan State in Central India ranks next in importance to Hyderabad among the Mohammadan States of India. The ruling family was founded by Sardar Dost Mohammad Khan, Diler Jung, a Tirah Afghan, who, after having served with distinction in the army of the Emperor Aurangzeb, obtained the pargana of Berasia in 1709. With the disintegration of the Moghal Empire Bhopal State developed into an independent State. In the early part of the 19th century, the Nawab successfully withstood the inroads of Scindia and Bhonsla, and by the agreement of 1817 Bhopal undertook to assist the British with a contingent force and to co-operate against the Pindari bands. In 1818 a permanent treaty succeeded the agreement of 1817.

The present ruler of the State, His Highness Sikander Saulat Nawab Iftikharul-Mulk, Lieutenant-Colonel Haji Sir Mohammad Humidullah Khan Bahadur, G.C.S.I., G.C.I.E., C.V.O., B.A., succeeded his mother, Her late Highness Nawab Sultan Jahan Begam, on her abdication in May, 1926. He had previously actively participated in the administration of the State for nearly ten years as Chief Secretary and afterwards as Member for Finance and Law and Justice.

His Highness is the head of the Government and is assisted by an Executive Council consisting of five Members and one Secretary, whose names are given below :—

Alimartabat, James Ferguson Dyer, C.I.E., I.C.S., President of the State Council and Member, Revenue Department.

Alimartabat, Rai Bahadur, Raja Oudh Narain Bisarya, B.A., Member, Finance, Law and Justice and Public Works Departments.

Alimartabat, Nasirul-Mulk, Moulvi Syed Liakat Ali, M.A., LL.B., Member, Robkari Khas.

Alimartabat, Lieutenant-Colonel H. De N. Lucas, Member, Army Department.

Alimartabat, Rafiul-Qadr., Ziaul Uloom, Mufti Mohammad Anwarul Haq, M.A., M.F., Member, Public Health and Education Department.

Secretary.—Munshi Hasan Mohammad Hayat, B.A.

The Political Department is under His Highness' direct control, the Secretary being Ali-Qadr, Kazi Ali Haider Abbasi.

The work of legislation with the right of discussing the budget, moving resolutions and interpellation rests with a representative Legislative Council inaugurated in 1927. The raiyatwari system in which the cultivator holds his land direct from Government has lately been introduced. The State forests are extensive and valuable, and the arable area which comprises more than two-thirds of the total consists mostly of good soil producing cotton, wheat, other cereals, sugar-cane and tobacco. The State contains many remains of great archæological interest including the famous Sanchi Topes, which date from the third century B.C. and which were restored under the direction of Sir John Marshall during the second decade of the century. Sanchi Station on the G. I. P. main line to Delhi adjoins the Topes.

Among other troops, the State maintains one full strength infantry battalion. The capital, Bhopal City beautifully situated on the northern bank of an extensive lake, is the junction for the Bhopal Ujjain Section of the Great Indian Peninsula Railway.

Rewa.—This State lies in the Baghelkhand Agency, and falls into two natural divisions separated by the scrap of the Kaimur range. The area is 13,000 sq. miles with a population of 15,87,352 (in 1931). Its Chiefs are Bagey Rajputs descended from the Solanki clan which ruled over Gujrat from the tenth to the thirteenth century. In 1812, a body of Pindaries raided Mirzapur from Rewa territory and the Prince who had previously rejected overtures for an alliance, was called upon to accede to a threat acknowledging the protection of the British Government. During the Mutiny, Rewa offered troops to the British, and for his services then, various parganas, which had been seized by the Marathas, were restored to the Rewa Chief. The present ruler is H. H. Bandhwesh Maharaja Sir Gulab Singhji Bahadur, K.C.S.I., G.C.I.E., who was born in 1903. He was married in 1919 to the sister of His Highness the Maharaja of Jodhpur. Upon the death of his father Lt.-Col. H. H. Maharaja Sir Venkat Raman Singh Bahadur, G.C.S.I., on 30th October, 1918, H. H. Bandhwesh Maharaja Gulab Singh Bahadur succeeded to the gadi on 31st October, as a minor. During the period of minority the State was administered by a Council of Regency with H. H. Maharaja Colonel Sir Sajjan Singh Bahadur, K.C.S.I., K.C.V.O., A.D.C. of Rutlam as Regent. H. H. Bandhwesh Maharaja Gulab Singh Bahadur attained majority in 1922 and was invested with full ruling powers on 31st October, 1922, by H. E. the Viceroy and the administration of the State is now carried on by him with the aid of a State Council of which His Highness is the President. His Highness has got a son and heir named Shri Yuvaraj Maharaj Kumar Martand Singhji, born on 15th March, 1923.

His Highness' second marriage with the daughter of H. H. Maharaja of Kishengarh was performed on the 18th February 1925.

Dhar.—This State, in the Agency for Southern States in Central India, takes its name from the old city of Dhar, long famous as the capital of the Parmar Rajputs, who ruled over Malwa from ninth to the thirteenth century and from whom the present Rulers of Dhar—Puar Marathas—claim descent. In the middle of the 18th century the Ruler of Dhar, Anand Rao, was one of the leading chiefs of Central India, sharing with Holkar and Scindia the rule of Malwa. The State came into treaty relations with the British Government in virtue of the treaty of 1819. Lt.-Colonel H. H. the Maharaja Sir Udaji Rao Puar Sahib Bahadur, K.C.S.I., K.C.V.O., K.B.E., died on 30th July 1926. There are 13 Feudatories and 9 Bhumias of whom 13 hold a guarantee from the British Government. The population of the State according to the latest

Census figure is 2,43,521 and the average Income and Expenditure are about 17 and 16 lakhs respectively.

The present Ruler, His Highness the Maharaja Anand Rao Puar Saheb Bahadur being minor, the Government of State is carried on by a Council. Dewan Bahadur K. Nadkar is Dewan and President of the Council of Administration.

The famous and the ancient hill fort of Mandul the capital of several ancient and medieval Kingdoms, with its beautiful mausoleums, tombs and palaces and high hills and deep dales is situated in the State at a distance of 24 miles from the city of Dhar.

Jaora State.—This State is the only Treaty State in the Malwa Political Agency covering an area of about 601 square miles with a total population of 1,00,204, and has its headquarters at Jaora Town. The Chiefs of Jaora claim descent from Abdul Majid Khan, an Afghan of the Tajik Khel from Swat. The first Nawab was Abdul Ghafoor Khan who obtained the State about the year 1808. The present Chief is Lt.-Col. His Highness Fakhrud-Daulah Nawab Sir Mohammad Iftikhar Ali Khan Sahib Bahadur, Saulat-e-Jang, K.C.I.E., who was born in 1883. His Highness is an Honorary Lt.-Col. in the Indian Army.

In the administration of the State His Highness is assisted by a Council constituted as under:—

President:—His Highness the Nawab Sahib Bahadur. *Vice-President*:—Khan Bahadur Sahibzada Mohamed Serfraz Ali Khan, Chief Secretary. *Secretary*:—Mr. Nasrat Mohammad Khan, M.A., LL.B., (Aligarh). *Members*:—Nawabzada Mohammad Nasir Ali Khan Sahib; Nawabzada Mohammad Mumtaz Ali Khan Sahib Military Secretary (Military); Khan Bahadur Sahibzada Mohammad Sher Ali Khan, Secretary, Public Health Deptt.; Major P. F. Norbury, D.S.O., I.A., Private Secretary; Mr. Serajur Rehman Khan, Bar.-at-Law, (Offg.) Judicial Secretary. (Law & Justice); Mirza Mohammad Aslam Beg, Revenue Secretary, (Revenue); Mr. Serajur Rehman Khan, Bar.-at-Law, Judge, Chief Court; and Seth Govindramji, (Finance Member).

A Chief Court with a Chief Justice and two Puisne Judges has also been established.

The soil of the State is among the richest in Malwa being mainly of the best black variety bearing excellent crops of wheat, cotton and poppy. The average annual revenue is Rs. 12,00,000.

Rutlam—Is the premier Rajput State in the Malwa Agency. It covers an area of 871 square miles, including that of the Jagir of Khera in the Kushalgarh Chiefship, which pays an annual tribute to the Rutlam Darbar. The State was founded by Raja Ratansinghji, a great grandson of Raja Udai Singh of Jodhpur, in 1652. The Ruler of Rutlam is the religious head of the Rajputs of Malwa, and important caste questions are referred to him for decision. The State enjoys full and final civil and criminal powers. The present Ruler of Rutlam is Colonel His Highness Maharaja Sir Sajjan Singh, G.C.I.E., K.C.S.I., K.C.V.O., A.D.C. to H. R. H. the Prince of Wales, who was born in 1880, and educated at Daly College, Indore, received military training in Imperial Cadet Corps and invested with full powers in 1898. His Highness served in the war in France and Egypt from 1915 to 1918, was mentioned in despatches and received the Croix d'Officiers de Legion d'Honneur. Salute: 13 guns, local 15 guns.

Dewan.—Rao Bahadur Devshanker J. Dave, Advocate.

Datia State.—The rulers of this State, in the Bundelkhand Agency, are Bundela Rajputs of the Orchha house. The territory was granted by the chief of Orchha to his son Bhagwan Rao in 1626, this was extended by conquest and by grants from the Delhi emperors. The present Ruler Major His Highness Maharaja Lokendra Sir Govind Sinh Ju Deo Bahadur, G.C.I.E. (1932), K.C.S.I., 1918, who was born in 1886 and succeeded in 1907, married 1902, enjoys a salute of 15 guns. He placed all his resources and his personal services at the disposal of the Imperial Government during the Great War and established a War Hospital at Datia. He is a progressive Ruler and has created a Legislative Council and introduced many useful and important reforms in his State. He is a Vice-President of St. John Ambulance Association, a patron of Red Cross Society and has recently offered to the Imperial City of Delhi the life size marble statue of Lord Reading, the late Viceroy. He has built a hospital in the city named after Mrs. Heale and to advance female education he has built a girls' school named after Lady Willingdon. His Highness is a famous big game shot and has shot more than 156 tigers.

Orchha State.—The rulers of this State are Bundela Rajputs claiming to be descendants of the Gaharwars of Benares. It was founded as an independent State in 1048 A.D. It entered into relations with the British by the treaty made in 1812. His Highness Sir Pratap Singh, G.C.S.I., G.C.I.E., died in March 1930 and has been succeeded by his grandson His Highness Sawai Mahendra Maharaja Vir Singh Dev Bahadur, the present ruler. The ruler of the State has the hereditary titles of His Highness Saramad-i-Rajahai-Bundelkhand Maharaja Mahendra Sawai Bahadur. The State has a population of about 3,15,000 and an area of 2,080 square miles. The capital is Tikamgarh, 36 miles from Lalitpur Station, on the G.I.P. Railway. Orchha, the old capital, has fallen into decay but is a place of interest on account of its magnificent buildings of which the finest were erected by Maharaja Bir Singh Dev I, the most famous ruler of the State (1605-1627).

Dewan—Major B. P. Pande, B.A., LL.B., F.R.E.S.

GWALIOR.

Resident (Officiating)—Lieut.-Col. D. G. Wilson.

BHOPAL.

Political Agent—Lt.-Col. H. W. C. Robson.

BUNDELKHAND.

Political Agent—Lt.-Col. A. S. Meek, C.M.G.

SIKKIM.

Sikkim is bounded on the north and north-east by Tibet, on the south-east by Bhutan, on the south by the British district of Darjeeling, and on the west by Nepal. The population consists of Bhutias, Lepchas, and Nepalese. It forms the direct route to the Chumbi Valley in Tibet. The main axis of the Himalayas, which runs east and west, forms the boundary between Sikkim and Tibet. The Singalilla and Chola ranges, which run southwards from the main chain, separate Sikkim from Nepal on the west, and from Tibet and Bhutan on the east. On the Singalila range rise the great snow peaks of Kinchinjunga (28,146 feet), one of the highest mountains in the world. The Chola range which is much loftier than that of Singalila, leaves the main chain at the Dongkya La.

Tradition says that the ancestors of the Rajas of Sikkim originally came from eastern Tibet. The State was twice invaded by the Gurkhas at the end of the eighteenth century. On the outbreak of the Nepal War in 1814, the British formed an alliance with the Raja of Sikkim and at the close of the war the Raja was rewarded by a considerable cession of territory. In 1835 the Raja granted the site of Darjeeling to the British and received Rs. 12,000 annually in lieu of it. The State was previously under the Government of Bengal, but was brought under the direct supervision of the Government of India in 1906. The State is thinly populated, the area being 2,818 square miles, and the population 1,09,651, chiefly Buddhists and Hindus. The most important crops are maize and rice. There are several trade routes through Sikkim from Darjeeling District into Tibet. In the convention of 1890 provision was made for the opening of a trade mart but the results were disappointing, and the failure of the Tibetans to fulfil their obligations resulted in 1904 in the despatch of a mission to Lhasa, where a new convention was signed. Trade with the British has increased in recent years, and is now between 40 and 50 lakhs yearly. A number of good roads have been constructed in recent years. The present ruler, His Highness Maharajah Sir Tashi Namgyal, K.C.I.E., was born in 1893 and succeeded in 1914. His Highness was invested with full ruling powers on the 5th April 1918. The title of a C.I.E. was conferred upon the Maharaja on the 1st January 1918 and K.C.I.E. on 1st January 1923. The average revenue is Rs. 5,20,422.

Political Officer in Sikkim:—F. Williamson.

BHUTAN.

Bhutan extends for a distance of approximately 190 miles east and west along the southern slopes of the central axis of the Himalayas, adjacent to the northern border of Eastern Bengal and Assam. Its area is 18,000 square miles and its population, consisting of Buddhists and Hindus, has been estimated at 300,000. The country formerly belonged to a tribe called Tek-pa, but was wrested from them by some Tibetan soldiers about the middle of the seventeenth century. British relations with Bhutan commenced in 1772 when the Bhotias invaded the principality of Cooch Behar and British aid was invoked by that State. After a number of raids by the Bhutanese into Assam, an envoy (the Hon. A. Eden) was sent to Bhutan, who was grossly insulted and compelled to sign a treaty surrendering the Duars to Bhutan. On his return the treaty was disallowed and the Duars annexed. This was followed by the treaty of 1865, by which the State's relations with the Government of India were satisfactorily regulated. The State formerly received an allowance of half a lakh a year from the British Government in consideration of the cession in 1865 of some areas on the southern borders. This allowance was doubled by a new treaty concluded in January 1910, by which the Bhutanese Government bound itself to be guided by the advice of the British Government in regard to its external relations, while the British Government undertook to exercise no interference in the internal administration of Bhutan. On the occasion of the Tibet Mission of 1904, the Bhotias gave strong proof of their friendly attitude. Not only did they consent to the survey of a road through their country to Chumbi, but their ruler, the Tongsa Penlop, accompanied the British troops to Lhasa, and assisted in the negotiations with the Tibetan authorities. For these services he was made a K.C.I.E., and he has since entertained the British Agent hospitably at his capital. The ruler is now known as H.H. the Maharaja of Bhutan, Sir Uggen Wangchuk, K.C.S.I., K.C.I.E. At the head of the Bhutan Government, there are nominally two supreme authorities; the Dharma Raja, known as Shapting Renipoche, the spiritual head; and the Deb or Depa Raja, the temporal ruler. The Dharma Raja is regarded as a very high incarnation of Buddha, far higher than the ordinary incarnations in Tibet, of which there are several hundreds. On the death of a Dharma Raja a year or two is allowed to elapse, and his reincarnation then takes place, always in the Choje, or royal family of Bhutan.

Cultivation is backward and the chief crop is maize. The military force consists of local levies under the control of the different chiefs. They are of no military value.

NORTH-WEST FRONTIER STATES.

The Indian States of the North-West Frontier Provinces are Amb, Dir, Swat and Chitral. The area of the latter three is 3,000,1,800 and 4,000 square miles and population 250,000, 216,000 and 99,000 respectively.

Amb.—Is only a village on the western bank of the Indus in Independent Tanawala.

Chitral.—Runs from Lowarai top to the south of the Hindu-Kush range in the north, and has an area of about 4,000 square miles. The ruling dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with its neighbours. It was visited in 1885 by the Lockhart Mission, and in 1889, on the establishment of a political agency in Gilgit, the ruler of Chitral received an annual subsidy from the British Government. That subsidy was increased two years later on condition that the ruler, Amen-ul-Mulk, accepted the advice of the British Government in all matters connected with foreign policy and frontier defence. His sudden death in 1892 was followed by a dispute as to the succession. The eldest son Nizam-ul-Mulk was recognised by Government, but he was murdered in 1895. A war was declared by Umra-khan of Jandul and Dir against the infidels and the Agent at Gilgit, who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched (April 1895) to their relief.

The valleys of which the State consist are extremely fertile and continuously cultivated. The internal administration of the country is conducted by His Highness Sir Shujaul-mulk, K.C.I.E., the Mehtar of Chitral and the foreign policy is regulated by the Political Agent at Malakand.

Dir.—The territories of this State, about 3,000 square miles in area, include the country drained by the Panjkora and its affluents down to the junction of the former river with the Bajaur Rud. The Nawab of Dir is the overlord of the country, exacting allegiance from the petty chiefs of the clans. Dir is mainly held by Yusufzai Pathans, the old non-Pathan inhabitants being now confined to the upper portion of the Panjkora Valley known as the Dir Kohistan.

Swat.—The Ruler of the State, Miangul Gulshahzada Sir Abdul Wadood, K.B.E., is a descendent of the famous Akhund Sahib of Swat. He consolidated his rule in Swat from 1917 to 1922, and was recognized by the Government of India as Wali of Swat in 1926. The area of the State is 1,800 square miles and population 216,000. The Headquarters of the State is at Saidu Sharif about 40 miles from Malakand and connected with Malakand by motor road.

Political Agent for Dir, Swat and Chitral—L. W. H. D. Best, O.B.E., M.C., I.C.S.

STATES IN THE MADRAS PRESIDENCY.

The Madras Presidency includes 5 Indian States covering an area of 10,608 square miles Of these, the States of Travancore and Cochin represent ancient Hindu dynasties. Pudukottai is the inheritance of the chieftain called the Tondiman, Banganapalle and Sandur two petty States, of which the first is ruled by a Nawab, lie in the centre of two British districts.

Name.	Area sq. miles.	Population.	Estimated Gross Revenue in lakhs of rupees
Travancore ..	7,625	5,095,973	230·04
Cochin ..	1,480	1,205,016	83·62
Pudukottai ..	1,179	400,694	52·40
Banganapalle .	256	39,218	3·71
Sandur ..	158	13,583	1·78

These States were brought into direct relation with the Government of India on October 1st, 1928.

Travancore.—This State, which has an area of 7,624.84 square miles and a population of 5,095,973 with a revenue of Rs. 232.88 lakhs occupies the south-west portion of the Indian Peninsula, forming an irregular triangle with its apex at Cape Comorin. The early history ns Travancore is in great part traditional; but there is little doubt that H. H. the Maharaja is the representative of the Chera dynasty, one of the three great Hindu dynasties which exercised sovereignty at one time in Southern India. The petty chiefs, who had subsequently set up as independent rulers within the State, were all subdued, and the whole country, included within its present boundaries, was consolidated and brought under one rule, by Maharaja Marthanda Varma (1729-58). The English first settled at Anjengo, a few miles to the north of Trivandrum, and built a factory there in 1684. In the wars in which the East India Company were engaged in Madura and Tinnevelly, in the middle of the 18th century, the Travancore State gave assistance to the British authorities. Travancore was reckoned as one of the staunchest allies of the British Power and was accordingly included in the Treaty made in 1784 between the East India Company and the Sultan of Mysore. To protect the State from possible inroads by Tippu, an arrangement was come to in 1788 with the East India Company, and in 1795 a formal treaty was concluded, by which the Company agreed to protect Travancore from all foreign enemies. In 1805 the annual subsidy to be paid by Travancore was fixed at 8 lakhs of rupees.

H. H. the Maharaja (*b.* 7th November 1912) ascended the masnad on the 1st September 1924. During the minority the State was ruled by Her Highness Maharani Setu Lakshmi Bai, C.I., aunt of the Maharaja, as Regent on his behalf. His Highness was invested with ruling powers on the 6th November 1931. The work of legislation was entrusted to a Legislative Council established as early as 1888. The Legislature was last re-constituted in January 1933, when a bicameral body was instituted. The new Chambers, *viz.*, the Sri Mulam Assembly and the Sri Chitra State Council have a predominant elected non-official majority. Both Chambers possess the right to vote on the annual Budget, to move resolutions and ask questions. Both Chambers have also the right to initiate legislation. The elections to the Assembly are based on a wide franchise. Differences of opinion between the two Chambers will be settled bya Joint Committee consisting of an equal number of members selected by each Chamber. Women are placed on a footing of complete equality with men in the matter both of franchise and membership in the Legislature.

Local Self-Government on a small scale exists in the more important towns. The State supports a military force of 1,471 men. Education has advanced considerably in recent years and the State takes a leading place in that respect. In the matter of female Education the State has a leading place among Indian States and the British Indian Provinces. The principal food-grain grown is rice, but the main source of agricultural wealth is the cocoanut. Other crops are pepper, areca-nut, jack-fruit, sugar-cane and tapioca. Rubber and tea are among other important products. Cotton weaving and the making of matting from the coir are among the chief industries. The State is well provided with roads, and with a natural system of back-waters, besides canals and rivers navigable for country crafts. One line of railway about one hundred miles in length cuts across the State from east to west and then runs along the Coast to the Capital. More Railway lines are in contemplation. The capital is Trivandrum.

Acent to the Governor-General—Lieut.-Col. D. M. Field.

Dewan—Sir Mahomed Habibullah, K,C.S.I., K.C.I.E.

Cochin.—This State on the south-west coast of India is bounded by the Malabar District of the Madras Presidency and the State of Travancore. Very little is known of its early history. According to tradition, the Rajas of Cochin hold the territory in right of descent from Cheraman Perumal, who governed the whole country of Kerala, including Travancore and Malabar, as Viceroy of the Chola Kings about the beginning of the ninth century, and afterwards established himself as an independent Ruler. In 1502, the Portuguese were allowed to settle in what is now British Cochin and in the following year they built a fort and established commercial relations in the State. In the earlier wars with the Zamorin of Calicut, they assisted the Rajas of Cochin. The influence of the Portuguese on the west coast began to decline about the latter part of the seventeenth century, and in 1663 they were ousted from the town of Cochin by the Dutch with whom the Raja entered into friendly relations. About a century later, in 1759, when the Dutch power began to decline, the Raja was attacked by the Zamorin of Calicut, who was expelled with the assistance of the Raja of Travancore. In 1776, the State was conquered by Hyder Ali, to whom it remained tributary and subordinate, and subsequently to his son, Tippu Sultan. A treaty was concluded in 1791 between the Raja and the East India Company, by which His Highness agreed to become tributary to the British Government for his territories which were then in the possession of Tippu, and to pay a subsidy.

His Highness Sri Sir Rama Varmah, G.C.I.E., who ascended the throne in January 1915 having demised on 25th March 1932, His Highness Srce Rama Varma who was born on 30th December 1861 succeeded to the throne and was duly installed as Maharaja on 1st June 1932. The administration is conducted under the control of the Maharaja whose chief Minister and Executive officer is the Dewan, C. G. Herbert, Esq., I.C.S. The forests of Cochin form one of its most valuable assets. They abound in teak ebony, blackwood, and other valuable trees. Rice forms the staple of cultivation Cocoanuts are largely raised in the sandy tracts and their products form the chief exports of the State. Communications by road and backwaters are good, and the State owns a line of railway from Shoranore to Ernakulam, the capital of the State, and a Forest Steam Tramway used in developing the forests. The State uppsorts a force of 32 officers and 337 men.

Acent to the Governor-General—Lieut.-Col. D. M. Field.

Pudukkottai.—This State is bounded on the north and west by Trichinopoly, on the south by Ramnad and on the east by Tanjore. In early times a part of the State belonged to the Chola Kings and the southern part to the Pandya Kings of Madura. Relations with the English began during the Carnatic wars. During the siege of Trichinopoly by the French in 1752, the Tondiman of the time did good service to the Company's cause by sending them provisions, although his own country was on at least one occasion ravaged as a consequence of his fidelity to the English. In 1756 he sent some of his troops to assist Muhammad Yusuf, the Company's sepoy commandant, in settling the Madura and Tinnevelly countries. Subsequently he was of much service in the wars with Haidar Ali. His services were rewarded by a grant of territory subject to the conditions that the district should not be alienated (1806). Apart from that there is no treaty or arrangement with the Raja. His Highness Sri Brihadamba Das Raja Rajagopala Tondiman Bahadur, the present ruler, is a minor. He was installed as Raja on 19-11-28. The administration of the State is carried on by an Administrator. The various departments are constituted on the British India model. The principal food crop is rice. The forests which cover about one-seventh of the State, contain only small timber. There are no large industries. The State is well provided with roads, but Pudukkottai is the only municipal town in the State.

Acent to the Governor-General—Lt.-Col. D. M. Field.

Banganapalle.—This is a small State in two detached portions which in the eighteenth century passed from Hyderabad to Mysore and back again to Hyderabad. The control over it was ceded to the Madras Government by the Nizam in 1800. The present ruler is Nawab Meer Fazle Ali Khan Bahadur. The chief food-grain is cholam. The Nawab pays no tribute and maintains no military force. The revenue of the State is over 3 lakhs. The Nawab enjoys a salute of 9 guns.

Agent to the Governor-General:—Lt.-Col. D. M. Field.

Sandur.—The State is almost surrounded by the District of Bellary. The State is under the political control of the Agent to the Governor General, Madras States. After the destruction of the Empire of Vijayanagar in 1565 the State came to be held by semi-independent chiefs under the nominal sovereignty of the Sultan of Bijapur and in 1728 one of these chiefs, a Poligar of Bedar tribe, was turned out by an ancestor of the present Raja named Siddoji Rao of the Bhosle family of the famous Mahratta Chief Sivaji; they were Senapathies of Sivaji. In Siva Rao's time the State came under the Madras Government and his heirs in perpetuity with full powers. In 1876 the title of Raja was conferred on the Chief as a hereditary distinction. The present ruler is Raja Shrimant Yeshwantrao Hindurao Ghorpade who was invested with full ruling powers in February 1930.

The Raja pays no tribute and maintains no military force. The most important staple crop is cholam. Teak and sandalwood are found in small quantities in the forests.

The minerals of the State possess unusual interest. The hematites found in it are probably the richest ore in India. An outcrop near the southern boundary forms the crest of a ridge 150 feet in height, which apparently consists entirely of pure steel grey crystalline hematite (specular iron) of intense hardness. Some of the softer ores used to be smelted, but the industry has been killed by the cheaper English iron. Manganese deposits have also been found in three places, and during 1911 to 1914 over 223,000 tons of manganese ore were transported by one company.

Agent to the Governor-General:—Lt.-Col. D. M. Field.

STATES OF WESTERN INDIA.

Owing to the large number of States concerned and the interlacing of their territories with neighbouring British districts, the transfer of States under the Bombay Government to direct political relations with the Government of India (which was advocated in the Montagu-Chelmsford Report on the Constitutional Reforms) had been delayed. The first stage of that process, however, was carried out in October, 1924, when a new Residency was created in direct relation with the Government of India comprising the whole of the compact area making up the Kathiawar, Cutch and Palanpur Agencies under the Government of Bombay.

The remaining States in the Bombay Presidency which continued to remain in political relations with the Government of Bombay were transferred to the direct control of the Government of India with effect from the 1st April 1933. The transfer necessitated regrouping not only of the remaining Bombay States but also of some of the States comprised in the Western India States Agency. All the States and Estates hitherto included in the Mahi Kantha Agency except the Danta State are now in the Western India States Agency. These and the States and Estates comprised in the Banas Kantha Agency except the Palanpur State under the Western India States Agency now form a combined Agency which is designated "Sabar Kantha Agency." The Danta State has been transferred to the Rajputana Agency; so also the Palanpur State which was in the Western India States Agency has been transferred to the Rajputana Agency.

Resident of the First Class and Agent to the Governor-General in the States of Western India:—

The Honourable Mr. C. Latimer, C.S.I., C.I.E., I.C.S.

Judicial Commissioner in the States of Western India:—D. R. Norman, I.C.S.

Kathiawar.—Kathiawar is the peninsula lying immediately to the north of Gujarat in the Bombay Presidency. Its extreme length is about 220 miles and its greatest breadth about 165 miles, the area being 23,445 square miles. There are nearly 200 separate States in Kathiawar, which for purposes of administrative convenience is sub-divided into subordinate Agencies known as the Western and Eastern Kathiawar Agencies. The Western Kathiawar Agency comprises the Halar and Sorath Prants, while the Eastern Kathiawar Agency comprises the Prants of Jhalawad and Gohelwad but in whichever of these two Agencies States with Salutes of guns are situated, they are in direct political relations with the Hon'ble the Agent to the Governor-General. The history of the British connection with Kathiawar commences from Colonel Walker's settlement of 1807. In 1863, the States in Kathiawar were classified into 7 classes, and although classes have since been abolished, the various jurisdictions still remained graded, as fixed in 1863.

Cutch.—Before the creation in October 1924, of the Western India States Agency, the relations of the Cutch Durbar with the Bombay Government were conducted through a Political Agent in charge of the Cutch Agency, with Headquarters at Bhuj. The Cutch Agency and the appointment of the Political Agent have since been abolished and the State of Cutch is in direct relations with the Hon'ble the Agent to the Governor-General in the States of Western India.

Sabar Kantha Agency.—As stated above, this is a new group comprising the States and Estates in the old Banas Kantha Agency and State and Estates in the old Mahi Kantha

Agency except the Danta State. Before the year 1925, the Banas Kantha Agency was known as the Palanpur Agency when it also comprised the First Class States of Palanpur and Radhanpur. Of these two States, Palanpur is now in direct political relationship with the Government of India through the Honourable the Agent to the Governor-General in Rajputana and Radhanpur, through the Honourable the Agent to the Governor-General in the States of Western India. The First Class State of Idar which was included in the old Mahi Kantha Agency is also in direct political relationship with the Government of India through the Honourable the Agent to the Governor-General in the States of Western India; so also the full powered State of Vijayanagar. The group comprising the remaining minor States, Estates and Talukas which were included in the old Banas Kantha Agency under the Western India States Agency and the old Mahi Kantha Agency under the Government of Bombay has been named the Sabar Kantha Agency and is in charge of a Political Agent who is subordinate to the Honourable the Agent to the Governor-General in the States of Western India.

Bhavnagar.—This State lies at the head and west side of the Gulf of Cambay. The Gohel Rajputs, to which tribe the Ruler of Bhavnagar belongs, are said to have settled in the country about the year 1260, under Sajakji from whose three sons—Ranoji, Sarangji and Shahji—are descended respectively the rulers of Bhavnagar, Lathi and Palitana. An intimate connexion was formed between the Bombay Government and Bhavnagar in the eighteenth century when the ruler of that State took pains to destroy the pirates which infested the neighbouring seas. The State was split up when Gujarat and Kathiawar were divided between the Peshwa and the Gaekwar; but the various claims over Bhavnagar were consolidated in the hands of the British Government in 1807. The State pays an annual tribute of Rs. 1,28,060 to the British Government, Rs. 3,581-8-0 as Peshkashi to Baroda, and Rs. 22,858 as Zortalbi to Junagadh. His Highness Maharaja Krishna Kumarsinhji succeeded to the *gadi* on the death of his father, Maharaja Sir Bhavsinhji, K.C.S.I., on 17th July 1919, and was invested with full powers on 18th April 1931. The State Council consists of Sir Prabhashankar D. Pattani, K.C.I.E., as President. The other members of the Council are Dewan Bahadur T. K. Trivedi and Khan Bahadur S. A. Goghawala, M.A., LL.B., Bar-at-Law. One noteworthy feature in the administration is the complete separation of judicial from executive functions and the decentralisation of authority is another. The authority and powers of all the Heads of Departments have been clearly defined, and each within his own sphere is independent of the others being directly responsible to the Council.

The chief products of the State are grain, cotton, sugar-cane and salt. The chief manufactures are oil, copper and brass vessels and cloth. The Bhavnagar State Railway is 307 miles in length. The capital of the State is the town and port of Bhavnagar, which has a good and safe harbour for shipping and carried on an extensive trade as one of the principal markets and harbours of export for cotton in Kathiawar. Bhavnagar supports 270 State Lancers and 250 State Infantry.

Population (in 1931) was 500,274 of whom 86 per cent. were Hindus and 8 per cent. Mahomedans. The average income for the last five years was Rs. 1,34,74,796, and the average expenditure Rs. 1,11,24,783.

Dhrangadhra State is a State of the First Class in Kathiawar with a population of nearly one lakh and an area of 1,167 square miles exclusive of the Dhrangadhra portion of the Runn of Cutch. The ruler of Dhrangadhra is the head of the Jhala family of Rajputs, originally called the Makvanas. This Rajput clan is of great antiquity having migrated to Kathiawar from the North, establishing itself first at Patri in the Ahmedabad District, thence moving to Halvad and finally settling in its present seat. Being the guardians of the North-Eastern marches of Kathiawar they had to suffer repeatedly from the successive inroads of the Mahomedans into that Peninsula, but after suffering the various vicissitudes of war they were confirmed in their possession of Halvad, its surrounding territories and the salt-pans attached thereto by an Imperial Firman issued by Emperor Aurangzeb. The States of Wankaner, Limbdi, Wadhwan, Chuda, Sayla and Than-Lakhtar are off shoots from Dhrangadhra. His Highness Maharana Shri Sir Ghanshyamsinhji, G.C.I.E., K.C.S.I., Maharaja Raj Saheb, is the ruler of the State and the titular head of all the Jhalas. The administration is conducted under the Maharaja's directions by the Dewan Raj Rana Shri Mansinhji S. Jhala, C.I.E. The soil being eminently fit for cotton cultivation, the principal crops are long stapled cotton and cereals of various kinds. Excellent building and ornamental stone is quarried from the hills situated within the State. Wadagara Salt of an excellent quality with Magnesium Chloride and other by-products of salt are also manufactured in the State Salt Works at Kuda which offer practically inexhaustible supplies for their manufacture. To utilize these valuable resources, the State has recently built and put into operation a huge factory in Dhrangadhra, known as the Shri Shakti Alkali Works, for the manufacture on a large scale of Soda Ash, Caustic Soda and Soda Bicarb as bye-products of salt, and these are finding a ready market all over India. The capital town is Dhrangadhra, a fortified town, 75 miles west of Ahmedabad.

Dhrangadhra State owns the Railway from Wadhwan Junction to Halvad, a distance of 40 miles, which is worked by the B. B. & C. I. Railway. An extension of this line to Maliya is under contemplation. A railway siding has been laid from Dhrangadhra to Kuda—a distance of 11 miles—to facilitate the salt traffic.

Gondal State.—The Ruling Prince of Gondal is a Rajput of the Jadeja stock with the title of H. H. Maharaja Thakore Saheb, the present Ruler being H. H. Shri Bhagwat Sinhji, G.C.I.E. The early founder of the State Kumbhoji I., had a modest estate of 20 villages. Kumbhoji II., the most powerful Chief of the House, widened the territories to almost their present limits by conquest; but it was left to the present ruler to develop

its resources to the utmost, and in the words of Lord Reay, Governor of Bombay, by its "importance and advanced administration to get it recognised as a First Class State. The State pays a tribute of Rs. 1,10,721. The chief products are cotton, groundnuts and grain and the chief manufactures are cotton and woollen fabrics and gold embroidery. Gondal has always been pre-eminent amongst the States of its class for the vigour with which public works have been prosecuted, and was one of the earliest pioneers of railway enterprise in Kathiawar, having initiated the Dhasa-Dhoraji line, it owns the Dhasa-Jam Jodhpur section called the Gondal Railway and manages it along with the Jetalsar-Rajkot Railway and H. H. Gaekwad's Khijadiya-Dhari line; it subsequently built the Jetalsar-Rajkot Railway in partnership with other Native States in Kathiawar. There are no export and import dues, the people being free from taxes and dues. Comparatively speaking Gondal stands first in Kathiawar in respect of the spread of education. Compulsory female education in the State has been ordered by His Highness. Rs. 25 lakhs have been spent on irrigation tanks and canals, water supply and electricity to the town of Gondal. The Capital is Gondal, a fortified town on the line between Rajkot and Jetalsar.

Junagadh State.—A first class State under the Western India States Agency and lies in the South-Western portion of the Kathiawar Peninsula between 24°-44′ and 21°-53′ North latitude; 80° and 72° East longitude with the Halar division of the province as its northern boundary and Gohilwad Prant to its east. It is bounded on the south and west by the Arabian Sea. The State is divided into 13 Mahals. It has 16 ports of which the principal are Veraval and Mangrol. The principal rivers in the State are the Bhadar, Uben, Ozat, Hiran, Saraswati, Machhundri, Singaoda, Meghal, Vrajmi, Raval and Sabli. The principal town of Junagadh, which is one of the most picturesque towns in India, is situated on the slope of the Girnar and the Datar Hills, while in antiquity and historical interest it yields to none. The Upperkote or old citadel contains interesting Buddhist caves and the whole of the ditch and neighbourhood is honeycombed with caves of their remains. There are a number of fine modern buildings in the town. The famous Asoka inscription of the Buddhist time carved out on a big bolster of black granite stone is housed at the foot of the Girnar Hill, which is sacred to the Jains, the Shivaites, the Vaishnavites and other Hindus. To the south-east of the Girnar Hill lies the extensive forest of the Gir comprising 494 square miles, 823 acres and 10 gunthas. It supplies timber and other natural products to the residents of the State and the neighbouring districts and is unique as the sole stronghold of the Indian lion. The area of the State is 3,337 square miles and the average revenue amounts to about Rs. 80,00,000. The total population according to the census of 1931 is 545,152. Until 1472 when it was conquered by Sultan Mahomed Begra of Ahmedabad Junagadh was a Rajput State ruled by Chiefs of the Chuda Sama tribe. During the reign of the Emperor Akbar it became a dependency of Delhi under the immediate authority of the Moghal Viceroy of Gujarat. About 1735 when the representatives of the Moghals had lost his authority in Gujarat, Sherkhan Babi, the ancestor of the present Babi Ruler expelled the Moghal Governor, and established his own rule. The ruler of Junagadh first entered into engagements with the British Government in 1807. The principal articles of production in the State are cotton, bajri, juwar, sesamum, wheat, rice, sugarcane, cereals, grass, timber, stone, castor-seed, fish, country tobacco groundnuts, cocoanuts, bamboos, etc., while those of manufacture are ghee, molasses, sugar candy, copper, and brassware, dyed cloth, gold and silver embroidery, pottery, hardware, leather, bamboo furniture, etc. The State pays a tribute of Rs. 28,394 annually to the Paramount Power and Peshkashi of Rs. 37,210 to His Highness the Gaekwar; on the other hand, the State of Junagadh receives a tribute styled Zortalbi amounting to Rs. 92,421 from not less than 134 States and Talukas, a relic of the day of Mahomedan supremacy. The State maintains State forces consisting of Lancers and the Mahabat Khanji Infantry, the sanctioned strength of the former being 173 and of the latter 224 inclusive of Bag-pipe Band.

The Ruler bears the title of Nawab. The present Nawab is His Highness Sir Mahabat Khan III, G.C.I.E., K.C.S.I., and is the ninth in succession and seventh in descent from His Highness Bahadurkhanji I, the founder of the Babi Family of Junagadh in 1735 A.D. His Highness the Nawab Saheb was born on 2nd August 1900 and succeeded to the *gadi* in 1911, visited England in 1913-14, received his education at the Mayo College, Ajmer, and has been invested with full powers since March 1920. His Highness the Nawab Saheb is the Ruler of the Premier State in Kathiawar, ranks first amongst the Chiefs of Kathiawar, exercising plenary powers and enjoys a salute of 15 guns personal, 13 permanent and 15 local within the territorial limits of the Junagadh State. Languages spoken:—Gujarati and Urdu.

Ruler:—His Highness Sir Mahabat Khanji Rasulkhanji, G.C.I.E., K.C.S.I.

Heir-Apparent—Shahzada Mahomed Dilawarkhanji, 2nd Shahzada Mahomed Himatkhanji.

President of the Council.—P. R. Cadell, C.S.I., C.I.E.

Navanagar State, on the southern shore of the Gulf of Cutch, has an area of 3,791 square miles. The Maharaja of Navanagar is a Jadeja Rajput by caste, and belongs to the same family as the Rao of Cutch. The Jadejas originally entered Kathiawar from Cutch, and dispossessed the ancient family of Jethwas then established at Ghumli. The town of Jamnagar was founded in 1540. The present Jam Saheb is Captain His Highness Maharaja Jam Shri Digvijayasinhji who succeeded in April 1933. The principal products are grain, cotton and oil-seeds, shipped from the ports of the State. A small pearl fishery lies off the coast. The State pays a tribute of Rs. 1,20,093 per annum jointly to the British Government, the Gaekwar of Baroda and Zortalbi to the Nawab of Junagadh. The State maintains two squadrons of Nawanagar State Lancers and 1½ company

of the State Infantry. The Capital is Jamnagar, a flourishing place, nearly 4 miles in circuit, situated 5 miles east of the port of Bedi. Population 4,09,192. Revenue nearly Rs. 1,09,00,000.

DEWAN :—Khan Bahadur Merwanji Pestonji, B.A., LL.B.

Revenue Secretary
Political Secretary } Gokulbhai B. Desai, Bar-at-Law.
General Secretary

Military Secretary :—Lt.-Col. R. K. Himmatsinhji.

Cutch.—The State is bounded on the north and north-west by Sind, on the east by the Palanpur Agency, on the south by the Peninsula of Kathiawar and the Gulf of Cutch and the south-west by the Indian Ocean. Its area, exclusive of the great salt marsh called the Rann of Cutch, is 7,616 square miles. The capital is Bhuj, where the ruling Chief (the Maharao) His Highness Maha Rao Sri Khengarji Saval Bahadur, G.C.S.I., G.C.I.E., resides. From its isolated position, the special characteristic of its people, their peculiar dialect, and their strong feeling of personal loyalty to their ruler, the peninsula of Cutch has more of the elements of a distinct nationality than any other of the dependencies of Bombay. The earliest historic notices of the State occur in the Greek writers. Its modern history dates from its conquest by the Sind tribe of Samma Rajputs in the fourteenth century. The section of the Sammas forming the ruling family in Cutch were known as the Jadejas or 'children of Jada'. The British made a treaty with the State in 1815. There is a fair proportion of good arable soil in Cutch, and wheat, barley and cotton are cultivated. Both iron and coal are found but are not worked. Cutch is noted for its beautiful embroidery and silverwork and its manufactures of silk and cotton are of some importance. Trade is chiefly carried by sea. The ruling chief is the supreme authority. A few of the Bhayats are invested with jurisdictional powers in varying degrees in their own estates and over their own ryots. A notable fact in connection with the administration of the Cutch State is the number and position of the Bhayat. These are Rajput nobles forming the brothernood of the Rao. They were granted a share in the territories of the ruling chief as provision for their maintenance and are bound to furnish troops on an emergency. The number of these chiefs is 137, and the total number of the Jadeja tribe in Cutch is about 16,000. The British military force having been withdrawn from Bhuj, the State now pays Rs. 82,257 annually as an Anjar equivalent to the British Government. The military force consists of about 1,000 in addition to which, there are some irregular infantry, and the Bhayats could furnish on requisition a mixed force of four thousand.

Porbandar.—The Porbandar State on the Western Coast of the province of Kathiawar comprises an area of 642¼ square miles and has a population of 1,15,741 souls according to the Census of 1931. The capital of the State is Porbander, a flourishing port having trade connections with Java, Burma, Persian Gulf, Africa and the important Continental Ports. The State has its own Railway. The well-known Porbandar stone is quarried in the Barda Hills near Adityana and is largely exported to important places in as well as outside India. Porbandar Ghee (butter) has also a reputation of its own and is largely exported to Africa. The Indian Cement Factory of Messrs. Tata & Sons was established at Porbandar in 1912. It manufactures Ganapati Brand Portland cement which has stood keen competition. Among more recent industries may be mentioned the establishment of the Nadir Salt Works and Distemper and Paints manufacture. The State maintains a Military Force.

His Highness Maharaja Rana Saheb Shri Sir Natwarsinhji Bahadur, K.C.S.I., is the present Ruler of the State. Born on the 30th June 1901, His Highness the Maharaja was educated at the Rajkumar College, Rajkot, where he distinguished himself both in studies and sports. His Highness ascended the Gadi on the 26th January 1920 and was married next month to Kunvari Shri Rupaliba Saheb, M.B.E., of Limbdi. His Highness belongs to the ancient Rajput clan of the Jethwas, the earliest settlers in Western India and enjoys a salute of 13 guns. His Highness led the All-India Cricket Team to England in 1932. The Porbandar State ranks fourth among the States of Western India.

Radhanpur is a first class State, with an area of 1,150 square miles, which is held by a branch of the illustrious Babi family, who since the reign of Humayun have always been prominent in the annals of Gujarat. The present Ruler is His Highness Nawab Jalal-ud-inkhanji Bismillahkhanji Babi, Nawab Saheb of Radhanpur. The State maintains a Police force of 209. The principal products are cotton, wheat and grain. The capital is Radhanpur town, a considerable trade centre for Northern Gujarat and Cutch. Sami has a cotton press and 3 ginning factories. There is one ginning factory at Munjpur, one at Lolada and one at Sankeshwar which is a great centre of Jain pilgrimage all the year round. Gotarka, Dev and Trakod Lofi are also the principal places of pilgrimage for Mahommedans, Vaishnavas and Brahmins, respectively.

There are several ancient monuments in the State, *viz.*, Fatehkote at Radhanpur, Jhalore's Teba at Subapure, Loteshvara Mahadev at Loti Sankheshvara temple at Sankheshvara, Waghel tank at Waghel, Varanatha place at Waghel, Tatleshwar Mahadev at Fatehpur, Rajaypura Bhotava, Old Masjid at Munjpur, Place of Ashas at Gotarka, Mahabali Pir's Dargah at Gotarka and Nilkantha Mahadev at Kunwar.

There is also an Anath Ashram for the poor known as "The Husseinbakhte Saheba Mohobat Vilas."

His Highness the Nawab Saheb Bahadur has established a Bank named "Vadhiar Bank" to lend money to cultivators and others on easy terms, and thus save them from the clutches of the money-lenders.

Idar.—Idar is a First Class State with an area of 1,669 square miles and an average revenue of about 20 lakhs. The present Ruler of Idar H. H. Maharaja Himatsinghji is a Rajput of the Rathod clan. He was born in 1899 A.D. and ascended the gadi in 1931 on the demise of His late Highness Maharaja Sir Dowlatsinghji. His Highness accompanied His late Highness Lt.-Col. Sir Dowlatsanghji to Europe when the latter went to attenid the Coronation of His Majesty the King-Emperor in London and acted as Page to his Imperial Majesty at the Coronation Darbar held at Delhi in 1911. The subordinate Feudatory Jagirdars are divided into three classes. The Jagirdars comprised in the class of Bhayats are cadets of the Ruling House to whom grants have been made in maintenance or as a Jiwarak. Those known as Sardar Pattawats are descendants of the military leaders who accompanied Anandsingh and Rai Singh, the founder of tne present Marwar dynasty when they took possession of the State in the first quarter of the eighteenth century and to whom grants of land were made by Maharaja Anandsingh in 1741 A.D. on condition of military service. In the case of the Bhoomias are included all subordinate Feudatories who were in possession of their Pattas prior to the advent of the present Marwar dynasty. The pattas they hold were acquired by their ancestors by grant from the former Rao Rulers of the State. The Maharaja receives Rs. 52,427 annually on account of Khichdi and other Raj Haks from his subordinate Sardars the tributary talukas of the Mahi Kantha Agency and others and pays Rs. 30,340 as Ghasdana to Gackwar of Baroda through the British Government.

Vijaynagar.—The State has an area of 135 square miles with a population of 5,858 and an annual revenue of about Rs. 57,630. The Ruler is Rathod Rajput. His ancestors were the Rulers of Idar but on being driven from that place established their rule in Polo. The present Chief is Rao Shri Hamnirsinhji Hindusinhji. He was born on 3rd January 1904 and succeeded to the Gadi in 1916. The Ruler has no salute but on account of the historic importance of the family he enjoyed rank above the Ruler of the salute State of Danta in the old Mahi Kantha Agency.

GUJARAT STATES AGENCY AND BARODA RESIDENCY.

Consequent upon the establishment of direct relations between the Government of India and the Bombay States since April 1933 many States and Estates which were previously included in the various Political Agencies of the Bombay Government have now been included in a newly formed Political Agency of the Government of India designated the Gujarat States Agency. The charge of this new Agency has been added to the charge of the Resident at Baroda, who is now known as the A.G.G. for the Gujarat States and Resident at Baroda. The Political Agencies thus amalgamated were the Rewa Kantha Agency, the Kaira Agency, the Surat Agency, the Nasik Agency and the Thana Agency.

The following are the full-powered salute States now in direct political relations with the Government of India through the Agent to the Governor-General for the Gujarat States and Resident at Baroda :—

(1) Balasinor .. (Old Rewa Kantha Agency).
(2) Bansda .. (Old Surat Agency).
(3) Baria .. (Old Rewa Kantha Agency).
(4) Baroda .. ..
(5) Cambay .. (Old Kaira Agency).
(6) Chhota Udepur .. (Old Rewa Kantha Agency).
(7) Dharampur. . (Old Surat Agency).
(8) Jawhar .. (Old Thana Agency).
(9) Lunawada .. (Old Rewa Kantha Agency).
(10) Rajpipla .. (Old Rewa Kantha Agency).
(11) Sachin .. (Old Surat Agency).
(12) Sant .. (Old Rewa Kantha Agency).

The Headquarters of the Agency are at Baroda and consist of :—

Agent to the Governor-General, Gujarat States, and Resident at Baroda.—Lieutenant-Colonel J. L. R. Weir, C.I.E.

Secretary to the Agent to the Governor-General, Gujarat States and Resident at Baroda.—Major C. W. L. Harvey, M.C., I.A.

Indian Assistant to the Agent to the Governor-General, Gujarat States and Resident at Baroda.—Mr. A. W. De Cruz.

Balasinor.—This State has an area of 189 square miles, a population of 52,525, and an annual revenue of about Rs. 2½ lakhs. The Ruling Prince belongs to the Babi Family. The State pays a tribute of Rs. 9,766-9-8 to the British Government and Rs. 3,077-11-1 to the Baroda Government. The name of the present Ruler is Babi Shri Jamiatkhanji Manvarkhanji, Nawab of Balasinor. He was born on the 10th November 1894 and succeeded to the gadi in 1899. The Ruler of the State received in 1890 a Sanad guaranteeing succession according to Muhammadan Law in the event of failure of direct heirs. The Nawab is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Bansda.—This State has an area of 215 square miles a population of 48,807 and an annual revenue of about Rs. 7¼ lakhs. The Ruler of Bansda are Solanki Rajputs of the Lunar Race and descendants of the Great Sidhraj Jaysing. The present Ruler Maharaval Shri Indrasinhji was born on 16th February 1888, and succeeded to the gadi in September 1911. The Rulers of the State has received a Sanad guaranteeing succession to an adopted heir in the event of failure of direct heirs. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Baria.—This State has an area of 813 square miles with a population of 159,429 and is situated in the heart of the Panchmahals District. The capital Devgad Baria is reached by the Baria State Railway from Piplod Station on the B. B. & C. I. Railway at a distance of 10 miles. The average revenue of the State is about 12 lakhs. The Ruler, Major His Highness Maharaol Shri Sir Ranjitsinhji, K.C.S.I., is the direct descendant of the Great House of Khichi Chowhan Rajputs who ruled over Gujarat for 244 years with their capital at Champaner, enjoying the proud title of Pavapatis. The State pays no tribute either to the British Government or to any other Indian State. His Highness served in France and Flanders in the Great European War and in the Afghan War, 1919. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns and a personal salute of eleven guns.

Cambay.—This State has an area of 350 square miles, a population of 87,761 and an annual revenue of about Rs. 10½ lakhs. The founder of the Ruling family was Mirza Jafar Najamud-Daulah Nominkhan I, the last but one of the Muhammadan Governors of Gujarat. The present Ruler is His Highness Mirza Hussain Yavar Khan Saheb. He was born on the 16th May 1911, succeeded to the gadi on the 21st January 1915 and was invested with ruling powers on the 13th December 1930. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 11 guns.

Chhota Udepur.—This State has an area of 890 square miles, a population of 1,44,640 and an annual revenue of about Rs. 14½ lakhs. The Ruling family belongs to the Khichi Chavan Rajput clan and claims descent from the last Patai Raja of Pawagadh or Champaner, the State being founded shortly after the fall of that fortress in 1484. The name of the present Ruler is Maharawal Shri Natwarsinhji. He was born on the 16th November 1906 and succeeded to the gadi on the 29th August 1923 on the death of his father. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Dharampur.—This State has an area of 704 square miles, a population of 1,12,051 and an annual revenue of about Rs. 12 lakhs. The Rulers of Dharampur trace their descent from Ramchandraji of Hindu Mythology. They belong to the Solar Sisodia Rajputs dynasty. The present Raja, His Highness Maharana Shri Vijaydevji Mohandevji, was born on the 3rd December 1884 and succeeded to the gadi on the 26th March 1921. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns and a personal salute of 11 guns.

Jawhar.—This State is situated to the North of the Thana District of the Bombay Presidency on a plateau above the Konkan plain. It has an area of 310 square miles, a population of 57,288 and an average annual revenue of about Rs. 5¼ lakhs. Up to 1924, the period of the first Mahomedan invasion of the Deccan, Jawhar was held by a Varli, not a Koli Chief. The first Koli Chief obtained his footing in Jawhar by a device similar to that of Dido when he asked for and received as much land as the hide of a bull would cover. The Koli Chief cut a hide into strips, and thus enclosed the territory of the State. The present Chief, Raja Patangsha *alias* Yeshwantrao Vikramsha, is a minor and the State is at present under minority administration. The Raja is entitled to become a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Lunawada.—The State has an area of 388 square miles, a population of 95,162 and an annual revenue of about Rs. 5½ lakhs. The Rulers of Lunawada belong to the historic Solanki clan of Rajputs claiming their descent from the famous Sidhraj Jaysinh of Anhilwad (Gujarat). Besides having fine patches of good agricultural land, the State contains a considerable forest area yielding rich timber. The present Raja, Maharana Shri Virbhadrasinhji, was invested with full powers on 2nd October 1930. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Rajpipla.—This important State lies to the south of the Narbada. It has an area of 1,517½ square miles, a population of 206,114 and an average annual revenue of about Rs. 24½ lakhs. The lands are rich and very fertile and, except for a few forest-clad hills, are suitable and available for cultivation in large quantities in the south-east talukas. The family of the Maharaja of Rajpipla, Major H. H. Maharana Shri Sir Vijaysinhji, K.C.S.I., is said to derive its origin from a Rajput of the Gohel clan. Cotton is the most important crop in the State. In the hills there are valuable teak forests. The capital is Rajpipla which is connected with Ankleshwar by railway built by the State. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 13 guns.

Sachin.—This State has an area of 49 square miles, a population of 22,125 and an annual revenue of about Rs. 4 lakhs. The ancestors of the Nawab of Sachin were the Rulers of Janjira. The founder of the Sachin family was Abdul Karim Yakut Khan commonly called Balu Miyan. In 17 4 on the death of his father Abdul Karim, (Nawab of Janjira), the Chiefship was seized by Sidi Jawhar and Balu Miyan fled to Poona where he sought the protection of Nana Furnavis, who managed to secure for him a tract of land near Surat then estimated to yield Rs. 75,000 a year. Balu Miyan was granted the hereditary title of Nawab by the Emperor of Delhi. The present Ruler is Nawab Mohamed Hyder Khan who was born on the 11th September 1909 and succeeded to the gadi in November 1930. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Sant.—This State has an area of 394 square miles, a population of 83,538 and an annual revenue of about Rs. 5½ lakhs. The Ruling family belongs to the Mahipavat branch of the Puvar or Parmar Rajputs. The Rulers used to pay a tribute of 5,384-9-10 to Scindia. This tribute is now paid by the State to the British Government. The present Ruler Maharana Shri Jorarwarsinhji Pratapsinhji was born on 24th March 1881 and succeeded to the gadi in 1896. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Rewa Kantha Agency.—Including the Surgana State and the Dangs.

This Agency is a subordinate Political Agency of the Gujarat States Agency. It is comprised of all the non-salute States and Estates of the Old Rewa Kantha Agency, the State of Surgana, previously in the Nasik Agency, and the petty states known as the Dangs, previously in the Surat Agency.

Rewa Kantha means the district or province situated on the banks of the river Rewa or Narmada or Narbada. This river is held in high veneration among the Hindus especially in the Bombay Presidency.

All the States comprised in the Province of Rewa Kantha are not on the banks of Narbada, for some of the Northern States, *i.e.*, Kadanas and the States in Pandu Mewas are on the banks of the Mahi river. In fact the Rewa Kantha Agency comprises territories watered both by the Rewa and Mahi Rivers.

The population consists of the following main classes: Hindus, Jains, Musalmans, Animistic Bhils, Dhankas, Kolis and Naikdas.

Surgana.—Is situated on the borders of the Nasik District.

The **Dangs** consist of a tract of country between the Sahyadris and the Surat District which is parcelled out among 14 petty Chiefs. Of these 13 are Bhils and 1 a Kokani.

The headquarters of the Agency, which is situated at the Baroda Residency in view of the fact that the Secretary to the Agent to the Governor-General, Gujarat States and Resident at Baroda is also *ex-officio* Political Agent of this Agency, consist of:—

Political Agent, Major C. W. L. Harvey, M.C., I.A.

Deputy Political Agent.—Mr. M. B. Mehta.

Assistant Political Agent for the Dangs.—Mr. E. O. Sampson, L.E.S.

Many of the States and Estates are small and only a few enjoy restricted jurisdictional powers. The four Chiefs of Kadana, Bhaderwa, Surgana and Jambughoda are however, larger and more important, the first three named being included in the list of electorates for representative members of the Chamber of Princes.

DECCAN STATES AGENCY AND KOLHAPUR RESIDENCY.

This Agency which was formed in consequence of the transfer of the Bombay States to the direct control of the Government of India includes the following States:—

Kolhapur.	Miraj (Senior).
Janjira.	Miraj (Junior).
Savantvadi.	Kurandwad (Senior).
Mudhol.	Kurandwad (Junior).
Sangli.	Ramdurg.
Bhor.	Aundh.
Jamkhandi.	Akalkot
Phaltan.	Savanur.
Jath.	Wadi Estate.

The above States have been brought into political relations with the Government of India through the Agent to the Governor-General for the Deccan States and Resident at Kolhapur, whose headquarters are at Kolhapur.

Agent to the Governor-General for the Deccan States and Resident at Kolhapur:—Lieutenant-Colonel H. Wilberforce-Bell C.I.E.

Kolhapur Agency.—Kolhapur is a State with an area of 3,217 square miles and population of 9,57,137. Subordinate to Kolhapur are nine feudatories, of which the following four are important: Vishalgarh, Bavda, Kagal (senior), and Ichalkaranji. The ruling house traces its descent from a younger son of Shivaji, founder of the Maratha power. The prevalence of piracy from the Kolhapur port of Malvan compelled the Bombay Government to send expeditions against Kolhapur in 1765, and again in 1792, when the Raja agreed to give compensation for the losses which British merchants had sustained since 1785, and to permit the establishment of factories at Malvan and Kolhapur. Internal dissensions and wars with neighbouring States gradually weakened the power of Kolhapur. In 1812 a treaty was concluded with the British Government, by which, in return for the cession of certain ports, the Kolhapur Raja was guaranteed against the attacks of foreign powers; while on his part he engaged to abstain from hostilities with other States, and to refer all disputes to the arbitration of the British Government. The principal articles of production are rice, joowar and sugar-cane and the manufactures are coarse cotton and woollen cloths, pottery and hardware. The State pays no tribute, and supports a military force of 692. The nine feudatory estates are administered by their holders, except in the case of two whose holders are minors. Kolhapur proper is divided into seven pethas or talukas and three mahals and is managed by the Maharaja, who has full powers of life and death. The Madras and Southern Mahratta Railway passes through the State and is connected with Kolhapur City by a line which is the property of the State. The present Ruler is Lt.-Col. His Highness Maharaja Shri Sir Rajaram Shahu Chhatrapati, G.C.S.I., G.C.I.E. He has a dynastic salute of 19 guns.

Janjira.—This State is situated to the South of the Kolaba District of the Bombay Presidency. The ruling family is said to be descended from an Abyssinian in the service of one of the Nizam Shahi Kings of Ahmednagar at the end of the fifteenth century. The most noticeable point in its history is the successful resistance that it alone, of all the States of Western India, made against the determined attacks of the

Marathas. The British, on succeeding the Marathas as masters of the Konkan, refrained from interfering in the internal administration of the State. The chief is a Sunni Mahomedan; by race a Sidi or Abyssinian, with a title of His Highness the Nawab. He has a sanad guaranteeing succession according to Mahomedan law and pays no tribute. Till 1868 the State enjoyed singular independence, there being no Political Agent, and no interference whatever in its internal affairs. About that year the mal administration of the chief, especially in matters of police and criminal justice, became flagrant; those branches of administration were in consequence taken out of his hands and vested temporarily in a Political Agent. The last ruler, H. H. Nawab Sidi Sir Ahmed Khan, G.C.I.E., died on 2nd May 1922, and was succeeded by his son His Highness Sidi Muhammad Khan, born on the 7th March 1914. The area of the State is 379 square miles, and the population 1,10,366. The average revenue is 8 lakhs, including that derived from a small dependency named Jafferabad in the south of Kathiawar under the Western India States Agency. The State maintains an irregular military force of 243. The capital is Murud on the main land, the name of Janjira being retained by the island fort opposite. The Nawab is entitled to a dynastic salute of 11 guns. In recognition of services rendered in connection with the war the last ruler's salute was raised on the 1st January 1918 to 13 guns personal and 13 guns local on the 1st January 1921.

Sawantwadi.—This State has an area of 930 square miles and population of 230,589. The average revenue is Rs. 6,33,000. It lies to the north of the Portuguese territory of Goa, the general aspect of the country being extremely picturesque. Early inscriptions take the history of the State back to the sixth century. So late as the nineteenth century the ports on this coast swarmed with pirates and the country was very much disturbed. The present Ruler is Major His Highness Raje Badadur Shrimant Khem Sawant *alias* Bapu Saheb Bhonsle, Raja of Savantwadi. Rice is the principal crop of the State, and it is rich in valuable teak. The sturdy Marathas of the State are favourite troops for the Indian Army and supply much of the immigrant labour in the adjacent British districts. The Capital is Sawantwadi, also called Sundar Wadi, or simply Wadi. The Raja enjoys a dynastic salute of 9 guns and a permanent local salute of 11 guns.

Mudhol.—The State has an area of 368 square miles, a population of 62,860 and an annual revenue of about Rs. 5,61,000. The present Ruler is Lieutenant Raja Sir Malojirao Venkatrao *alias* Nana Saheb Ghorpade, K.C.I.E. He was born in 1884 and succeeded to the *gadi* in 1900 when he was a minor. He was invested with Ruling powers in 1904. He enjoys a dynastic salute of 9 guns and is a Member of the Chamber of Princes.

Sangli.—The State has an area of 1,136 square miles, a population of 2,58,442 and an annual revenue of Rs. 15,37,000. The founder of the family was Harbhut who rose to distinction during the rule of the Peshwas. The present Ruler Lieutenant (Honorary) His Highness Raja Sir Chintamanrav Dhundirao *alias* Appasaheb Patwardhan, K.C.I.E., was born on the 14th February 1890 and succeeded to the *gadi* in 1901 on the death of his adoptive father Dhundiraj Chintamanrav Patwardhan. His Highness has been granted the hereditary title of Raja. He enjoys a dynastic salute of 9 guns and a personal salute of 11 guns.

Bhor.—The State lies in the Western Ghats in wild and mountainous country. It has an area of 925 square miles, a population of 1,41,546 and an annual revenue of about Rs. 6¾ lakhs. The present Chief Shrimant Raghunathrao Shankarrao *alias* Babasaheb Pant Sachiv, was born on 20th September 1878. He succeeded to the *gadi* in 1922. The honour of receiving a dynastic salute of 9 guns was conferred on him in 1927.

The following are the particulars of the remaining States grouped in this Agency:—

State.	Name of Chief.	Area.	Population.	Revenue.	Tribute to British Government.
				Rs.	Rs.
Akalkot ..	Shrimant Meherban Vijaysinhrao Fatesinhrao Raje Bhonsle Raje Saheb of.	498	92,636	7,13,000	14,592
Aundh ..	Meherban Bhavanrao Shrinivasrao *alias* Balasaheb Pant Pratinidhi.	501	76,507	4,15,000	No tribute.
Jamkhandi .	Meherban Shankarrao Parshuramrao *alias* Appasaheb Patwardhan.	524	1,14,282	8,27,000	20,841
Jath.. ..	Shrimant Vijayasinh Raomrao *alias* Babasaheb Dafle.	980	91,102	3,42,000	11,247

The following are the particulars of the remaining States grouped in this Agency :—*contd.*

State.	Name of Chief.	Area.	Population.	Revenue.	Tribute to British Covernment.
				Rs.	Rs.
Kurundwad (Senior).	Meherban Chintaman r a o Bhalchandrarao *alias* Balasaheb Patvardhan.	182	44,251	2,26,000	9,619
Kurundwad (Junior).	(1) Meherban Ganpat r a o Madhavrao *alias* Bapusaheb Patwardhan.				
	(2) Meherban Trimbakrao Harihar *alias* Abasaheb Patwardhan.	116	39,587	1,94,000	No tribute.
Miraj (Senior)	Meherban Sir Gangadharrao Ganesh *alias* Balasaheb Patwardhan, K.C.I.E.	342	93,957	5,27,000	12,558

Wadi Estate.	Meherban Ganpatrao Gangadharrao *alias* Dajisaheb Patwardhan Jahagirdar.	12	1,704	8,000	Do.

UNDER THE GOVERNMENT OF BENGAL.

Cooch Behar.—This State, which at one time comprised almost the whole of Northern Bengal, Assam and a part of Bhutan known as the Duars and formed part of the famous kingdom of Kamrup, is a low-lying plain in North Bengal. It has an area of 1,318 square miles and a population of 5,90,866. On the demise of the late Ruler His Highness Maharaja Jitendra Narayan Bhup Bahadur in December 1922 in England, his eldest son Yuvaraja Jagaddipendra Narayan (born on December 15, 1915) succeeded to the *gadi* at the age of 7. His Highness the Maharaja Bhup Bahadur belongs to the Kshatriya Varna of Kshatriya origin. His Highness the Maharaja Bhup Bahadur has three sisters Maharajkumaris Ila Devi (aged 19), Ayesha Devi (aged 14) and Menaka Devi (aged 13) and one brother Maharajkumar Indrajitendra Narayan (aged 15). Her Highness the Maharani Saheba is Regent of the State and the administration of the State is conducted by a Council of Regency composed of Her Highness the Regent, *President*, Lt.-Col. K. A. G. Evans-Gordon, I.A., *Vice-President*, with Sj. Jatindra Mohan Sen Gupta, B.L., Revenue Officer, Sj. Satindra Nath Guha, B.L., Civil and Sessions Judge, and Sj. Dineshananda Chakraverty, Civil Surgeon, as members.

The capital is Cooch Behar, which is reached by the Cooch Behar Railway, linked to the Eastern Bengal Railway System.

Tripura.—This State lies to the east of the district of Tippera and consists largely of hills covered with dense jungles. It has an area of 4,116 square miles and a population of 382,450. The revenue from the State is about 20 lakhs and from the Zemindaries in British India is about 13 lakhs. The State enjoys a Salute of 13 guns. The present Ruler is Maharaja Manikya Bir Bikram Kishore Deb Barman Bahadur, who is a Kshatriya by caste and comes of the Lunar race. He was born on 19th August 1908 and he is entitled to a salute of 13 guns. He succeeded the late Maharaja Manikya Birendra Kishore Deb Barman Bahadur on 13th August 1923. The Military prestige of Tripura dates back to the fifteenth century and a mythical account of the State takes the history to an even earlier date. Both as regards its constitution and its relations with the British Government, the State differs alike from the large Native States of India, and from those which are classed as tributary. Besides being the Ruler of Tripura, the Maharaja also holds a large landed property situated in the plains of the Districts of Tippera, Noakhali and Sylhet. This estate covers an area of 600 square miles, and is held to form with the State an indivisible Raj. Disputes as to the right of succession have occurred on the occasion of almost every vacancy in the *gadi* producing in times gone by disturbances and domestic wars, and exposing the inhabitants to serious disorders and attacks from the Kukis, who were always called in as auxiliaries by one or other of the contending parties. The principles which govern succession to the State have recently, however, been embodied in a *sanad* which was drawn up in 1904. The chief products of the State are rice, cotton, til, tea and forest produce of various kinds, the traffic being carried chiefly by water. The Maharaja received full administrative powers on 19th August 1927. His Highness married the sixth daughter of the late Maharaja Sir Bhagabati Prasad Singhji Saheb Bahadur, K.C.I.E., K.B.E., of Balarampur (Oudh) on the 16th January 1929 but on her death in November, 1930, married the eldest daughter of H. H. Maharaja Mahendra Sir Yadvendra Singh Bahadur, K.C.I.E., Maharaja of Panna. The State courts are authorised to inflict capital punishment. The capital is Agartala.

Political Agent:—Magistrate and Collector of Tippera (*Ex-officio*.)

EASTERN STATES AGENCY.

From the 1st April 1933 the States in Bihar and Orissa and in the Central Provinces (with the exception of Makrai) were comprised in the newly created Eastern States Agency and placed in the political charge of an Agent to the Governor General.

The names of the States are:—Athgarh, Athmallik, Bamra, Baramba, Bastar, Baud, Bonai, Changbhakar, Chhuikhadan, Daspalla, Dhenkanal, Gangpur, Hindol, Jashpurr, Kalahandi, Kanker, Kawardha, Keonjha, Khairagarh, Khandpara, Kharsawan, Korea, Mayurbhaj, Nandgaon, Narsinghpur, Nayagarh, Nilgiri, Pal-Lahara, Patna, Raigarh, Rairakhol Ranpur, Sakti, Sarangarh, Seraikela, Sonpur Surguja, Talcher, Tigiria, and Udaipur.

The total area is 59,680 square miles and the total population 71,08,736. The annual income is Rs. 1,47,67,529. These States pay a tribute amounting to Rs. 3,35,549 to Government.

Kharsawan and Seraikela.—The inhabitants are mostly hill-men of Kolarian or Dravidian origin. The Chief of Kharsawan belongs to a junior branch of the Porahat Raja's family. The State first came under the notice of the British in 1793, when in consequence of disturbances on the frontier of the old Jungle Mahals the Thakur of Kharsawan and the Kunwar of Seraikela were compelled to enter into certain agreements relating to the treatment of fugitive rebels. The Chief is bound, when called upon, to render service to the British Government, but he has never had to pay tribute. The Bengal Nagpur Railway runs through a part of the State. The adjoining State of Seraikela is held by the elder branch of the Porahat Raja's family.

The States of Athgarh, Athmallik, Bamra, Baramba, Baud, Bonai, Daspalla, Dhenkanal Gangpur, Hindol, Kalakhandi, Keonjharr, Khandpara, Mayurbhanj, Narsinghpur, Nayagarh, Nilgiri, Pal-Lahara, Patna, Rairakho, Ranpur, Sonpur, Talcher, and Tigiria have no connected or authentic history. They were first inhabited by aboriginal races who were divided into innumerable communal or tribal groups each under its own Chief or headman. These carried on incessant warfare with their neighbours on the one hand and with the wild beasts of the forests on the other. In course of time their hill retreats were penetrated by Aryan adventurers who gradually overthrew the tribal Chiefs and established themselves in their place. Tradition relates how these daring interlopers, most of whom were Rajputs from the north, came to Puri on a pilgrimage and remained behind to found kingdoms and dynasties. It was thus that Jal Singh became ruler of Mayurbhanj over 1,300 years ago, and was succeeded by his eldest son, while his second son seized Keonjhar. The Chiefs of Baud and Daspalla are said to be descended from the same stock; and a Rajput origin is also claimed by the Rajas of Athmallik, Narsinghpur, Pal-Lahara, Talcher and Tigiria. Nayagarh, it is allegged, was founded by a Rajput from Rewah, and a scion of the same family was the ancestor of the present house of Khandpara. On the other hand, the Chiefs of a few States such as Athgarh, Baramba, and Dhenkanal owe their origin to favourites or distinguished servants of the Ruling sovereigns of Orissa. The State of Ranpur is believed to be the most ancient, the list of its Chiefs covering a period of over 3,600 years. It is noteworthy that this family is of Khono origin and furnishes the only known instance in which, amid many vicissitudes, the supremacy of the original settlers has remained in tact. The States acknowledged the suzerainty of the paramount power and were under an implied obligation to render assistance in resisting invaders; but in other respect neither the ancient kings of Orissa nor their successors, the Moghuls and

Marathas, ever interfered with their internal administration. All the States have annals of the dynasties that have ruled over them; but they are made up for the most part of legend and fiction and long genealogical tables of doubtful accuracy, and contain very few features of general interest. The British conquest of Orissa from the Marathas which took place in 1803, was immediately followed by the submission of ten of the tributary States the Chiefs of which were the first to enter into treaty engagements.

The States have formed the subject of frequent legislation of a special character. They were taken over from the Marathas in 1803 with the rest of Orissa; but, as they had always been tributary States rather than regular districts of the native Governments, they were exempted from the operation of the general regulation system. This was on the ground of expediency only and it was held that there was nothing in the nature of British relations with the proprietors that would preclude their being brought under the ordinary jurisdiction of the British Courts, if that should ever be found advisable. In 1882 it was held that the States did not form part of British India and this was afterward accepted by the Secretary of State.

The staple crop in these States is rice. The forests in them were at one time among the best timber producing tracts in India, but until lately forest conservancy was practically unknown. The States have formed the subject of frequent legislation of a special character.

The States of Bastar, Changbhakar, Chhuikhadan, Jaspur, Kanker, Kawardha, Khairagarh, Korea, Nandgaon, Raigarh, Sakti, Sarangarh, Surguja and Udaipur are scattered round the Chhattisgarh Division in the Central Provinces to the different districts of which the majority of them were formerly attached.

Bastar.—This State is situated in the south-east corner of the Central Provinces. In area (13,602 square miles) it is the twelfth largest State in India and is very scattered and backward. A point of interest is that Bastar is the only State in India of which the Chief is a Hindu lady. She is the last descendant of an ancient family of Lunar Rajputs, which ruled over Warangal until the Mahommedan conquest of the Deccan in the 14th century A.D. when the brother of the last Raja of Warangal fled into Bastar and established a kingdom there. From then till the days of the Marathas the State was virtually independent, its inaccessibility securing it from all but occasional raids of Mahommedan freebooters. The Bhonslas of Nagpur imposed a small tribute on Bastar in the 18th century, and at various times for delay in payment deprived it of the Sihawa tract in the Raipur district, and allowed the Raja of Jeypore in the adjacent Vizagapatam Agency of Madras to retain possession of the Kotapad tract, originally pledged to Jeypore by a Bastar Raja for assistance during family dissensions. The dispute between Bastar and Jeypore over this land led to constant border disturbances, and was not finally settled till 1863, when the Government of India, while recognising Bastar's claim, finally made the tract over to Jeypore on the ground of long possession, on condition of payment by Jeypore of Rs. 3,000 tribute, two-thirds of which was remitted from the tribute payable by Bastar. The present tribute paid by Bastar is Rs. 18,000 a year.

On the formation of the Central Provinces Bastar was recognised as a Feudatory State. Since then the state has made steady, if slow, progress, hampered by the innate convervatism of its aboriginal population, which has from time to time rebelled. The last rebellion in 1910 was due to oppression by minor State official and dislike of the rigorous forest policy then under introduction. After the rebellion the Raja had his powers reduced and a series of Diwans were appointed by the Central Provinces Administration. The State has since his death continued to be under Government management owing to the minority of Maharani Profulla Kumari Devi.

Nearly 11,000 square miles are covered by forest of which about 3,000 square miles are reserves. Cultivation is therefore sparse. Rice and mustard are the chief crops. There is a large export of grain, timber and minor forest produce, particularly myrabolams. Most of the sal forest is leased for sleeper manufacture. There are more than 600 miles of gravel motorable road in the State. The capital, Jagdalpur, on the Indrawati river is 184 miles, by motorable road, from Raipur in the Central Provinces.

Surguja.—Until 1905 this was included in the Chotanagpur States of Bengal. The most important feature is the Mainpat, a magnificent table land forming the southern barrier of the State. The early history of Surguja is obscure; but according to a local tradition in Palamau the present Ruling family is said to be descended from an Arksel Raja of Palamau. In 1758 a Maratha army overran the State and compelled its Chief to acknowledge himself a tributary of the Bhonsla Raja. At the end of the eighteenth century in consequence of the Chief having aided a rebellion in Palamau against the British an expedition entered Surguja and though order was temporarily restored, disputes again broke out between the Chief and his relations, necessitating British interference. Until 1818 the State continued to be the scene of constant lawlessness; but in that year it was ceded to the British Government under the provisional agreement concluded with Mudhoji Bhonsla of Nagpur, and order was soon established. The principal crops are rice and other cereals.

Agent to the Governor-General: Mr. E. C. Gibson, C.I.E., I.C.S.

Secretary, Ranchi: Mr. L. G. Wallis, I.C.S.
Assistant Secretary, Ranchi: Mr. G. A. Heron.
Secretary, Eastern States Agency and Political Agent, Sambalpur: Mr. J. Bowstead, M.C., I.C.S.

Forest.

Agency Forest Officer Eastern States Agency, (Sambalpur): Mr. F. A. A. Hart, I.F.S. (on leave).

Education:

Agency Inspector of Schools, (Raipur): Rai Sahib P. H. Kataria.

Agency Inspector of Schools, (Sambalpur): Mr. H. Misra.

UNDER THE GOVERNMENT OF ASSAM.

Manipur.—The only State of importance, under the Government of Assam, is Manipur which has an area of 8,620 square miles and a population of 4,45,606 (1931 Census), of which about 58 per cent. are Hindus and 35 per cent. animistic hill tribes. Manipur consists of a great tract of mountainous country, and a valley about 50 miles long and 20 miles wide, which is shut in on every side. The State adopted Hinduism in the early eighteenth century, in the reign of Pamheiba or Gharib Nawaz, who subsequently made several invasions into Burma. On the Burmese retaliating, Manipur negotiated a treaty of alliance with the British in 1762. The Burmese again invaded Manipur during the first Burmese war, and on the conclusion of peace in 1826 Manipur was declared independent. The chief event in its subsequent history was the intervention of the British in 1891 to establish the claim of Kula Chandra Singh as Maharaja, followed by the treacherous murder of the Chief Commissioner, Mr. Quinton, and the officers with him, and the withdrawal of the escort which accompanied him. From 1891 to 1907 the State was administered by the Political Agent, during the minority of H. H. Chura Chand Singh. The Raja was invested with ruling powers in 1907 and formally installed on the gadi in 1908. For his services during the War the hereditary title of Maharaja was conferred on him. He is entitled to a salute of 11 guns.

The administration of the State is now conducted by H. H. the Maharaja, assisted by a Durbar, which consists of a President, who is usually a member of the Indian Civil Service, his services being lent to the State by the Assam Government three ordinary and three additional members, who are all Manipuris. The staple crop of the country is rice. Forests of various kinds cover the great part of the mountain ranges.

Khasi States.—These petty chiefships, 25 in number, with a total area of about 3,600 square miles and a population of 1,80,000, are included under the Government of Assam. Most of the States have treaties or engagement with the British Government. The two largest are Khyrim and Mylliem and the smallest is Nongliwai, which has a population of only 213. Most of them are ruled by a Chief or Siem. The Siemship usually remains in one family. The succession was originally controlled by a small electoral body constituted from the heads of certain clans but in recent years there has been a tendency to broaden the elective basis. The constitution of a Khasi State has always been of a very democratic character, a Siem exercising but little control over his people.

UNDER THE GOVERNMENT OF THE UNITED PROVINCES.

Three States: Rampur, Tehri and Benares are included under this Government:—

State.	Area Sq. Miles.	Population.	Revenue in lakhs of Rupees.
Rampur ..	892	453,607	54
Tehri (Garhwal)	4,502	318,482	18
Benares ..	875	362,735	22

Rampur State.—The State of Rampur was founded by Nawab Sayed Ali Mohammad Khan Bahadur in the middle of the 18th century and his dominions included a considerable portion of what is now known as Rohilkhand. The founder belonged to the famous Sayeds of the Bareha clans in the Muzaffarnagar district and was a statesman of remarkable ability. He rendered invaluable services to the Moghal Emperor who recognised him as Ruler of Rohilkhand.

Upon his death, his Kingdom underwent many vicissitudes and was considerably reduced in size during the reign of his son Nawab Sayed Faizulla Khan Bahadur. The Province of Rohilkhand had now passed into the hands of the East India Company. Nawab Sayed Faizulla Khan Bahadur was most loyal and true to the British Government to whom he always looked up for help during those unsettled days and he gave tangible proof of his loyalty when during the war against France he offered all his cavalry 2,000 strong to the British Government in 1878 and received the following message of thanks from the then Governor-General:—

"That in his own name as well as that of the Board, he returned him the warmest thanks for this instance of his faithful attachment to the Company and the English Nation."

Another opportunity arose for the ruler of Rampur to evince his steadfast loyalty and devotion to the Imperial Cause on the outbreak of the Mutiny of 1857. His Highness Nawab Sir Sayed Yusuf Ali Khan Bahadur occupied the Musnad of Rampur in those days. From the very start till peace was re-established in the country, he was lavish in his expenditure of men and money on the side of the British Government he fought their battles, saved the lives of many Europeans whom he provided with money and other means of comfort and had so much established his reputation as a good administrator that he was placed in charge of the Moradabad district. These signal services were recognised by the Government by the grant of an Illaqa besides other marks of distinction.

The reign of His Late Highness Nawab Sir Sayed Mohammad Hamid Ali Khan Bahadur stood out unique in many ways. Rampur made great strides in trade and commerce and in fact in every walk of life. He took keen interest in Education and did not only contribute handsome donations but made annual grants to the various educational institutions. He was no whit behind his compatriot in his loyalty

to the British Government. The Great War of 1914 found him foremost in offering his personal services and all the resources of the State—men, money and material—to the British Government. The 1st Rampur Infantry was sent to East Africa and returned home after nearly four years' service and won the favourable remarks of high British Officers. Besides the expenditure involved in this His Highness also participated in the Scheme of the Hospitalship "Loyalty" and contributed one lakh of rupees towards the cost and upkeep of it. His other contributions to the various funds amounted to over half a lakh of rupees and he also subscribed Rs. 7,00,000 to the two War Loans. At the time of the Afghan War 1919 the I. S. Lancers and the Imperial Service Infantry were sent on garrison duty in British India.

The present Ruler His Highness Nawab Sayed Raza Ali Khan Bahadur succeeded his father on 20th June 1930. His Highness was born on 17th November 1906 and was educated at the Rajkumar College, Rajkot. He is an enlightened ruler and takes very keen interest in the administration of the State.

Since his accession to the masnad, His Highness has introduced reforms in Judicial, Police, Revenue and Army Departments and during the short period that the reins of the State have been in his hands he has overhauled and reorganised the whole administration. His Highness is also greatly interested in education, commerce and industry and has taken practical steps to improve them. The welfare of his subjects and their advancement in every walk of life is the cherished desire of His Highness.

His Highness has two sons and two daughters. The eldest son Sahebzada Sayed Murtaza Ali Khan Bahadur is the Heir Apparent.

The permanent salute of the State is 15 guns and the annual income over fifty lakhs of rupees.

Tehri State (or Tehri-Garhwal).—This State lies entirely in the Himalayas and contains a tangled series of ridges and spurs radiating from a lofty series of peaks on the border of Tibet. The sources of the Ganges and the Jumna are in it. The early history to the State is that of Garhwal District, the two tracts having formerly been ruled by the same dynasty since 688 A. D. Pradyumna Shah, the last Raja of the whole territory, was killed in battle fighting against the Gurkhas; but at the close of the Nepalese War in 1815, his son received from the British the present State of Tehri. During the Mutiny the latter rendered valuable assistance to Government. He died in 1859. The present Raja is Major H. H. Sir Narendra Shah Bahadur, K.C.S.I., who is 59th direct male lineal descendant from the original founder of the dynasty, Raja Kanak Pal. The principal products are rice and wheat grown on terraces on the hill sides. The State forests are very valuable and there is considerable export of timber. The Raja has full powers within the State. The strength of the State forces is 330. The capital is Tehri, the summer capital being Pratapnagar, 8,000 feet above the sea-level.

Agent to the Governor-General: The Governor of the U. P. of Agra and Oudh.

Benares.—The kingdom of Benares under its Hindu Rulers existed from time immemorial and finds mention in Hindu and Buddhist literature. In the 12th century it was conquered by Shahab-ud-din Ghori and formed a separate province of the Mohammadan Empire. In the 18th century when the powers of Moghal Emperors declined after the death of Aurangzeb, Raja Mansa Ram an enterprising zamindar of Gangapur (Benares district) founded the State of Benares and obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738. Raja Mansa Ram died in 1740 and his son Balwant Singh became the virtual ruler. During the next 30 years attempts were unsuccessfully made by Safdar Jang and after him by Shuja-ud-daula of Oudh to destroy the independence of the Raja and the Fort of Ramnagar was built on the bank of the Ganges opposite the Benares City. Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh. He was expelled by Warren Hastings. Balwant Singh's daughter's son Mahip Narain Singh was placed on the *gadi*. The latter proved an imbecile and there was maladministration which led to an agreement in 1794 by which the lands, held by the Raja in his own right which was granted to him by the British Government, were separated from the rest of the province. The direct control of the latter was assumed by the Government and an annual income of one lakh of rupees was assured to the Raja while the former constituted the Domains. Within the Domains the Raja had revenue powers similar to those of a Collector in a British district. There was thus constituted what for over a century was known as the Family Domains of the Maharaja of Benares. On the 1st of April, 1911, the major portion of these Domains became a State consisting of the perganas of Bhadohi and Chakia (or Kera Mangraur). The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State. The Maharaja's powers are those of a Ruling Chief, subject to certain conditions, of which the most important are the maintenance of all rights acquired under laws in force prior to the transfer, the reservation to Government of the control of the postal and telegraph systems, of plenary criminal jurisdiction within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with Excise.

The present ruler is Captain H. H. Maharaja Sir Aditya Narain Singh Bahadur, K.C.S.I., who was born in 1874 and succeeded to the State in 1931.

PUNJAB STATES.

There are 14 States of the Punjab which since 1921, have been in direct political relation with the Government of India through the Hon'ble the Agent to the Governor-General, Punjab States, who resides at Lahore.

The following are details :—

Name.	Permanent salute in guns.	Area (Sq. miles.)	Population (1921.)	Approximate revenue in lakhs of rupees.
Patiala	17	5,942	1,625,520	1,35.6
Bahawalpur	17	16,434	984,612	49.7
Khairpur‡	15	6,050	227,143	20.4
Jind	13	1,299	324,676	29.3
Nabha*	13	947	287,574	29.8
Kapurthala	13	599	316,757	37.0
Mandi	11	1,139	207,465	15.3
Sirmur, (Nahan)†	11	1,046	148,568	6.0
Bilaspur (Kahlur)*	11	453	100,994	3.0
Malerkotla	11	165	83,072	14.6
Faridkot*	11	638	164,364	18.9
Chamba	11	3,127	146,870	8.3
Suket	9	392	58,408	2.2
Loharu*	226	23.338		1.3

* Under administration.

‡ Brought under the Political control of the A. G. G. Punjab States in April 1933.

† Personal salute raised to 13 guns.

Bahawalpur.—A Native State in direct political relationship with the Government of India through the Agent to the Governor-General, Punjab States Agency. Bahawalpur is situated between the Punjab and Rajputana, Latitude 27° 41′ to 30° 22′ 15″, Long. 70° 47′ to 74° 1′ and bounded on the North-East by the District of Ferozepur; on the East and South by the Rajputana States of Bikaner and Jaisalmere: on the South-West by Sind, on the North-West by the Indus and Sutlej rivers. Area, 15,000 square miles.

This State is about 300 miles in length and about 50 miles wide, is divided lengthwise into three great strips. Of these, the first is a part of the Great Indian Desert; the central track which is as barren as uplands of the Western Punjab; has however been partly rendered capable of cultivation by the net work of Sutlej Valley Canals constructed recently; and the third a fertile alluvial tract in the river valley is called the Sind. The State is a partner in the great Sutlej Valley Project which is now nearing completion. The scheme embodies four colossal weirs and a network of canals that are gradually but surely converting the arid and bleak desert of Cholistan into a valley of smiling fields and rich gardens. It has been estimated that the perennial and non-perennial areas to be brought under cultivation by the Project would cover 14·64 and 25·82 lakh acres of land respectively. The ruling family is descended from the Abbassaide Khalifas of Baghdad. The tribe originally came from Sind, and assumed independence during the dismemberment of the Durrani Empire in the Treaty of Lahore in 1809. Ranjit Singh was confined to the right bank of the Sutlej.

The first treaty with Bahawalpur was negotiated in 1833, the year after the treaty with Ranjit Singh for regulating traffic on the Indus. It secured the independence of the Nawab within his own territories and opened up the traffic on the Indus and Sutlej. During the first Afghan War the Nawab rendered assistance to the British and was rewarded by a grant of territory and life pension. On his death his heir being minor for a time the administration of the State was in the hands of the British authorities. The present ruler is Rukn-ud-Daula, Nusrat-Jang, Mukhlis-ud-Daula, Hafiz-ul-Mulkh, His Highness Major Nawab Sir Sadiq Muhammad Khan Abbasi V. G.C.I.E., K.C.V.O., K.C.I.E., who was born in 1904 and succeeded in 1907. During his minority the State was managed by a Council of Regency which ceased to exist in March 1924, when His Highness the Nawab was invested with full power. His Highness is now assisted in the administration of his State by a Prime Minister, Izzat Nishan, Imad-ul-Mulk, Rai Rais-ul-Wozra, Khan Bahadur, Mr. Nabi Buksh Mahomed Husain, M.A., LL.B., C.I.E., K.C.A.O., BO.C.S., a Public Works and Revenue Minister, Mr. C. A. H. Townsend, C.I.E., a Minister for Law and Justice, Rafi-us-Shan, Iftikhar-ul-Mulk, Lt.-Col. Maqbool Hasan Kureishy, M.A., LL.B., C.A.O., C.H.O., a Home Minister, Amin-ul-Mulk, Umdat-ul-Umra, Sardar Mohammad Amir Khan, C.H.O., an Army Minister, Major General Sahibzada Haji Mohammad Dilawar Khan Abbasi, C.H.O., C.A.O., and a Minister for Commerce, Dewan Sukha Nand, M.A.O.

The chief crops are wheat, rice and millet. The Lahore-Karachi branch of the North Western State Railway passes through the State. The State supports an Imperial Service combined infantry, in addition to other troops. The capital is Bahawalpur, a walled town built in 1718.

Income from all sources over 70 lakhs. Languages spoken Multani or Western Punjabi (Jatki), and Marwari.

Agent to the Governor-General, Punjab States.—The Hon. Sir James Fitzpatrick, B.A., LL.B., K.C.I.E., C.B.E., I.C.S.

Chamba.—This State is enclosed on the west and north by Kashmir, on the east and south by the British districts of Kangra and

Gurdaspur, and it is shut in on almost every side by lofty hill ranges. The whole country is mountainous and is a favourite resort of sportsmen. It possesses a remarkable series of copper plate inscriptions from which its chronicle have been compiled.

Founded probably in the sixth century by Marut, a Surajbansi Rajput, who built Brahmapura, the modern Barmaur, Chamba was extended by Meru Varma (680) and the town of Chamba built by Sahil Varma about 920. The State maintained its independence, until the Moghal conquest of India.

Under the Moghals it became tributary to the empire, but its internal administration was not interfered with, and it escaped almost unscathed from Sikh aggression. The State first came under British influence in 1846. The part, west of the Ravi, was at first handed over to Kashmir, but subsequently the boundaries of the State were fixed as they now stand, and it was declared independent of Kashmir. The present chief is H. H. Raja Ram Singh, who was born in 1890, and succeeded in 1919. The principal crops are rice, maize and millets. There are some valuable forests which were partly leased to Government in 1864 for a term of 99 years, but the management of them has now been retroceded to the Chamba Durbar. The mountain ranges are rich in minerals which are little worked. The principal road to Chamba town is from Pathankot, the terminus of the Amritsar Pathankot branch of the North-Western Railway. Chamba town, on the right bank of the Ravi, contains a number of interesting temples, of which that of Lakshmi Narayan, dating possibly from the tenth century, is the most famous.

Faridkot.—The ruling family of this sandy level tract of land belongs to the Sidhu-Barar clan of the Jats, and is descended from the same stock as the Phulkian houses. Their occupation of Faridkot and Kot Kapura dates from the time of Akbar, though quarrels with the surrounding Sikh States and internal dissensions have greatly reduced the patrimony.

The present Ruling Prince, Farzand-i-Saadat Nishan Hazarat-i-Kaisar-i-Hind Brar Bans Raja Har Indar Singh Bahadur was born in 1915 and succeeded his father in 1919. Under the orders of the Government of India the administration of the State has been entrusted to a Council of Administration consisting of a President, Sardar Bahadur Sardar Indar Singh, B.A., and three members. The State has an area of 643 square miles with a population of 164,364 souls and has an annual income of 18 lakhs. The Ruler is entitled to a salute of 11 guns and a visit and return visit from the Viceroy. The State Forces consist of State Sappers and Household Troops (Cavalry and Infantry).

Jind.—Jind is one of the three Phulkian States (the other two being Patiala and Nabha). Its area is 1,268 square miles, with a population of 3,24,676 souls and an income of 25 lakhs.

The history of Jind as a separate State dates from 1763, when Raja Gajpat Singh, the maternal grandfather of Maharaja Ranjit Singh, and great grandson of the famous Phul, established his principality. He was succeeded by Raja Bhag Singh, who greatly assisted Lord Lake in 1805. His grandson Raja Sangat Singh was succeeded by the nearest male collateral Raja Sarup Singh in 1837. In the crisis of 1857 Raja Sarup Singh rendered valuable services to the British and was rewarded with a grant of nearly 600 square miles of land, known as Dadri territory. He was succeeded by his son Maharaja Raghbir Singh, who gave help to the British Government on the occasion of Kuka outbreak (1872) and the 2nd Afghan War (1878). The present ruler Maharaja Ranbir Singh was born in 1879, succeeded in 1887, and invested with full powers in 1899. The State rendered exemplary services in the Great European War. It supplied 8,673 men to the Indian Army and Imperial Service Troops and doubled the strength of its Imperial Service Infantry. The total contribution amounted to nearly 35 lakhs, in gifts of cash, materials, animals and loan.

His Highness enjoys a salute of 15 guns. The capital is Sangrur, which is connected by a State Railway with the North-Western Railway. The principal executive Officer of the State is called Chief Minister.

Ruler.—Colonel His Highness Farzand-i-Dilband Rasikh-ul-Itikad, Daulat-i-Inglishia Raja-i-Rajgan Maharaja Sir Ranbir Singh Rajendra Bahadur, G.C.I.E., K.C.S.I., etc.

Kapurthala.—This State consists of three detached pieces of territory in the great plain of the Jullundur Doab. The ancestors of the ruler of Kapurthala at one time held possessions both in the Cis and Trans-Sutlej and also in the Bari Doab. In the latter lies the village of Ahlu whence the family springs, and from which it takes the name of Ahluwalia. When the Jullundur Doab came under the dominion of the British Government in 1846, the estates north of the Sutlej were maintained in the independent possession of the Kapurthala Ruler, conditional on his paying a commutation in cash for military service engagements by which he had previously been bound to Maharaja Ranjit Singh, of Lahore. This annual tribute of Rs. 1,31,000 a year was remitted by the Government of India in perpetuity in (1924) in recognition of the splendid war record and uniformly efficient administration of the State. The Bari Doab estates are held by the head of the House as a jaghir in perpetuity, the civil and police jurisdiction remaining in the hands of the British authorities. For good services during the Mutiny, the present Maharaja's grandfather was rewarded with a grant of other estates in Oudh, which yield a large annual income equal to those of Kapurthala State. The present Ruler's titles are Col. H. H. Farzand-I-Dilband Rasikhul-Itikad Daulat-I-Inglishia Raja-I-Rajagan Maharaja Jagatjit Singh Bahadur Maharaja of Kapurthala, G.C.S.I. (1911), G.C.I.E. (1918), G.B.E. (1927) who was born on 24th November 1872 and succeeded his father His Highness the late Raja-i-Rajgan Kharak Singh of Kapurthala in 1877. He was granted the title of Maharaja as an hereditary distinction in 1911. His salute was raised to 15 guns and he was made Honorary Colonel of the 45th Rattrays Sikhs. The Maharaja received the Grand Cross of the Legion d'Honneur from the French Government in 1924, and possesses also the Grand Cross of the

Order of Carlos 3rd, of Spain, Grand Cross of the Order of the Star of Roumania, Grand Cross of the Order Menelek of Abyssinia, Grand Cordon of the Order of the Nile of Egypt, Grand Cordon of the Order of Morocco, Grand Cordon of the Order of Tunis, Grand Cross of the Order of Chili, Grand Cross of the Order of the Sun of Peru, Grand Cross of the Order of Cuba; represented Indian Princes and India on the League of Nations in 1926, 1927 and 1929, celebrated the Golden Jubilee of his reign in December 1927 with great eclat, when Their Excellencies the Viceroy and Lady Irwin, the Commander-in-Chief in India and Lady Birdwood, Governor of the Punjab and Lady Hailey, Their Highnesses the Maharajas of Jammu and Kashmir, Bikaner Patiala, Jamnagar, Alwar, Bharatpur, Rajpipla, Mandi, the Nawabs of Palanpur, Malerkotla, Loharu and the Raja of Kalsia were present, besides a very large and distinguished gathering of European and Indian guests.

The rulers of Kapurthala are Rajput Sikh, and claim descent from Rana Kapur, a distinguished member of the Rajput House of Jaisalmer. Only a small proportion of the population however are Sikhs, the majority being Mahomedans. The chief crops are wheat, gram, maize, cotton and sugarcane. The town of Sultanpur in this State is famous for hand-printed cloths. Phagwara is another important town in the State and is very prosperous on account of its grain markets and factories for manufacture of agricultural implements, and metallic utensils of household use. The situation of this town on the main railway line and the consequent facilities of export and import make its importance still greater and this is the chief commercial town in the State. The main line of the North-Western Railway passes through part of the State and the Grand Trunk Road runs parallel to it. A branch railway from Jullundur City to Ferozepur passes through the capital. The Imperial Service and local troops of the State have been re-organized and are now designated as Kapurthala State Forces. The State Troops, the strength of which was raised during the Great War, to nearly 2,000, served the Empire in that crisis in East Africa, Mesopotamia and on the Afghan Frontier. Primary education is free throughout the State, and it spends a large proportion of its revenues on its Education Department. The State also possesses a Legislative Assembly which was created by the present Maharaja on the occasion of the Silver Jubilee of his reign in 1916. The capital is Kapurthala which has been embellished by the present Maharaja with a Palace of remarkable beauty and grandeur and with various buildings of public utility. The town boasts modern amenities such as electric light, water-works, etc.

Political Officer: The Hon'ble Agent to the Governor-General, Punjab States, Lahore.

Malerkotla.—This State consists of a level sandy plain unbroken by a hill or stream, bounded by the district of Ludhiana on the north, by Patiala territory on the east and south and by the Ludhiana District, Patiala and Nabha territories on the west. The Rulers (Nawabs) of Malerkotla are of "Kurd" descent who came originally from the Province of "Sherwan" and settled in the town of "Sherwan" north of Persia, and after settling for a time in Afghanistan near Ghazni came to India and settled at *Maler*, the old capital of the State in 1442. Originally they held positions of trust under the Lodhi and Moghal Emperors. As the Moghal Empire began to sink into decay they gradually became independent. They were in constant feuds with the newly created adjacent Sikh States. After the victory of Laswari, gained by the British over Sindhia in 1803 and the subjugation and flight of Holkar in 1805, when the Nawab of Malerkotla joined the British Army, the British Government succeeded to the power of the Mahrattas in the districts between the Sutlej and the Jumna. The State entered into political relations with the British Government in 1809. The present Ruler is Lt.-Col. His Highness Nawab Sir Ahmad Ali Khan, Bahadur, K.C.S.I., K.C.I.E., who was born in 1881 and succeeded in 1908. He was created Hony. Major in the Indian Army in June 1916 and promoted to the rank of Lt.-Col. in December 1919.

The chief products are cotton, sugar, poppy, aniseed, mustard, ajwain, methi, tobacco, garlic, onions and all sorts of grains.

The State maintains Sappers, Infantry, Cavalry and Artillery. The capital is Malerkotla. The population of the town is 30,000. Annual revenue of the State is about 16 lakhs.

Mandi is an Indian State in the Punjab Political Agency lying in the upper reaches of Bias river which drains nearly all its area. Its area is 1,200 square miles and it lies between 31°-23′ North Lat.; and 76°-22′ East Long.; and is bounded on the east by Kulu; on the south by Suket and on the north and west by Kangra. It has an interesting history of considerable length which finally resulted in its entering into a treaty with the British in 1846.

The present Ruler, Capt. His Highness Raja Sir Jogindar Sen Bahadur, K.C.S.I., assumed full powers in February 1925. His Highness married the only daughter of His Highness the Maharaja of Kapurthala.

The Mandi Hydro-Electric Scheme was formally opened by H. E. the Viceroy in March this year.

The principal crops are rice, maize, wheat and millet. About three-fifths of the State are occupied by forests and grazing lands. It is rich in minerals. The capital is Mandi, founded in 1527, which contains several temples and places of interest and is one of the chief marts for commerce with Ladhakh and Yarkand.

Nabha.—Nabha which became a separate State in 1763 is one of the 3 Phulkian States —Nabha, Patiala and Jind—and though second in point of population and revenue of the 3 sister States, it claims seniority being descended from the eldest branch. It consists of two distinct parts, the main portion comprising 12 separate pieces of territory scattered among the other Punjab States and Districts, forms the City of Nabha and the *Nizamats* of Phul

and Amloh; the second portion forms the *Nizamat* of Bawal in the extreme south-east of the Punjab on the border of Rajputana; this Nizamat of Bawal was subsequently added to its territory as a reward from the British Government for the loyalty of the Rulers of Nabha. The State now covers an area of about 1,000 square miles and has a population of about 3 lakhs. The State maintains one battalion of Infantry known as the Nabha Akal Infantry under the Indian States Forces Scheme consisting of 482. For the preservation of the peace there is also a Police force consisting of about 400 men.

The State is traversed by the main and 3 branch lines of the N. W. Railway and the B. B. & C. I. crosses the *Nizamat* of Bawat. A portion of the State is irrigated by the Sirhind Canal. The crops of the State are gram, pulses, bajra, sugarcane, cotton, wheat and barley, to facilitate trade the Durbar has opened grain markets and Banks near the principal railway station within the State territory. The chief industries of the State consist of the manufacture of silver and gold ornaments, brass utensils, and cotton carpets, lace and *gota*, etc. There are some ginning factories and a cotton steam press in the State which are working successfully. In 1923 an inquiry was held into certain matters in dispute between the Patiala and the Nabha Durbars which showed that the Nabha Police had fabricated cases against persons connected with the Patiala State with the object of injuring them through the Patiala Durbar. As a result, the Maharaja Ripudaman Singh, who was born in 1883 and succeeded his father in 1911 entered into an agreement with the Government of India whereby he voluntarily separated himself from the administration and the control of the State was accordingly assumed by the Government of India. In consequence of repeated breaches of the agreement by the Maharaja, he was in February 1928 deprived of the title of Maharaja, His Highness and of all rights and privileges pertaining to the Ruler of the State, and his eldest son, Partab Singh, was recognized as Maharaja in his stead.

Patiala.—This is the largest of the Phulkian States, and the premier State in the Punjab. Its territory is scattered and interspersed with small States and even single villages belonging to other States and British districts. It also comprises a portion of the Simla Hills and territory on the border of Jaipur and Alwar States. Area 5,932 square miles. Population 16,25,520. Gross income Rs. one crore and forty lakhs. Its history as a separate State begins in 1762. The present Ruler, Lieutenant-General His Highness Farzand-i-Khas Daulati-Inglishia Mansur-ul-Zaman Amir-ul-Umra Maharaja Dhiraj Raj Rajeshwar, Sri Maharaja-i-Rajgan Sir Bhupindra Singh Mohinder Bahadur, Yadu Vanshavatans Bhatti Kul Bhushan, G.C.S.I., G.C.I.E., G.C.V.O., G.B.E., A.D.C., was born in 1891, succeeded in 1900, and assumed the reins of government in 1909 on attaining majority. His Highness the Maharaja Dhiraj enjoys at present personal salute of 19 guns and he and his successors the distinction of exemption from presenting Nazar to the Viceroy in Durbar in perpetuity. The principal crops are grain, barley, wheat, sugar-cane, rapeseed, cotton and tobacco. A great part of the State is irrigated by the Sirhind and Western Jumna Canal distributaries. It possesses valuable forests. The State is rich in antiquities, especially at Pinjaur, Sunam, Sirhind, Bhatinda, Narnaul, etc. One hundred and thirty-eight miles of broad-gauge railway line comprising two Sections—from Rajpura to Bhatinda and from Sirhind to Rupar—have been constructed by the State at its own cost. The North-Western Railway, the E. I. Railway, the B. B. & C. I. Railway and the J. B. Railway traverse the State. His Highness maintains a contingent of two regiments of cavalry and four battalions of infantry—one battery of Horse Artillery.

The State maintains a first grade college which imparts free education to state subjects. Primary education is also free throughout the State. The Durbar sanctioned a scheme of compulsory education in 1928.

Since the State has entered into alliance with the British Government in 1809 A.D. it has rendered help to the British Government on all critical occasions such as the Gurkha War of 1819, the Sikh War of 1845, the Mutiny of 1857, the Afghan War of 1878-79, and the Tirah and N. W. F. campaign of 1897. On the outbreak of the European War His Highness placed the entire resources of his State at the disposal of His Majesty the King-Emperor and offered his personal services. The entire Imperial Service Contingent was on active service throughout the period of the War and served on various fronts in Egypt, Gallipoli, Mesopotamina and Palestine, winning numerous distinctions. Two mule and one camel corps were raised and placed at the service of the British Government for the period of the War, and in addition to furnishing nearly 28,000 recruits for the British Indian Army and maintaining the State Imperial Service Contingent at full strength, contributed substantially in money and material. Again in 1919 on the outbreak of hostilities with Afghanistan His Highness served personally on the Frontier on the Staff of the General Officer Commanding and the Imperial Service Contingent saw active service towards Kohat and Quetta fronts. For his services on the N. W. Frontier His Highness was mentioned in despatches.

His Highness was selected by His Excellency the Viceroy to represent the Ruling Princes of India at the Imperial War Conference and Imperial War Cabinet in June 1918 and during his stay in Europe His Highness paid visits to all the different and principal fronts in Belgium, France, Italy and Egypt (Palestine) and received the following decorations from the allied Sovereigns and Governments:—(*a*) Grand Cordon of the Order de Leopold, (*b*) Grand Cross of the Legion of Honour, France, (*c*) Grand Cross of the Order of the Crown of Italy, (*d*) Grand Cordon of the Order of the Nile, (*e*) Grand Cross of the Order of the Crown of Roumania and (*f*) Grand Cross of the Order of St. Saviour of Greece (1926).

His Highness represented the Indian Princes at the League of Nations in 1925. In 1926, he was elected Chancellor of the Chamber of Princes (Narendra Mandal). He was re-elected

Chancellor of the Chamber in 1927-28-29-30. In 1930, His Highness led the Princes' delegation to the Round Table Conference. He was again elected Chancellor of the Chamber of Princes in 1933.

Sirmur (Nahan).—This is a hilly State in the Himalayas under the Political control of the Hon'ble the Agent to the Governor-General, Punjab States, Lahore. Its history is said to date from the 11th century. In the eighteenth century the State was able to repulse the Gurkha invasion, but the Gurkhas were invited to aid in the suppression of an internal revolt in the State and they in turn had to be evicted by the British. In 1857 the Raja rendered valuable services to the British, and during the second Afghan War he sent a contingent to the North-West Frontier. The present Prince is H. H. Maharaja Rajendra Prakash who was born in 1913 and succeeded in 1911. The main agricultural feature of the State is the recent development of the Kiarda Dun, a fertile level plain which produces wheat, gram, rice, maize and other crops. The State forests are valuable and there is an iron foundry at Nahan which was started in 1867 but, being unable to compete with the imported iron, is now used for the manufacture of sugar-cane crushing mills. The State supports a Corps of Sappers and Miners which served in the Great War. It was captured with General Townshend's force at Kut-al-Amara but the Corps was reconstituted and sent to service.

UNDER THE GOVERNMENT OF BURMA.

The States under this Government comprise the Shan States which are included in British India though they do not form part of Burma proper and are not comprised in the regularly administered area of the Province and the Karenni States which are not part of British India and are not subject to any of the laws in force in the Shan States or other parts of Burma.

The Shan States comprise the two isolated States of Hsawnghsup and Singaling Hkamti in the Upper Chindwin District under the supervision of the Commissioner, Sagaing Division, the eight petty village communities under separate hereditary Chiefs known as Hkamti Long in the Myitkyina District and the two main divisions of the Shan States known as the Northern and Southern Shan States numbering six and thirty States respectively which are under the Commissioner, Federated Shan States.

Hsawnghsup with an area of 529 square miles and a population of 7,239 lies between the 24th and 25th parallels of latitude and on the 95th parallel of longitude between the Chindwin river and the State of Manipur.

Singaling Hkamti has an area of 983 square miles and a population of 2,157 and lies on the 28th and 90th parallels of latitude and longitude respectively.

The Hkamti Long States have an area of 200 square miles with a population of 5,349 and lie between the 27th and 28th parallels of latitude on the Upper Waters of the N'Mai branch of the Irrawaddy.

The Northern Shan States (area 20,156 square miles and population 636,107) and the Southern Shan States (area 36,157 square miles and population 870,230), form with the unadministered Wa States (area about 2,000 square miles) and the Karenni States, a huge triangle lying roughly between the 19th and 24th parallels of latitude and the 96th and 102nd parallels of longitude with its base on the plains of Burma and its apex on the Mehkong river.

The population consists chiefly of Shans who belong to the Shan group of the Tai Chinese family; the remainder belong chiefly to the Wa-palaung and Mon Khmer groups of races of the Austro-Asiatic brand of the Austric family, or to the Karen family which Sir George Grievson now proposes to separate from the Tai Chinese family. There are also a number of Kachins and others of the Tibeto Burman family. The Shans themselves shade off imperceptibly into a markedly Chinese race on the frontier. Buddhism and Animism are the principal religions.

The climate over so large an area varies greatly. In the narrow lowlying valleys the heat in summer is excessive. Elsewhere the summer shade temperature is usually 80 to 95° Fahr. In winter frost is severe on the paddy plains and open downs but the temperature on the hills is more equable. The rainfall varies from 50 to 100 inches in different localities.

The agricultural products of the States are rice, pulses, maize, buckwheat, cotton, sessamum, groundnuts, oranges and pineapples.

Land is held chiefly on communal tenure but unoccupied land is easily obtainable on lease from the Chiefs in accordance with special rules for non-natives of the States. Great spaces of the States are suitable for cattle, pony and mule breeding and in the Northern States Chinese settlers appear to have found the latter a very paying proposition.

The mineral resources of the States are still unexplored. The Burma Corporation have a concession for silver, copper, lead and zinc in the Northern States which they claim to be the richest in the world. The Mawson area in the Southern States is also rich in lead. Lignite and iron ore of a low grade are found in many places.

Lashio, the headquarters of the Northern Shan States, is the terminus of the Myohaung-Lashio Branch of the Burma Railways (178 miles) and is also connected with Mandalay by a cart road

The Burma Corporation's narrow-gauge private railway track 46 miles long connects their Bawdwin mine with the Burma Railways system at Namyao.

The Southern Shan States are served by the Burma Railways branch line Thazi to Heho (37 miles) which has recently been extended to Tayaw in the Yawnghwe plain.

Taunggyi, the headquarters of the Southern Shan States, is connected with Thazi by a well-graded motor road. The States vary much in size and importance. The largest State is Kengtung with an area of 12,400 square miles and population 225,894.

Hsipaw with an area of 4,400 square miles and population 148,731 is the richest State with a gross revenue of Rs. 10,62,418.

The Sawbwas of Kengtung, Hsipaw and Yawnghwe and Mongnai have salutes of nine guns while the Mong Mit Sawbwa has a personal salute of the same number.

Administration.

Under the Burma Laws Act, 1898, the Civil, Criminal and Revenue administration of every Shan State is vested in the Chief of the State subject to the restrictions specified in the sanad of appointment granted to him and under the same Act the law to be administered in each State is the customary law of the State so far as it is in accordance with justice, equity and good conscience and not opposed to the law in force in the rest of British India. The customary law may be modified by the Governor who has also power to appoint officers to take part in the administration of any State and to regulate the powers and proceedings of such officers. The Chiefs are bound by their sanads to follow the advice of the Superintendents appointed but subject to certain modifications which have been made in the customary law relating to criminal and civil justice have more or less maintained the semi-independent status which was found existing at the annexation of Upper Burma.

In 1920, Sir Reginald Craddock, Lieutenant-Governor of Burma, proposed a scheme for the sanction of the Secretary of State under which the Chiefs of the Northern and Southern Shan States have agreed to federalise the departments of Government in which they had been previously largely dependent on contributions from the Provincial Funds. Under this scheme no interference is contemplated in the internal management of the States and the Chiefs continue to collect their taxes and be responsible for law and order, maintain Courts for the disposal of criminal and civil cases, appoint their own officials and control their own subjects under the advice of the Superintendents. But the Federation is responsible for the centralised Departments of Public Works, Medical, Forests, Education, Agriculture and to a small extent Police. In place of the individual tribute formerly paid by them the Chiefs contribute to the Federation a proportion of their revenue which amounts roughly to the expenditure hitherto incurred by them on the heads of administration now centralised while the Provincial Government surrenders to the Federation all provincial revenue previously derived from the States and makes an annual contribution to enable it to maintain its services at the same degree of efficiency formerly enjoyed. The Federation on the other hand pays a fixed proportion of its revenue to the Provincial Treasury as tribute in place of the individual contributions of the Chiefs. Under this scheme the Federation is a sub-entity of the Burma Government, is self-contained and responsible for its own progress. The Chiefs express their views on Federal and general matters through a Council of Chiefs consisting of all Chiefs of the rank of Sawbwa and four elected representatives of the lesser Chiefs. The Superintendents, Northern Shan States and the Commissioner of the Federated Shan States to whom the supervision of the Federation has been entrusted are *ex-officio* members of the Council. The scheme was sanctioned and brought into force with effect from October 1922. The first meeting of the Council of Chiefs was formally opened by His Excellency the Governor Sir Spencer Harcourt Butler, G.C.I.E., K.C.S.I., I.C.S., in March 1923.

Karenni.

This district which formerly consisted of five States now consists of three as two have been amalgamated with others. It has a total area of 3,015 square miles and a population of 58,761. It lies on the south of the Southern Shan States between Siam and the British district of Toungoo. The largest State is Kantarawadi with an area of 3,000 square miles and a population of 30,677 and a revenue of nearly 1½ lakhs of rupees. More than half of the inhabitants are Red Karens. An Assistant Political Officer is posted at Loikaw subject to the supervision of the Superintendent, Southern Shan States, who exercises in practice much the same control over the Chiefs as is exercised in the Shan States though nominally they are more independent than their Shan neighbours. Mineral and forest rights however in Karenni belong to the Chiefs and not to the Government. In the past substantial contributions from Provincial revenues have been made to the Karenni Chiefs for education and medical service. The Chiefs are at present unwilling to surrender their special rights and join the Shan States Federation though very considerable advantages might accrue from their doing so.

The principal wealth of the country used to be in its teak timber and a large alien population was at one time supported by the timber trade. This has largely declined in the last few years and unless the Chiefs are prepared to deny themselves and close their forests they will soon disappear.

JAMMU AND KASHMIR STATE.

The territory known generally as the Jammu and Kashmir State lies between 32° and 37° N. and 73° and 80° E. It is an almost entirely mountainous region with a strip of level land along the Punjab Border, and its mountains, valleys and lakes comprise some of the grandest scenery in the world. The State may be divided physically into three areas: the upper, comprising the area drained by the River Indus and its tributaries; the middle, drained by the Jhelum and Kishenganga Rivers; and the lower area, consisting of the level strip along the southern border, and its adjacent ranges of hills. The dividing lines between the three areas are the snow-bound inner and outer Himalayan ranges known as the Zojila and the Panchal. The area of the State is 84,258 square miles. Beginning in the south where the great plain of the Punjab ends, it extends northwards to the high Karakoram mountains "Where three Empires Meet."

Briefly described, the State comprises the valleys of the three great rivers of Northern India, *viz.*, the upper reaches of the Chenab and the Jhelum, and the middle reaches of the Indus. The total population is 3,220,518 souls.

History.—Various historians and poets have left more or less trustworthy records of the history of the Valley of Kashmir and the adjacent regions. In 1586 it was annexed to the Moghul Empire by Akbar. Srinagar, the Capital, originally known as Pravarapura, had by then been long established though many of the fine buildings said to have been erected by early Hindu rulers had been destroyed by the Muhammadans who first penetrated into the Valley in the fourteenth century. In the reign of Sikandar, who was a contemporary of Tamer lane, a large number of Hindus was converted to Islam. Jehangir did much to beautify the Valley but after Aurangzeb there was a period of disorder and decay and by the middle of the eighteenth century the Suba or Governor of Kashmir had become practically independent of Delhi. Thereafter the country experienced the oppression of Afghan rule until it was rescued in 1819 by an army sent by Maharaja Ranjit Singh. The Sikh rule was less oppressive than that of the Afghans. The early history of the State as at present constituted is that of Maharaja Shri Gulab Singhji, a scion of the old Ruling Family of Jammu, who rose to eminence in the service of Maharaja Ranjit Singh of Lahore and was, in recognition of his distinguished services, made Raja of Jammu in 1820. He held aloof from the war between the British and the Sikhs, only appearing as mediator after the battle of Sobraon (1846), when the British made over to him the valley of Kashmir and certain other areas in return for his services in re-establishing peace. His son, His Highness Maharaja Ranbir Singhji, G.C.S.I., G.C.I.E., a model Hindu and one of the staunchest allies of the British Government, ruled from 1857 to 1885. He did much to consolidate his possessions and evolve order in the frontier districts. He was succeeded by his eldest son His Highness Maharaja Sir Pratap Singhji, G.C.S.I., G.C.I.E., G.B.E., who died on 23rd December 1925 and was succeeded by His Highness the present Maharaja Shri Harisinghji Bahadur.

The most notable reform effected in the State during the reign of the late Maharaja was the Land Revenue Settlement originally carried out under Lawrence and revised from time to time.

Administration.—For some years after the accession to the *gadi* of the late Maharaja, the administration of the State was conducted by a Council over which the Maharaja presided. In 1905 this Council was abolished and the administration of the State was thenceforward carried on by His Highness the Maharaja with the help of a Chief Minister and a number of Ministers in charge of different portfolios. This system continued until the 24th January 1922 when an Executive Council was inaugurated. Very recently, certain modifications have been introduced in the Constitution as a result of which the contact of His Highness with the administration of the State has become more direct and intimate.

The British Resident has his headquarters at Srinagar and Sialkot and there is also a Political Agent at Gilgit. A British Officer is stationed at Leh to assist in the supervision of the Central Asian Trade with India which passes through Kashmir.

In the Dogras the State has splendid material for the Army which consists of 7,798 troops. Besides this, thousands of Dogras serve in the Indian Army.

Finance.—The financial position of the State is strong. The total revenue including jagirs, is about Rs. 2,70,00,000; the chief sources being land, forests, customs and excise and Sericulture. There is a big reserve and no debt.

Production and Industry.—The population is pre-eminently agricultural and pastoral. The principal food crops are rice, maize and wheat. Oilseed is also an important crop. Barley, cotton, saffron, tobacco, beans, walnuts, almonds and hops are also grown. Pears and apples, the principal fruits of the Valley, are exported in large quantities. The State forests are extensive and valuable. The principal species of timber trees are deodar, blue pine and fir. The most valuable forests occur in Kishtwar, Karnah and Kamraj Ilaqas. A survey of the mineral resources of the State is being conducted under an expert. The most noteworthy of the minerals are bauxite, coal, fuller's earth, kaolino, slate, zinc, copper and talc. Gold is found in Baltistan and Gilgit, sapphires in Paddar, aquamarines in Skardu and lead in Uri. The silk filature in Srinagar is the largest of its kind in the world. Manufacture of silk is a very ancient industry in Kashmir. Zain-ul-Abidin who ruled from 1421 to 1472 is said to have imported silk weavers from Khurasan and settled them here. Woollen cloth, shawls, papier-mâché and wood carving of the State are world-famous. The State participated in the British Empire Exhibition of 1924. The Kashmir Court was styled "The Gem of The Smaller Courts" and attracted many visitors.

Communications.—Great efforts have been made and are being made towards the improvement of roads for wheeled traffic in the State. The Jhelum Valley road (196 miles) which links the Kashmir Valley with the Punjab and the North-Western Frontier Province is considered to be one of the finest motorable mountain roads in the world.

The Banihal Cart Road, 205 miles long, which has recently been completed, joins Kashmir with the North Western Railway system at Jammu-Tawi and is also a fine motorable road.

Roads for pack animals lead from Srinagar, the summer capital of Kashmir, to the frontier districts of Gilgit and Ladakh. Internal village communications have also been much improved.

The Jammu-Suchetgarh Railway, a section of the Wazirabad-Sialkot branch line of the North Western Railway system, is the only Railway in the State. The mountainous nature of the country has made the extension of the line into the heart of the State so far impracticable.

Public Works.—In 1904 a flood spill channel above Srinagar was constructed to minimise the constant danger of floods in the River Jhelum and it was hoped that the danger would be still further reduced by the carrying out of a scheme for lowering a part of the bed of the River Jhelum by dredging, which has been taken in hand. It is interesting to know that dredging operations were once before carried out in the reign of Avantivarman (A.D. 855-883) by his engineer Suyya near Sopore, with the same object. Good progress has been made with irrigation but the most important scheme of recent years has been the installation of a large Electric Power Station on the Jhelum River at Mahora which was completed in 1907.

Education.—Of the total population of 3,259,527 excluding the frontier ilaqas where literacy is not recorded, there are 72,228 persons who are able to read and write, of whom 4,007 only are females. In other words, 26 out of every 1,000 persons aged five or more can read and write. Among males 46 in every 1,000 are literate. The number of educational institutions including two Arts Colleges and two technical institutes is 784 and is being steadily increased. In municipal areas education for boys has been made compulsory from 1929. Much progress has also been made in female education and two new girls' schools have been established during the year.

Reforms.—The most important reforms connected with the present Maharaja's reign have been the establishment of an independent High Court of Judicature modelled on British High Courts and the annual summoning of representatives from the provinces as a beginning of popular institutions in the State. Important legislative measures passed by His Highness' Government in recent years include the raising of the age of consent to 14 for girls and 18 for boys and the Agriculturists' Relief Regulation meant to cope with the problem of rural indebtedness.

THE CHAMBER OF PRINCES.

The Narendra Mandal, or Chamber of Princes came into existence, with the earnest co-operation of a number of leading Princes themselves as one of the results of the Report on Indian constitutional reform presented to Parliament by Mr. Montagu, Secretary of State for India and H. E. Lord Chelmsford, Viceroy and Governor-General of India, in 1919. The proposal was that the Chamber should exist as a permanent consultative body, with the Viceroy as President and the members composing the Chamber consisting mainly of the Princes and Chiefs having salutes, or whose membership might otherwise be considered desirable by the Viceroy. Certain smaller Chiefs were grouped and were given the privilege of nominating a member to represent them from year to year. The Chamber is a recommendatory body, which performs its functions under a constitution approved by the Secretary of State and it deals with questions submitted to it concerning the Princes and their rights and privileges generally and their position in imperial affairs.

The Chamber was formally inaugurated by H.R. H. the Duke of Connaught on 8th February 1921. It meets regularly once a year and the agenda of subjects for discussion is framed and proposed by the Chancellor of the Chamber who at present is His Highness the Maharajah of Patiala. The Chamber selects by vote its own officers, who are the Chancellor, a pro-Chancellor to act for him in his absence out of India and a Standing Committee of the Chamber. This Committee considers before the annual meetings the subjects to be discussed at them.

Until 1929, the proceedings of the Chamber were considered as confidential and there was no admittance of the general public to its meetings. At the annual session in February 1929, the Princes passed a resolution by which all meetings were ordinarily made open to the public. The Chamber contains very restricted accommodation and admission has to be regulated according to the number of seats available.

Indian States' Tribute.

Many of the States pay tribute, varying in amount according to the circumstances of each case, to the British Government. This tribute is frequently due to exchanges of territory or settlement of claims between the Governments, but is chiefly in lieu of former obligations to supply or maintain troops. The actual annual receipts in the form of tribute and contributions from Indian States are summarised in the following table. The relations of the States to one another in respect of tributes are complicated, and it would serve no useful purpose to enter upon the question. It may, however, be mentioned that a large number of the States of Kathiawar and Gujarat pay tribute of some kind to Baroda, and that Gwalior claims tribute from some of the smaller States of Central India :—

States paying tribute directly to the Government of India.

	£
Tribute from Jaipur	26,667
„ „ Kotah	15,648
„ „ Udaipur	13,333
„ „ Jodhpur	6,533

Tribute from Cutch	5,484

It was announced at the Coronation Durbar of 1911 that there would in future be no Nazarana payments on successions.

Foreign Possessions in India.

Portugal and France both hold small territorial possessions in the Indian Peninsula.

The Portuguese possessions in India, all of which are situated within the limits of Bombay Presidency, consist of the Province of Goa on the Arabian Sea Coast; the territory of Daman with the small territory called Pragana-Nagar-Avely on the Gujarat Coast, at the entrance to the Gulf of Cambay; and the little island of Diu, with two places called Gogla and Simbor, on the southern extremity of the Kathiawar Peninsula. All these three territories constitute what is called the State of India.

GOA.

Goa forms a compact block of territory surrounded by British districts. Savantwadi State lies to the north of it, the Arabian Sea on the west and North Kanara on the south, and the eastern boundary is the range of the Western Ghats, which separates it from the British districts of Belgaum and North Kanara. The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 miles. The territory has a total area of 1,301 square miles and consists of the *Velhas Conquistas*, or Old Conquests, comprising the island of Goa, acquired by the Portuguese in 1510, and the neighbouring municipalities of Salsette, Bardez, and Mormugao acquired in 1543; and of the *Novas Conquistas*, or New Conquests, comprising the municipalities of Pernem, Sanquelim, Ponda, Quepem, Canacona, Satari and Sanguem acquired in the latter half of the 18th century. The small island of Angediva situated opposite the port of Karwar, in the British district of North Kanara, forms administratively a portion of the Canacona municipality. This was acquired in 1505. The whole country is hilly, especially the eastern portion, the predominating physical feature being the Western Ghats, which besides bounding the country along the north-east and south-east, just off westward and spread across the country in a succession of spurs and ridges. There are several conspicuous isolated peaks, of which the highest, Sonsagar, is 3,827 feet high.

The country is intersected by numerous rivers running westward from the Ghats, and the principal eight, which are all navigable, are in size of some importance. Goa possesses a fine harbour, formed by the promontories of Bardez and Salsette. Half-way between these extremities lies the *cabo*, or cape, which forms the extremity of the island of Goa. This divides the whole bay into two anchorages, known as Aguada and Mormugao. Both are capable of accommodating the largest shipping from September to May, but Aguada is virtually closed during the south-west monsoon, owing to the high winds and sea and to the formation of sand bars across the estuary of the Mandovi river, which opens into Aguada. Mormugao is accessible at all times and is therefore the harbour of commercial importance. It is the terminus of the railway running to the coast from the inland British system of lines. A breakwater and port have been built there and the trade is considerable being chiefly transit trade from British territory. The international transit of Mormugao port was in 1926 about Rs. 440 lakhs.

The People.

The total population of Goa was 531,952 at the census of 1921. This gives a density of 408 persons to the square mile and the population showed an increase of 9 per cent. since the census ten years previously. In the Velhas Conquistas the majority of the population is Christian. In the Novas Conquistas Hindus are more numerous than Christians. The Moslems in the territory are numbered in a few thousands. The Christians still very largely adhere to caste distinctions, claiming to be Brahmans, Charados and low castes, which do not intermarry. The Hindus who form about one-half of the total population are largely Maratha and do not differ from those of the adjacent, Konkan districts of Bombay. All classes of the people, with the exception of Europeans, use the Konkani dialect of Marathi with some admixture of Portuguese words. The official language is Portuguese, which is commonly spoken in the capital and the principal towns as well as by all educated people. Nearly all the Christians profess the Roman Catholic religion and are spiritually subject to an archbishop who has the titles of Primate of the East and Patriarch of the East Indies and exercises ecclesiastical jurisdiction also over a portion of British India, and the provinces of Macau (China) and Timor (Oceania), with missions in foreign countries and Mocambique (Portuguese East Africa). The Christians of Daman and Diu are subject under a new Treaty signed in 1928 between Portugal and the Holy See to the Archbishop of Goa. There are numerous churches in Goa, mostly built by the Jesuits and Franciscans prior to the extinction of the religious orders in Portuguese territory. The churches are in charge of secular priests. Hindus and Mahomedans now enjoy perfect freedom in religious matters and have their own places of worship. In the early days of Portuguese rule the worship of Hindu gods in public and the observance of Hindu usages were strictly forbidden and rigorously suppressed.

The Country.

A little over one-third of the entire territory of Goa is stated to be under cultivation. The fertility of the soil varies considerably according to quality, situation and water-supply. The Velhas Conquistas are as a rule better and more intensively cultivated than the Novas Conquistas. In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying from half an acre to five or six acres. The staple produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the needs of the population for two-thirds of the year. Next to rice, the culture of cocoanut palms is deemed most important, from the variety of uses to which the products are applied. Hilly places and inferior

soils are set apart for the cultivation of cereals and several kinds of fruits and vegetables are cultivated to an important extent. The condition of the agricultural classes in the Velhas Conquistas has improved during recent years, owing to the general rise in the prices of all classes of agricultural produce and partly to the current of emigration to British territory. There is a great shortage of agricultural labour in the Velhas Conquistas, and the cultivation of rice fields is now practically controlled by the Hindu population. In the summer months bands of artisans and field labourers from the adjoining British territory make their way into Bardez where the demand for labour is always keen. Stately forests are found in the Novas Conquistas. They cover an area of 116 square miles and are under conservation and yield some profit to the administration. Iron is found in parts of the territory; but has not been seriously worked. Manganese also exists and some mines are being worked at present, the ore being exported to the Continent.

Commerce.

In the days of its glory, Goa was the chief entrepot of commerce between East and West and was specially famous for its trade in horses with the Persian Gulf. It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant.

The present trade of Goa is not very large. Its imports amount to about Rs. 160 lakhs and exports to about Rs. 40 lakhs. The discrepancy is met from the money sent to Goa by the many emigrants who are to be found all over the world. Few manufacturing industries of any moment exist and most manufactured articles in use are imported. Exports chiefly consist of cocoanuts, betel nuts, mangoes and other fruits and raw produce.

A line of railway connects Mormugao with the Madras and Southern Mahratta Railway. Its length from Mormugao to Castle Rock above the Ghats where it joins the British system, is 51 miles, of which 49 are in Portuguese territory. The railway is under the management of the Madras and Southern Mahratta Railway administration, and the bulk of the trade of Mormugao port is what it brings down from and takes to the interior. The telegraphs in Portuguese territories are worked as a separate system from the British. The latter, however, had an office at Nova-Goa maintained jointly by the two Governments but since 1925 the Nova-Goa office has been handed over to the Portuguese Government which now maintains and works all the telegraphs in its territories.

Taxes and Tariffs.

The country was in a state of chronic financial equilibrium for nearly sixty years with occasional exceptions. The last war enhanced the deficits to alarming proportions and these were met by fresh taxes and new loans. Most of the new taxes were the result of the initiative of the Governor-General Jaime de Morais, who is popularly known as the 'Governor of Taxes." Only in 1927 the country experienced the joys of a balanced budget and the public servants whose salaries had always remained in arrears are now being paid regularly. There is an estimated surplus of about a lakh and a half which has been ear-marked for promoting the industrial progress of the country. If municipal and national taxes be added together, the country presents a very high incidence of taxation, even higher than that of British India, the average coming to about Rs. 8-8 *per capita*. There is no income-tax, except for government servants, but there is a special ten per cent tax on all incomes derived in the shape of interest on loans. This tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief sources of revenue are the land tax, Excise and the customs. There is a special tax on emigrants which yields to the State about Rs. 60,000 The country being economically backward, the taxes give very little indication of its productive capacity or of its annual wealth. The national wealth is a matter of pure conjecture for lack of statistics.

The tariff schedule is based on the three-fold principle, fiscal, protective and preferential. There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent. according to the nature of the commodities, but the duties in several cases are specific, not *ad valorem*. This causes considerable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonies. Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent. on their basic price.

The Capital.

Nova-Goa, the present capital of Portuguese India, comprehends Panjim and Ribandar, Old Goa is some six miles distant from the new city. Panjim occupies a narrow strip of land leading up to the Cabo, the cape dividing the Aguada bay from that of Mormugao, and mainly slopes down to the edge of the Aguada. It was selected as the residence of the Portuguese Viceroy in 1759, and in 1843 it was raised to its present rank as the capital of Portuguese India. The appearance of the city, with its row of public buildings and elegant private residences, as seen from the water is very picturesque and this impression is not belied by a closer inspection of its neat and spacious roads, bordered by decent, tidy houses. The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library and the Government Press. Other noticeable buildings are the Cathedral and various churches, the viceregal palace, the High Court and so on. The square in the lower part of the town is adorned with a life-sized statue of Albuquerque standing under a canopy.

History.

Goa was captured for the Portuguese by Alfonso de Albuquerque in 1510. Albuquerque promptly fortified the place and established Portuguese rule on a firm basis. From this time Goa rapidly rose in importance and became the metropolis of Portuguese power in the East. There was constant fighting with the armies of the Bijapur kingdom, but the Portuguese held their own and gained the surrounding territory now known as the Velhas Conquistas.

The subsequent history of the town is one of ostentation and decay. Goa reached its summit of prosperity at the end of the sixteenth century. The accounts of travellers show that the Goa of those days presented a scene of military, ecclesiastical and commercial magnificence which has had no parallel in the British capitals of India. Portugal, however, with its three millions of population, was too small to defend itself against Spain and maintain at the same time its immence Empire in the four Continents. Albuquerque tried to consolidate Portuguese rule in India by his policy of attracting the conquered Indians and granting them civil and religious liberties. His contemporaries, however, could not understand his far-seeing statesmanship and after his death they undid all his work basing their dominion on conquest by the sword and military force and they laboured to consolidate it by a proselytising organisation which throws all the missionary efforts of every other European power in India into the shade. Old Goa, as the ruins of the old capital are called to-day, had a hundred churches, many of them of magnificent proportions, and the Inquisition which was a power in the land. The sixty years' subjection to Spain in the 17th century completed the ruin of the Portuguese Empire in the East and though the Marquis of Pombal in the 18th century tried to stave off its decadence, his subordinates in far-off India either could not understand or would not carry out his orders and even his strong hand was unable to stop the decline. It was in the 19th century that the colonials began to enjoy full Portuguese citizenship and sent their representatives to the Parliament in Lisbon.

Modern Times.

There was frequently recurring fighting and in 1741 the Marathas invaded the neighbourhood of Goa and threatened the city itself. An army of 12,000 men arrived from Portugal at the critical moment. The invaders were beaten off, and the Novas Conquistas were added to the Portuguese possessions. In 1844 the shelter given by Goa to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bombay. In 1852 the Ranes of Satari, in the Novas Conquistas, revolted. In 1871 the native army in Goa mutinied and the King's own brother came from Lisbon to deal with the trouble and having done so disbanded the native army, which has never been reconstituted. But another outbreak among the troops took place in 1895 and the Ranes joining them the trouble was again not quieted until the arrival of another special expedition from Lisbon. The Ranes again broke out in 1901 and again in 1912, troops being again imported to deal with the last outbreak, which was only reported concluded in the summer of 1913. There has been no outbreak after that date.

The people on the whole appear to be quite satisfied with the Portuguese connection. There is no agitation for further reforms as in British India and not a sign of disaffection against Portuguese rule. This is chiefly due to the fact that under the present regime the natives of Goa enjoy complete equality with the natives of Portugal, many of the sons of Goa occupying high and responsible positions in Portugal. Thus Elvino de Britto who was Minister of Public Works towards the end of the last century was a native of Goa as was the father of Dr. Bettencourt Rodrigues, Minister for Foreign Affairs in General Carmonas dictatorial Government. Natives of Goa are also Dr. Almeida Arez, the President of the Supreme Court in Lisbon, Dr. Cacteno Gonsalves, Judge of the same Court and Mr. Alberto Xavier, Secretary-General of the Ministry of Finance.

Administration.

The Lisbon Government by Decree No. 3266, dated 27th July 1917, enacted new rules regarding the administration of Portuguese India under an Organic Charter (Carta Organica) in force since 1st July 1919. This Charter, regarding civil and financial administration of the colony, was modified by rules Nos. 1005 and 1022, dated 7th and 20th August 1920, and decrees Nos. 7008 and 7030. dated 9th and 16th October. A new Organic Charter modifying in certain parts the earlier one was granted by Decree No. 12499 of 4th October 1926 and is now in force.

The territory of Portuguese India is ruled by one Governor-General, residing in the Capital of the State, at Panjim *alias* Nova-Goa, and is divided into three districts: Goa, Daman and Diu. The last two are each under a Lieutenant-Governor. The district of Goa is under the direct superintendency of the Governor-General.

Subordinate to the Governor-General the following Secretariats are working: Home and Political, Finance, Customs, Education, Military, Naval, Agriculture, Health and Public Works. There are also three special and autonomous Departments, which do not constitute exclusive Secretariats, one of them being the Department of Posts and Telegraphs, the second that of Survey and the third that of the Fiscal of the W. I. P. Railway.

As the principal organ of administration next to the Governor-General and in collaboration with him works a Governor's Council (*Conselho do Governo*) with Legislative and advisory powers. The Council is constituted, in addition to the Governor-General, *ex-officio* President, of four officials (Attorney-General, the Director of Finances, the Director of Civil Administration and the Director of Public Works), five elected members (three representing *Velhas Conquistas*, one the *Novas Conquistas* and one the Districts of Daman and Diu) and five members nominated by the Governor-General to represent the minorities, agricultural, commercial and other interests and the press.

In each province of Goa, Daman and Diu, there is a District Council to supervise the Municipalities and other local institutions. The District Council of Goa is composed of the Director of Civil Administration, President, the Government Prosecutor of the Nova-Goa Civil Court; the Deputy Chief Health Officer; the Engineer next to the Director of Public Works; the Deputy Director of Finances; the Chairman of the Municipal Corporation of the Islands; one member elected by the Commercial and Industrial Associations of the district; one member elected by the 60 highest tax payers of Goa; one member elected by the Associations of Land-

owners and Farmers of the District; and one member advocates elected by the Legislative Council among the legally qualified.

At Daman and Diu the corresponding body is composed of the local Governor, President, the Government Prosecutor, the Chief of the Public Works Department, the Health Officer, the Financial Director of the district, the Chairman of the Municipal Corporation, two members elected by 40 highest tax payers of the District and one member elected by the Merchants, Industrialists and Farmers of the district.

Under the provisions of the above quoted Decree is also officiating in the capital of Portuguese India a administrative court tribunal to take cognizance and decide all litigious administrative matters, fiscal questions and accounts. It is named *Tribunal Administrativo Fiscal e de Contas* and is composed of the Chief Justice as President, four High Court judges, one superior Government officer, who must be a Bachelor of Laws, nominated by the Government and a citizen, who is not an official elected by the Governor-General's Council. When matters regarding finances and accounts come up for decision and discussion the Director of Finances also sits on this Tribunal.

Under the presidency of the Governor-General the following bodies are also working:—

Technical Council of Public Works.—Its members are all engineers on permanent duty in the head office, a military officer of highest rank in the army or navy, the Director of Finances, the Attorney-General, the Chief Health Officer and a Secretary being a clerk of the Public Works Department appointed by the Director of Public Works.

Council of Public Instruction.—This Council presided over by the Governor-General is composed of five officials: the Director of Civil Administration, the Director of the Medical College, the Director of the Lyceum, the Director of the Normal School and the Inspector of Primary Schools, and four nominated members.

There is one High Court in the State of India with five Judges and one Attorney-General; and Courts of Justice at Panjim, Margao, Mapuçá, Bicholim, Quepém e Damão; and Municipal Courts of Justice at Mormugão (Vasco da Gama), Pondá, Diu and Nagar-Aveli.

PORT OF MORMUGAO.

Mormugão is situated towards the south of Aguada Bar, on the left Bar, on the left bank of Zuary River in Lat. 15° 25'N. and Long. 73° 47' E., about 225 miles south of Bombay and 6½ miles south of Panjim, the Capital of Portuguese India. The Port of Mormugão is the natural outlet to the sea for the whole area served by the M. & S. M. Ry. (metre-gauge), and offers the shortest route both passenger and goods traffic. The distance from Aden to Mormugão is about the same as from Aden to Bombay. The Port is provided with lighthouses, buoys and all necessary marks and it is easily accessible all the year round and at any hour of the day or night even without the assistance of a Pilot. Pilotage is not compulsory, but when usual pilot flag is hoisted, a qualified officer will board the vessel and render such assistance.

Mormugão Harbour is the terminal station of the West of India Portuguese Railway which is controlled by the Madras and Southern Maharatta Railway Company, with headquarters at Madras. Goods are shipped direct from Mormugão to any Continental Ports, every facility being afforded for such direct shipments. Cargo can be unloaded from or loaded direct into Railway wagons, which run alongside steamers, thus reducing handling. Warehouses are built on the quay and have railway sidings alongside. Steamers of over 5,000 tons net register, from any Continental Ports can be discharged or loaded rapidly and in complete safety, in a working day of 10 hours 650 tons iron work or 800 tons bale or bag cargo can easily be loaded or discharged. The port is provided with steam cranes and all other appliances for quick loading and discharging of vessels, one of the cranes being of 30 tons capacity for discharging heavy lifts. The tonnage, quay dues and all other charges are very low, special concessions being granted for steamers arriving from European or American Ports touching Lisbon. Fresh water can be obtained at a low cost.

The Bombay Steam Navigation Company's (Shepherd) steamers between Bombay and Mangalore call at Mormugão twice a week. The British India Steam Navigation Company's steamers between Bombay and Africa call at Mormugão at least once a month. The Ellerman Strick Line maintains a regular service from Liverpool to Mormugao calling occasionally at Lisbon. This service offers every facility for shipment from the United Kingdom to stations on the M. & S. M. Railway under the "Combined Sea and Rail Through Bills of Lading." There are several stevedoring firms, the maximum rate for discharging or loading coal and general cargo being fixed by Government at 6 annas per ton, deadweight. Goods for British India pass through Goa without any charge being collected by Portuguese Government. British Customs duty payable at Castle-Rock can be paid by the Railway Company and collected at destination. Goods from stations on the M. & S. M. Ry. System to Mormugão or *vice-versa* are railed without transhipment, thus avoiding a second handling. Steam tugs, barges, etc., for unloading in the stream can be had at a very low charge.

With a view to promoting the economical, commercial and industrial development of Mormugão, a special Department under the designation of the "Mormugão Improvement Trust" with its head office at Vasco da Gama, 2 miles from Mormugão Harbour, has been created and the Local Government have introduced various regulations granting every facility to those intending to raise buildings for residential and industrial purposes in the whole area, comprising about 300 acres, near the Harbour. There are over 2,000 plots, each measuring between 1,000 and 2,000 square metres (each square yard—0·8361 square metre), available for residential quarters, granted on permanent lease on each payment of 2 annas to Rs. 1-8 per square metre, according to their situation, in addition to an annual payment of 4 pies per square metre as lease-hold rent.

Within about 60 days from the date of application for a plot, the same is made over to the applicant or to the highest bidder, should there be more than one applicant for one and the same plot. The plan of buildings is in all cases subject to the approval of the Chairman of the Improvement Trust, such plan being required to be submitted within 60 days from the date the plot is made over to the lessee, and the period within which building is to be completed is 2 years. Importation of building materials is allowed free of Custom duties. In addition to the above, there is an extensive area available and reserved only for Industrial and Commercial Establishments, this area being known as "Free Zone". Within this "Free Zone," in addition to plots, which are leased at a very low rate for building factories, bonded warehouses or for establishment of any kind of industrial or commercial concerns, in accordance with rules and regulations lately issued by the local Government, special concessions and privileges are granted, such as:

(*I*) *For Establishment of Factories or Industrial Concerns.*—All machinery, building materials, tools, raw materials, etc., required for construction, maintenance and regular working of the Factories are permitted free of import duty, likewise export of the goods manufactured within the "Free Zone."

(*II*) *For Establishment of Depots of Manufactured or Unmanufactured Goods, Bonded Warehouses, etc., etc.*—All goods imported by the Concessionaire for the purpose of such depot are allowed to be exported to any Foreign territory, after being improved and repacked, if necessary, without payment of either import or export duty.

(*III*) *Exemption of Government Taxes.*—In addition to the above privileges, all Factories, Commercial Establishments, buildings, etc., within the "Free Zone" are exempt from all Government taxes for a period of 20 years from May 1923. Applications for any of the above concessions have to be addressed to H.E. the Governor-General of Portuguese India and presented at the office of the Mormugao Improvement Trust at Vasco da Gama, giving therein full particulars of the area and plot, etc., required. Such applications are disposed of within as little time as possible. Full information can be obtained from the Mormugao Improvement Trust, Vasco da Gama

DAMAN.

The settlement of Daman lies at the entrance to the Gulf of Cambay, about 100 miles north of Bombay. It is composed of two portions, namely, Daman proper, lying on the coast, and the detached pargana of Nagar Aveli, separated from it by a narrow strip of British territory and bisected by the B. B. & C. I. Railway. Daman proper contains an area of 22 square miles and 26 villages and has a population (1921) of 17,566 of whom 1,480 are Christians. The number of houses is according to the same census 4,095. Nagar Aveli has an area of 60 square miles and a population (1921) of 31,048, of whom only 271 are Christians. The number of houses is 6,069. The town of Daman was sacked by the Portuguese in 1531 rebuilt by the natives and retaken by the Portuguese in 1558, when they made it one of their permanent establishments in India. They converted the mosque into a church and have since built eight other places of worship. The native Christians adopt the European costume, some of the women dressing themselves after the present European fashion, and others following the old style of petticoat and mantle once prevalent in Spain and Portugal.

The soil of the settlement is moist and fertile, especially in Nagar Aveli, but despite the ease of cultivation only one-twentieth part of the territory is under tillage. The principal crops are rice, wheat, the inferior cereals of Gujarat and tobacco. The settlement contains no minerals. There are stately forests in Nagar Aveli, and about two-thirds of them consist of teak, but the forests are not conserved and the extent of land covered by each kind of timber has not been determined. Before the decline of Portuguese power in the East, Daman carried on an extensive commerce especially with the east coast of Africa. In those days it was noted for its dyeing and weaving.

The territory forms for administrative purposes a single district and has a Municipal Chamber and Corporation. It is ruled by a Governor invested with both civil and military functions, subordinate to the Governor-General of Goa. The judicial department is administered by a judge, with an establishment composed of a delegate of the Attorney-General and two clerks. In Nagar Aveli the greater part of the soil is the property of the Government, from whom the cultivators hold their tenures direct. A tax is levied on all lands, whether alienated or the property of the State. The chief sources of revenue are land-tax, forests, excise and customs duties.

DIU.

Diu is an island lying off the southern extremity of the Kathiawar Peninsula, from which it is separated by a narrow channel through a considerable swamp. It is composed of three portions, namely, Diu proper (island), the village of Gogla, on the Peninsula, separated by the channel, and the fortress of Simbor, about 5 miles west of the island. It has a small but excellent harbour, where vessels can safely ride at anchor in two fathoms of water and owing to the great advantages which its position offers for trade with Arabia and the Persian Gulf, the Portuguese were fired at an early period with a desire to obtain possession of it. This they gained, first by treaty with the Sultan of Gujarat and then by force of arms. Diu became opulent and famous for its commerce. It has now dwindled into insignificance. The extreme length of the island is about seven miles and its breadth from north to south, two miles. The area is 20 square miles. The population of the town of Diu, from which the island takes its name, is said to have been 50,000 in the days of its commercial prosperity. The total population of the island, according to the census of 1921, is 13,844, of whom 228 were Christians.

FRENCH POSSESSIONS.

The French possessions in India comprise five Settlements, with certain dependent lodges, or plots. They aggregate 203 square miles, and had a total population on the 26th Feb. 1931 of 286,410. The first French expedition into Indian waters, with a view to open up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen, but it failed, as also did several similar attempts which followed. In 1642 Cardinal Richelieu founded the first Campagnie d'Orient, but its efforts met with no success. Colbert reconstituted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having twice attempted, without success, to establish itself in Madagascar, Colbert's Company again took up the idea of direct trade with India and its President, Caron, founded in 1668 the Comptoir, or agency, at Surat. But on finding that city unsuited for a head establishment he seized the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, speedily retook Trincomalee; and Caron, passing over to the Coromandel coast, in 1672, seized St. Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland. He was, however, compelled to restore it to the Dutch in 1674.

The ruin of the Company seemed impending when one of its agents, the celebrated Francois Martin, suddenly restored it. Rallying under him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trincomalee and St. Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Raja of Gingee. He built fortifications, and a trade began to spring up; but he was unable to hold the town against the Dutch, who wrested it from him in 1693, and held it until it was restored to the French by the Peace of Ryswick, in 1697. Pondicherry became in this year and has ever since remained, the most important of the French Settlements in India. Its foundation was contemporaneous with that of Calcutta. Like Calcutta, its site was purchased by a European Company from a native prince, and what Job Charnock was to Calcutta Francois Martin proved to Pondicherry. On its restitution to the French by the Peace of Ryswick in 1697, Martin was appointed Governor, and under his able management Pondicherry became an entrepot of trade.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688, by grant from the Delhi Emperor; Mahé, on the Malabar Coast, was obtained in 1725-6, under the government of M. Lenoir; Karikal, on the Coromandel Coast, under that of M. Dumas, in 1739. Yanaon, on the coast of the Northern Circars, was taken possession of in 1750, and formally ceded to the French two years later.

Administration.

The military command and administration-in-chief of the French possessions in India are vested in a Governor, whose residence is at Pondicherry. The office is at present held by Monsieur George Bourret (Francois-Adrien). He is assisted by a Chief Justice and by several "Chefs de Service" in the different administrative departments. In 1879 local councils and a council-general were established, the members being chosen by a sort of universal suffrage within the French territories. Seventeen Municipalities, or Communal Boards, were erected in 1907, namely, Pondicherry, Ariancoupam, Modellarpeth, Oulgaret, Villenour, Tiroubouvane, Bahour and Nettapacam, for the establishment of Pondicherry; Karikal, Neravy, Nedouncadou, Tirunalar, Grande Aldée, Cotchéry, for the establishment of Karikal, and also Chandernagore, Mahé and Yanaon. On municipal boards natives are entitled to a proportion of the seats. Civil and criminal courts, courts of first instance and a court of appeal compose the judicial machinery. The army and establishments connected with the Governor and his staff at Pondicherry, and those of administrators at Chandernagore, Yanaon, Mahe and Karikal, together with other headquarters charges necessarily engross a large proportion of the revenue. All the state and dignity of an independent Government, with four dependent ones, have to be maintained. This is effected by rigid economy, and the prestige of the French Government is worthily maintained in the East. Pondicherry is also the scene of considerable religious pomp and missionary activity. It forms the seat of an Archbishop, with a body of priests for all French India; and of the Missions Etrangeres, the successors of the Mission du Carnatic founded by the Jesuits in 1776. But the chief field of this mission lies outside the French Settlements, a large proportion of its Christians are British subjects and many of the churches are in British territory. The British rupee is the ordinary tender within French territories. A line of railway running *via* Villenour, from Pondicherry to Villupuram on the South Indian Railway, maintains communication with Madras and the rest of British India, and Karikal is linked to the same railway by the branch from Peralam. A Chamber of Commerce consisting of fifteen members, nine of them Europeans or persons of European descent, was reorganised by a decree of 7th March, 1914. The capital, Pondicherry, is a very handsome town, and presents, especially from the sea, a striking appearance of French civilisation.

People and Trade.

The Settlements are represented in Parliament at Paris by one senator and one deputy. The Senator is Mons. Lemoignic. The Deputy is Mons. Pierre Dupuy. There were in 1932 59 primary schools and 3 colleges all maintained by the Government, with 308 teachers and 9,263 pupils. Local revenue and expenditure (Budget of 1932) Rs. 2,694,019. The principal crops are paddy, groundnut, and ragi. There are at Pondicherry 3 cotton mills, and at Chandernagore 1 jute mill. The cotton mills have, in all 1,691 looms and 71,744 spindles, employing 7,450 persons. There are also at work one oil factory and a few oil presses for groundnuts, and one ice factory.

The chief exports from Pondicherry are oil seeds. At the ports of Pondicherry, Karikal, and Mahé in 1931 the imports amounted to frs. 96,215,000 and the exports to frs. 173,695,000. At these three ports in 1931, 271 vessels entered and cleared; tonnage 84,333 T. Pondicherry is visited by French steamers, sailing monthly between Colombo and Calcutta in connection with the Messageries Maritimes. The figures contained in this paragraph are the latest available and are corrected up to December 1931.

PONDICHERRY.

Pondicherry is the chief of the French Settlements in India and its capital is the headquarters of their Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 122 by the Villupuram-Pondicherry branch of the South Indian Railway. The area of the Settlement is 115 square miles and its population in the 26th Feb. 1931 was 183,555. It consists of the eight communes of Pondicherry. The Settlement was founded in 1674 under Francois Martin. In 1693, it was captured by the Dutch but was restored in 1699. It was besieged four times by the English. The first siege under Admiral Boscawen in 1748 was unsuccessful. The second, under Eyre Coote in 1761, resulted in the capture of the place, which was restored in 1765. It was again besieged and captured in 1778 by Sir Hector Munro, and the fortifications were demolished in 1779. The place was again restored in 1785 under the Treaty of Versailles of 1783. It was captured a fourth time by Colonel Braithwaite in 1793, and finally restored in 1816.

The Settlement comprises a number of isolated pieces of territory which are cut off from the main part and surrounded by the British District of South Arcot, except where they border on the sea. The Collector of South Arcot is empowered to deal with ordinary correspondence with the French authorities on these and kindred matters, and in this capacity is styled the Special Agent. At Pondicherry itself is a British Consular Agent accredited to the French Government, who is usually an officer of the Indian Army. The town is compact, neat and clean, and is divided by a canal into two parts, the Ville blanche and the Ville noire. The Ville blanche has a European appearance, the streets being laid at right angles to one another with trees along their margins reminding the visitor of continental boulevards, and the houses being constructed with courtyards and embellished with green venetians. All the cross streets lead down to the shore, where a wide promenade facing the sea is again different from anything of its kind in British India. In the middle is a screw-pile pier, which serves, when ships touch at the port, as a point for the landing of cargo, and on holidays as a general promenade for the population. There is no real harbour at Pondicherry; ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual *masula* boats of this coast. Facing the shore end of the pier is a statue of the great Dupleix, to whom the place and the French name owed so much.

CHANDERNAGORE.

Chandernagore is situated on the bank of the Hooghly, a short distance below Chinsura. Population (in the 26th Feb. 1931) 27,262. The town was permanently occupied by the French in 1688, though previously it had been temporarily occupied by them at a date given as 1672 or 1676. It did not, however, rise to any importance till the time of Dupleix. It changed hands between British and French various times during the Napoleonic wars and was finally restored to the French in 1816.

The former grandeur of Chandernagore has disappeared, and at present it is little more than a quiet suburban town with little external trade. The railway station on the East Indian Railway is just outside French territory 22 miles from Calcutta (Howrah). The chief administrative officer is the Administrator who is subordinate to the Governor of the French Possessions. The chief public institution is the College Dupleix, formerly called St. Mary's institution, founded in 1882 and under the direct control of the French Government.

KARIKAL.

Karikal lies on the Coromandel Coast between the Tanjore District of Madras and the Bay of Bengal. The settlement is divided into six communes, containing 110 villages in all, and covering an area of 53 square miles. It is governed by an Administrator subordinate to the Governor at Pondicherry. The population has in recent years rapidly decreased. In 1883 it was 93,055; in 1891, 75,526; in 1901, 54,603; in 1923, 57,023; in 1924, 56,922; and in 1931, 57,914; but the density is still very high, being 1,068 persons per square mile. Kumbakonam is the only taluk in Tanjore District which has a higher density. Each of the six communes—namely, Karikal, La Grande Aldee, Nedungadu, Cotchéry, Néravy and Tirnoular—possesses a mayor and council. The members are all elected by universal suffrage, but in the municipality Karikal half the number of seats are reserved for Europeans or their descendants. The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

The capital of the settlement is situated on the north bank of the river Arasalar, about 1½ miles from its mouth. It has a brisk trade in rice with Ceylon, and to a less extent with the Straits Settlements. It has no commerce with France, and very little with other French colonies. The port is merely an open roadstead, provided with a light-house 142 feet high, the light in which has a range of from 8 to 10 miles. In 1899 Karikal was connected with Peralem on the Tanjore District Board Railway. Karikal finally came into French possession on the settlement after 1815.

The Frontiers.

By those who take a long view of politics in the wide sense of the term, it will be seen that the Indian Frontier problem, which has loomed so large in the discussion of Indian questions, has always borne a two-fold character—the local issue and the international issue. For almost a century the international issue was the greater of the two, and the most serious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face. But the tendency of later times was for the international aspect to recede and for the local aspect to grow in importance, until it wright be said, with as much truth as characterises all generalisations, that the local issue dominated, if it did not absorb the situation.

The Local Problem.—The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail. From the Arabian Sea on the West to the confines of Nepal is a wild and troublous sea of some of the highest mountains in the world. The thin valleys in these immense ranges are poorly populated by hardy, brave, militant mountaineers, rendered the fiercer and the more difficult by professing the martial Moslem faith, accentuated by the most bitter fanaticism. But sparse as the population is, it is in excess of the supporting power of the country. Like mountaineers in all parts of the world, these brave and fearless men have sought to eke out their exiguous agriculture by raiding the rich plains of Hindustan. We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by opening for the warlike Highlanders a military career in the famous Highland regiments, and in rendering military operations easier by the construction of Wade's road. The Highland problem has disappeared so long from English politics that its pregnant lessons are little realised, but if the curious student will read again that brilliant novel by Neil Munro, "The New Road," he will appreciate what Wade's work meant for the Highlands of Scotland, and what lessons it teaches those who are called upon to face, in its local aspect, the Indian frontier problem. So far as the area with which we are dealing was concerned, two policies were tried. In Baluchistan, the genius of Sir Robert Sandeman devised the method of entering into military occupation of the principal points, and thence controlling the country. At the same time close engagements were entered into with the principal chiefs, through whom the tribesmen were kept in order. That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not seriously embarrass the Government of India from the time when Sandeman set his mark on the land. Not that the country was entirely peaceful. Occasional tribal raids or risings necessitated occasional military operations, and the Gomal Pass was involved in the general tribal disturbances which followed the wanton declaration of war by Afghanistan in 1919. But speaking broadly, Sandeman brought peace to Baluchistan, and to the large frontier area which is embraced in that generic term. So far as this section of the frontier is concerned it may be said that no frontier problem exists, save the need for an economical and constructive policy.

Towards Afghanistan.—Far otherwise has it until lately been with the section of the frontier which stretches from Baluchistan to the confines of Kashmir. That has, for three quarters of a century, been the scene of almost ceaseless military operations, which have constituted a devastating drain on the Indian exchequer. For years one sought for a definite policy guiding the actions of the Government of India. One explanation of their inconsistencies was found in the existence of two schools of thought. Once the frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupation of the whole country right up to the confines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country. But those who looked at policy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan frontier would only shift the frontier problem farther North. Instead of the differing tribes, we should, they argued, have to meet the Afghan on our border line. If Afghanistan were a strong, homogeneous State, that would be a matter of little account. But even under the iron rule of Abdurrahaman Khan, the Amir's writ ran but lightly in the southern confines of his kingdom. Under his successor, Habibullah Khan, whose policy was generally wise and successful, it ran still less firmly. The Amir was unable to control the organisation of the tribal gatherings which involved us in the Zakka Khel and Mohmand expeditions during the Indian secretaryship of that arch pacifist, Lord Morley. Nor did it enable Habibullah to deal effectively with a rising against his own Governor in Khost. The Afghan forces melted away under transport difficulties when they were moved against the rebellious Khostwalis, and the Amir had to make peace with his troublous vassals. Therefore, it was said, occupation up to what is called the Durand Line because it is the line demarcated by the Frontier Commission in which Sir Mortimer Durand was the British Plenipotentiary, would simply mean that in time of trouble we should have to deal with Afghanistan instead of a tribe or two, and with the irreconcilable tribesmen along our difficult line of communications. There was the further consideration that financiers were of the fixed belief that even if the Forward Policy was wise from the military standpoint, it would involve charges over an indefinite period greater than the Indian finances would bear. Moreover on this section of the Frontier, the position was complicated by the expansion of Russia in Central Asia. The easiest passes, and the passes down which for centuries from the time of Alexander the Great invaders

have swept from Persia and Central Asia to loot the fat plains of Hindustan, traverse this region. Therefore it was deemed essential to control, if not to occupy them, in the interests of the Imperial situation. In this zone therefore policy ebbed and flowed between the Forward School, which would have occupied, or dominated, the whole Frontier up to the Durand Line, that is to say up to the Afghan frontier: and the Close Border School, which would have us remain out of the difficult mountainous zone and meet the tribesmen on the plains if they sallied forth. The extreme advocates of this school would even have had us return to the line of the Indus.

The Two Policies.—The result of this conflict of opinion was a series of wavering compromises, which like all compromises was profoundly unsatisfactory. We pushed forward posts here and there, which irritated the Tribesmen, and made them fearful of their prized independence, without controlling them. These advanced posts were in many cases inadequately held and rarely were they linked with their supporting posts by adequate means of communication. We preserved between our administrative frontier and the Durand Line which demarcated our frontier with Afghanistan an irregular belt of land called The Independent Territory, in which neither we nor the Afghan Government exercised jurisdiction. This was left entirely under the control of the tribes who peopled it. Now it was often asked why we did not follow the precedent of Baluchistan and "Sandemanise" the Independent Territory. That was one of the perennial topics of Frontier discussions. But stress was laid upon the essential differences between this zone and Baluchistan. Sir Robert Sandeman found a strong tribal system existing in Baluchistan, and he was able to enter into direct engagements with the tribal Chiefs. There is no such tribal organisation in the Independent Territory. The tribal Chiefs, or maliks, exercise a very precarious authority, and the instrument for the collective expression of the tribal will is not the chief, but the jirgah, or tribal council, of the most democratic character, where the voice of the young men of the tribe often has the same influence, in time of excitement perhaps more influence, than the voice of the wiser greybeard. The bitter fruit of this policy of compromise was reaped in 1897, when following a minor outbreak in the Tochi Valley the general uneasiness flamed into a rising which involved the whole of the North-West Frontier, from the Gomal to the borders of Nepal. A force over thirty thousand strong had to be mobilised to deal with it. Even this large force, owing to the immense difficulties of transportation, was unable effectively to deal with the situation, though peace was made. The emergency thus created synchronised with the advent of Lord Curzon as Viceroy. He dealt with it in masterful fashion. In the first place, he separated the frontier zone from the Government of the Punjab, which had hitherto been responsible for its administration, and had organised for the purpose a special force of Frontier soldiers, known as the Punjab Irregular Frontier Force. This was the revival of a scheme as old as the Viceroyalty of Lord Lytton, though no other Viceroy had been able to carry it through in the face of the strong opposition of successive Punjab Governments. The area so separated was constituted into a separate administrative zone under the direct authority of the Government of India, exercised through a Chief Commissioner. Then Lord Curzon withdrew the advanced military posts and concentrated the Regular troops in bases better linked with the main military centres of India by roads and railways. The advanced posts, and especially important Passes like the Tochi, the Kurram and the Khyber, were entrusted to the defence of local militia, recruited from the tribesmen themselves, and officered by British officers drawn from the ranks of the Indian Army. Later it was supplemented by a fine development policy. The construction of the Upper Swat Canal, afterwards developed into the Swat Canal (*q.v.* Irrigation) led to such an increase in cultivation that the tribesmen were given a means of livelihood and were invested with the magic charm of valuable property. The irrigated part of the Frontier has since been one of the most peaceful in the whole border line.

Lord Curzon's Success.—Judged by every reasonable standard the Curzon policy was successful. It did not give us complete peace. There were occasional punitive expeditions demanded, such as for instance the Zakka Khel and Mohmand expeditions, and the Waziris, and in particular the truculent Mahsud Waziris, never ceased raiding. But in comparison with what had gone before, it gave relative peace. It endured throughout the Great War, though the Waziris built up a heavy bill of offences, which awaited settlement when Government were free from the immense preoccupations of the war. It broke down under the strain of the wanton invasion of India by the Afghans in the hot weather of 1919. On February 20th the Amir Habibullah Khan was assassinated in his sleep near Jelalabad. Although he does not figure so prominently in frontier history as his iron father Abdurrahaman Khan, he nevertheless has high claims on the favourable verdict of history. None anticipated that any successor to Abdurrahaman Khan could hold in the leash of a single State the fractious, fanatical tribes who make up the population of the Afghan kingdom. Yet this Habibullah did. On occasions his attitude seemed to be equivocal, as when armed gatherings of the tribes called lashkars were permitted to assemble in Afghan territory and to invade the Independent Territory, causing the Zakka Khel and Mohmand expeditions. But we must not judge a State like Afghanistan by European standards; the Amir had often to bow before the fanatical elements amongst his own people until they had burnt their fingers by contact with the British troops. At the outset of the Great War he warned the Government that he might often have to do things which seemed unfriendly, but they must trust him. In truth, the position of the Amir when Turkey entered on the war, and called Moslems everywhere to arms on the side of Germany was extraordinarily difficult; he received Turkish, German and Austrian missions in Kabul, from which British representatives were still excluded. But he kept Afghanistan out of the war, and with the complete defeat of the Central Powers and their satellites, his policy was justified up to the hilt. Indeed, his success was the cause of his assassination. The irreconcilable elements in the Kingdom saw that the day of reckoning had come and strove

to avert the settlement of their account by the murder. When he was done to death, his brother, Nasrullah Khan, was proclaimed Amir by the assassins. But the conscience of Afghanistan revolted against the idea of Nasrullah, the arch-fanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his brother. A military movement in Kabul itself brushed him aside and installed the son of Habibullah, Amanullah Khan, on the throne. But Amanullah Khan soon found it was a thorny bed on which he lay, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical crime, set his troops in motion on April 25, 1919, and preaching a *jehad* promised his soldiery the traditional loot of Hindustan. The Indian Army was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten. Dacca was seized, Jelalabad and Kabul were frequently bombed from the air, and there was nothing to prevent our occupation of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overset a government in Afghanistan, but it is quite another to set up a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August 1919.

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze. With one or two exceptions, the Tribal Militia left without the support of the regular troops who in the emergency ought to have been hastened to their succour, could not stand the strain of an appeal from their fellow tribesmen, and either melted away or joined the rising. This has often been described as the failure of the Curzon policy, which was based on the tribal militia. But there is another aspect to this issue, which was set out in a series of brilliant articles which Mr. Arthur Moore, its special correspondent, contributed to *The Times*. He pointed out that the militia was meant to be a military police force. The lapse of time, and forgetfulness of its real purpose, had converted the militia into an imitation of the regular army. The Militia was meant to be a police. When the war broke out its units were treated as a covering force behind which the Regular Army mobilised. This is a role which it was never intended they should serve; exposed to a strain which they should never have been called upon to bear, they crumpled under it. If on the outbreak of trouble troops had promptly hurried to their support all might have been well. Left to look after themselves, with no sign of support, they found themselves too weak to hold their positions and militarily their only course was to retire from the midst of their own kinsmen as the seal of revolt surged towards them. They would not take it.

Russia and the Frontier.—The Curzon policy was up to the time of its collapse greatly assisted by extraneous events. The greatest external force in moulding Indian frontier policy was the long struggle with Russia. For nearly three quarters of a century a veiled warfare for predominance in Asia was waged between Great Britain and Russia. There are few pages in British foreign policy less attractive to the student of Imperial affairs. Russia was confronted in Central Asia with precisely the same conditions as those which faced England in India when the course of events converted the old East India Company from a trading corporation into a governing body. The decaying khanates of Central Asia were impossible neighbours. Confronted with an inferior civilisation, and with neighbours who would not let her alone, Russia had to advance. True, the adventurous spirits in her armies, and some of the great administrators in the Tsarist capital were not adverse to paying off on the Indian Borderland the score against Great Britain for the Crimean War, and for what the Russians thought was depriving them of the fruits of their costly victory over Turkey in 1877-78. The result was a long and unsatisfactory guerilla enterprise between the hardiest spirits on both sides, accompanied by periodic panics in the British Press each time the Russians moved forward, which induced the coining, after the Russian occupation of Merv, of the generic term "Mervousness." This external force involved the Government of India in the humiliations of the Afghan War of 1838, with the tragic destruction of the retiring Indian force between Kabul and Jelalabad, slightly relieved by the heroic defence of Jelalabad and the firmness of General Pollock in refusing to withdraw the punitive army until he had set his mark on Kabul by the razing of the famous Bala Hissar fortress. It involved us in the second Afghan War of 1878, which left the baffling problem of no stable government in Afghanistan. There was a gleam of light when Abdurrahaman Khan, whom we set up at Kabul to relieve us of our perplexities, proved himself a strong and capable ruler, if one ruthless in his methods. But in the early eighties the two States were on the verge of war over a squabble for the possession of Penjdeh, and then men began to think a little more clearly. There began a series of boundary delimitations and agreements which clarified the situation, without however finally settling it. The old controversy broke out in another form when intrigues with a Buriat monk, Dorjieff, during Lord Curzon's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Tibet. An expedition to Lhasa rent the veil which had so long concealed the mysterious city and dispersed the miasma of this intrigue. But it was not until the conclusion of the Anglo-Russian agreement of 1907 that the two countries arrived at a stage long sought by those who looked beyond their noses. The actual authors of the Agreement were Lord Grey, the Foreign Secretary, and Lord Hardinge, formerly British Ambassador in Petrograd, but it had been desired by their predecessors, whose efforts were rendered nugatory by the intransigent attitude of the dominant forces in Petrograd. It was not until Russia was chastened on the battlefields of Manchuria by Japan, and disappeared as a sea power in the decisive battle of Tsushima, that an atmosphere was created favourable to the conclusion of an Agreement. This embraced the whole frontier zone. There were many unsatisfactory features in the Agreement, especially in regard to Persia, for which we had to pay a considerable price in the attitude

of Persians in the War. But again taking long views, the Agreement fully justified itself in a broad definition of the interest of the two countries, which put an end to the period of excursions and alarms up to the outbreak of the War. Russia then ceased to be a material factor in the Indian Frontier Problem. With the establishment of the Soviet Oligarchy in Moscow uneasiness has returned, for the geographical and allied circumstances which influenced the policy of the Tsarist regime exert precisely the same pressure upon its successor, and the Soviet have a troublesome motive which the Tsars had not: their aim to produce world revolution is avowed and Britain and the Constitutionalism for which she stands are the greatest obstacles in their path.

German Influence.—As nature abhors a vacuum, so in the case of States bordered by higher civilisations, no sooner does one strong influence recede than some other takes its place. Long before the signing of the Anglo-Russian Agreement the shadow of the German menace had begun to appear on the horizon. Imitative, not creative, in this, as in most other activities, the Germans adapted their methods from the penetration by railway which was so marked a feature of Russian expansion in Manchuria, brought to an end by the disastrous issue of the war with Japan. The seeds of the German effort were sown when the Kaiser, extending the hand of Christian fellowship to the Sultan of Turkey, Abdul-Hamed, at a time when that sovereign was ostracised by Europe for his direct complicity in the massacre of Armenians, or rather one of the massacres of Armenians, made German influence supreme at Constantinople. His theatrical tour through Palestine, which was generally treated in Europe as an exhibition of opera bouffe, soon bore fruit in the acquisition by German interests of the principal railways in Anatolia. Later it fructified more effectively in the Baghdad Railway concession, under which German interests secured the right of extending the Anatolian lines from the port of Haidar Pasha, opposite Constantinople, to a port in the Persian Gulf. Now successive British Statesmen of both parties had declared that the acquisition of a territorial foot-hold in the Persian Gulf by any power—Russia and the port of Bunder Abbas being then in view—would be regarded as an unfriendly act. There followed a replica of the period of alarms and excursions which had disfigured our relations with Russia. Undaunted, even when their endeavour to secure British co-operation in the enterprise failed, and when the Revolution in Turkey which set the Committee of Union and Progress in power entailed a temporary interruption of their influence at Constantinople, the Germans pressed forward with their enterprise. They pushed the Anatolian railways as far east as Bourgulu, and constructed a line northwards from Baghdad to Samara. They sent a mission to explore the potentialities of the port of Koweit in the Persian Gulf, and set the Turks in motion to subordinate the Sheikh of Koweit to direct Turkish sovereignty, with a nominal view to extending the Baghdad railway from Basra to Koweit, or the vicinity of Koweit at the deep water inlet behind Bubian Island. They commenced the most difficult part of the work in piercing the Amanus and Taurus ranges by a series of tunnels, and laid the rails on the other side of the mountains across the Euphrates to Ras-al-Ain. Behind this railway activity stood a grandiose policy, which is indicated in what became known in Germany as "B.B.B."—Berlin, Byzantium, Baghdad. Throughout the progress of these schemes, which did not stop short of Baghdad, but were directed through a port in the Persian Gulf, at India, the Germans were anxious to secure the co-operation of Great Britain, if they could do so on their own terms, that is to say without affecting the enterprise as a dominant German adventure. Shortly before the commencement of the war the protracted negotiations with London which had this end in view ended in a definite agreement between the two Powers. Under this agreement the Gulf section of the line was to have been British, and the other portion German. But this agreement which had not been signed became waste paper with the outbreak of the war, and the German plans vanished in thin air with the complete defeat of Turkey and Germany. Nevertheless the railway did not stand still during the war. Germany made immense efforts to complete the difficult tunnel sections and the work was substantially finished when the Armistice was signed.

The Significance of the Baghdad Railway—The real significance of the Baghdad Railway was little appreciated in Great Britain. It was constantly pictured as a great trunk line, which would short-circuit the traditional British dominance by sea, and absorb the passenger and goods traffic from the East. This idea could only be nourished by those completely ignorant of the conditions of the Indian passenger service and the essentials of a competitive route for the carriage of merchandise. The rush of passenger traffic from India is from April to June, in order to escape the hot weather in India and, the return traffic is spread over the period of from October to January. From April to June the heat in Mesopotamia is appalling. To imagine that the passenger traffic from India would turn from the easy and comfortable, as well as fairly expeditious sea route from Bombay to Marseilles and thence by the easiest railway travelling outside the British Isles to Calais and London, for such a land route was an amazing chimera. The Baghdad route would have involved a sea voyage from Bombay or Karachi to Koweit or Basra, then a journey across the burning plains of Mesopotamia and Asia Minor to Haidar Pasha, then across the Straits to Constantinople, and finally right across Europe to a North Sea port. This would in any circumstances have been a costly freak journey in comparison with the sea route. Then as for the commercial aspect of the line, the natural port of the Middle East is Basra. The sea freight from England or Germany to Basra was often less than half the freight from Basra to Baghdad. To imagine again that merchandise would desert this route for a land and sea route, which would have involved a double break of bulk at Constantinople and Haidar Pasha, was again a chimera.

As a through route the primary purpose of the Baghdad Railway was strategic. It was designed to make the Power seated at Constantinople—and that Power the Teutons were resolved should be Germany—complete master of Asia

Minor and The Middle East, and the route-selected, often criticised, was the best for the rapid movement of troops to the strategic centres. As a commercial line, the Railway, if completed, would have served three zones. The western area of Turkey in Asia at Haidar Pasha. The rich lands of Anatolia at Alexandretta. The eastern zone at Basra. The Germans, it is understood, attached immense importance to the subsequent engagements with Turkey which placed them in maritime command at Alexandretta. They began to inaugurate a commercial position in the Persian Gulf through the establishment of a subsidized line of steamers run by the great Hamburg-America corporation. They strove to obtain an actual footing in the Gulf through the German house of Wonkhaus. The Germans were probably never serious in their alleged designs on Koweit, which could never have borne a more definite relation to the commerce of the Gulf than Flushing to Antwerp or Cuxhaven to Hamburg; that was one of the red herrings they drew across their trail to divert attention from their real objective, Basra, which is destined by virtue of an unchallengeable geographical and natural position to be the great port of The Middle East. These considerations have no more than an academic value now. Germany was defeated. The Turks, when they emerged from an isolated military despotism based on Angora, were confronted with the immense problem of re-building their bankrupt State, deprived of the most intelligent section of the old population—the Greeks and the Armenians, by massacre and expulsion—were a very different factor. The completion of the through line was indefinitely postponed. But as the advantages of the route, for the purposes we have indicated, are many and great, the ultimate construction of the through line is only a matter of time, so one has placed these authoritative characteristics on record for the guidance of opinion when the project of the through route is revived, as it must be.

Turkey and the Frontier.—The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never assumed any significance, save as the *avant courier* of Germany, when she passed under the tutelage of that Power, and for a limited period during the war. Although so long established in Mesopotamia, Turkey was not very firmly seated in that country, the Arabs tolerated rather than accepted Turkish rule so long as they were substantially left alone, and the administration, it is understood, never paid its way. For a brief period Midhat Pasha raised the status of Mesopotamia, and after the Revolution that fine soldier Nazim Pasha became a power in the land. But speaking broadly Turkey remained in Mesopotamia because it was no-one's interest, even that of the Arab, to turn her out. When however Germany developed her "B.B.B." policy, Turkey was used as a stalking horse. She moved a small force to the Peninsula of Al-Katr in order to frighten the Sheikh of Bahrein, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Sheikh of Koweit into a *de facto* suzerainty, exercised by military force. These efforts faded before the vigorous action of the British Government which concluded a binding arrangement with the Sheikh of Koweit, and the position of the Turks at Al-Katr was always very precarious. On the outbreak of the war however the situation profoundly changed. When the sound and carefully executed expedition to Basra and its strategic hinterland was developed into the insane enterprise to capture Baghdad by *coup de main*, with very inadequate forces, and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable character. These were completely successful with General Maude's occupation of Baghdad. After the Russian *debâcle* we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asia, producing military exploits of an almost epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power in Palestine, where Lord Allenby scattered the Turks like chaff. But the aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite frontiers. This enabled the Turks, if they were so disposed, to be troublesome through guerilla warfare in the Mosul Zone, and by stirring up the Kurds, who are the Ishmaelites of Asia Minor. The conclusion of the Treaty of Lausanne in 1923 brought temporary relief, but it did not settle the main issue, the frontier between Turkey and Irak. Under the Treaty it was provided that if the two parties could not agree to a boundary line delimitation should be left to The League of Nations. Negotiations were promptly opened at Constantinople, but it was immediately found that there could be no mutual agreement; the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Irak. The issue therefore went to the League of Nations. That body despatched a neutral commission to study the position on the spot; this commission reported that the best settlement would be for the Mosul vilayet to be incorporated in Irak, if the British Government were prepared to prolong its mandate over that State for a period of twenty-five years. When the report of this commission came before the League in 1925 Britain gave the necessary guarantee, and the Council of The League unanimously allotted the Mosul vilayat to Irak. The Turkish delegates, who at first recognised the decisive authority of the League, then declared that they would not be bound by its decisions. So the matter rested at the end of the year, with Irak in occupation of the disputed up to the temporary frontier, which was known as The Brussels Line. After at first breathing nothing but armed resistance to acceptance of the award, the Turks afterward assumed a more conciliatory note, and alarmed, it may be, by the threat of Italian aggression, accepted the frontier line demarcated by the League.

France and the Frontier.—If we touch for a few sentences on the position of France on the frontiers of India, it is not because they have any present day significance, but in order to complete this brief survey of the waxing and waning of external influences on Indian frontier policy. It is difficult to find any sound policy behind the efforts of France to obtain a coaling

station at Maskat in the Persian Gulf, and her long opposition to the steps necessary to extirpate the slave trade, and hold in check the immense traffic in arms which was equipping all the tribesmen on our North-West Frontier with rifles of precision and a large supply of ammunition. We can find no more definite purpose in it than a general pin-pricking policy, a desire to play the part of Russia, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cessions in West Africa, particularly in the neighbourhood of Gambia, as the price of abstention. These embarrassments were slowly removed one by one after the conclusion of the Anglo-French Entente. Far otherwise was it in the East. The consolidation of French authority in French Indo-China was the prelude to designs for the expansion of this authority at the expense of Siam and to find compensation there for the veiled British protectorate of Egypt. There had earlier been mutterings in Burma. We were established in Lower Burma in the thirties and in the eighties the foolish and tyrannical King Theebaw, in Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British. However, if any hopes were entertained of extending the Asiatic possessions of France in this direction, they were dissipated by the Second Burmese War and the firm establishment of British rule. Far otherwise was it on the confines of Siam. It was the fixed purpose of British policy to preserve Siam as a buffer state between Burma, then a regular Province of the Indian Empire, and French Indo-China. This policy was definitely challenged by French encroachments on Siam. Matters approached a crisis in 1894, and we were within measurable distance of a situation which might have ended in open war between the two States. But as in the case of Penjdeh, and later when Major Marchand marched across Africa to Fashoda, the imminence of hostilities made statesmen on both sides ask themselves what they might be going to fight about. They found there was nothing essential and an agreement was negotiated between the two Powers, which secured the independence and integrity of Siam. That agreement has been consolidated by wise and progressive rule in Siam itself, under its own independent sovereign, who is imbued with a strong friendship for Great Britain, whilst at the same time maintaining good relations with French neighbours.

The New Frontier Problem.—The whole purpose of this brief sketch has been to show that for three generations—most assuredly since the events leading to the Afghan War of 1838—the Indian frontier problem has never been a local problem. It has been dominated by external influences—in the main the long struggle between Great Britain and Russia, for a brief period the German ambition to build up a dominant position in the East through the revival of the land route, and to a much lesser extent by the ambitions of France and Turkey. The circumstances affecting the Frontier from centres beyond it have greatly changed. Old dangers have disappeared. And, generally, conditions have become more like those normal to critical land frontiers anywhere in the world in this present time of swift communications, aerial operations and easy propaganda. Consequently, a great deal of new attention is necessarily being directed to local aspects of the general problem. The tribesman was always an opponent to be respected. Brave, hardy, fanatical, he has always been a first-class fighting man. Knowing every inch of the inhospitable country to which punitive operations must of necessity take place he has hung on our rearguards and given them an infinite of trouble. Even when armed with a jezail and when every cartridge had to be husbanded with jealous care, the tribesman was a respectable antagonist. Now the tribesmen are everywhere armed with magazine rifles, either imported through the Persian Gulf when gunrunning was a thriving occupation, stolen from British magazines, or secured from Russian and Afghan sources. They have an abundant supply of ammunition. Considerable numbers of the fighting men have been trained in the ranks of the Indian Army, either as Regulars in the Pathan regiments, or else in the tribal militias. We found this to our cost in the events following the Afghan War of 1919. The Afghan regular army was of little account. The tribesmen who rose at the call of the jihad, especially in Waziristan, were of great account. They gave our troops the hardest fighting they have ever had on the Frontier; their marksmanship and fire discipline were described by experienced soldiers as admirable. The tribal militia, the keystone of the Curzon system, had for all practical purposes disappeared. What was to take its place?

Immediately following the Afghan War, the frontier positions were garrisoned by regular troops, but this was only a temporary measure. It may be said that the crux of the situation was in **Waziristan.** This sector of the Frontier has always been the most difficult of the whole, because of the intractable character of the people, and of their inveterate raiding activities. Besides, possessing a bolt hole into Afghanistan they had in the past evaded effective punishment. In view of the complete disappearance of the external menace, and the consequent lapsing of any necessity to preserve open lines of communication which would enable us to go to the support of Afghanistan, now formally recognised in the Treaty of 1921 as a completely independent State, there were many who urged the desirability of complete withdrawal, even to the line of the Indus. This extreme school gained little support. Our position in Quetta on the one side and Peshawar on the other is fully consolidated, and no good case could be made out for withdrawing from it. On the other hand, there was a strong case made out for leaving the tribesmen severely alone from the Gomal to the Kurram, and dealing with them if they emerged from their fastnesses. The military standpoint was that the Waziris are absolutely intractable; that it was unfair to impose on troops the frequent necessity of punitive operations in most arduous conditions; and that the only solution of the question was the occupation of dominant points in Waziristan, as far north as Ladha, and linking these posts with our military bases, and particularly with the termini of the Indian frontier railways, by good motor roads.

This controversy lasted long. It resulted in a typically British compromise which specially arose from the changed conditions in which we found ourselves in 1922, when our troops were in occupation of Waziristan as a result of the operations forced upon us for the suppression of the tribal outbreak which the Afghans stirred up in support of their invasion of India in 1919. The ensuing policy has been aptly described as the "half-forward" policy. It is in truth a repetition of the Sandeman policy, adapted to local conditions. There has been no withdrawal in the ordinary sense of the term, but the limit of the North Waziristan occupation was temporarily fixed at Ramzak, not at Ladha. A network of consequential roads was pushed forward. Its elaboration continues. In South Waziristan, Wana has been re-occupied, partly in response to a pressing invitation from the Wana Wazirs, because they wanted to share the benefits which they saw British occupation to be bringing to their cousins northward of them. In February, 1933, control over tribal territory was pushed forward beyond Razmak towards the Afghan Border because of a rebellion on the Afghan side and of the need to assist the King of Kabul by preventing excursions by bodies of Wazirs into His Majesty's disturbed territory. The work of control and of civilization is rapidly progressing in the whole territory. But of this particulars are given on 272 and following pages.

The main Indian rail-head, which for many years terminated at Jamrud, at the easterly entrance to the Khyber Pass, was in the autumn of 1925 extended to Landi Khana, at the opposite end of the Pass and within a mile of the frontier between India and Afghanistan.

I.—THE PERSIAN GULF.

From what has gone before it will be seen that the keynote of this discussion of Indian frontier policy is that the external menace has largely disappeared. No part of the frontier is more powerfully influenced by this consideration than the Persian Gulf. Our first appearance in the Gulf was in connection with the long struggle for supremacy with the Portuguese, the French and the Dutch, who had established trading stations there. With the capture and destruction of the great entrepot which the Portuguese had established at Ormuz, the supersession of the land by the sea route, and the appearance of anarchy in the interior the importance of the Gulf declined. The Indian Government remained there primarily to preserve the peace. This work it quietly and efficiently performed. Piracy was stamped out, the Trucial Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Royal Navy kept watch and ward, and our consuls regulated the external affairs of the Arab rulers on the Arab coast. In return for these services Great Britain claimed no selfish advantages. The waters of the Gulf were kept free to the navigation of the ships of all nations, and though Great Britain could have made any territorial acquisitions she pleased she retained possession of only the tiny station of Bassidu. Left to herself Great Britain desired no other policy, but for a quarter of a century the Gulf was involved in European affairs. France sought to acquire a coaling station at Jissa, near Maskat, and obstructed the efforts of the British Government to stamp out the slave trade and to check the immense traffic in arms which was equipping the tribes on our land frontier with weapons of precision and quantities of ammunition. All causes of difference were gradually removed by agreements following the Anglo-French Entente. Russia sent one of her finest cruisers to "show the flag" in the Gulf, and established consular posts where there were no interests of preserve. She was credited with the intention of occupying a warm water port, and in particular with casting covetous eyes on the most dreadful spot in the Gulf, Bunder Abbas. This menace declined after the signing of the Anglo-Russian Agreement and disappeared with the collapse of Russian power following the Revolution. Then Turkey, either acting for herself, or as the *avant courier* of Germany, under whose domination she had passed, began to stir. She threatened the Sheikh of Bahrein by the armed occupation of the peninsula of Al-Katr, and moved troops to enforce her suzerainty over Koweit, the best port in the Persian Gulf and a possible terminus of the Baghdad Railway. Further to consolidate her interests, or to stake out a claim, Germany sent the heavily-subsidized ships of the Hamburg-America line to the Gulf, where they comported themselves as the instruments of Imperial policy rather than as inoffensive merchantmen. She also strove, through the agency of the firm of Wonkhaus, to acquire a territorial footing on the island of Shargah. These events stirred the British Government to an unusual activity in the waters of the Gulf.

Counter Measures.

The first effective steps to counter these influences were taken during the vigorous viceroyalty of Lord Curzon, who visited the Gulf during his early travels and incorporated a masterly survey of its features in his monumental work on Persia. He appointed the ablest men he could find to the head of affairs, established several new consulates, and was instrumental in improving the sea communications with the Gulf ports. The British Government also took alarm. They were fortified in their stand against foreign intrigue by the opinion of a writer of unchallenged authority. The American Naval writer, the late Admiral Mahan, placed on record his view that "Concession in the Persian Gulf, whether by formal arrangement (with other Powers) or by neglect of the local commercial interests which now underlie political and military control, will imperil Great Britain's naval position in the Farther East, her political position in India, her commercial interests in both, and the Imperial tie between herself and Australasia." The Imperial standpoint, endorsed by both Parties in the State, was set out by Lord Lansdowne in

words of great import—"We (*i.e.*, His Majesty's Government) should regard the establishment of a naval base or of a fortified port in the Persian Gulf by any other Power as a very grave menace to British interests, which we should certainly resist with all the means at our disposal." The negative measures following these declarations were followed by a constructive policy when the oil fields in the Bakhtiari country, with a great refinery, were developed by the Anglo-Persian Oil Company, in which the British Government has a large financial stake. But with the disappearance of these external forces on Gulf policy, as set out in the introduction to this section, the politics of the Persian Gulf receded in importance, until they are now. more than they were before these external influences developed, a local question, mainly a question of policy. They are therefore set out more briefly and those who desire a complete narrative are referred to the Indian Year Book for 1923, pp. 178-183. An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf. The fleet consisting of two sloops and four launches, all suitably armed, was built in Italy and duly arrived at its destination in 1932. It is at the outset officered by Italians. The immediate reason for the new fleet is that an increase in the Persian Customs tariff for revenue purposes led to extensive smuggling. The fleet is required to check it.

Maskat.

Maskat, which is reached in about forty-eight hours from Karachi, is outside the Persian Gulf proper. It lies three hundred miles south of Cape Musandim, which is the real entrance to the Gulf, but its natural strength and historical prestige combine to make it inseparable from the politics of the Gulf, with which it has always been intimately associated.

Formerly Maskat was part of a domain which embraced Zanzibar, and the Islands of Kishm and Larak, with Bunder Abbas on the Persian shore. Zanzibar was separated from it by agreement, and the Persians succeeded in establishing their authority over the possessions on the eastern shore.

The relations between Britain and Maskat have been intimate for a century and more. It was under British auspices that the separation between Zanzibar and Maskat was effected, the Sheikh accepted a British subsidy in return for the suppression of the slave trade and in 1892 sealed his dependence upon us by concluding a treaty pledging himself not to cede any part of his territory without our consent.

The Pirate Coast.

Turning Cape Musandim and entering the Gulf Proper, we pass the Pirate Coast, controlled by the six Trucial Chiefs. The ill-name of this territory has now ceased to have any meaning, but in the early days it had a very real relation to the actual conditions. The pirates were the boldest of their kind, and they did not hesitate to attack on occasion, and not always without success, the Company's ships of war. Large expeditions were fitted out to break their power, with such success that since 1820 no considerable punitive measures have been necessary. The Trucial Chiefs are bound to Great Britain by a series of engagements, beginning with 1806 and ending with the perpetual treaty of 1853 by which they bound themselves to avoid all hostilities at sea, and the subsequent treaty of 1873 by which they undertook to prohibit altogether the traffic in slaves. The relations of the Trucial Chiefs are controlled by the British Resident at Bushire, who visits the Pirate Coast every year on a tour of inspection.

The commercial importance of the Pirate Coast is increasing through the rise of Debai. Formerly Lingah was the entrepot for this trade, but the exactions of the Belgian Customs officials in the employ of Persia drove this traffic from Lingah to Debai. The Trucial Chiefs are—Debai, Abu Thabee, Shargah, Ajman, Um-al-Gawain and Ras-el-Kheyma.

Bahrein.

North of the Pirate Coast lies the little Archipelago which forms the chiefship of the Sheikh of Bahrein. Of this group of islands only those of Bahrein and Maharak are of any size, but their importance is out of all proportion to their extent. This is the great centre of the Gulf pearl fishery, which, in a good year, may be worth half a million pounds sterling. The anchorage is wretched, and at certain states of the tide ships have to lie four miles from the shore, which is not even approachable by boats, and passengers, mails and cargo have to be handed on the donkeys for which Bahrein is famous. But this notwithstanding the trade of the port is valued at over a million and a quarter sterling, and the customs revenue, which amounts to some eighty thousand pounds makes the Sheikh the richest ruler in the Gulf.

In the neighbourhood of Bahrein is the vast burying ground which has hitherto baffled archæologists. The generally accepted theory is that it is a relic of the Phœnicians, who are known to have traded in these waters.

Koweit.

In the north-west comer of the Gulf lies the port which has made more stir than any place of similar size in the world. The importance of Koweit lies solely in the fact that it is a possible Gulf terminus of the Baghdad Railway. This is no new discovery, for when the Euphrates Valley Railway was under discussion, General Chesney selected it under the alternative name of the Grane—so called from the resemblance of the formation of the Bay to a pair of horns—as the sea terminus of the line. Nowhere else would Koweit be called a good or a promising port. The Bay is 20 miles deep and 5 miles broad, but so shallow that heavy expense would have to be incurred to render it suitable for modern ocean-going steamers. It is sheltered from all but the westerly winds; and the clean thriving town is peopled by some 20,000 inhabitants, chiefly dependent on the sea, for the mariners of Koweit are noted for their boldness and hardihood.

Muhammerah.

On the opposite side of the entrance to the Shatt-el-Arab lie the territories of Sheikh Khazzal of Muhammerah. The town, favourably situated near the mouth of the Karun River, has grown in importance since the opening of the Karun River route to trade through the enterprise of Messrs. Lynch Brothers. This route provides the shortest passage to Ispahan and the central tableland, and already competes with the older route by way of Bushire and Shiraz. This importance has grown since the Anglo-Persian Oil Company established refineries at Muhammerah for the oil which they win in the rich fields which they have tapped near Ahwaz. Its importance will be still further accentuated, by the opening of the railway to Khorremabad by way of Dizful which is now under construction.

Basra.

In a sense Basra and Turkish Arabistan can hardly be said to come within the scope of the frontiers of India, yet they are so indissolubly associated with the politics of the Gulf that they must be considered in relation thereto. Basra is the present sea terminus of the Baghdad Railway. It stands on the Shatt-el-Arab, sixty miles from its mouth, favourably situated to receive the whole water-borne trade of the Tigris and Euphrates Rivers. The local traffic is valuable, for the richness of the date groves on either side of the Shattel-Arab is indescribable, there is a considerable entrepot traffic, whilst Basra is the port of entry for Baghdad and for the trade with Persia, which follows the caravan route *via* Kermanshah and Hamadan.

The political destinies of Basra are at present wrapped up with the destinies of the new Arab State which we have set up in Mesopotamia under King Feisal. When the war was over we found ourselves committed to immense, undefined and burdensome responsibilities in that land. The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad; then the great military enterprises necessitated by the fall of Kut-al-Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary, and west to the confines of Trans-Jordania. Amongst ardent Imperialists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire. The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodigious. In these circumstances King Feisal was imported from the Hedjaz and installed on the throne under the aegis of Great Britain. Still we were committed to the support of the new kingdom, and that most dangerous condition arose—responsibility without any real power unless King Feisal was to be a mere puppet, immense expenditure and indefinite military commitments. In these circumstances there was an insistent demand for withdrawal from the land. British policy moved slowly towards that end, but a definite step was taken in 1923. The Secretary of State for the Colonies announced this policy in a statement which is reproduced textually, for the purpose of reference. Addressing the House of Lords on May 3rd he said—

Your Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken. Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad, the terms of which I propose to read out to Your Lordships. This announcement was drawn up in consultation with King Feisal and his Government, and has their cordial assent. It is being published at Baghdad to-day.

The announcement is as follows:—

"It will be remembered that in the autumn of last year, after a lengthy exchange of views, it was decided between the Governments of His Britannic Majesty and His Majesty King Feisal that a Treaty of Alliance should be entered into between His Britannic Majesty and His Majesty the King of Iraq. This Treaty which was signed on the 10th October, 1922, and the term of which was to be twenty years (subject to periodical revision at the desire of either party) provided for the establishment of an independent Constitutional Government in Iraq, enjoying a certain measure of advice and assistance from Great Britain of the nature and extent indicated in the text of the Treaty itself and of subsidiary Agreements which were to be made thereunder.

"Since then the Iraq Government has made great strides along the path of independence, and stable existence and has been able successfully to assume administrative responsibility and both parties being equally anxious that the commitments and responsibilities of His Majesty's Government in respect of Iraq should be terminated as soon as possible, it is considered that the period of the Treaty in its present form can conveniently be shortened. In order to obviate the inconvenience of introducing amendments into the body of a Treaty already signed, it has been decided to bring about the necessary modifications by means of a protocol which, like the Treaty itself, will be subject to ratification by the Constituent Assembly.

"Accordingly a protocol has now been signed by the parties in the following terms:—

It is understood between the High Contracting Parties that, notwithstanding the provisions of Article 18, the present Treaty is all terminate upon Iraq becoming member of the League of Nations and in any case not later than four years from the ratification of peace with Turkey. Nothing in this protocol shall prevent a fresh agreement from being concluded with a view to regulate the subsequent relations between the High Contracting Parties; and negotiations for that object shall be entered into between them before the expiration of the above period."

It will be noticed that under this protocol the Treaty in its present form was to terminate on the entry of Iraq into the League of Nations or in four years, whichever might be earlier.

The position of Iraq as regards the League was that when the Treaty was ratified His Britannic Majesty was bound under Article 6 to use his good offices to secure the admission of Iraq to membership of the League of Nations as soon as possible. His Majesty's Government would be in a position to take this step on the fulfilment of the two following essential conditions, namely, the delimitation of the frontiers of Iraq, and the establishment of a stable government in accordance with the Organic Law.

The Council of the League of Nations in January, 1932, adopted the report of the Iraq Commission recommending the termination of the mandate subject to the admission of Iraq to membership of the League and Iraq entering into a number of undertakings, with regard to treatment of minorities and the administration of justice. This means the termination of the mandate when the next Assembly of the League voted for the admission of Iraq to League membership.

Under the Treaty of Lausanne between Turkey and the Powers, which was signed in 1923, it was agreed that the frontier between King Feisal's State and Turkey, the important frontier because the future of Mosul was in dispute, should be settled by the League of Nations, should Great Britain and Turkey be unable to come to agreement by direct negotiation. These direct negotiations were opened at Constantinople, but no agreement was reached, so the question was opened before the Council of the League in September 1924. Whilst the matter was under discussion complaint was made by Great Britain that Turkey had violated the provisional frontier drawn in the Treaty of Lausanne, and certain irregular hostilities were carried on in the disputed zone. This matter too was remitted to the League, and a further provisional boundary was drawn, which was accepted by both parties.

Here the matter remained until the autumn of 1925. In order to secure the material for a decision the League of Nations despatched a neutral commission to Mosul to investigate the situation. This commission produced a long and involved report, but one which led by devious paths to a common sense recommendation. It was that the first essential in the Mosul vilayet is stable government. The desires of the people were for incorporation in the State of Iraq. If therefore the British Government was willing to extend its mandate over Iraq for a further period of twenty-five years—a guarantee of stable government—then Mosul should be incorporated in Iraq; if Britain was not willing, then Mosul should return to Turkey. When the matter came before the Council of the League Great Britain gave the necessary guarantee. The Turks thereupon challenged the whole competence of the Council to give an award under the terms of the Treaty of Lausanne. The issue was remitted to the Court of International Justice at The Hague which decided in favour of the competence of the Council. About this time there was published the report of a distinguished Esthonian General, General Laindoner, who had been despatched by the League to investigate allegations of brutality by the Turks in deporting Christians from their own zone, and this report was of the most damning character. Great Britain having given the necessary assurance, that she was prepared to extend her mandate over Iraq for a further twenty-five years, thereupon the Council of the League allocated the whole of the area in dispute, right up to the temporary frontier—commonly called The Brussels Line—to Iraq. The Turks refused to accept the award and withdrew from Geneva threatening force. Later, wiser counsels prevailed and in 1926. Turkey accepted a frontier substantially as drawn by the League.

A New Treaty.—A new Treaty regulating the relation of Iraq with Great Britain, the Mandatory Power, was negotiated in 1927, and signed towards the end of the year. The full text is not available, but a semi-official announcement on December 20th may be regarded as substantially authentic.

The Treaty declares that there shall be peace and friendship between His Britannic Majesty and His Majesty the King of Iraq. It states that "Provided the present rate of progress in Iraq is maintained and all goes well in the interval, His Britannic Majesty will support the candidature of Iraq for admission to the League of Nations in 1932." It stipulated that separate agreements superseding those of March 25, 1924, shall regulate the financial and military relations.

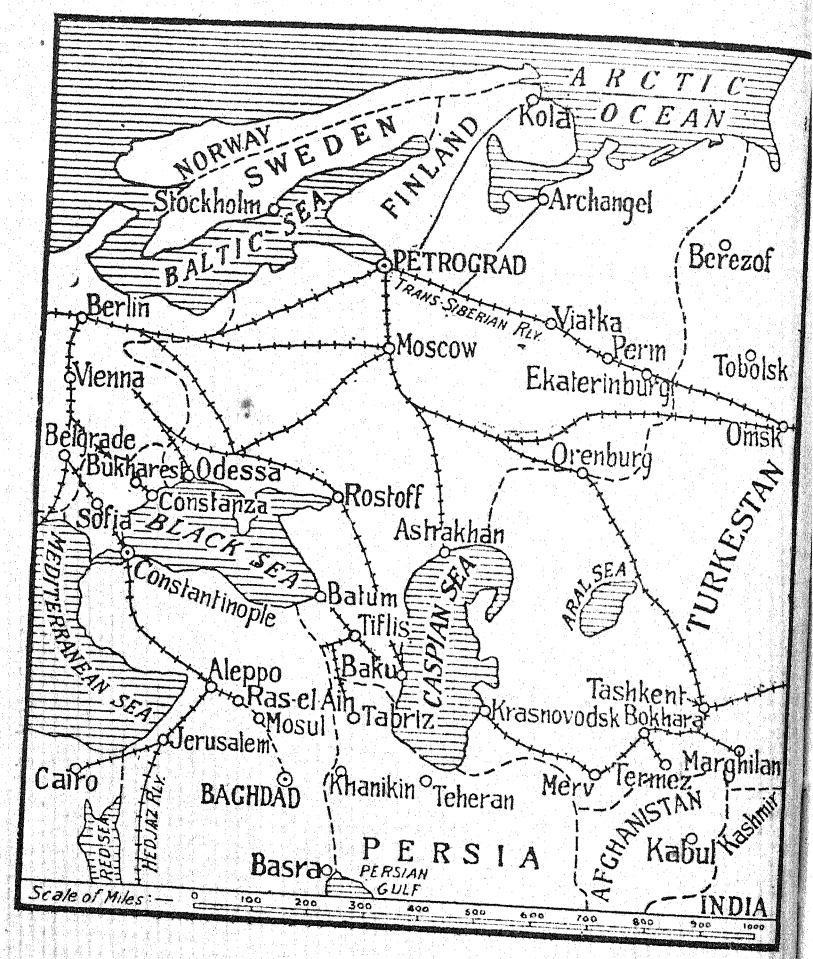
The King of Iraq undertook to secure the execution of all international obligations which His Britannic Majesty had undertaken to see carried out in respect of Iraq. He also undertook not to modify the existing provisions of Iraq's organic law so as adversely to affect the rights and interests of foreigners, and to constitute any difference in the rights before the law among Iraquis on the grounds of differences of race, religion, or language.

There was provision for full consultation between the high contracting parties in all matters of foreign policy which may affect their common interests. The King of Iraq undertook so soon as local conditions permit to accede to all general international agreements already existing, or which might be concluded thereafter, with the approval of the League of Nations, in respect of the slave trade, the traffic in drugs, arms and munitions, the traffic in women and children, transit navigation, aviation, and communications, and also to execute the provisions of the Covenant of the League of Nations, the Treaty of Lausanne, the Anglo-French Boundary Convention, and the San Remo Oil Agreement in so far as they apply to Iraq.

There was provision against discrimination in matters concerning taxation, commerce, or navigation against nationals or companies of any State which is a member of the League of Nations, or of any State to which the King of Iraq had agreed by Treaty that the same rights should be ensured as if it were a member of the League.

Any difference that might arise between the high contracting parties was to be referred to the Permanent Court of International Justice provided for by Article Fourteen of the Covenant of the League. The Treaty was made subjected to revision with the object of making all the modifications required by the circumstances when Iraq enters the League of Nations.

Railway Position in the Middle East.



It is important to remember that there is a considerable difference between the vilayet of Basra and the other portions of King Feisal's State. Basra has for long been in the closest commercial contact with India, and is in many respects a commercial appanage of Bombay. Its people have not much in common with those of the North. They took no part in the Arab rising which followed the war, and they ask nothing better than to remain in close touch with India and through India with the British Government. If we are correct in the supposition that Basra is destined to be the great port of the Middle East, then its future under an Arab State, with no experience of administration in such conditions, is one of the greatest interest, which can hardly be regarded as settled by the policy underlying the declaration which is set out above.

The Persian Shore.

The Persian shore presents fewer points of permanent interest. The importance of Bushire is administrative rather than commercial. It is the headquarters of Persian authority, the residence of the British Resident, and the centre of many foreign consuls. It is also the main entrepot for the trade of Shiraz, and competes for that of Ispahan. But the anchorage is wretched and dangerous, the road to Shiraz passes over the notorious kotals which preclude the idea of rail connection, and if ever a railway to the central tableland is opened, the commercial value of Bushire will dwindle to insignificance. Further south lies Lingah, reputed to be the prettiest port on the Persian coast, but its trade is being diverted to Debai on the Pirate Coast. In the narrow channel which forms the entrance to the Gulf from the Arabian Sea is Bunder Abbas. Here we are at the key of the Gulf. Bunder Abbas is of some importance as the outlet for the trade of Kerman and Yezd. It is of still more importance as a possible naval base. To the west of the town between the Island of Kishm and the mainland, lie the Clarence Straits which narrow until they are less than three miles in width, and yet contain abundance of water. Here, according to sound naval opinion, there is the possibility of creating a naval base which would command the Gulf. The great obstacle is the climate, which is one of the worst in the world. On the opposite shore, under the shadow of Cape Musandim, lies another sheltered deep-water anchorage, Elphinstone's Inlet, where the climate conditions are equally vile. But between these two points there is the possibility of controlling the Gulf just as Gibraltar controls the Mediterranean. For many years Bunder Abbas loomed large in public discussions as the possible warm water port for which Russia was seeking. There is a British Naval station at Henjam, a small island close to Kism, where the station was established under agreement with the Persian authorities. On the Mekran coast, there is the cable station of Jask, and the possible port of Chamber. An interesting development in the Gulf in the past two or three years has been the institution of a Persian Navy.

II.—SEISTAN.

The concentration of public attention on the Persian Gulf was allowed to obscure the frontier importance of Seistan. Yet it was for many years a serious preoccupation with the Government of India. Seistan lies midway north and south between the point where the frontiers of Russia, Persia and Afghanistan meet at Zulfikar and that where the frontiers of Persia and of our Indian Empire meet on the open sea at Gwattur. It marches on its eastern border with Afghanistan and with Baluchistan, it commands the valley of the Helmand, and with it the road from Herat to Kandahar, and its immense resources as a wheat-producing region have been only partly developed under Persian misrule. It offers to an aggressive rival, an admirable strategic base for future military operations; it is also midway athwart the track of the shortest line which could be built to connect the Trans-Caspian Railway with the Indian Ocean, and if and when the line from Askabad to Meshed were built, the temptation to extend it through Seistan would be strong. Whilst the gaze of the British was concentrated on the North-West Frontier, and to possible lines of advance through Kandahar to Quetta, and through Kabul to Peshawar, there can be little doubt that Russian attention was directed to a more leisurely movement through Seistan, if the day came when she moved her armies against India.

Whether with this purpose or not, Russian intrigue was particularly active in Seistan in the early years of the century. Having Russia fied Khorassan, her agents moved into Seistan and through the agency of the Belgian Customs officials, "scientific missions" and an irritating plague cordon, sought to establish in fluence, and to stifle the British trade which was gradually being built up by way of Nushki. These efforts died down before the presence of the McMahon mission, which, in pursuance of Treaty rights, was demarcating the boundary between Persia and Afghanistan, with special reference to the distribution of the waters of the Helmand. They finally ceased with the conclusion of the Anglo-Russian Agreement. Since then the international importance of Seistan has waned.

The natural conditions which give to Seistan this strategic importance persist. Meantime, British influence is being consolidated through the Seistan trade route. The distance from Quetta to the Seistan border at Killa Robat is 465 miles, most of it dead level, and it has now been provided with fortified posts, dak bungalows, wells, and all facilities for caravan traffic. The railway was pushed out from Spezand, on the Bolan Railway, to Nushki, so as to provide a better starting point for the caravans than Quetta. This line was extended to Duzdap, 54 miles on the Persian side of the Indo-Persian Frontier during the war as a military measure, but the traffic after the re-establishment of peace supported only two trains a week. There then arose trouble owing to Persian insistence on the collection of Customs duties on rations taken across their frontier for the railway staff. This led to the stoppage of train running on the Persian side of the Frontier. Negotiations have now for years dragged on to bring about a reasonable settlement in regard to the situation.

III.—PERSIA.

From causes which only need to be very briefly set out, the Persian question as affecting Indian frontier policy has receded until it is of no account. Reference is made in the introduction to this section to the fact that the conclusion of the Anglo-Russian Agreement left us a bitter legacy in Persia. That Agreement divided Persia into two zones of influence, and the Persians bitterly resented this apparent division of their kingdom between the two Powers, though no such end was in view. German agents, working cleverly on this feeling, established an influence which was not suspected, and when the war broke out they were able to raise the tribes in opposition to Great Britain, in the South, and after the fall of Kut-al-Amara when a Turkish Division penetrated Western Persia, they exercised a strong influence in Teheran. With the defeat of Turkey and the Central Powers this influence disappeared, but at that time there was no authority in Persia besides that of the British Government, which had strong forces in the North-West and controlled the southern provinces through a force organised under British officers and called The South Persian Rifles. It was one of the first tasks of the British Government to regularise this position, and for this purpose an agreement was reached with the then Persian Government, the main features of which were:—

To respect Persian integrity;
To supply experts for Persian administration;
To supply officers and equipment for a Persian force for the maintenance of order;
To provide a loan for these purposes;
To co-operate with the Persian Government in railway construction and other forms of transport.

Both Governments agreed to the appointment of a joint committee to examine and revise the Customs tariff.

The second agreement defined the terms and conditions on which the loan was to be made to Persia. The loan was for £2,000,000 at 7 per cent. redeemable in 20 years. It was secured on the revenues and Customs' receipts assigned for the repayment of the 1911 loan and should these be insufficient the Persian Government was to make good the necessary sums from other sources.

The Present Position.—We have given the main points in the Anglo-Persian agreement, because few documents have been more misunderstood. Those who desire to study it in greater detail will find it set out in the Indian Year Book for 1921, page 138 *et seq.* It has been explained that most Persians construed it into a guarantee of protection against all external enemies. When the British troops in the north-west retired before the Bolsheviks, the Persians had no use for the Agreement and it soon became a dead instrument. It was finally rejected and the advisers who were to have assisted Persia under it withdrew.

A remark frequently heard amongst soldiers and politicians in India after the War was that Great Britain must take an active hand in Persia because she could not be a passive witness to chaos in that country. The view always taken in the Indian Year Book was that the internal affairs of Persia were her own concern; if she preferred chaos to order that was her own look-out, but left alone she would hammer out some form of Government. That position has been justified. The Sirdar Sipah, or commander-in-chief, a rough but energetic soldier, gradually took charge of Persian affairs and established a thinly-veiled military dictatorship which made the Government feared and respected throughout the country for the first time since the assassination of Shah Nasr-ed-din. A body of capable Americans under Dr. Millspaugh restored order to the chaotic finances. These two forces operating in unison gave Persia the best government she had known for a generation. But the Sirdar Sipah chafed under the irregularities of his position, with a Shah spending his time in Europe and wasting the resources of the country. He moved to have his position regularised by the deposition of the absentee Shah and his own ascent of the throne. At first he was defeated by the opposition of the Mollahs, but in 1925 prevailed, and the Shah was formally deposed and the Sirdar Sipah chosen monarch in his place. The change was made without disturbance, and Persia entered on a period of peace and consolidation which has removed it from the disturbing forces in the post-war world. Since then considerable progress has been made with the reform of the administration, and many projects are afoot for the improvement of communications, which is the greatest need of the land, such as an air service to Teheran and railway construction. The least reassuring episode was the departure of the American financial mission, which had done admirable work in the restoration of the finances. When their contract expired Dr. Millspaugh and his colleagues were offered a renewal of it on terms which they did not regard as satisfactory, especially in regard to the powers they were to exercise. They therefore withdrew from the country, and have been replaced by other foreign advisers. The general situation was gravely disturbed in 1932 by the sudden termination by the Persian Government of the Anglo-Persian Oil Co's concession, a matter affecting one of the biggest industrial undertakings in the world and millions sterling of capital. The intervention of the British Government led to the reference of the trouble to the League of Nations and this paved the way for negotiations between the Company and the Persian Government. While these were being settled some progress was also made with general negotiations between the British and Persian Governments for an agreement covering all outstanding points of difficulty between them.

IV.—THE PRESENT FRONTIER PROBLEM.

There yet remains a small part of British India where the King's writ does not run. Under what is called the Durand Agreement with the Amir of Afghanistan, the boundary between India and Afghanistan was settled, and it was delimited in 1903 except for a small section which was delimited after the Afghan War in 1919. But the Government of India have never occupied up to the border. Between the administered territory and the Durand line there lies a belt of territory of varying width extending from the Gomal Pass in the south, to Kashmir in the north; this is generically known as the Tribal Territory. Its future is the keynote of the interminable discussions of frontier policy for nearly half a century.

This is a country of deep valleys and secluded glens, which nature has fenced in with almost inaccessible mountains. It is peopled with wild tribes of mysterious origin, in whom Afghan, Tartar, Turkoman, Persian, Indian, Arab and Jewish intermingle. They had lived their own lives for centuries, with little intercourse even amongst themselves, and as Sir Valentine Chirol truly said "the only bond that ever could unite them in common action was the bond of Islam." It is impossible to understand the Frontier problem unless two facts are steadily borne in mind. The strongest sentiment amongst these strange people is the desire to be left alone. They value their independence much more than their lives. The other factor is that the country does not suffice even in good years to maintain the population. They must find the means of subsistence outside, either in trade, by service in the Indian Army or in the Khassadars, or else in the outlet which hill-men all the world over have utilised from time immemorial, the raiding of the wealthier and more peaceful population of the Plains.

Frontier Policy.

The policy of the Government of India toward the Independent Territory has ebbed and flowed in a remarkable degree. It has fluctuated between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the tribesmen entirely to their own resources, punishing them only when they raided British territory. Behind both the policies lay the menace of a Russian invasion, and that coloured our frontier policy until the Anglo-Russian Agreement. This induced what was called Hit and Retire tactics. In the half century which ended in 1897 there were nearly a score of punitive expeditions, each one of which left behind a legacy of distrust, and which brought no permanent improvement in its train. The fruit of the suspicion thus engendered was seen in 1897. Then the whole Frontier, from the Malakand to the Gomal, was ablaze. The extent of this rising and the magnitude of the military measures which were taken to meet it compelled a consideration of the whole position. The broad outlines of the new policy were laid down in a despatch from the Secretary of State for India; which prescribed for the Government the "limitation of your interference with the tribes, so as to avoid the extension of administrative control over tribal territory." It fell to Lord Curzon to give effect to this policy. The main foundations of his action were to exercise over the tribes the political influence requisite to secure our imperial interests, to pay them subsidies for the performance of specific duties, but to respect their tribal independence and leave them, as far as possible, free to govern themselves according to their own traditions and to follow their own inherited habits of life without let or hindrance.

New Province.

As a first step Lord Curzon took the control of the tribes under the direct supervision of the Government of India. Up to this point they had been in charge of the Government of the Punjab, a province whose head is busied with many other concerns. Lord Curzon created in 1901 the North-West Frontier Province, and placed it in charge of a Chief Commissioner, with an intimate frontier experience, directly subordinate to the Government of India. This was a revival of a scheme prepared by Lord Lytton in 1877, and often considered afterwards, but which had slipped for lack of driving power. Next, Lord Curzon withdrew the regular troops so far as possible from the advanced posts, and placed these fortalices in charge of tribal levies, officered by a handful of British officers. The most successful of these was the Khyber Rifles, which steadfastly kept the peace of that historic Pass until 1919. At the same time the regular troops were cantoned in places whence they could quickly move to any danger point, and these bases were connected with the Indian railway system. In pursuance of this policy frontier railways were run out to Dargai, and a narrow-gauge line, since converted to the broad-gauge, was constructed from Kushalgarh to Kohat, at the entrance of the Kohat Pass, and to Thal in the midst of the Kurram Valley. These railways were completed by lines to Tonk and Bannu. By this means the striking power of the regular forces was greatly increased. Nor was the policy of economic development neglected. The railways gave a powerful stimulus to trade and the Lower Swat Canal converted fractious tribesmen into successful agriculturists. This policy of economic development is receiving a great development through the completion of the Upper Swat Canal (*q. v.* Irrigation). Now it is completed there are other works awaiting attention. For many years this policy was completely justified by results.

A New Policy.

It saved us from serious complications for nearly twenty years, although the position could never be said to be entirely satisfactory, particularly in Waziristan, peopled by the most reckless raiders on the whole border-line, with a bolt hole into Afghanistan when pressed from the British side. It endured through the Great War and did not break

down until the Amir of Afghanistan sought refuge from his internal troubles in a jehad against India. In this insane enterprise the Afghans placed less reliance in their regular troops, which have never offered more than a contemptible resistance to the British forces than in the armed tribesmen. In this they were justified, for the Indian Military authorities failed to give timely support to the advanced militia posts, some of these posts were ordered to withdraw, the Militia collapsed and the most serious fighting was with the tribesmen. The tribal levies collapsed with almost universal swiftness. The Southern Waziristan Militia broke and there was serious trouble throughout the Zhob district. The Afridis, our most serious enemies in 1897, and the most powerful of the tribes on the North-West Frontier, remained fairly quiet throughout the actual hostilities with Afghanistan, but later it was necessary to take measures against a leading malcontent and destroy his fort at Chora. But the Mahsuds and the Waziris broke into open hostilities. Their country lies within the belt bounded by the Durand Line and the Afghan frontier on the west, and by the districts of Bannu and Dehra Ismail Khan on the east. Amongst them the Afghan emissaries were particularly active and as they could put in the field some 30,000 warriors, 75 per cent. armed with modern weapons of precision, they constituted formidable adversaries. They refused to make peace even when the Afghans craved in. They rejected our terms and active measures were taken against them. The fighting was the most severe in the history of the Frontier. The Mahsuds fought with great tenacity. Their shooting was amazingly good; their tactics were admirable, for amongst their ranks were many men trained either in the Militia or in the Indian Army; and more than once they came within measurable distance of considerable success. They were assisted by the fact that the best trained troops in the Indian Army were still overseas and younger soldiers were opposed to them. But their very tenacity and bravery were their own undoing; their losses were the heaviest in the long history of the Borderland and when the Mahsuds made their complete submission in September 1921 they were more severely chastened than at any time during their career.

A New Chapter.—As the result of the Afghan War of 1919, Indian frontier policy was again thrown into the melting pot. There was much vague discussion of the position in the course of the months which followed the Afghan War and the troubles in Waziristan which succeeded it, but this discussion did not really come to a head until February-March 1922. The Budget then presented to the country revealed a serious financial position. It showed that despite serious increases in taxation, the country had suffered a series of deficits, which had been financed out of borrowings. Further heavy taxation was proposed in this Budget, but even then the equilibrium which the financial authorities regarded as of paramount importance was not attained. When the accounts were examined, it was seen that the heaviest charges on the exchequer were those under Military Expenses, and that there was an indefinitely large, and seemingly unending expenditure on Waziristan. This forced the Military, and allied with it the Frontier, expenditure to the front. In actual practice the discussion was really focussed on Waziristan. In essentials it was the aged controversy—shall we deal with this part of the Frontier on what is known as the Sandeman system, namely, by occupying commanding posts within the country itself, dominating the tribesmen but interfering little in their own affairs; or shall we revert to what was known as the close border system, as modified by Lord Curzon, of withdrawing our regular troops to strategic positions outside the tribal area, leaving the tribesmen, organised into militia, to keep the passes open, and punishing the tribesmen by expeditions when their raiding propensities become unbearable.

The Curzon Policy.—The Curzon policy, adopted in 1899, to clear up the aftermath of the serious and unsatisfactory Frontier rising in 1897, was a compromise between the "occupation" and the "close border" policies. It was based on the withdrawal of the regular troops so far as possible to cantonments in rear whilst the frontier posts, such as those in the Tochi at Wana and in the Khyber and Kurram were held by militia, recruited from amongst the tribesmen themselves. The cantonments for regular troops were linked so far as possible with the Indian railway system, so as to permit of rapid reinforcement. But it must be remembered that like all Frontier students, Lord Curzon did not regard this as the final policy. He wrote in the Memorandum formulating his ideas: "It is of course inevitable that in the passage of time the whole Waziri country up to the Durand line will come more and more under our control. No policy in the world can resist or greatly retard that consummation. My desire is to bring it about by gradual degrees and above all without the constant aid and presence of British troops." The Curzon policy, though it was not pursued with the steadfastness he would have followed if he had remained in control, gave us moderate—or rather it should be said bearable—frontier conditions until the Afghan War. It then broke down, because the tribal militia, on which it was based, could not, when left without the support of regular troops in the day of need, withstand the wave of fanaticism and other conditions set up by the Afghan invasion of 1919. The Khyber militia faded away; the Waziri militia either mutinied, as at Wana, or deserted. The pillar of the Curzon system fell.

The Policy.—The policy first adumbrated to meet these changed conditions was outlined by Lord Chelmsford, the then Viceroy, in a speech which he addressed to the Indian Legislature. He said it had been decided to retain commanding posts in Waziristan; to open up the country by roads; to extend the main Indian railway system from its then terminus, Jamrud, through the Khyber to the frontier of Afghanistan, and to take over the duties of the Militia by regular troops. That immediate policy was soon modified so far as the policing of these frontier lines by regular troops was concerned. Such duties are immensely unpopular in the regular army, which is not organised and equipped for work of this character. Irregulars have always existed on

WAZIRISTAN.

the frontier, and as they had disappeared with the Militia, it was necessary to recreate them. The new form of irregular was what have been called Khassadars and Scouts. The Khassadar is an extremely irregular. He has no British officers and no uniform, except a distinguishing kind of *pagri*. In contradistinction to the old Militia, he finds his own rifle. As one informed observer remarked, the beauty of the system is that so long as the Khassadars, under their own headmen, secure the immunity of the caravans and perform their other police duties, they draw their pay and no questions are asked. If they desert in the day of trouble, they lose their pay but the Government loses no rifles, nor does it risk mutiny or the loss of British and Indian officers. But the application of this policy produced an acute controversy. It was one thing to say that commanding posts in Waziristan should be retained; it was another to decide what these posts should be. We must therefore consider the special problem of Waziristan. The Scouts are a mobile, mounted, irregular force not territorially recruited, officered by British officers.

V.—WAZIRISTAN.

We can now approach the real frontier question of the day, the future of Waziristan. What follows is drawn from an admirable article contributed some years ago to "The Journal of the United Service Institution of India," written by Lt.-Col. G. M. Routh, D.S.O.

Geographically Waziristan is a rough parallelogram averaging 60 miles from East to West and 160 from North to South. The western half consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the water-shed between the Indus and the Helmund Rivers and corresponds with the Durand Line separating India from Afghanistan. This is the western boundary. On the east is the Indus. North is the water-shed of the Kurram River running East and West about 30 miles north of Bannu separating Waziristan from the Kohat District. South is a zigzag political boundary from the Durand Line running between Wana and Fort Sandeman in Baluchistan with a turn southwards to the Indus.

The western half is a rugged and inhospitable medley of ridges and ravines straggled and confused in hopeless disarray. The more inhabited portions lie well up the slope at heights of four to six thousand feet. Here are our outposts of Wana and Ladha some 15 and 20 miles respectively from the Durand Line, in the centre of the grazing district, the latter within five miles of important villages of Kaniguram and Makin.

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sand desert in the Marwat above Pezu.

Where irrigation or river water is obtainable cultivation is attempted under conditions which can hardly be encouraging. Other tracts like that between Pezu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfall.

Inhabitants.—The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of their richer and more peaceful neighbours. The name originates according to tradition from one Wazir, two of whose grandsons were the actual founders of the race. Of the four main tribes Darweshkhel, Mahsuds, Dawars and Batanni, only the first two are true Wazirs. Their villages are separate though dotted about more or less indiscriminately, and inter-marriage is the exception—in fact all traditionally are in open strife, a circumstance which, until some bright political comet like the Afghan War of 1919 joined them together, as materially aided our dealings with them.

Unlike other parts of India, however, these wild people acknowledge little allegiance to maliks or headmen. No one except perhaps the Mulla Powindah till his death in 1913 could speak of any portion of them as his following.

Policy.—The policy of the British was at first one of non-interference with the tribes. Even now only part of the country is administered. Gradually it was found that more and more supervision became necessary to control raiding and this was attempted by expeditions to portions of the country with Regulars, followed by building posts and brick towers to be held by Militia. These posts were at first placed at the points where raiders usually debouched. The Political Officers, at first supported by Regulars, built up from 1904 onwards a force of some 3,000 Militia with British Officers at their disposal, who were backed up by the garrisons at Bannu and Dera Ismail Khan. In addition certain allowances were made to the tribes for good behaviour, prevention of raids and surrender of offenders when required; also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied. Wana was occupied in 1895 at the request of the Wana Wazirs. Similarly the Tochi in 1896. In the comprehensive expedition of 1895-96 when this policy was put into effect, the British arms were shown in every remote valley in the vain hope of taming the Mahsuds. It was hoped the various posts would prove a pacifying influence and a rallying ground for Government supporters. From 1904 to 1919 they were held by Militia. Roads and communications were improved and tribal allowances augmented by sales of produce to the troops on a liberal scale.

A Programme.—Lt.-Col. Routh then outlined a possible policy for Waziristan. We give it textually, because we believe that when it was written it reflected how military opinion in India was developing:—

"To the unprejudiced mind it appears more practical to grasp the nettle firmly and dominate the inhabited tracts. Why should not the road now being made to Ladha be continued 30 miles north to the Tochi road at Datta Khel and 20 miles south to Wana? Why should we not occupy the healthier portions of Waziristan rather than the foothills or Cis-Indus zones? The Razmak district round Makin 6,000 feet up is both healthy and fertile. The same applies to the Shawal valley laying behind Pir Gul, the national peak near Ladha rising to a height of 11,556 feet above the sea. The Wana plain, 5,000 feet up, 30 miles by 15, could with railways support an army corps; there is no doubt that

a forward railway policy will help to solve the problem. A line has been surveyed from Tank to Draband and thence up the valley to Fort Sandeman, so connecting with the Zhob and perhaps later to Wana. The Gumal Tangi from Murtaza to Khajuri Kach is the apparently obvious route, but would be prohibitively expensive in construction and require much tunnelling. Beyond Khajuri Kach *via* Tanai and Rogha Kot to Wana, some 23 miles, offers no difficulty. The old policy of the raiders working westwards and our retributive expeditions stretching their very temporary tentacles eastwards seems to suggest better lateral communications. The broad gauge at Kohat might without undue cost be extended to Thal and thence to Idak *via* Spinwam. From here till further extension proved desirable, a motor road through Razmak, Makin and Dwatoi to link up with that now surveyed to Ladha sounds possible to the looker on. Eventually such communications, road, rail, or both, could continue to Wana, Fort Sandeman and Quetta *via* Hindu Bagh, a strategic line offering great defensive possibilities substituting Razmak, which resembles Ootacamund, and healthy uplands for the deadly fever spots now occupied. The very fact of employing the tribesmen on these works with good pay and good engineers tends to pacify the country as well as providing healthy accessible hill stations in place of the proverbially comfortless cantonments which now exist in this part of the Frontier."

A Compromise.—A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Mahsud rebellion was made by the Foreign Secretary, Sir (then Mr.) Denys Bray, in the course of a Budget discussion in the Legislative Assembly on 5th March 1923. He outlined neither a Forward policy nor a Close Border policy. Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the one plan nor the other remained within the bounds of reasonable argument.

The Foreign Secretary explained that the ingredients of the Frontier problem at the present day are essentially three, namely, the Frontier districts, the neighbouring friendly State of Afghanistan, and the so-called Independent Territory, this last being the belt of unsettled mountain country which lies between the borders of British India and India. He proceeded specially to show that this belt is, in fact, within India "....It is boundary pillars that mark off Waziristan from Afghanistan; it is boundary pillars that include Waziristan in India. We are apt to call Waziristan independent territory; and it is only from the point of view of our British districts that these tribes are trans-frontier tribes. From the point of view of India, from the international point of view that is, they are cis-frontier tribesmen of India. If Waziristan and her tribes are India's scourge, they are also India's responsibility—and India's alone. That is an international fact that we must never forget."

Sir Denys next referred to the triumph of the Sandeman policy in Baluchistan. He pointed out that some people long ago believed that the same policy would prove effective in Waziristan. "But what was a practical proposition 20 or 30 years ago is not necessarily so now. The task is infinitely more difficult to-day, chiefly because the tribesmen are infinitely better armed; their arms having increased at least tenfold during the last 20 years." Dealing with the Close Border prescription he showed that if one erected a Chinese wall of barbed-wire fence along the plain some distance below the hills, "all the time the problem in front of us would be going from bad to worse, with the inevitable increase of arms in the trans-border and with that inevitable increase in the economic stringency in this mountainous tract, which would make the tribesmen more and more desperate, more and more thrown back on barbarism.....A rigid Close Border policy is really a policy of negation, and nothing more.....We might gain for our districts a momentary respite from raids but we would be leaving behind a legacy of infinitely worse trouble for their descendants."

The settled policy of Government in Waziristan, Sir Denys showed, was the control of that country through a road system, of which about 140 miles would lie in Waziristan itself and one hundred miles along the border of Derajat, and the maintenance of some 4,600 Khassadars and of some 5,000 irregulars, while at Razmak, 7,000 feet high and overlooking northern Waziristan, there would be an advanced base occupied by a strong garrison of regular troops. Razmak he showed to be further from the Durand Line than the old-established posts in the Tochi. In the geographical sense, therefore, the policy was, in one signal respect, a backward policy. None the less, it was a forward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through civilization, of the most backward and inaccessible, and therefore the most truculent and aggressive tribes on the border. "Come what may, civilization must be made to penetrate these inaccessible mountains or we must admit that there is no solution to the Waziristan problem, and we must fold our hands while it grows inevitably worse."

The policy thus initiated has proceeded with results according with the highest reasonable expectations and exceeding the most sanguine hopes of most people concerned in its formulation.

The roads are policed by the Khassadars, who have, in the main, proved faithful to their trust. The open hostility of the Waziri tribesmen to the presence of troops and other agents of Government in their midst, which at the outset they showed by shooting up individuals and small bodies of troops on every opportunity, has faded away, and the people have shown an understanding of the rule of law, and, under the control exercised, a readiness to conform to it. In various small but significant ways, methods of civilization have caught the imagination of the people and won their approval. Thus, the safety of the roads has encouraged, and is buttressed by a considerable development of motor-bus traffic. The roads, as the King's Highway, are officially held to be sacrosanct, that is no shooting up or other pursuit of personal or tribal feuds is permitted upon them. This permits villagers to proceed to and from the plains towns in safety. Under the influence of their women, the tribesmen applied

that the ban against shooting upon the highway would be extended to all the country for three miles on either side of the highway. Tentative efforts to introduce primary education proved possible and achieved as much success as could be expected. The hospitals and dispensaries maintained for irregular troops, called Scouts, employed about the country, attend to the wants of the tribes-people who come to them. So much has this arrangement been appreciated that the Mahsuds formally applied for the establishment of a hospital of their own. With grim humour, they offered to provide such an institution with the necessary surgical instruments, saying that they had saved this from the time when the British formerly left the country. In other words, they offered what they had captured or looted during the 1919 emeute.

A remarkable illustration of the acceptance by the people of the new conditions was provided a year or two ago by the Wana Wazirs when they partitioned the Political Authorities for the occupation of south Waziristan corresponding with that already established in northern Waziristan. A motor road had already been run out from Jhandola through Chagmali and the Shahur Tangi to Sarwekai. A brigade of troops, hitherto stationed at Manzai, whereabouts the Tak-i-Zam, after flowing down its deep valley from northern Waziristan, debouches on to the Derajat, was accordingly ordered up to Wana in the autumn of 1929. It proceeded throughout the journey thither without opposition and was warmly welcomed by the tribes people at Wana, where it established itself in a favourably sited camp not far from the fort which was the earlier centre of British occupation. There it happily remains.

The reoccupation of Wana and the circumstances in which it took place illustrate that a policy is a live thing. In other words, it is not a programme which can reach fulfilment or completion. It lives and always waits upon some new action to give it further expression. In this respect the new policy, though it has only demonstrably been applied in Waziristan, must be regarded as that which governs the actions of the authorities in regard, at least to the whole Frontier region lying between Baluchistan and the Khyber Pass, except, possibly, the Kurram Valley.

The area cultivated by the villagers of Wana plain doubled by the end of 1931 and the people declared their readiness to surrender their firearms if their neighbours also gave up theirs or were deprived of them. A road has been built commencing Fort Sandeman *via* Gulkach, on the Gomal river, with Tanai, on the Sarwekai-Wana road. A road, as yet roughly made, but suitable for motor transport has been constructed from Razmak through Kaniguram, in the heart of the Mahsud country to Wana. It was completed in 1933 and the only disputes connected with its construction arose from the rivalry of the tribesmen whose villages lie along the route and who sometimes fought one another to secure road-making contracts.

A startling new development upon the North West Frontier during 1930 was the spread thereto of agitation carried on by the **Indian National Congress** in the interior of India in pursuit of its efforts to bring political pressure to bear upon the Government of India, and above them, His Majesty's Government. The Congress at its annual session at Lahore in the week following Christmas, 1929, adopted a programme aiming at the separation of India from the British Empire and at the promotion of revolution in India to secure this end. In particular, it avowedly set out "to make Government impossible." Revolutionary agitation, and especially a campaign to promote disobedience of the civil law in order to bring the administration to a stand-still, commenced all over India immediately after the Congress meetings. The settled districts of the N.W. F. P. were the scene of this, in common with the rest of the land. The agitation was there carried on by Congress agents organised in what are known as Khilafat Committees. For their purpose they made special use of misrepresentations of the Sarda Act, recently passed by the Indian Legislature by the official and Hindu votes against the opposition of the Muslim non-official members. This measure makes illegal and provides penalties for the marriage of boys and girls below stated minimum ages. The age at which marriage may take place is also in general terms laid down for Mohammedans by their religious law. Hence, the Muslims in British India, while acknowledging that the Sarda Act would not in practice affect them, because its provisions in no way over-rule their religious law, nevertheless saw in the measure an act affecting the domain of their religious law, and passed, in spite of their dissent, in a Legislature in which Muslims are, by themselves, a hopeless minority. They regarded its enactment as a grave illustration of their fears that under any scheme of democratic self-government in India, Muslim interests would not be safe against disregard by the Hindu majority.

Outbreak at Peshawar in 1930.—This Muslim apprehension, after the passing of the Act, strongly influenced the attitude of the community towards all questions of political reform, and the lever which misrepresentation of the Act provided for stirring up anti-Government agitation in the almost wholly and fanatical Muslim province in the north can easily be understood. Grossly untrue propaganda was carried on; it was, for instance, alleged that under the Act all girls must be medically examined before marriage. An elaboration of this untruth was that the Government were recruiting a large body of Hindu inspectors to make the examinations. And the agitation was deliberately pushed outwards from the settled districts of the N. W. F. P. into the tribal areas. Waziristan was amongst the first of them to be inundated with the propaganda. This was in March-April 1929. The poison spread outwards from Peshawar into Tirah about the same time. The agitation was sedulously carried on in the district northward of Peshawar city and from thence was pushed into Mohmand country. The first point of violent combustion was Peshawar city, where the mob murderously broke out on 23rd April 1930. Within a short time, Afridi bands descended the ravines and nullahs from Tirah to join in the fray. The Mohmands became

greatly excited and sent down bands to sit near the border and watch for an opportunity to join in. The Upper Tochi's Wazirs simultaneously took to arms and shortly afterwards the Mahsud Wazirs, about Ladha, did the same. At this stage, the development of the Air arm in India proved of incalculable value. Aeroplanes patrolled the whole country and were frequently employed by the political authorities to take preventive and punitive action by bombing. The road system, meanwhile, enabled troops to be moved at will to positions of advantage for dealing with whatever serious tribal aggression appeared likely.

In the result, the Mohmands, after being bombed several times, found discretion the better part of valour and made no descent in force. The Afridis twice endeavoured to raid Peshawar in force but by combined air and land action were both times driven back to their hills with no achievement to report. The Orakzais of southern Tirah threatened to descend by the Ublan Pass upon Kohat and their western clans attacked a post in the Upper Kurram and endeavoured to attack Parachinar. Helped by the machinations of Congress agents, they succeeded in drawing two or three clans of Afghan tribesmen across the border into the fray. Combined air and ground action crushed these efforts. The Tochi Wazirs heavily attacked Datta Khel, but were speedily brought to order by force. The Mahsuds were similarly repulsed and punished when they assaulted Scrarogha, in the valley of the Tak-i-Zam.

All outbreaks of revolt were suppressed in the same manner and the establishment of new fortified posts on the Peshawar plain, immediately opposite the main valleys leading out of Tirah, and the construction of roads for their service, now indicate the application of the new frontier policy in that region. The Afridis long refused to assent to these, but being thereby deprived of access to their normal winter grazing grounds on the Khajuri and Aka Khul plain, and prevented from visiting Peshawar, their marketing centre, they came in an accepted peace under the new conditions before the opening of the winter of 1931-32.

It will be seen that the events of the summer of 1930 put the policy to a severe test, and that its successful operation in the emergency was specially assisted by the Royal Air Force. The resultant position appears, then, to be that the control of the tribes, where the policy has already been expressed in road building and in the establishment of suitable garrisons, is effective, that the political and military ground organization with which the policy is supported brings about the introduction of the ameliorative influence of civilization, and that the rapidity and success with which the Royal Air Force can operate over the hills, tends to diminish the amount of ground force necessary. On the other hand, the two descents of the Afridis upon the plain and their return to their homes without great loss, despite all that the Royal Air Force and large bodies of troops could do, indicate the capacity for mischief which lies in the hands of the Tirah tribes, and must remain there so long as the policy is not extended over their highlands.

Mohmand Outbreak in 1933.—Disturbances in the Mohmand country during the summer of 1933 both illustrated the operation of the modern Frontier policy and the need to keep it a live policy if it is to be of any use at all. The Mohmands may for the purposes of present description be divided into two categories namely, the Upper Mohmands, who live in the highlands of the Mohmand country, and the Lower Mohmands, whose country stretches from the lower altitudes of the same hills down to the Peshawar Plain. Through the country of the Upper Mohmands passes the Durand line but the Afghan Government have never agreed to its delimitation in part of this region and consequently its place has long been taken over a considerable portion of the length of the Frontier by what is described as the Presumptive Frontier. The exact position of this latter has never been settled between the two governments and it is consequently sometimes difficult to say whether people from particular villages belong to one side or to the other of it.

In 1932, during the revolutionary Red Shirt campaign, in connection with the Indian National Congress, in the Peshawar Plain, the Upper Mohmands decided to join in the disturbances and raids in the administered territory immediately northward of Peshawar. The Lower Mohmands are described as the Assured Tribes. The meaning of the description is that the British Indian authorities assure them protection against the attacks of the Upper Mohmands and they, on the other hand, are bound by promises of good behaviour. The Assured Tribes in 1932 interfered with the programme of the Upper Mohmands for raiding the plain and the Upper Mohmands in 1933, when spring and early summer once more facilitated their methods of campaigning, commenced retributory raids upon the Halimzai and other Assured clans. The attacked clans appealed to the political authorities for help and that help they were obliged to give.

About the same time as this trouble was germinating, there appeared in Bajaur, a country immediately to the north of that in which the events just described developed, a Pretender to the Aghan throne. He was accompanied by two companions and started a campaign in Bajaur for a revolution or such other trouble as might be possible in Afghanistan. This compelled the British Indian authorities to take measures in fulfilment of their obligations of good neighbourliness to Afghanistan.

Road construction from the Peshwar-Shabkadr road northwards through Ghalanai into the Halimzai country and towards the passes which lead from that country into the upper extremities of the Bajaur Valley was undertaken and two brigades of troops, with other details, were sent forward up it to assist in dealing with the Upper Mohmands. At the same time, aeroplanes bombarded the village of Kotkai in Upper Bajaur, which had given shelter to the Pretender, further aerial demonstrations were made and the Bajauris were given an ultimatum demanding the surrender of the Pretender by a given date.

The Upper Mohmands continuing aggressive and the Bajauris obdurate, there was good prospect of a campaign over the same country as that covered by the campaign of 1897. It seemed likely that the Ghalanai Road would be continued into the upper extremity of Bajaur and that another road for troops would also have to be constructed up the Bajaur valley itself so that by the meeting of the two roads in Upper Bajaur, there would become established a circular road through this part of the tribal territory, resembling that running through North Waziristan.

In the end, the Upper Mohmands, partly doubtless because of punishment which they received in certain encounters with our troops and partly probably because of influence brough to bear upon them from Kabul, retired to their hills and after negotiations entered into bonds to keep the peace; and the Bajauris, while maintaining on grounds of tribal custom their refusal to surrender the Pretender, nevertheless expelled that person from their territory, probably into Afghanistan. Here, then, the trouble ceased. The nett result of it is the construction of the road through Ghalanai and the rapid development of bus services and other activities of civilization which speedily took place along it.

VI.—AFGHANISTAN.

The relations of Afghanistan with the Indian Empire were for long dominated by one main consideration—the relation of Afghanistan to a Russian invasion of India. All other considerations were of secondary importance. For nearly three-quarters of a century the attitude of Great Britain toward successive Amirs has been dictated by this one factor. It was in order to prevent Afghanistan from coming under the influence of Russia that the first Afghan War of 1838 was fought—the most melancholy episode in Indian frontier history. It was because a Russian envoy was received at Kabul whilst the British representative was turned back at Ali Masjid that the Afghan War of 1878 was waged. After that the whole end of British policy toward Afghanistan was to build up a strong independent State, friendly to Britain, which would act as a buffer against Russia, and so to order our frontier policy that we should be in a position to move large forces up, if necessary, to support the Afghans in resisting aggression.

Gates to India.

A knowledge of the trans-frontier geography of India brought home to her administrators the conviction that there were only two main gates to India—through Afghanistan, the historic route to India, along which successive invasions have poured, and by way of Seistan. It was the purpose of British policy to close them, and of Russia to endeavour to keep them at any rate half open. To this end, having pushed her trans-Persian railway to Samarkand, Russia thrust a military line from Merv to the Kushklinsky Post, where railway material is collected for its immediate prolongation to Herat. Later, she connected the trans-Siberian railway with the tran-Caucasian system, by the Orenburg-Tashkent line, thus bringing Central Asia into direct touch with her European magazines. Nor has Great Britain been idle. A great military station has been created at Quetta. This is connected with the Indian railway system by lines of railway which climb to the Quetta Plateau by the Bolan Pass and through the Chapper Rift, lines which rank amongst the most picturesque and daring in the world. From Quetta the line has been carried by the Khojak tunnel through the Khwaja Amran Range, until it leads out to the Afghan Border at New Chaman, where it opens on the route to Kandahar. The material is stocked at New Chaman which would enable the line to be carried to Kandahar in sixty days. In view of the same menace the whole of Baluchistan has been brought under British control. Quetta is now one of the great strategical positions of the world, and nothing has been left undone which modern military science can achieve to add to its natural strength. In the opinion of many military authorities it firmly closes the western gate to India, either by way of Kandahar, or by the direct route through Seistan.

Further east, the Indian railway system was carried to Jamrud and by the autumn of 1925 up the Khyber Pass to Landi Kotal and down the other side of the Pass to Landi Khana. A first class military road sometimes double, sometimes treble, also threads the Pass to our advanced post at Landi Kotal; and then descends until it meets the Afghan frontier at Landi Khana. Later, a commencement was made with the Loi Shilman Railway, which, starting from Peshawar, was designed to penetrate the Mullagori country and provide an alternative advance to the Khyber for the movement of British troops for the defence of Kabul. For unexplained reasons, this line was suddenly stopped and is now thrust in the air. In this wise the two Powers prepared for the great conflict which was to be fought on the Kandahar-Ghazni-Kabul line.

Relations with India.

Between the advanced posts on either side stands the Kingdom of Afghanistan. The end of British policy has been to make it strong and friendly. In the first particular it has early and largely succeeded. The second aim may now also be said to have been attained. When the late Abdurrahaman was invited to ascend the throne, as the only means of escape from the tangle of 1879, none realised his great qualities. Previously the Amir of Afghanistan had been the chief of a confederacy of clans. Abdurrahaman made himself master in his own kingdom. By

means into which it is not well closely to enter; he beat down opposition until none dared lift a hand against him. Aided by a British subsidy of twelve lakhs of rupees a year, increased to eighteen by the Durand Agreement of 1893, and subsequently to over 20 lakhs, he established a strong standing army and set up arsenals under foreign supervision to furnish it with arms and ammunition. Step by step his position was regularised. The Anglo-Russian Boundary Commission,—which nearly precipitated war over the Penjdeh episode in 1885,—determined the northern boundaries. The Pamirs Agreement delimited the borders amid those snowy heights. The Durand Agreement settled the border on the British side, except for a small section to the west of the Khyber, which remained a fruitful source of trouble between Afghanistan and ourselves until 1919, when the Afghan claims and action upon the undemarcated section led to war. That section was finally surveyed and the frontier determined shortly after the conclusion of peace with Afghanistan. Finally the McMahon award closed the old feud with Persia over the distribution of the waters of the Helmand in Seistan. It was estimated by competent authorities that about the time of Abdurrahaman's death, Afghanistan was in a position to place in the field, in the event of war, one hundred thousand well-armed regular and irregular troops, together with two hundred thousand tribal levies, and to leave fifty thousand regulars and irregulars and a hundred thousand levies to maintain order in Kabul and the provinces. But if Afghanistan were made strong, it was not made friendly. Abdurrahaman Khan distrusted British policy up to the day of his death. All that can be said is that he distrusted it less than he distrusted Russia, and if the occasion had arisen for him to make a choice, he would have opposed a Russian advance with all the force at his disposal. He closed his country absolutely against all foreigners, except those who were necessary for the supervision of his arsenals and factories. He refused to accept a British Resident, on the ground that he could not protect him, and British affairs were entrusted to an Indian agent, who was in a most equivocal position. At the same time he repeatedly pressed for the right to pass by the Government of India and to establish his own representative at the Court of St. James.

Afghanistan and the War.—These relations were markedly improved during the reign of His Majesty the Amir Habibullah Khan. It used to be one of the trite sayings of the Frontier that the system which Abdurrahman Khan had built up would perish with him, for none was capable of maintaining it. Habibullah Khan more than maintained it. He visited India soon after his accession and acquired a vivid knowledge of the power and resources of the Empire. He strengthened and consolidated his authority in Afghanistan itself. At the outset of the war he made a declaration of his complete neutrality. It is believed—a considerable reticence is preserved over our relations with Afghanistan—that he warned the Government of India that he might be forced into many equivocal acts, but that they must trust him; certainly his reception of Turkish, Austrian and German "missions" at Kabul, at a time when British representatives were severely excluded, was open to grave misconstruction. But a fuller knowledge induced the belief that the Amir was in a position of no little difficulty. He had to compromise with the fanatical and anti-British elements amongst his own people, inflamed by the Turkish preaching of a jehad, or holy Islamic war. But he committed no act of hostility; as soon as it was safe to do so he turned the members of these missions out of the kingdom. At the end of the war his policy was completely justified; he had kept Afghanistan out of the war, he had adhered to the winning side; his authority in the kingdom and in Central Asia was at its zenith.

Murder of the Amir.—It is believed that if he had lived Habibullah Khan would have used this authority for a progressive policy in Afghanistan, by opening up communications and extending his engagements with India. He was courted by the representatives of Persia and the Central Asian States as the possible rallying centre of a Central Asian Islamic confederation. At this moment he was assassinated on the 20th February 1919. The circumstances surrounding his murder have never been fully explained; but there is strong ground for the belief that it was promoted by the reactionaries who had harassed him all his reign. These realised that with his vindication by the war their time of reckoning had come; they anticipated it by suborning one of his aides to murder him in his sleep. His brother, Nasrullah Khan, the nominee of the fanatical element, was proclaimed Amir at Jelalabad in his stead, but public opinion in Afghanistan revolted at the idea of the brother seizing power over the corpse of the murdered man. His sons, Hayat and Amanullah, were not disposed to waive their heritage. Amanullah was at Kabul, controlling the treasury and the arsenal and supported by the Army. Nasrullah found it impossible to make head against him and withdrew. The new Amir, Amanullah, at once communicated his accession to the Government of India and proclaimed his desire to adhere to the traditional policy of friendship. But his difficulties at once commenced; he had to deal with the war party in Afghanistan; he was confronted with the dissatisfaction arising from the manner in which the murderers of Habibullah had been dealt with; the fanatical element was exasperated by the imprisonment of Nasrullah; and the Army was so incensed that it had to be removed from Kabul and given occupation to divert its thoughts. A further element of complexity was introduced by the political situation in India. The agitation against the Rowlatt Act was at its height. The disturbances in the Punjab and Gujarat had taken place. Afghan agents in India, of whom the most prominent was Ghulam Hyder Khan, the Afghan postmaster at Peshawar, flooded Afghanistan with exaggerated accounts of the Indian unrest. The result of all this was to convince the Amir that the real solution of his difficulties was to unite all the disturbing elements in a war with India. On the 25th April his troops were set in motion and simultaneously a stream of anti-British propaganda.

commenced to flow from Kabul and open intrigue was started with the Frontier tribes, on whom the Afghans placed their chief reliance.

Speedy Defeat.—The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad. Nevertheless the regular Afghan Army was rapidly dealt with. Strong British forces moved up the Khyber and seized Dacca. Jelalabad was repeatedly bombed from the air and also Kabul. Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelalabad. In ten days the Afghans were severely defeated. On the 14th May they asked for an Armistice. With the usual Afghan spirit of haggling, they tried to water down the conditions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawalpindi on the 26th July. On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp. 196-197.

Post-War Relations.—It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards. During the hot weather of 1920 there were prolonged discussions at Mussoorie between Afghan Representatives and British officials under Sir Henry Dobbs. These were private, but it is believed that a complete agreement was reached. Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace. This Mission crossed the Border in January 1921 and entered Kabul where a peace treaty was signed.

The main points of the Treaty are set out in the Indian Year Book, 1923, pp. 197, 198-199.

Afghanistan after the War.—Since the War the relations between Afghanistan and Great Britain have been good and improving. There were painful episodes in 1923 when a murder gang from the tribal territory on the British side of the Frontier committed raids in British India, murdering English people and kidnapping English women and then took refuge in Afghanistan. In course of time this gang was broken up. His Majesty the King of Afghanistan had troubles within his own borders which have made him glad of British help. The main object of his government was to strengthen the resources of the country and to bring it into closer relation with modern methods of administration. But Afghanistan is an intensely conservative country and no changes are popular; especially violent was the opposition to a secular form of administration and education. The direct result was a formidable rebellion of Mangals and Zadrans in the Southern Provinces, and serious reverses to the regular troops sent against the rebels. At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of aeroplanes and other assistance afforded by the Government of India the insurrection was broken. Whilst this assistance was appreciated, the whole business gave a serious set-back to the reforms initiated by His Majesty; he had to withdraw almost the whole of his administrative code and to revert to the Mahomedan Law which was previously in force.

Bolshevik Penetration.—Taking a long view, a much more serious development of the policies of Afghanistan, at the period to which the foregoing notes apply was the penetration of the Bolsheviks. These astute propagandists have converted the former Trans-Caspian States of Tsarist Russia into Soviet Republics, where the rule of the Bolsheviks is much more drastic and disruptive than was that of what was called the despotism of the Romanoffs. The object of this policy is gradually to sweep into the Soviet system the outlying provinces of Persia, of China and of Afghanistan. In Persia this policy was foiled by the vigour of the Sipar Salah, Reza Khan, since declared Shah. In Chinese Turkestan it is pursued with qualified success. In Afghanistan it also made certain progress. The first step of the Bolsheviks was to extend the Soviet Republics of Tajikistan, Uzbekia and Turkmanistan so as to absorb all Northern Afghanistan. This was later, apparently, abandoned for the moment for a more gentle penetration. Large subsidies, mostly delivered in kind, were given to Afghanistan. Telegraph lines were erected all over the country; roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pilots and mechanics was created and was largely developed. In return the Bolsheviks received important trading facilities. The whole purpose of this policy was ultimately to make it possible to attack Great Britain in India through an absorbed Afghanistan.

It is very doubtful if the Amir and his advisers were deceived by these practices, and whether they did not pursue the simple plan of taking all they could get without the slightest intention of handing themselves over to the Bolsheviks. But it is easier to let the Bolshevik in than to get him out; friends of the Afghans were asking themselves whether the Amir was not nourishing vipers in his bosom. Towards the end of 1925 and in the early part of 1926 there was a rude awakening. The Northern Frontier of the country has always been unsettled because of the shifting courses of the Oxus. In December Bolshevik forces captured with violence the Afghan post of Darkabad, killing one soldier. These events aroused great indignation at Kabul and were denounced by the Amir *coram publico*. There is no little evidence to show that though the form of government has changed in Russia the aims of Russian policy are the same. It used to be said that the test of Russian good faith under the Anglo-Russian Agreement would be the attitude of Petrograd towards the extension of the Orenberg-Tashkent railway to Termes. That line has been constructed by the Bolsheviks. The Afghans have had their eyes opened.

Russo-Afghan Treaty.—Outwardly the relations between the two States are friendly. In December 1926 the Afghan papers published the text of a new treaty concluded with Soviet Russia, which was signed on August 31st, but

it provided that it should in no way interfere with the secret treaty signed in Moscow on February 28th, 1921. The principal clauses of this treaty, as disclosed in the Afghan papers, are as follows :—

Clause 1.—In the event of war or hostile action between one of the contracting parties and a third power or powers, the other contracting party will observe neutrality in respect of the first contracting party.

Clause 2.—Both the contracting parties agree to abstain from mutual aggression, the one against the other. Within their own dominions also they will do nothing which may cause political or military harm to the other party. The contracting parties particularly agree not to make alliances or political and military agreements with any one or more other powers against each other. Each will also abstain from joining any boycott or financial or economic blockade organized against the other pary. Besides this in case the attitude of a third power or powers is hostile towards one of the contracting parties, the other contracting party will not help such hostile policy, and, further, will prohibit the execution of such policy and hostile actions and measures within its dominions.

Clause 3.—The high contracting parties acknowledge one another's Government as rightful and independent. They agree to abstain from all sorts of armed or unarmed interference in one another's internal affairs. They will decidedly neither join nor help any one or more other powers which interfere in or against one of the contracting Government. None of the contracting parties will permit in its dominions the formation or existence of societies and the activities of individuals whose object is to gather armed force with a view to injuring the other's independence, or otherwise such activities will be checked. Similarly, neither of the contracting parties will allow armed forces, arms, ammunition, or other war material, meant to be used against the other contracting party to pass through its dominions.

Clause 6.—This treaty will take effect from the date of its ratification, which should take place within three months of its signature. It will be valid for three years. After this period it will remain in force for another year provided neither of the parties has given notice six months before the date of its expiry that it would cease after that time.

On March 23rd there was also signed in Berlin a treaty between Germany and Afghanistan which amounted to no more than the establishment of diplomatic relations.

A British Minister is established in Kabul as well as the representatives of other European States. The representatives of Afghanistan are established in India and in London, and at some of the European capitals. The various subsidiary agreements under the Treaty have been carried into effect.

The King's Tour.—In the closing months of 1927 His Majesty King Amanulla, accompanied by the Queen and a staff of officials, commenced a long tour to India and Europe. It is understood that this was one of the cherished ambitions of his father, King Habibullah, who was assassinated in 1919. King Amanulla, when he set out, was warmly welcomed in India and received a great popular greeting in Bombay both from his co-religionists and from members of other communities, who forgot the invasion of India in 1919. He then took ship to Europe. He was the guest of His Majesty King George V in London, and visited the principal European capitals. He made a State visit to Turkey, and returned to Afghanistan by way of Soviet Russia and Persia. A series of treaties with the governments of the countries visited was announced and the King returned to Kabul in the late summer of 1928, the tour having been unclouded by untoward incident. Afghanistan was peaceful during his long absence.

Reforming Zeal.—King Amanulla returned to his realm as full of reforming zeal. He was much impressed by the political and social institutions of the western lands he visited, and in particular by the dramatic forcefulness with which Mustapha Kemal Pasha had driven Turkey along the path of "reform," or perhaps it would be more correct to say westernisation. In this he was encouraged by the Queen, who was desirous of seeing the women of Afghanistan enjoy some of the freedom and opportunity won by and for the women of the West. Edict after edict was issued, changing the whole structure of Afghan society. New codes and taxes were imposed: it was proposed that women should emerge from their seclusion and doff the veil; the co-education of boys and girls was prescribed; in September Government officials were forbidden to practise polygamy; in October European dress was ordered for the people of Kabul. At the same time, the pay of the regular troops fell into arrear.

With every appreciation of the spirit and direction of these changes, friends of His Majesty advised the King to moderate the pace. They reminded him that in 1924 far less drastic changes had brought serious trouble in their train. In May of that year the "Lame Mullah" raised the standard of rebellion amongst the Gilzai and Mangal clansmen of Khost. The Mullahs were openly active against the King and His Majesty was equally frank in his hostility to them. Possibly also well-wishers suggested that what was possible in Turkey, after centuries of close contact with the West, and where the ground had been prepared by missionary effort and a long struggle for the emancipation of women, might be less easy in Afghanistan, where there had been no contact with the western world.

A change of Kings.—Events moved rapidly in 1929. A notorious north Afghan *budmash*, Bacha-i-Saqqao, raised the standard of revolt and inflicted severe losses on the Afghan Regular troops, discontented as they were by arrears of pay. Day by day the Afghan representatives in various parts of the world issued messages asserting that the rebels had been destroyed, and a rapid series of pronouncements declared the withdrawal of all the reforms and the establishment of a Council of Provincial Representatives. Communications with the

outer world were broken. King Amanulla and his family fled from Kabul to Kandahar, and then from Kandahar *via* Quetta to Bombay where they took ship to Europe. King Amanulla on his arrival at Rome entered into possession of the Afghan Legation, where he remained. Bacha-i-Saqqao declared himself King of Afghanistan, and for a few months held his position in Kabul. Without money, administrative experience or a disciplined following, his throne was a thorny one and he was harassed by constant attacks. The Royal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant flights evacuated all without the slightest hitch. The most formidable of the new king's adversaries were led by General Nadir Khan, a scion of the old ruling house, with a wide knowledge of the world. Heavy fighting took place. Fortunes varied. Nadir Khan almost gave up his chances as finally lost. But a band of Wazirs from the British side of the border attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest. Nadir Khan thus became victor and shortly afterwards, at the wish of the Afghans, Bacha-i-Saqqao was executed with other rebels, and when the year closed Nadir Khan was to all seeming in firm possession of the Kingdom. He despatched members of his family to the principal Afghan Legations in Europe. A Shinwari rising near the exit from the Khyber Pass took place in February 1930, and was repressed with unexpected success and vigour. There followed a serious rebellion in Kohidaman, Bacha-i-Saqqao's country. This also was promptly quelled. And thereafter Nadir Shah ruled without challenge. He devoted himself to the reorganisation of his Army. England was strictly neutral during the successive stages of the revolution, but promised support to Afghanistan to help her maintain internal peace when she had restored it and this promise was fulfilled by the provision of an interest free loan of £200,000 to King Nadir and by the supply of rifles and ammunition to him. He gave evidence of his friendliness towards Britain and India. He co-operated effectively to prevent tribes on his side of the Frontier joining those on the British side against the Government of India in response to the Congress agitation in the summer of 1930. The trade routes were re-opened and the new King again took up Amanullah's mantle of reform but in a statesmanlike manner which carried the Mullah's along with him.

Murder of Nadir Shah.—This ordered march of progress was tragically interrupted by the murder of His Majesty Nadir Shah on the afternoon of 8 November 1933. His Majesty was attending a football tournament prize-giving, when a young man among the gathering stepped forward and fired several revolver shots into him at close range, killing him instantly. It later appeared that the assassin committed the crime in revenge for the execution of a prominent Afghan who had been caught deeply involved in treasonable activities after he had been mercifully treated for earlier behaviour of the same kind. The assassin's father was stated to have been this man's servant. The murder was not followed by general or widespread disorder. The members of Nadir Shah's family and his prominent officers of State stood loyally by his heir, his son, Muhammed Zahir. The latter was duly placed on his father's throne and his accession was in due course acknowledged and confirmed throughout the kingdom in the traditional manner. The new king started his reign with a high reputation for courage and steadiness. He early issued assurances to his people that he would continue the policy of his father in affairs of State. No untoward events have occurred in the months that have since past.

British Representative—Sir R. R. Maconochie, K.B.E., C.I.E.

VII.—TIBET.

Recent British policy in Tibet is really another phase in the long-drawn-out duel between Great Britain and Russia in Central Asia. The earliest efforts to establish communication with that country were not, of course, inspired by this apprehension. When in 1774 Warren Hastings despatched Bogle on a mission to the Tashi-Lama of Shigatse,—the spiritual equal if not superior, of the Dalai Lama of Lhasa—his desire was to establish facilities for trade, to open up friendly relations with a Power which was giving us trouble on the frontier, and gradually to pave the way to a good understanding between the two countries. After Warren Hastings' departure from India the subject slept, and the last Englishman to visit Lhasa, until the Younghusband Expedition of 1904, was the unofficial Manning. In 1885, under the inspiration of Colman Macaulay, of the Bengal Civil Service, a further attempt was made to get into touch with the Tibetans, but it was abandoned in deference to the opposition of the Chinese, whose suzerainty over Tibet was recognised, and to whose view until the war with Japan, British statesmen were inclined to pay excessive deference. But the position on the Tibetan frontier continued to be most unsatisfactory. The Tibetans were aggressive and obstructive, and with a view to putting an end to an intolerable situation, a Convention was negotiated between Great Britain and China in 1890. This laid down the boundary between Sikkim and Tibet, it admitted a British protectorate over Sikkim, and paved the way for arrangements for the conduct of trade across the Sikkim-Tibet frontiers. These supplementary arrangements provided for the opening of a trade mart at Yatung, on the Tibetan side of the frontier, to which British subjects should have the right of free access, and where there should be no restrictions on trade. The agreement proved useless in practice, because the Tibetans refused to recognise it, and despite their established suzerainty, the Chinese Government were unable to secure respect for it.

Russian Intervention.

This was the position when in 1899 Lord Curzon, Viceroy of India, endeavoured to get into direct touch with the Tibetan authorities. Three letters which he addressed to the Dalai Lama were returned unopened, at a time when the Dalai Lama was in direct intercourse with the Tsar of Russia. His emissary was a Siberian Dorjieff, who had established a remarkable ascendancy in the counsels of the Dalai Lama. After a few years' residence at Lhasa Dorjieff went to Russia on a confidential mission in 1899. At the end of 1900 he returned to Russia at the head of a Tibetan mission of which the head was officially described in Russia as "the senior Tsanite Khomba attached to the Dalai Lama of Tibet." This mission arrived at Odessa in October 1900, and was received in audience by the Tsar at Livadia. Dorjieff returned to Lhasa to report progress, and in 1901 was at St. Petersburg with a Tibetan mission, where as bearers of an autograph letter from the Dalai Lama they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by a Russian force to which several Intelligence Officers were attached. At the time it was rumoured that Dorjieff had, on behalf of the Dalai Lama, concluded a treaty with Russia, which virtually placed Tibet under the protectorate of Russia. This rumour was afterwards officially contradicted by the Russian Government.

The Expedition of 1904.

In view of these conditions the Government of India, treating the idea of Chinese suzerainty over Tibet as a constitutional fiction, proposed in 1903, to despatch a mission, with an armed escort, to Lhasa to discuss the outstanding questions with the Tibetan authorities on the spot. To this the Home Government could not assent, but agreed, in conjunction with the Chinese Government, to a joint meeting at Khamba Jong, on the Tibetan side of the frontier. Sir Francis Younghusband was the British representative, but after months of delay it was ascertained that the Tibetans had no intention of committing themselves. It was therefore agreed that the mission, with a strong escort, should move to Gyantse. On the way the Tibetans developed marked hostility, and there was fighting at Tuna, and several sharp encounters in and around Gyantse. It was therefore decided that the mission should advance to Lhasa, and on August 3rd, 1904, Lhasa was reached. There Sir Francis Younghusband negotiated a convention by which the Tibetans agreed to respect the Chinese Convention of 1890; to open trade marts at Gyantse, Gartok and Yatung; to pay an indemnity of £500,000 (seventy-five lakhs of rupees); the British to remain in occupation of the Chumbi Valley until this indemnity was paid off at the rate of a lakh of rupees a year. In a separate instrument the Tibetans agreed that the British Trade Agent at Gyantse should have the right to proceed to Lhasa to discuss commercial questions, if necessary.

Home Government intervenes.

For reasons which were not apparent at the time, but which have since been made clearer, the Home Government were unable to accept the full terms of this agreement. The indemnity was reduced from seventy-five lakhs of rupees to twenty-five lakhs, to be paid off in three years, and the occupation of the Chumbi Valley was reduced to that period. The right to despatch the British Trade Agent to Lhasa was withdrawn. Two years later (June 1906) a Convention was concluded between Great Britain and China regulating the position in Tibet. Under this Convention Great Britain agreed neither to annex Tibetan territory, nor to interfere in the internal administration of Tibet. China undertook not to permit any other foreign State to interfere with the territory or internal administration of Tibet. Great Britain was empowered to lay down telegraph lines to connect the trade stations with India, and it was provided that the provisions of the Convention of 1890, and the Trade Regulations of 1893, remained in force. The Chinese Government paid the indemnity in three years and the Chumbi Valley was evacuated. The only direct result of the Mission was the opening of the three trade marts and the establishment of a British Trade Agent at Gyantse.

Chinese Action.

The sequel to the Anglo-Russian Agreement was dramatic, although it ought not to have been unexpected. On the approach of the Younghusband Mission the Dalai Lama fled to Urga, the sacred city of the Buddhists in Mongolia. He left the internal government of Tibet in confusion, and one of Sir Francis Younghusband's great difficulties was to find Tibetan officials who would undertake the responsibility of signing the Treaty. Now the suzerainty of China over Tibet had been explicitly reaffirmed. It was asserted that she would be held responsible for the foreign relations of Tibet. In the past this suzerainty having been a "constitutional action," it was inevitable that China should take steps to see that she had the power to make her well respected at Lhasa. To this end she proceeded to convert Tibet from a vassal state into a province of China. In 1908 Chao Erh feng, Acting Viceroy in the neighbouring province of Szechuen, was appointed Resident in Tibet. He proceeded gradually to establish his authority, marching through eastern Tibet and treating the people with great severity. Meantime the Dalai Lama, finding his presence at Urga, the seat of another Buddhist Pontiff, irksome, had taken refuge in Si-ning. Thence he proceeded to Peking, where he arrived in 1908, was received by the Court, and despatched to resume his duties at Lhasa. Moving by leisured stages, he arrived there at Christmas, 1909. But it was soon apparent that the ideas of the Dalai Lama and of the Chinese Government had little in common. The Dalai Lama expected to resume the temporal and spiritual despotism which he had exercised prior to 1904. The Chinese intended to deprive him of all temporal power and preserve him as a spiritual pope. The Tibetans had already been exasperated by the pressure of the Chinese soldiery. The report that a strong Chinese force was moving on Lhasa so alarmed the Dalai Lama that he fled from Lhasa, and by the irony of fate sought a refuge in India. He

was chased to the frontier by Chinese troops, and took up his abode in Darjeeling, whilst Chinese troops overran Tibet.

Later Stages.

The British Government, acting on the representations of the Government of India, made strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances in the peace of a country which was a neighbour on intimate terms with other neighbouring States on our frontier, especially with Nepal, and pressed that an effective Tibetan Government be maintained. The attitude of the Chinese Government was that no more troops had been sent to Tibet than were necessary for the preservation of order, that China had no intention of converting Tibet into a province, but that being responsible for the good conduct of Tibet, she must be in a position to see that her wishes were respected by the Tibetans. Finally, the Chinese remarked that the Dalai Lama was such an impossible person that they had been compelled again to depose him. Here the matter might have rested, but for the revolution in China. That revolution broke out in Szechuen, and one of the first victims was Chao Erh-feng. Cut off from all support from China, surrounded by a hostile and infuriated populace, the Chinese troops in Tibet were in a hopeless case; they surrendered, and sought escape not through China, but through India, by way of Darjeeling and Calcutta. The Dalai Lama returned to Lhasa, and in 1913, in the House of Lords on July 28, Lord Morley stated the policy of the British Government in relation to these changes. He said the declaration of the President of the Chinese Republic saying that Tibet came within the sphere of Chinese internal administration; and that Tibet was to be regarded as on an equal footing with other provinces of China, was met by a very vigorous protest from the British Government. The Chinese Government subsequently accepted the principle that China is to have no right of active intervention in the internal administration of Tibet, and agreed to the constitution of a conference to discuss the relation of the three countries. This Convention met at Simla when Sir Henry McMahon, Foreign Secretary to the Government of India; Mr. Ivan Chen, representing China; and Mr. Long Chen Shatra, Prime Minister to the Dalai Lama, threshed out these issues. Whilst no official pronouncement has been made on the subject, it is understood that a Convention was initialled in June which recognised the complete autonomy of Tibet proper, with the right of China to maintain a Resident at Lhasa with a suitable guard. A semi-autonomous zone was to be constituted in Eastern Tibet, in which the Chinese position was to be relatively much stronger. But this Convention, it is understood, has not been ratified by the Chinese Government, owing to the difficulty of defining Outer and Inner Tibet, and in 1918 Tibet took the offensive and threw off the last vestiges of Chinese suzerainty. When the Chinese province of Szechuan went over to the South, the Central Government at Pekin was unable to finance the frontier forces or to withstand the Tibetan advance, which was directed from Lhasa and appeared to be ably managed. After the Tibetan army had occupied some towns on the confines of the Szechuan marshes, hostilities were suspended and an armistice was concluded.

From what has gone before, it will be seen that the importance which formerly attached to the political condition of Tibet was much less a local than an external question, and was influenced by our relations with Russia and China rather than with our relations with Tibet. Russia having relapsed into a state of considerable confusion, and China having relapsed into a state of absolute confusion, these external forces temporarily at any rate disappeared, and Tibet no longer loomed on the Indian political horizon. The veil was drawn afresh over Lhasa, and affairs in that country pursued an isolated course, with this considerable difference. The Dalai Lama was now on terms of the greatest cordiality with the Government of India. In 1920 he requested that a British officer should be sent to discuss with him the position in Central Asia brought about by the Revolution in Russia and the collapse of Government in China, and Mr. Bell, C.M.G., I.C.S., Political Officer in Sikkim, was deputed for this purpose. In 1922 telephonic communication between Lhasa and India was established.

British Trade Agent, Gyantse and Yatung.—Captain A. A. Russell, M.C.

VIII.—THE NORTH-EASTERN FRONTIER.

The position on the northern frontier has been considered as if the British line were contiguous with that of Tibet. This is not so. The real frontier States are Kashmir, Nepal, Sikkim and Bhutan. From Chitral to Gilgit, now the northernmost posts of the Indian Government, to Assam, with the exception of the small wedge between Kashmir and Nepal, where the British district of Kumaon is thrust right up to the confines of Tibet, for a distance of nearly fifteen hundred miles there is a narrow strip of native territory between British India and the true frontier. The first of these frontier States is **Kashmir.** The characteristics of this State are considered under Indian States (*q.v.*); it is almost the only important Native State in India with frontier responsibilities, and it worthily discharges them through the agency of its efficient Indian State troops—four regiments of infantry and two Mountain Batteries, composed mainly of the Rajput Dogras, who make excellent fighting material. One of the most important trade routes with Tibet passes through Kashmir—that through Ladak. Then we come to the long narrow strip of **Nepal.** This Gurkha State stands in special relation with the British Government. It is for all practical purposes independent, and the British resident at Khatmandu exercises no influence on the internal administration The governing

machine in Nepal is also peculiar. The Maharaj Dhiraj, who comes from the Sesodia Rajput clan, the bluest blood in India, takes no part in the administration. All power vests in the Prime Minister, who occupies a place equivalent to that of the Mayors of the Palace, or the Shoguns of Japan. The present Prime Minister, Sir Chandra Shamsher, has visited England, and has given conspicuous evidence of his attachment to the British Government. Nepal is the main Indian outpost against Tibet or against Chinese aggression through Tibet. The friction between the Chinese and the Nepalese used to be frequent, and in the eighteenth century the Chinese marched an army to the confines of Khatmandu—one of the most remarkable military achievements in the history of Asia. Under the firm rule of the present Prime Minister Nepal has been largely free from internal disturbance, and has been raised to a strong bulwark of India. Nepal is the recruiting ground for the Gurkha Infantry, who form such a splendid part of the fighting arm of the Indian Empire. Beyond Nepal are the smaller States of **Bhutan** and **Sikkim**, whose rulers are Mongolian by extraction and Buddhists by religion. In view of Chinese aggressions in Tibet, the Government of India in 1910 strengthened their relations with Bhutan by increasing their subsidy from fifty thousand to a lakh of rupees a year, and taking a guarantee that Bhutan would be guided by them in its foreign relations. Afterwards China was officially notified that Great Britain would protect the rights and interests of these States. At the request of the Nepalese Government a British railway expert was deputed to visit the country and advise on the best means of improving communications with India. As the result of his report the Nepalese Government have decided to construct a light railway from Bhichhakhori to Raxaul. Great success has attended the orders passed by the Nepalese Government abolishing slavery.

Assam and Burma.

We then come to the Assam border tribes—the Daflas, the Miris, the Abors and the Mishmis. Excepting the Abors none of these tribes has recently given trouble. The murder of Mr. Williamson and Dr. Gregorson by the Minyong Abors in 1911 made necessary an expedition to the Dihang valley of the Abor country on the N. E. frontier. A force of 2,500 and about 400 military police was employed from October 1911 to April 1912 in subduing the tribe. After two or three small actions the murderers were delivered up. The cost of the expedition was Rs. 21,60,000. At the same time friendly missions were sent to the Mishmi and Miri countries. Close contact with these forest-clad and leech-infested hills has not encouraged any desire to establish more intimate relations with them. The area occupied by the Nagasares runs northwards from Manipur. The Nagasares, a Tibeto-Burman people, devoted to the practice of head hunting, which is still vigorously prosecuted by the independent tribes. The Chin Hills is a tract of mountainous country to the south of Manipur. The corner of India from the Assam boundary to the northern boundary of the Shan States is for the most part included in the Myitkyina and Bhamo districts of Burma. Over the greater part of this area, a labyrinth of hills in the north, no direct administrative control is at present exercised. It is peopled by the Shans and the Kachins. Civilisation is said to be progressing and steps have been taken to prevent encroachments from the Chinese side. There is a considerable trade with China through Bhamo. On the Eastern frontier of Burma are the Shan States, with an area of fifty thousand square miles and a population of 1,300,000. These States are still administered by the Sawbwas or hereditary chiefs, subject to the guidance of Superintendents and Assistant Superintendents. The Northern Shan Railway to Lashio, opened in 1903, was meant to be a stage in the construction of a direct railway link with China, but this idea has been put aside, for it is seen that there can never be a trade which would justify the heavy expenditure. The Southern Shan States are being developed by railway connection. The five Karenni States lie on the frontier south of the Shan States. South of Karenni the frontier runs between Siam and the Tenasserim Division of Burma. The relations between the Indian Government and the progressive kingdom of Siam are excellent. A notable humanitarian development of recent years is the success of the measures to abolish slavery in the Hukawng Valley. In this remote place in the north-east of Burma a mild system of slavery existed, but in response to the initiative and pressure of British officers they were all freed by April 1926.

NEPAL.

The small hilly independent Kingdom of Nepal is a narrow tract of country extending for about 520 miles along the southern slope of the central axis of the Himalayas. It has an area of about 56,000 square miles, with a population of about 5,580,000, chiefly Hindus. The greater part of the country is mountainous, the lower slopes being cultivated. Above these is a rugged broken wall of rock leading up to the chain of snow-clad peaks which culminate in Mount Everest (29.002 feet) and others of slightly less altitude. The country before the Gurkha occupation was split up into several small kingdoms under Newar kings. The Gurkhas under Prithvi Narayan Shah overran and conquered the different kingdoms of Patan, Kathmandu, and Bhatgaon, and other places during the latter half of the 18th century and since then have been rulers of the whole of Nepal. In 1846 the head of the Rana family Maharaja Jung Bahadur Rana, obtained from the sovereign the perpetual right to the office of Prime Minister of Nepal, and the right is still enjoyed by the descendants of the Rana family. In 1850 Jung Bahadur paid a visit to England and was thus the first Hindu Chief to leave India and to become acquainted with the power and resources of the British nation. The relations of Nepal with the Government of India are regulated by the treaty of 1816 and subsequent agreements by which a representative of the British Government is received at Kathmandu. By virtue of the same Treaty either Government maintained a representative at the Court of the other and her treaty relations with Tibet allow her to keep a Resident at Lhasa of her own. Her relation with China is of a friendly nature. Ever since the conclusion of the treaty of 1816 the friendly relations with the British Government have steadily been maintained. During the rule of the late Prime Minister it has been at its height as is evidenced by the valuable friendly help in men and money which has been given and which was appreciatively mentioned in both the Houses of Parliament and by Mr. Asquith in his Guildhall speech in 1915. The message from His Majesty the King-Emperor to the Nepalese Prime Minister sent on the termination of hostilities and published at the time as also Viceroy's valedictory address to the Nepalese contingent on the eve of their return home after having laudably fulfilled their mission in India eloquently and gratefully acknowledged the valuable help rendered by Nepal during the four and a half years of war. In recognition of this help Nepal receives an unconditional annual present of Rupees ten lakhs from the British Government to be paid in perpetuity. To further strengthen and cement the bonds of friendship that have subsisted so long between the two countries, a new Treaty of friendship was concluded between the Government of Nepal and Great Britain on the 21st December 1923.

From the foregoing account of the history of Nepal it will be seen that the Government of the country has generally been in the hands of the Minister of the day. Since the time of Jung Bahadur this system of government has been clearly laid down and defined. The sovereign, or Maharajadhiraja, as he is called, is but a dignified figure-head, whose position can best be likened to that of the Emperor of Japan during the Shogunate. The present King, His Majesty Maharajadhiraja Tribhubana Bir Bikram Jung Bahadur Shah Bahadur Shum Shere Jung Deva, ascended the throne on the death of his father in 1911. The real ruler of the country is the Minister who, while enjoying complete monopoly of power, couples with his official rank the exalted title of Maharaja. Next to him comes the Commander-in-Chief, who ordinarily succeeds to the office of Minister.

The present Minister at the head of affairs of Nepal is Maharaja Bhim, Shum Shere Jung Bahadur Rana, G.C.S.I., G.C.M.G., K.C.V.O., Yit Tang-Paoting-Shun Chian, Luh Chuan-Shang-Chiang (Chinese), Honorary Lieutenant-General British Army and Hon. Colonel, 4th Gurkhas, who succeeded the late Maharaja Chandra Shum Shere Jung Bahadur Rana as Prime Minister and Supreme Commander-in-Chief in November 1929. Soon after this accession to power, with the consummate skill and political acumen of a born diplomat he averted a threatened breach of relations with Tibet. A man of proved ability as the Commander-in-Chief of Nepal he has inaugurated several urgent and important works of public utility. Already he has abolished certain uneconomical imposts such as those on salt, cotton, etc., has tentatively suspended capital punishment in the kingdom with a view to its final abolition, constructed a second water-works, improved mintage and expanded general education. The reclamation on a large scale of forest areas both in the hills and the Tarai is now going on, to provide a hearth and home for Gurkhas retiring from British Service and part of the overflow population now migrating outside the country. In all his public utterances he has expressed an earnest desire to uphold and augment the traditional friendship with the British Government.

Rice, wheat and maize form the chief crops in the lowlands. Mineral wealth is supposed to be great, but, like other sources of revenue, has not been developed. Communications in the State are primitive, but since 1920 the Government has already undertaken the construction of a good and permanent road for vehicular traffic from Amlekhgunj to Bhimphedi—the base of a steep ridge in the main route to the capital of the country from British India—and also has installed a ropeway to connect this base with the capital proper covering a distance of 14 miles. A light railway from Amlekhgunj covering a distance of 25 miles in the route and connecting with the B. & N. W. Ry. at Raxaul also has been constructed and opened for traffic since March 1927. It has also put up a telephone over this route connecting the capital with the frontier township of Birgunge near Raxaul. The revenue is about two crores of rupees per annum. The standing army is estimated at 45,000 the highest posts in it being filled by relations of the minister. The State is of considerable archæological interest and many of the sites connected with scenes of Buddha's life have been identified in it by the remains of inscribed pillars.

British Envoy—Lieut.-Col. C. T. Dankes, O.I.E.

Railways to India.

The prospect of linking Europe and Asia by a railway running eastwards through Asia Minor has fascinated men's minds for generations. The plans suggested have, owing to the British connection with India, always lain in the direction of lines approaching India. More than 50 years ago a Select Committee of the House of Commons sat for two years to consider the question of a Euphrates Valley railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many years before the end of the nineteenth century. A proposal was put forward in 1895 for a line of 1,000 miles from Cairo and Port Said to Koweit, at the head of the Persian Gulf. While these projects were in the air, German enterprise stepped in and made a small beginning by constructing the Anatolian railway system. Its lines start from Scutari, on the southern shore of the Bosphorus, opposite Constantinople, and serve the extreme western end of Asia Minor. And upon this foundation was based the Turkish concession to Germans to build the Baghdad Railway.

Meanwhile, Russia was pushing her railways from various directions into the Central Asian territory running along the northern frontiers of Persia and Afghanistan to the borders of Chinese Turkestan. The construction of a Trans-Persian railway, connecting India, across Persia, with the Russian lines between the Black Sea and the Caspian Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia.

The Germans pushed forward their Baghdad railway project with a calculating shrewdness arising from their estimate of the value it would possess in their grand aim to overthrow the British Empire. The outbreak of the great war and the success of the Germans in inveigling Turkey into it saw the final stages of the construction of the railway pressed forward with passionate energy. Thus, before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and in use from Scutari across Anatolia, over the Taurus Mountains to Aleppo and thence eastward across the Euphrates to a point between Nisibin and Mosul. The Germans had also by that time constructed a line to Baghdad at the eastern end of the route, northwards from Baghdad to a point a considerable distance beyond Samara.

The war compelled the British to undertake considerable railway development northward from Basra, the port at the mouth of the Shat-el-Arab, the broad stream in which the Tigris and Euphrates, after their junction, flow into the head of the Persian Gulf. The system consists of a metre-gauge line from Basra *viâ* Nasarieh, on the Euphrates, thence northwards to Baghdad, the line passing a considerable distance westward to Kut-l-Amara, of historic fame. From Baghdad the line runs eastward approximately to the foot of the pass through which the Persian road crosses the frontier of that country. A line branches off in the neighbourhood of Kifri in the direction of Mosul. A line also runs westward from Baghdad to Feluja, on the Euphrates. When the Turkish Nationalists gained control of Anatolia any question of the completion of the through Baghdad line became indefinitely delayed.

The Trans-Persian line to join the Russian Caucasian system and the Indian railways first assumed proportions of practical importance in the winter of 1911. Both the Russian and the Indian railway systems were by then well developed up to the point likely to be the termini of a Trans-Persian line. The Russian system reached Julfa, on the Russo-Persian frontier in the Caucasus. During the war this line was carried thence southward into the region east and south-east of Lake Urumia. The Indian railway system, on the borderland of India and Persia, was similarly much extended and improved during the war. A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic, but the agreement came to naught.

There remains the possibility of linking the Russian and Indian railway system by way of Afghanistan. The suggestion has often been made in recent years that the Russian line from Merv to Herat, on the northern frontier of Afghanistan, should be linked to the Indian line which proceeds from Quetta to the Afghan border on Chaman. The distance between the railway heads is about 250 miles. But there have always for strategic reasons been strong military objections to the railway across Afghanistan and after the death of the late Amir Habibullah the Afghan Government flatly opposed any suggestion for carrying the Indian or Russian railway system within their borders. What the present Afghan Government think about the matter was not shown up to the time this article was written, but the strange situation in Central Asia and beyond the Indian North-West Frontier does not suggest the early removal of the strategic difficulties. The completion of a broad-gauge line extending the Indian railway system through the Khyber Pass to Landi Khana, at its western extremity, opens a prospect of further possible rail connections with Afghanistan.

Britain's special interests in regard to Persian communications have hitherto primarily been associated with lines running inland from the Persian Gulf, to supersede the old mule routes. Special importance has for many years been attached to schemes for a railway from Mohammerah, at the opening of the Karun Valley, where the Karun River runs into the Shat-el-Arab, just below Basra, northwards into the rich highland country of Western Persia, where the valuable West Persian oil wells also lie. Britain has long established special relations with the Karun Valley and has a large trade there.

Foreign Consular Officers in India.

Corrected up to 31st March 1934.

Name.	Appointment.	Station.
Afghanistan.		
Mr. Salah-ud-Din Khan	Consul-General	Delhi.
Syed Abdul Hamid Khan	Consul	Bombay.
Mr. Yar Muhammad Khan	Do.	Karachi.
Argentine Republic.		
Vacant	Consul	Calcutta.
Mr. C. C. Miller	Vice-Consul	Do.
Austria.		
*Sir Hormusjee Cowasjee Dinshaw, Kt., M.V.O., O.B.E. (on leave).	Consul	Aden.
*Mr. D. H. C. Dinshaw (acting)	Do.	Do.
*Mr. R. W. Plummer	Do.	Calcutta.
Belgium.		
Monsieur R. Guillaume (acting)	Consul-General	Calcutta.
Monsieur T. J. Clement	Do.	Bombay.
*Mr. A. E. Adams	Consul	Aden.
*Mr. A. D. Finney	Do.	Karachi.
*Mr. W. O. Wright	Do.	Madras.
*Mr. C. G. Wodehouse	Do.	Rangoon.
Bolivia.		
*Mr. B. Matthews	Consul-General	Calcutta.
*Mr. J. A. Johnston	Consul	Rangoon
Brazil.		
Dr. Mansel Agostinho de Heredia	Consul	Bombay.
Senhor M. M. de Souza	Do.	Calcutta.
*Senhor Jaime N. Heredia	Vice-Consul	Bombay.
Vacant	Do.	Calcutta.
*Mr. C. F. Pyett	Do.	Rangoon.
*Mr. W. Smith Hopburn	Consular Agent	Do.
Chile.		
Vacant	Consul-General	Calcutta.
Vacant	Consul	Bombay.
Vacant	Do.	Rangoon.
Vacant	Vice-Consul	Chittagong.
China.		
Vacant	Consul-General	Calcutta.
Mr. Jui-Chun Hsu	Consul	Rangoon
Mr. Chang-pei Liang (In charge of the Consulate General)	Consul	Calcutta.
Mr. Tsung Woo Ding	Vice-Consul	Bombay.
Costa Rica.		
Vacant	Consul	Calcutta.
Cuba.		
Senor W. F. Pais	Consul	Bombay.
Senhor Orlando de Lara (In charge of the Consulate)	Do.	Calcutta.

* Honorary.

Name.	Appointment.	Station.
Czechoslovak Republic.		
*Mr. Alexander Klauder	Consul	Aden.
Dr. Peter Klemens	Do.	Bombay.
Mr. Josef Lusk	Do.	Calcutta.
*Mr. G. Gardiner	Do.	Karachi.
Mr. G. S. Mahomed	Consular Agent	Do.
Denmark.		
Vacant	Consul-General	Calcutta.
*Mr. Stanley Nicholas Day	Consul	Aden.
*Mr. B. A. Thorstenson	Do.	Bombay.
*Mr. A. L. B. Tucker	Do.	Calcutta.
*Mr. A. Hansen	Do.	Calicut.
*Mr. W. M. Browning	Do.	Madras.
*Mr. C. A. K. de Castonier	Do.	Rangoon.
*Mr. A. N. Wardley	Vice-Consul	Calcutta.
Vacant	Do.	Karachi.
Dominica.		
*Dr. P. C. Sen	Consul	Calcutta.
Ecuador.		
*Mr. T. E. Cunningham (acting)	Consu	Calcutta.
Finland.		
*Mr. C. H. A. R. Hardcastle	Consul	Bombay.
*Mr. Carr Joakim	Do.	Rangoon.
*Mr. R. W. Plummer	Vice-Consul	Calcutta.
*Mr. C. G. Alexander	Do.	Madras.
France.		
Monsieur F. A. G. A. Danjou	Consul-General	Calcutta.
Monsieur E. P. F. Chalant	Consul	Bombay.
Monsieur A. Vissiere	Vice-Consul	Calcutta.
*Monsieur E. Chaize	Consular Agent	Aden.
Vacant	Do	Akyab.
*Mr. A. R. Lieshman, C.I.E., V.D.	Do.	Chittagong.
*Mr. E. L. Price, C.I.E., O.B.E.	Do.	Karachi
*Monsieur Dumonteil Lagrezo	Do.	Madras.
*Mr. R. B. Howison	Do.	Rangoon.
Vacant	Do.	Tellicherry.
Germany.		
Herr R. Von Bulow (on leave)	Consul-General	Calcutta.
Herr Karl Kapp	Consul	Bombay.
*Herr Edwin Oscar Bloech	Do.	Rangoon.
Dr. H. Richter (Transferred to Calcutta for the time being.)	Vice-Consul	Bombay.
Dr. E. Von Selzam (acting as Consul-General.)	Do.	Calcutta.
Herr W. Von Pochhammer	Consul	Ports S. Indian.
Greece.		
*Mr. M. Presvelos	Consul-General	Calcutta.
*Mr. Philon N. Philon	Consul	Bombay.
Vacant	Do.	Karachi.
*Mr. F. A. Archdale	Deputy Consul	Do.
Mr. H. Pantazopolo	Do.	Bombay.

* Honorary.

Mr. F. Aldridge	Consul	Calcutta.

* Honorary.

The Army.

The great sepoy army of India originated in the small establishments of guards, known as peons, enrolled for the protection of the factories of the East India Company; but sepoys were first enlisted and disciplined by the French, who appeared in India in 1665. Before this detachments of soldiers were sent from England to Bombay, and as early as 1665 the first fortified position was occupied by the East India Company at Armagon, near Masulipatam. Madras was acquired in 1640, but in 1654 the garrison of Fort St. George consisted of only ten men. In 1661 Bombay was occupied by 400 soldiers, and in 1668 the number was only 285 of whom 93 were English and the rest French, Portuguese and Indians.

After the declaration of war with France in 1744 the forces were considerably increased, but this did not prevent the French capturing Madras in 1746. Following the French example, the English raised considerable sepoy forces and largely increased the military establishments. In 1748 Major Stringer Lawrence landed at Fort St. David to command the forces of the Company. The English foothold in India was then precarious and the French under Dupleix were contemplating fresh attacks. It became necessary for the English Company to form a larger military establishment. The new commandant at once set about the organisation and discipline of his small force, and the garrison was given a company formation. This was the beginning of the regular Indian Army of which Lawrence subsequently became Commander-in-Chief. In Madras the European companies were developed into the Madras Fusiliers; similar companies in Bengal and Bombay became the 1st Bengal and 1st Bombay Fusiliers. The native infantry were similarly organised by Lawrence and Clive. By degrees Royal Regiments were sent to India, the first being the 39th Foot, which arrived in 1754.

Struggle with the French.—From this time for a century or more the army in India was engaged in constant war. After a prolonged war with the French, whom Dupleix had by 1750 raised to the position of the leading power in India, the efforts of Stringer Lawrence, Clive, and Eyre Coote completed the downfall of their rivals, and the power of England was established by the battle of Plassey in Bengal; and at Wandewash in Southern India, where the French were finally defeated in 1761. A number of independent States, owning nominal allegiance to the Emperor at Delhi, had risen on the decline of the Mughal Empire, some ruled by Mahratta Princes and others by Musalman adventurers such as Hyder Ali of Mysore. A prolonged struggle ensued with the latter and his son and successor Tipu Sultan, which ended only with the defeat and death of Tipu and the capture of Seringapatam in 1799.

Reorganisation of 1796.—In 1796 the Indian armies, which had been organised on the Presidency system, were reorganised. The European troops were 13,000 strong and the Indians numbered some 67,000, the infantry being generally formed into 75 regiments of two battalions each. In Bengal, regiments were formed by linking existing battalions of ten companies each with large establishments of English officers. The Madras and Bombay armies were at the same time reorganised on similar lines, and cavalry and artillery companies were raised.

In 1798, the Marquis Wellesley arrived as Governor-General, firmly imbued with the necessity of destroying the last vestiges of French influence. In pursuance of this policy he reduced Mysore, where Tipu was intriguing with the French, and then turned his attention to the Mahratta States, in which Sindhia had established power over the Mughal Emperor at Delhi by means of a large regular army officered by Europeans under the French adventurer Perron. In campaigns against Sindhia in Hindustan by a British Army under General Lake, and in the Deccan against that prince and the Raja of Berar by an army under General Wellesley, afterwards Duke of Wellington, the power of these Chiefs was broken in the battles of Laswari and Assaye. French influence was finally destroyed, and the Mughal Emperor was released from the domination of the Mahrattas. Subsequently Holkar also was reduced, and British power established on a firm footing.

Mutiny at Vellore.—The Indian Army had been from time to time subject to incidents of mutiny which were the precursors of the great cataclysm of 1857. The most serious of these outbreaks occurred at the fort of Vellore in 1806 when the native troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort, while the striped flag of the Sultan of Mysore, whose sons were confined there, was raised upon the ramparts. The mutiny was suppressed by Colonel Gillespie, who galloped over from Arcot at the head of the 19th Light Dragoons, blew in the gate of the fort, and destroyed the mutineers. This retribution put a stop to any further outbreaks in the army.

Overseas Expeditions.—Several important overseas expeditions were undertaken in the early part of the nineteenth century. Bourbon was taken from the French; Ceylon and the Spice Islands were wrested from the Dutch, and Java was conquered in 1811 by a force largely composed of Bengal troops which had volunteered for this service.

In 1814, the Nepal War took place in which the brave Gillespie, who had distinguished himself in Java, was killed when leading the assault on the fort of Kalunga. The Gurkhas were overcome in this war after offering a stout resistance.

In 1817, hostilities again broke out with the Mahrattas, who rose against the British during the progress of operations against the Pindaris. Practically the whole army took the field and all India was turned into a vast camp. The

Mahratta Chiefs of Poona, Nagpur, and Indore rose in succession, and were beaten respectively, at Kirkee, Sitabaldi, and Mehidpur. This was the last war in Southern India. The tide of war rolled to the north never to return. In the Punjab, to which our frontier now extended, our army came into touch with the great military community of the Sikhs.

In 1824, the armies were reorganised, the double-battalion regiments being separated, and the battalions numbered according to the dates they were raised. The Bengal Army was organised in three brigades of horse artillery, five battalions of foot artillery, two regiments of European and 68 of Indian infantry, 5 regiments of regular and 8 of irregular cavalry. The Madras and Bombay armies were constituted on similar lines, though of lesser strength.

First Afghan War and Sikh Wars.—In 1839, a British Army advanced into Afghanistan and occupied Cabul. There followed the murder of the British Envoys and the disastrous retreat in which the army perished. This disaster was in some measure retrieved by subsequent operations, but it had far-reaching effects on British prestige. The people of the Punjab had witnessed these unfortunate operations, they had seen the lost legions which never returned, and although they saw also the avenging armies they no longer regarded them with their former awe. Sikh aggression led to hostilities in 1845-46, when a large portion of the Bengal Army took the field under Sir Hugh Gough. The Sikhs were defeated after stubborn fights at Mudki and Ferozeshahr, the opening battles, but did not surrender until they had been overthrown at the battles of Aliwal and Sobraon. Two years later an outbreak at Multan caused the Second Sikh War when, after an indecisive action at Chilianwala, our brave enemies were finally overcome at Gujerat, and the Punjab was annexed. Other campaigns of this period were the conquest of Sind by Sir Charles Napier, and the Second Burmese War, the first having taken place in 1824.

The conquest of the Punjab extended over the frontier to the country inhabited by those turbulent tribes which have given so much trouble during the past sixty years while they have furnished many soldiers to our army. To keep order on this border the Punjab Frontier Force was established, and was constantly engaged in small expeditions which, while they involved little bloodshed, kept the force employed and involved much arduous work.

The Indian Mutiny.—On the eve of the mutiny in 1857 there were in the Bengal Army 21,000 British and 137,000 Indian troops; in the Madras Army 8,000 British and 49,000 Indian troops; and in Bombay 9,000 British and 45,000 Indian troops. The proportion of Indian to British was therefore too large for safety. The causes of the mutiny were many and various. Among these were the annexation policy of Lord Dalhousie, especially that of Oudh from which the greater part of the Bengal Army was drawn; interference with the privileges of the sepoy with respect to certain allowances; and lack of power on the part of commanding officers either to punish or reward. The final spark which fired the revolt was the introduction of a new cartridge. The muskets of those days were supplied with a cartridge in which the powder was enclosed in a paper cover, which had to be bitten off to expose the powder to ignition. In 1857 a new cartridge was introduced with paper of a glazed texture which it was currently reported was greased with the fat of swine and oxen, and therefore unclean alike for Muhammadans and Hindus. This was interpreted as an attempt to destroy the caste and the religion of the sepoys. Skilful agitators exploited this grievance, which was not without foundation, and added reports that flour was mixed with bone-dust and sugar refined with the blood of oxen.

Disaffection culminated in mutiny at Berhampur and in an outbreak at Barrackpore where sepoy Mangal Pande attacked a European officer. The next most serious manifestation was the refusal of men of the 3rd Bengal Cavalry at Meerut to take the obnoxious cartridge. These men were tried and sentenced to long terms of imprisonment, their fetters being riveted on parade on the 9th May. Next day the troops in Meerut rose, and, aided by the mob, burned the houses of the Europeans and murdered many. The troops then went off to Delhi. Unfortunately there was in Meerut no senior officer capable of dealing with the situation. The European troops in the place remained inactive, and the mutineers were allowed to depart unmolested to spread the flames of rebellion.

Delhi is the historic capital of India. On its time worn walls brood the prestige of a thousand years of Empire. It contained a great magazine of ammunition. Yet Delhi was held only by a few Indian battalions, who joined the mutineers. The Europeans who did not succeed in escaping were massacred and the Delhi Emperor was proclaimed supreme in India. The capital constituted a nucleus to which the troops who mutinied in many places flocked to the standard of the Mughal. An army was assembled for the recovery of Delhi but the city was not captured until the middle of September. In the meantime mutiny had spread. The massacres of Cawnpore and Jhansi took place, and Lucknow was besieged until its relief on the 27th September. The rebellion spread throughout Central India and the territory that now forms the Central Provinces, which were not recovered until Sir Hugh Rose's operations in 1858 ended in the defeat of the Rani of Jhansi.

Minor Campaigns.—During the period until 1879, when the Second Afghan War began, there were many minor campaigns including the China War of 1860, the Ambeyla Campaign, and the Abyssinian War. Then followed the Afghan War in which the leading figure was Lord Roberts. There were expeditions to Egypt and China, and Frontier Campaigns of which the most important was the Tirah Campaign of 1897. There were also the prolonged operations which led up to or ensued upon the annexation of Burma, several campaigns in Africa, and the expeditions to Lhasa. But until 1914, since the Afghan War, the army of India, except that portion of the British garrison which was sent to South Africa in 1899, had little severe fighting, although engaged in many arduous enterprises.

Reorganisation after the Mutiny.—In 1857 the East India Company ceased to exist

and their army was taken over by the Crown. At this time the army was organized into three armies, *viz*: Bengal, Bombay and Madras, the total strength being 65,000 British and 140,000 Indian troops.

Several minor re-organizations took place during the following years, such as the linking of three Regiments together and the raising of Class Regiments and Companies. In 1895 the next large reorganization took place. This was the abolition of the three Armies and the introduction of the command system. Four Commands were formed, *viz*: Punjab, Bengal, Madras and Bombay.

Lord Kitchener's Scheme.—This system lasted until 1904 when under Lord Kitchener's re-organization the Madras Command was abolished and the Army divided into three Commands—the Northern, Eastern and Western, corresponding to the Punjab, Bombay and Bengal Commands.

In 1907, Lord Kitchener considered that consequent on the delegation of administrative powers to Divisional Commanders, retention of such powers by Lieutenant-Generals of Commands led to delay in the despatch of business. The Command system was therefore abolished and India was divided into two Armies—the Northern and Southern—each under a General Officer who was responsible for the command, inspection and training of the troops but was given no administrative responsibilities.

Early in the War both Army Commanders took the field and were not replaced until 1916 and 1917 when both had practically the same functions as their predecessors. It was now realised that administration was being unduly centralised at Army Headquarters and the machinery was becoming clogged with unnecessary details. To secure efficiency at A. H. Q., therefore, a certain measure of decentralisation was carried out in 1918. With the alteration of the designation "Army" to "Command" at this time, a considerable increase was made in the administrative staffs of the two Commands and the General Officers Commanding were given powers to deal with all administrative questions other than those dealing with matters of policy, new principles or war.

The commands were increased to four in 1920, each under a General Officer Commanding-in-Chief.

Present System of Administration

The essential features of the Army, as constructed on its present basis, will be found in "The Army in India and its Evolution," a publication issued in 1924 with the authority of the Government of India.

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the military administration in India.

The Secretary of State's principal adviser on Indian military affairs is the Secretary in the Military Department of the India Office. The post is filled by a senior officer of the Indian Army with recent Indian experience. The appointment is at present held by Lieutenant General Sir John F. S. D. Coleridge, K.C.B., C.M.G., D.S.O., who was formerly Commander of the Peshawar District from October 1930 to May 1933. The Military Secretary is assisted by one first grade staff officer, selected from the Indian Army. In order that he may keep in touch with the current Indian affairs, the Military Secretary is expected to visit India during the tenure of his office. In addition, by a practice which has obtained for many years, a retired Indian Army officer of high rank has a seat upon the Secretary of State's Council.

The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, who is required to pay due obedience to all such orders as he may receive from the Secretary of State. The Viceroy's Executive Council exercise in respect of Army administration the same authority and functions as they exercise in respect of other departments of the Government; in the first phase of the representative institutions conferred upon India by the Montagu-Chelmsford Reforms Scheme, Army expenditure and the direction of military policy have been excluded from the control of the Indian Legislature.

The Commander-in-Chief.—The next authority in the chain of administrative arrangements is His Excellency the Commander-in-Chief, who by custom is also the Army Member of the Viceroy's Executive Council. The appointment is held by His Excellency Field Marshal Sir Philip W. Chetwode, Bart., G.C.B., K.C.M.G., D.S.O., British Service, who succeeded Field Marshal Sir William Birdwood. He is also a member of the Council of State. All the work connected with the administration of the Army, the formulation and execution of the military policy of the Government of India, the responsibility for maintaining every branch of the Army, combatant and non-combatant, in a state of efficiency, and the supreme direction of any military operations based upon India are centred in one authority,—the Commander-in-Chief and Army Member. In addition, he administers the Royal Indian Marine and the Royal Air Force in India. The Commander-in-Chief is assisted in the executive side of his administration by 4 Principal Staff Officers, *viz.*, the Chief of the General Staff, the Adjutant-General, the Quartermaster-General and the Master-General of Ordnance.

The Army Department.—The Department is administered by a Secretary who, like other Secretaries in the civil departments, is a Secretary to the Government of India as a whole, possessing the constitutional right of access to the Viceroy, he is also for the purposes of Sub-section 4, Section 26 of the Regimental Debts Act, 1893 (56 Vict-C. 5) and the Regulations made thereunder Secretary to the Government of India in the Military Department, and for purposes of the Royal Indian Marine, Secretary to the Government of India in the Marine Department. He also exercises the powers vested in the Army Council by the Geneva Convention Act, 1911, so far as that Act applies to India under the Order in Council No. 1551 of 1916. He is assisted by a Deputy Secretary, an Under Secretary, a Director of Military Lands and Cantonments, a Director, Regulations and Form, and two Assistant Secretaries, (one of whom is also Secretary of the Indian Soldiers' Board).

The Army Department deals with all army services proper, and also the administration of the Royal Indian Marine and the Royal Air Force in India, in so far as questions requiring the orders of the Government of India are concerned. The Army Department Secretariat has no direct relations with commanders of troops or the staffs of formations subordinate to Army Headquarter: it has continuous and intimate relations with Army Headquarters in all administration matters and is responsible for the administration of Cantonments, the estates of deceased officers and the compilation of the Indian Army List. The Army administration is represented in the Legislature by the Army Member in the Council of State, and by the Army Secretary in the Legislative Assembly.

The Military Council—is composed of the Commander-in-Chief as President, and the following members, namely: The Chief of the General Staff, as Vice-President, the Adjutant-General, the Quartermaster-General, the Master-General of Ordnance, the Air Officer Commanding Royal Air Force, the Secretary to the Government of India in the Army Department and the Financial Adviser, Military Finance, representing the Finance Department of the Government of India. It is mainly an advisory body, constituted for the purpose of assisting the Commander-in-Chief in the performance of his administrative duties. It has no collective responsibility. It meets when convened by the Commander-in-Chief for the consideration of cases of sufficient importance and difficulty to require examination in conference. The heads of the minor independent branches of Army Headquarters and the directors of technical services attend when required.

Military Territorial Areas.

Indian Territory is divided in four commands each under a General Officer Commanding-in-Chief and the Independent District of Burma under a Commander. The details of the organisation are given in the table on the next page and it will be seen that Commands comprise 13 districts: 4 Independent Brigade Areas and 30 Brigades and Brigade Areas. The Northern Command, with its headquarters at Murree, coincides roughly with the Punjab and North-West Frontier Province; the Southern Command, with headquarters at Poona, coincides roughly with the Bombay and Madras Presidencies and part of the Central Provinces and Rajputana; the Eastern Command, with headquarters at Naini Tal, coincides roughly with the Bengal Presidency and the United Provinces; the Western Command, whose headquarters are at Quetta, covers Sind and Baluchistan.

The General Officer Commanding-in-Chief of each command is responsible for the command, administration, training and general efficiency of the troops stationed within his area, and also for all internal security arrangements.

Apart from the four commands, the only formation directly controlled by Army Headquarters is the Burma district which, mainly because of its geographical situation, cannot conveniently be included in any of the four command areas. The Aden Independent Brigade which was under the administrative control of the Government of India was transferred to the administrative control of His Majesty's Government from the 1st April 1927.

The distribution of the troops allotted to the commands and districts has been determined by the principle that the striking force must be ready to function in war, commanded and constituted as it is in peace. With this end in view, the Army in India is now regarded as comprising three categories of troops:

(1) Covering Troops,
(2) The Field Army,
(3) Internal Security Troops.

The role of the Covering Force is to deal with minor frontier outbreaks and, in the event of major operations, to form a screen behind which mobilisation can proceed undisturbed. The force consists of approximately 12 infantry brigades with a due proportion of other arms.

The Field Army consists of 4 Divisions and 4 Cavalry Brigades. The Field Army is India's striking force in a major war.

Army Headquarters.

The organization of the Army Headquarters with the Commander-in-Chief as the head, is founded upon four Principal Staff Officers charged with the administration of—

(*a*) The General Staff Branch;
(*b*) The Adjutant-General's Branch;
(*c*) The Quartermaster-General's Branch.
(*d*) The Master-General of Ordnance Branch.

General Staff Branch.

C. G. S.—Genl. Sir Kenneth Wigram, K.C.B., C.S.I., C.B.E., D.S.O., A.D.C., I.A.

D. C. G. S.—Maj.-Genl. B. R. Moberly, C.B., D.S.O., I.A.

M. G., Cat. & Tech. Adviser, R. T. C.—Maj.-Genl. E. D. Giles, C.B., C.M.G., D.S.O., I.A.

M.G., R. A.—Maj-Genl. H. W. Newcome, C.B., C.M.G., D.S.O., Brit. Ser.

This Branch deals with military policy, with plans of operations for the defence of India, with the organization and distribution of the army for internal security and external war, the administration of the General Staff in India the supervision of the training of the military forces for war, their use in war, the organisation and administration of the general staff in India; the education of officers, the supervision of the education of warrant and non-commissioned officers and men of the Army in India, and inter-communication services.

Adjutant-General Branch.

A. G.—Lt.-Genl. Sir Walter S. Leslie, K.C.B., K.B.E., C.M.G., D.S.O., I.A.

D. A. G.—Maj.-Genl. G. Thorpe, C.B., C.M.G., D.S.O., Brit. Ser.

D. M. S.—Maj.-Genl. E. A. Walker, K.H.S., I.M.S.

This Branch deals with all matters appertaining to the raising, organising and maintenance of the military forces in officers and men, the peace distribution of the army, discipline, pay and pensions, martial, military and international law, medical and sanitary matters affecting the Army in India, personal and ceremonial questions, prisoners of war, recruiting mobilization and demobilization. The Judge Advocate-General forms part of the Branch. The Director of Medical Services in India, who was independent before the war, is now included in the Adjutant-General Branch.

Plan Showing Chain of Command.

THE COMMANDER-IN-CHIEF.

(His Excellency Field-Marshal Sir Philip W. Chetwoode, Bart., G.C.B., K.C.M.G., D.S.O., Brit. Ser.)

General Officer Commanding-in-Chief, Northern Command. (Genl. Sir Robert A. Cassels, G.C.B., C.S.I., D.S.O., I.A.)

- Commander, Rawalpindi District. (1st class.) (Maj.-Genl. R. G. Finlayson, C.B., C.M.G., D.S.O., Brit. Ser.).
  - Commander, 1st (Abbottabad) Infantry Brigade. (Brigr. H. L. Haughton, C.I.E., C.B.E.
  - Commander, 2nd (Rawalpindi) Infantry Brigade. (Brigr. A. L. Ransome, D.S.O., M.C., Brit. Ser.).
  - Commander, 3rd (Jhelum) Infantry Brigade. (Brigr. R. H. Anderson, C.I.E., I.A.).
- Commander, Kohat District. (2nd class.) (Maj.-Genl. D. I. Shuttleworth, C.B., C.B.E., D.S.O., I.A.).
  - Commander, Kohat Brigade. (Brigr. H. L. Scott, C.B., D.S.O., M.C., I.A.).
- Commander, Peshawar District. (1st class.) (Maj.-Genl. S. F. Muspratt, C.B., C.S.I., C.I.E., D.S.O., I.A.).
  - Commander, 1st (Risalpur) Cavalry Brigade. (Brgr. E. deBurgh, C.B., D.S.O., O.B.E., I.A.).
  - Commander, Landikotal Brigade. (Maj.-Genl. W. Dent, C.B., C.B.E., D.S.O., I.A.).
  - Commander, Peshawar Brigade. (Brigr. C. J. E. Auchinleck, D.S.O., O.B.E., I.A.).
  - Commander Nowshera Brigade. (Brigr. W. D. Croft, C.M.G., D.S.O., Brit. Ser.).

General Officer Commanding-in-Chief, Western Command. (Lt.-Genl. Sir Torquhil G. Matheson, K.C.B., C.M.G., Brit. Ser.)

- Commander, Baluchistan District. (1st class.) (Maj.-Genl. H. Karslake, C.B., C.M.G., D.S.O., Brit. Ser.).
  - Commander, 4th (Quetta) Infantry Brigade. (Brigr. A. H. Spooner, C.M.G., D.S.O., Brit. Ser.).
  - Commander, 5th (Quetta) Infantry Brigade. (Brigr. S. J. P. Seobell, C.M.G., D.S.O., Brit. Ser.).
- Commander, Zhob (Independent) Brigade Area. (Brigr J. C. McKenna, D.S.O., I.A.). —
- Commander, Sind (Independent) Brigade Area. (Maj-Genl. C. Kirkpatrick, C.B., C.B.E., I.A.). —
- Commander, Waziristan District. (2nd class.) (Maj.-Genl. S. B. Pope, C.B., D.S.O., I.A.).
  - Commander, Razmak Brigade. (Brigr. A. M. Mills, C.B., D.S.O., A.D.C., I.A.).
  - Commander, Bannu Brigade. (Brigr. H. St. G. S. Scott, C.B., D.S.O., I.A.).
  - Commander, Wana Brigade. (Brigr. M. Saunders, D.S.O., A.D.C., I.A.).
- Commander, Lahore District. (1st class.) (Maj.-Genl. A. W. H. M. Moens, C.B., C.M.G., D.S.O., I.A.).
  - Commander, 2nd (Sialkot) Cavalry Brigade. (Brigr. T. A. A. Wilson, I.A.).
  - Commander, Ferozepur Brigade Area. (Brigr. B. W. Shuttleworth, I.A.).
  - Commander, Jullunder Brigade Area. (Brigr. A. G. C. Hutchinson, C.B., O.B.E., I.A.).
  - Commander, Lahore Brigade Area. (Brigr. J. C. Gretton, I.A.).
  - Commander, Ambala Brigade Area. (Brigr. F. G. Gillies, C.B., O.B.E., I.A.).

Plan Showing Chain of Command.
THE COMMANDER-IN-CHIEF.—contd.

(His Excellency Field-Marshal Sir Philip W. Chetwode, Bart., G.C.B., K.C.M.G., D.S.O., Brit. Ser.)

- General Officer Commanding-in-Chief, Eastern Command. (Genl. Sir C. Norman Macmullen, K.C.B., C.M.G., C.I.E., D.S.O., A.D.C., I.A.)
  - Commander, Presidency and Assam District. (2nd class.) (Maj.-Genl. H. K. Bethell, C.B., C.M.G., C.V.O., D.S.O., Brit. Ser.)
    - Commander, 7th (Dehra Dun) Infantry Brigade. (Brigr. A. B. Haig, M.C., I.A.).
    - Commander, 8th (Bareilly) Infantry Brigade. (Brigr. D. B. Ross, O.B.E., I.A.)
  - Commander, Lucknow District. (2nd class.) Maj.-Genl. C. J. B. Hay, C.B., C.M.G., C.B.E., D.S.O., I.A.).
    - Commander, 6th (Lucknow Infantry Brigade. (Brigr. K. M. Laird, D.S.O., Brit. Ser.).
    - Commander, Allahabad Brigade Area. (Brigr. D. G. Ridgeway, C.B., D.S.O., I.A.).
  - Commander, Delhi (Independent) Brigade Area. (Brigr. A. L. M. Molesworth, I.A.).
  - Commander, Meerut District.—(1st class.) (Maj.-Genl. C. A. Key, C.B., C.M.G., C.B.E., D.S.O., Brit. Ser.).
    - Commander, 3rd (Meerut Cavalry Brigade. (Brigr. E. M. Dorman, D.S.O., M.C., Brit. Ser.).
    - Commander, 9th (Jhansi) Infantry Brigade. (Brigr. F. L. Nicholson, D.S.O. M.C., I.A.),
- General Officer Commanding-in-Chief, Southern Command. (Lt.-Genl. Sir George D. Jeffreys, K.C.B., K.C.V.O., C.M.G., Brit. Ser.)
  - Commander, Madras District (2nd class). (Maj.-Genl. C. R. Newman, C.B., C.M.G., D.S.O., Brit. Ser.). —
  - Commander, Bombay District 2nd class.). (Maj.-Genl. H. Needham, C.B., C.M.G., D.S.O., Brit. Ser.). — Commander, Mhow Brigade Area. (Brigr. J. de L. Consy, I.A.).
  - Commander, Poona (Independent) Brigade Area. (Brigr. F. G. Spring, C.M.G., D.S.O., Brit. Ser.). —
  - Commander, Deccan District (1st class). (Maj.-Genl. H. B. D. Baird, C.B., C.M.G., C.I.E., D.S.O., I.A.).
    - Commander, 4th (Secunderabad) Cavalry Brigade. (Brigr. D. K. McLeod, D.S.O., I.A.).
    - Commander, 10th (Jubbulpore) Infantry Brigade. (Brigr. C. G. Ling, D.S.O., M.C., Brit. Ser.).
    - Commander, 11th (Ahmednagar) Infantry Brigade. (Brigr. L. S. H. Smithers, I.A.).
    - Commander, 12th (Secunderabad) Infantry Brigade. (Brigr. D. G. Johnson, V.C., D.S.O., M.C., Brit. Ser.).
- Commander, Burma Ind. District. (2nd class.) (Maj.-Genl. D. Deane, C.B., D.S.O., I.A.)
  - — — Commander, Rangoon Brigade Area. (Brigr. C. C. Foss, V.C., D.S.O., Brit. Ser.).

Quarter-Master General's Branch.

Q. M. G.—Lt.-Genl. Sir W. Edmund Ironside, K.C.B., C.M.G., D.S.O., Brit. Ser.

D. Q. M. G.—Maj.-Genl. E. F. Orton, C.B., I.A.
D. S. & T.—Brigr. (Local Maj.-Genl.) E. M. Steward, O.B.E., I.A.

This Branch is concerned with the specification, provision, inspection, maintenance and issue of supplies, *i.e.*, foodstuffs, forage, fuel, etc., and is responsible for the following Services:—Transportation, Movements, Quartering, Supply and Transport, Military Farms, Remounts, Veterinary, Garrison and Regimental Institutes. Also for the purchase of grains and of minor supplies not provided in bulk by the authority responsible for production and provision.

Master General of the Ordnance Branch.

M. G. O.—Lt.-Genl. Sir Henry, E. ap R. Pryee, K.C.B., C.M.G., D.S.O., I.A.

D. M. G. O.—Brigr. (Local Maj.-Genl.) W. R. Paul, C.B.E., Brit. Ser.

This Branch controls the ordnance and clothing factories is concerned with the provision, inspection, maintenance and issue of equipment and ordnance stores, clothing, and necessaries and conducts all matter relating to contracts in respect of food-stuffs, &c., and supply in bulk of general stores and materials. The Master-General is also responsible for the design, inspection, and supply of guns, carriages, tanks, smallarms, machine guns, ammunition, chemical warfare appliances, etc. He also deals with questions regarding patents, royalties and inventions.

There are other branches of Army Headquarters administered by officers who are not classified as Principal Staff Officers, but are not directly subordinate to any of the four Principal Staff Officers.

These are:

(1) MILITARY SECRETARY'S BRANCH.
Mily. Secy.—Maj.-Genl. W. L. O. Twiss, C.B., C.B.E., M.C., I.A. The Military Secretary deals with the appointment promotion and retirement of officers holding the King's Commission, the selection of officers for staff appointments, and the appointment of officersto the Army in India Reserve of Officers. He is also the Secretary of the Selection Board.

(2) ENGINEER-IN-CHIEF'S BRANCH.
E.-in-C.—Maj.-Genl. G. H. Addison, C.B., C.M.G., D.S.O., Brit. Ser.

The Engineer-in-Chief is the head of the Corps of Royal Engineers in India. He is responsible for Engineer operations and Engineer Services during war and peace, the preparedness for warof the Engineering services. The supply of Engneer stores during war and peace. The construction and maintenance of all military works and the constructional efficiency, accuracy and economy of all projects and designs.

In addition to the above, the Army Headquarters staff includes certain technical advisers, *viz.*, the Major-General, Cavalry, the Major-General, Royal Artillery, and the Adviser and Secretary Board of Examiners.

The duties of the Signal Officer-in-Chief, the Inspector of the Army Educational Corps, India and the Inspector of Physical Training are carried out by the Commandants of Signal Training Centre, India, Jubbulpore, Army School of Education, India, Belgaum and Army School of Physical Training, Ambala, respectively.

Regular British Forces in India.

The British cavalry and British infantry units of the army in India are units of the British service. No individual British service unit is located permanently in India. Units of the British Army are detailed for a tour of foreign service, of which the major part is as a rule spent in India. In the case of British infantry battalions the system is that one battalion of a regiment is normally on home service while the other is overseas. In the case of British cavalry the same arrangement cannot be applied, as one unit only comprises the regiment.

In Great Britain, in peace-time, units are maintained at an establishment smaller than that required for war. In India, the peace establishments exceed the war establishments in view of the fact that reserves of British personnel do not exist, and reinforcements must be obtained from Great Britain.

British Cavalry.—There are 5 British cavalry regiments in India. The establishment of a British cavalry regiment is 27 officers and 567 other ranks.

British Infantry.—The present number of British infantry battalions in India is 45, each with an establishment of 28 officers and 865 other ranks.

In 1921, an important change was made in the composition of a British infantry battalion in India by the inclusion of a proportion of Indian combatant ranks. Battalions had always maintained a quota of Indian followers, but up to 1921 the combatant personnel was entirely British. In 1921, on the abolition of the Machine Gun Corps, eight machine guns were included in the equipment of a British infantry battalion. This number was increased to twelve in 1927. In 1929, a change of organisation was introduced, and the battalion now comprises:—*Headquarters Wing*—1 Machine Gun Company and 3 Rifle Companies. Each Rifle Company has 4 Lewis guns. The Machine Gun Company is organised into:—Headquarters and 3 Platoons (all on pack) each of 2 Sections of 2 vickers guns each. The peace establishment of Indian combatant personnel is fixed at one Indian officer and 43 Indian other ranks. The Indian platoon, as it is called, is transferred *en bloc* to another British battalion when the battalion to which it was originally attached proceeds on relief out of India.

Royal Artillery.—Indians are employed as drivers and artificers in the Royal Horse Artillery and in field and medium batteries, as drivers, gunners and artificers in mountain batteries, and as gunners in heavy batteries

The peace organisation of the artillery at the present day is as follows:

Royal Horse Artillery.—Comprises four independent batteries. Each battery is armed with six 13-pounder guns.

Field (Higher and Lower Establishment) Brigades.—Five brigades on the higher establishment, each consisting of headquarters and four batteries. Four brigades on the lower establishment, each consisting of headquarters and four batteries. A brigade on the higher establishment consists of 3 batteries of six 18 prs. each and 1 battery of six 4.5″ Howitzers or 2 batteries of six 18 prs. each and 2 batteries of six 4.5″ Howitzers. A brigade on the lower establishment consists of 3 batteries of four 18 prs. each and 1 battery of four 4.5″ Howitzers or 2 batteries of four 18 prs. each and 2 batteries of four 4.5″ Howitzers each.

Field (Mechanised) Brigade.—The mechanised brigade consists of two batteries armed with four 18-pounder guns, and two batteries armed with four 4·5″ howitzers.

Field (Reinforcement) Brigade.—The reinforcement brigade consists of two double batteries, each armed with four 18-pounder guns, and four 4·5″ howitzers.

Ammunition Columns.—Two Divisional ammunition columns are maintained for the artillery of the first and second divisions, and one field ammunition column for the covering force brigade on the frontier. These are all mechanised.

Indian Mountain Brigades.—Six brigades, each consisting of headquarters, one British light and three Indian mountain batteries, one unbrigaded mountain battery also one mountain Artillery Section for Chitral and one Survey Section. All batteries are armed, with four 3.7″ howitzers. The armaments of the Frontier posts at Kohat, Fort Lockhart, Fort Milward, Fort Salop, Jhansi post, Arawali, Bannu, Wana Mir Ali, Wana Thal, Chaman, Hindubagh, Malakand, Landi Kotal; Shagai; Chakdara and Fort Sandeman are also manned by personnel of Indian Mountain Brigades, R.A.

Medium Brigades.—Two brigades, all consisting of tractor drawn batteries. Three batteries in each brigade, two of which are armed with six 6″ howitzers, and one battery with four 60-pounder guns.

Heavy Brigade.—One battery at Bombay and one at Karachi.

Anti-Aircraft—Headquarters One battery, located at Bombay. The battery is armed with eight 3 inch, 20 cwt. guns.

Artillery Training Centres.—One centre at Muttra, for Indian ranks of R. H. A. and of field medium and anti-air craft batteries and another centre at Ambala for Indian ranks of Light, Mountain and Heavy Artillery. These centres were created for the recruitment and training of Indian personnel. There is also a R. A. Boys Depot at Bangalore.

Engineer Services.

The Engineer-in-Chief.—The head of the Corps of Royal Engineers in India is directly responsible to His Excellency the Commander-in-Chief. The Engineer-in-Chief is not a Staff Officer, but the technical adviser of the Commander-in-Chief on all military engineering matters and is responsible for:

(1) Engineer operations and engineer services during war and peace.

(2) The preparedness for war of the engineering services.

(3) The supply of engineer stores during war and peace.

(4) The execution and maintenance of all military works.

(5) The constructional efficiency, accuracy and economy of all projects and designs submitted by him.

The Organisation.—The Engineer organisation of the Army consists of two main branches, *viz.*, the Sappers and Miners and the Military Engineer Services.

The composition of the Corps of Sappers and Miners is as follows:

Queen Victoria's Own Madras Sappers and Miners, with headquarters at Bangalore. King George's Own Bengal Sappers and Miners, with headquarters at Roorkee. Royal Bombay Sappers and Miners, with headquarters at Kirkee.

The personnel of the Corps consists of Royal Engineer officers, Indian Army Officers fromthe late Pioneer Corps, Indian officers holding the Viceroy's commission, a certain number of British warrant and non-commissioned officers, Indian non-commissioned officers and Indian other ranks. Each Corps is commanded by a Lieut.-Colonel, who is assisted by a Superintendent of Instruction, an Officer-in-Charge, Workshops, an Adjutant, a Quartermaster, three Subadar-Majors, a Jemadar Adjutant and a Jemadar Quartermaster.

Field Troops are mounted units, trained to accompany cavalry, and are equipped to carry out hasty bridging, demolition and watersupply work. Field Companies are trained to accompany Infantry. Divisional Headquarters' Companies are small units containing highly qualified "tradesmen" and are trained to carry out technical work in connection with field workshops. Army Troops Companies are somewhat smaller units than field companies; they are required to carry out work behind divisions, under the orders of Chief Engineers, *e.g.*, heavy bridging work, large water-supplies, electrical and mechanical installation.

The Military Engineer Services control all military works in India, and Burma except in the case of a few small outlying military stations, which are in charge of Public Works Department. They control all works for the Royal Air Force and all major works for the Royal Indian Marine; and they are charged with all civil works in the North-West Frontier, Province and Baluchistan under the orders, in each of these two areas, of the Governor and Agent to the Governor-General, respectively. They also control civil works in Bangalore, under the Mysore Government.

The Engineer-in-Chief is assisted by a Deputy Engineer-in-Chief (Works) and a Deputy Engineer-in-Chief (Electrical and Mechanical). In each Command there is a Chief Engineer, while in the Northern Command a Deputy Chief Engineer administers Military and Civil works in the N. W. F. P. and is Secretary, P. W. D., to the Govt. of N. W. F. Province. The Chief Engineer, Western Command, is the

Secretary, P. W. D., to the Agent to the Governor-General in Baluchistan. Both at Army Headquarters and in Commands there are Staff Officers, R. E., and Technical Officers. At the headquarters of each district there is a Commander, Royal Engineers, assisted in certain districts by A. Cs. S. R. E. Officers of the Barrack Department are also employed as District Stores Officers. Garrison Engineers are in charge of brigade areas and military stations, their charges being divided into sub-divisions under Sub-divisional Officers. The sub-divisions are Buildings and Roads, Electrical and Mechanical, and Furniture and Stores. There are sub-overseers for Buildings and Roads and the Barrack Department subordinates in charge of Furniture and Stores are assisted by storekeepers.

Royal Air Force in India.

The Royal Air Force in India is controlled by the Commander-in-Chief in India as part of the defence services of the Indian Empire. The Air Force budget is incorporated in the Military Estimates. The Commander of the Air Force, the Air Officer Commanding in India is an Air Marshal whose rank corresponds to that of a Lieut.-General in the Army. The appointment is now held by Air Marshal Sir John M. Steel, K.B.E., C.B., C.M.G.

The headquarters of the Air Force is closely associated with Army Headquarters and is located with the latter at the seat of the Government of India. The Air Officer Commanding has a headquarters staff constituted in six branches, namely, air staff, personnel, technical, stores, medical and chief engineer. The system of staff organisation is similar to the staff system obtaining in the Army. Broadly speaking, the duties assigned to the divisions mentioned are those which are performed by the General Staff Branch, the Adjutant-General's and Military Secretary's branches, the Quartermaster-General's Branch, the Medical Directorate and the Engineer in Chief's branch respectively, of Army Headquarters.

Subordinate formations.—The formations subordinate to the Royal Air Force Headquarters are:—

(*i*) GROUP COMMAND, comprising 2 Wing Stations of two squadrons each, on a station basis.
(*ii*) Wing Command comprising 2 squadrons not on a station basis.
(*iii*) Station Commands.
(*iv*) The Aircraft Depot.
(*v*) The Aircraft Park.
(*vi*) Heavy Transport Flight.
(*vii*) R.A. F. Hill Depot, Lower Topa.

Group Command.—The Group Command is known as No. 1 (Indian) Group Headquarters, and is located at Peshawar. The Group Commander is a Group Captain, corresponding in rank to a Colonel in the Army. His staff is organised on the same system as that of the Headquarters of the R. A. F. in India. The establishment of the Group consists of 4 officers and 16 airmen.

The subordinate units to No. 1 (Indian) Group Headquarters are as follows:—
No. 1 Wing Station, R.A.F., Kohat.
No. 2 Wing Station, R.A.F., Risalpur.
Army Co-operation squadron at Peshawar.

Wing Command.—There is one Wing Command only namely 3 (Indian) Wing, R.A.F., located at Quetta. The Wing Commander is an officer with Air Force rank corresponding to a Lieutenant-Colonel in the Army.

He is equipped with a staff organised on approximately the same system as the Headquarters of a Group. The Wing Establishment consists of 4 officers and 17 airmen.

Wing Station Commands.—There are 2 Wing station commands in India, one located at Peshawar and the other at Risalpur. Each station consists of two squadrons on a reduced squadron basis with one administrative head, *i.e.*, Station Headquarters under the command of a Wing Commander. The strength of the Station Headquarters is 8 officers and 112 airmen, while that of the two squadrons totals 24 officers and 106 airmen. The wing Station at Risalpur also administers the Parachute Section.

The Squadrons.—Of the 8 squadrons 7 are extended along the North West Frontier from Quetta to Risalpur, and one is stationed at Ambala.

The squadron is the primary air force unit, and it consists, normally, of a Headquarters and three flights of aeroplanes. A flight can be detached temporarily but not permanently from its squadron as repair facilities, workshops and stores cannot economically be organised on anything less than a squadron basis. The squadrons headquarters comprises the officers and other ranks required for the command and administration of the squadron as a whole; it includes the workshops and repair units, the armouries and equipment stores of the squadrons.

The number of aeroplanes in a squadron varies with the type of aeroplane with which the squadron is equipped; but speaking generally squadrons on a peace basis have twelve aeroplanes *i.e.*, four in each of three flights. This does not however apply to the twin engined bombing squadrons.

Of the 8 squadrons 4 are equipped with Bristol Fighters and four with Wapitis and they are allotted for distant reconnaissance and bombing duties, of the other four, which are allotted for Army Co-operation duties, two squadrons are equipped with Bristol Fighters and two with Wapitis aircraft.

Squadron Establishment.—The establishment of officers in a squadron consists of seven officers in the Headquarters, and fifteen officers allotted to flying duties. This allows a reserve of one officer for each of the operative flights.

The establishment of other ranks is 123 airmen.

The Aircraft Depot.—The Aircraft Depot may be conveniently described as the wholesale store and provision department of the Royal Air Force. Technical stores are received from the United Kingdom, and in the first instance, held by this unit. It is also the main workshop and repair shop of the Force, where all engine repairs, mechanical transport repairs, and aircraft repairs of any magnitude are carried out. The Depot is located at Drigh Road, Karachi.

The Aircraft Park.—Relatively to the Aircraft Depot, the Aircraft Park may be described as a central retail establishment, intermediate between the squadrons and the Aircraft Depot. It receives stores from the depot and distributes them to the squadron. The Stocks held in the Park are, however, usually limited to items necessary at short notice for operations, and the quantities held are kept as low as distance from the depot and local conditions will admit. In war, an Aircraft Park is intended to be a mobile formation, though the aircraft Park in India cannot be made mobile under ordinary conditions. In peace, the Aircraft Park is located at Lahore. New aeroplanes received from the United Kingdom are erected there, but no major repairs are undertaken. In addition to the above functions, practically the whole of the motor transport bodies requred for R. A. F. vehicles are built or repaired at Aircraft Park. The Heavy Transport flight is administered by this unit.

Composition of Establishments.—The personnel of the Royal Air Force in India consists of officers, warrant officers, non-commissioned officers and men in the ranks of the R. A. F. of the United Kingdom, and Indian artificers, Mechanical Transport drivers and followers of the Indian Technical and Followers Corps, R. A. F. in India. The officers are employed on administration, flying and technical duties but all with the exception of officers of the store and medical branches are required to be capable of flying an aeroplane. A proportion of airmen are also trained and employed as pilots for a period of five years, after which period, they revert to their technical trades. Apart from these airmen all warrant officers, non-commissioned officers and aircraftsmen are employed solely on technical duties. The only other flying personnel who are not officers or airmen pilots are air gunners and a certain percentage of wireless operators.

The warrant officers, non-commissioned officers and aircrattsmen are employed at all units. The personnel of the Indian Technical and Followers Corps are employed as follows :—

(*a*) Technical Section (artificers) .. Aircraft Depot. Aircraft Park.
(*b*) M. T. Drivers Section . All Units.
(*c*) Followers Section .. All Units.

The total establishment of the Royal Air Force in India is as follows :—

Officers	256
Airmen	1,881
Indian Officers, other ranks and followers ..	924
Civilians	521

The Royal Air Force Medical Services.—In India, as in the United Kingdom, the Air Force has a medical service of its own. Flying must still be regarded at present as an abnormal pursuit for the human being. It is carried out under conditions which differ widely from those on the ground. With the growth of aeronautics therefore, it was found necessary to create a separate depa t-ment of medical science whose functions, broadly stated are to study the effect of flying upon the human constitution both mental and physical, to study also the effects of different forms of illness and physical disability upon flying efficiency and to apply in practical form the results ascertained. The essential object in view is to save life by ensuring, so far as possible that those who fly are physically and psychologically fit to do so. The present establishment of the Royal Air Force Medical Service in India consists of 11 officers and 27 airmen. The Medical Administration is controlled by the Principal Medical Officer of the rank of Group Captain, on the staff of the Air Officer Commanding the R. A. F. in India.

Indian Air Force.—This force came into existence on 8th October 1932, the date on which the first batch of six Indian cadets, after receiving training at Cranwell, obtained commission as Pilot Officers. These officers will form the first unit of the Indian Air Force. The training of cadets for the Indian Air Force cannot at present be undertaken in India, and arrangements have been made to continue their training at Cranwell.

Regular Indian Forces.

Indian Cavalry.—The present number of Indian cavalry regiments is 21.

The peace establishment of an Indian cavalry regiment comprises :

14 British officers.
19 Indian officers.
492 Indian non-commissioned officers and men.

Indian Infantry.—The establishment of the Indian Infantry is constituted as follows:

	Battalions
19 Infantry Regiments consisting of ..	98
3 Regiments of Sappers and Miners ..	7
10 Gurkha regiments consisting of ..	20
32	125

The normal strength of an active battalion is—

	British Officers.	Indian Officers.	Indian other ranks
Infantry ..	2	20	703
Gurkhas ..	13	22	908

The strength of an infantry training battalion depends upon the number of battalions forming the regiment. The average is as follows :—

British Officers 9, Indian Officers 13, and Indian other ranks 682.

In 1932 it was decided that the Pioneer organization was no longer absolutely necessary as the duties on which Pioneers were employed eg., road-making etc., were now generally performed by la etwebour. The whole organization has therefore been disbanded, and the opportunity has been taken to make a much needed addition to the various Engineer units (Sappers and Miners).

Reserves for the various units of the Indian Army have to be sufficient to provide for an actual shortage on mobilisation as well as for the maintenance of the mobilised unit at full strength for the first 8 months after mobilisation.

Reserve.—The conditions of the reserve, are as follows:—

The Indian Army Reserve consists of private soldiers or their equivalent. It is comprised of class 'C' reservists for Indian Cavalry

Artillery Sappers and Miners, Signals and Infantry and class 1 for Gurkha Rifles. The new class 'C' reserve was introduced for Indian Cavalry, Artillery, Sappers and Miners and Signals with effect from 1st October 1932 and for Indian Infantry with effect from 1st May 1932. There still remain a number of classes 'A' and 'B' reservists which count against the authorised establishment of the reserve but those will be gradually eliminated.

Training for Indian Cavalry, Infantry and Gurkha Rifles reservists is carried out biennially.

Reserve pay at certain specified rates is admissible from the date of transfer to, or enrolment in, the reserve. When called up for service or training, reservists receive pay and allowances, in lieu of reserve pay, at regular rates according to their arm of the service.

The establishment of reservists is fixed at present as follows:—

Cavalry	2,943
Artillery	2,329
Engineers	1,678
Indian Signal Corps	994
Infantry	22,120
Gurkhas	2,000
Railway Nucleus Reserve ..	654
Supplementary Reserve ..	247
Total ..	32,965

The Indian Signal Corps.—The Corps is organised on the same lines as a Sapper and Miner Corps, with a headquarters for recruiting and training personnel, and detached field units for the various army formations. The head of the corps is the commandant, Signal Training Centre (India), who belongs to the Royal Corps of Signals and performs the duties of the Signal Officer-in-Chief in the General Staff Branch at Army Headquarters as a technical adviser on questions connected with signals, and is also responsible for the technical inspection of all signal units. A chief signal officer with similar functions is attached to the headquarters of each Army Command. The British portion of the Corps has now been amalgamated with the Royal Corps of Singals.

The headquarters, termed the Signal Training Centre, India, are located at Jubbulpore, and are commanded by a Colonel, assisted by a staff, British and Indian, organised on very much the same lines as the headquarters of a Corps of Sappers and Miners.

The various types of field units and the number maintained are:—

Corps Signals Headquarters including Line and Wireless Company	2
Cavalry Brigade Signal Troops ..	4
Divisional Signals	4
District Signals	3
Experimental Wireless Section ..	1

In addition, there is an Army Signal School which carries out the training of regimental signalling instructors.

The formation of the District signals units was effected in 1926 with the transfer of Communications on the North-West Frontier to the Posts and Telegraphs Department. This transfer of communications also made feasible the raising of the 'A' and 'C' troops of Cavalry Brigade Signals to include a Wireless Section each the formation of two Corps Signal Headquarters, The District Signals are located at Peshawar, Waziristan and Kohat.

Royal Tank Corps.—Six armoured car companies arrived in India in 1921. Two more companies arrived in 1925. Two Group Headquarters were sanctioned in 1925. They are located as follows:—the Northern Group at Rawalpindi, this Group Headquarters commands companies in the Northern and Eastern Commands. The Southern Group at Poona. This Group Headquarters commands companies in the Southern and Western commands. There is a school at Ahmednagar for the training of R. T. C. personnel and the conduct of experiments.

Organisations.—2 Light Tank Companies. Each company consists of Headquarters and 3 Sections and is armed with 25 Carden Lloyd Light Tanks; 4 for Company Headquarters and 7 per section.

6 Armoured Car Companies. Each company consists of Headquarters and 3 Sections and is armed with 16 armoured cars; 1 for Company Headquarters and 5 per section. Excepting one company which is equipped with Guy Cars, armoured car all companies are equipped with Crossley Cars.

The establishments of the Royal Tank Corps formations are shown below:—

—	British Officers.	British other ranks.	Followers.	Motor cars.	Motor cycles.	Armoured cars.	Lorries.
Group Headquarters	2	2	..	..	..	..	..
Tank Corps School	5	48	16	1	2	9	9
Armoured Car Company	12	142	32	2	6	16	10

Medical Services.—The military medical services in India are composed of the following categories of personnel and subordinate organisations:—

(*a*) Officers and other ranks of the Royal Army Medical Corps serving in India;

(*b*) Officers of the Indian Medical Service in military employment;

(*c*) The Indian Medical Department, consisting of two branches, *viz.*, (i) assistant surgeons and (ii) sub-assistant surgeons.

(*d*) Queen Alexandra's Imperial Military Nursing Service.

(*e*) The Queen Alexandra's Military Nursing Service for India.

(*f*) The Army Dental Corps.

(*g*) The Indian Military Nursing Service.
(*h*) The Indian Hospital Corps.

Of these categories, the officers and men of the Royal Army Medical Corps and the Army Dental Corps, the assistant surgeons of the Indian Medical Department and the Queen Alexandra's Imperial Military Nursing Service and the Queen Alexandra's Military Nursing Service for India are primarily concerned with the medical care of British troops; while the officers of the Indian Medical Service, the sub-assistant surgeons of the Indian Medical Department and the Indian Military Nursing Service are concerned, primarily, with the medical care of Indian troops. The Indian Hospital Corps serves both organisations.

Civilians of miscellaneous classes employed by the Army in Waziristan are given medical treatment in military hospitals, and arrangements have been made with the Headquarters of the Indian Red Cross Society for the medical treatment and care of cases amongst Indian soldiers and followers of the Indian Army for chronic diseases, such as tuberculosis, leprosy and diabetes.

Indian Army Service Corps.—The Indian Army Service Corps is the counterpart of the Royal Army Service Corps of the British Army. It has developed from the Commissariat Department of an earlier period, and its immediate predecessor was the Supply and Transport Corps, by which name the service was known up to 1923. The Indian Army Service Corps which is under the control of the Quartermaster-General, is constituted in three main branches, namely: (*a*) Supply, (*b*) Animal transport, and (*c*) Mechanical Transport. The latter is constituted upon a special basis, which is, generically, a sub-division of the Royal Army Service Corps organisation.

The strength of the establishment is shown by categories in the following table:—

SUPPLY.

Officers with King's commissions	140
Indian officers	68
British other ranks	340
Civilians	621
Followers	1,401
Total	2,570

ANIMAL TRANSPORT.

Officers with King's commissions.	58
Indian officers	129
British other ranks	42
Civilians	105
Indian other ranks	9,845
Followers	1,403
Total	11,582

There are also 1,576 driver reservists.

The total number of mules and camels maintained under the present organisation, including the depots and the detachment in Kashmir, are 13,711 and 4,128 respectively. There are also 183 horses, 436 ponies and 12 bullocks. Wheeled and pack transport are combined. The company on the lower establishment represent the pre-war "cadre," other companies being maintained in peace-time at full war establishment.

MECHANICAL TRANSPORT.

Officers with King's commissions.	123
Indian officers	63
British other ranks	227
Indian other ranks	2,839
Indian civilians	231
Followers	1,204
Total	4,687

There are also 3,035 reservists.

The mechanical transport establishment consists of the following:—

(*a*) Field units—
- 11 M. T. Companies, consisting of 11 headquarters, 36 service sections (higher establishment), and 8 service sections (lower establishment).
- 5 M. T. Companies for motor ambulance convoys consisting of 5 headquarters, 1 section (higher establishment) and 11 sections (lower establishment).
- M. T. Companies (Mobile Repair Units) consisting of 2 headquarters and 4 sections.

(*b*) Maintenance units—
- 5 Heavy Repair shops.
- 1 Central M. T. Stores Depot.
- M. T. technical inspectorate, one M. T. depot for training Indian drivers.
- 1 Vehicle Reserve Depot.

Apart from units and vehicles employed in the conveyance of military stores, the mechanical transport service also provides motor ambulance convoys for hospitals and field medical units, and vehicles for other miscellaneous purposes. The total establishment now consists of 2,068 vehicles with 109 motor cycles.

The mechanical transport was taken over by the Indian Army Service Corps in 1927. At present the officers of the service are mainly drawn from the Royal Army Service Corps since at present there are no facilities in India for training officers in every branch of mechanical transport duties. The establishment of officers includes, however, a certain number of King's commissioned officers belonging to the Indian Army. The British subordinates of the service are drawn entirely from the Royal Army Service Corps.

The Ordnance Services which are under the M.G.O. may be broadly described as the agency whose duty it is to supply the army with munitions of war, such as small arms, guns, ammunition and other equipment of a technical military character, and also, under an arrangement introduced in recent years, with clothing and general stores other than engineering stores. A central disposal organisation is in operation under the control of the Master General of Ordnance to dispose of the Surplus Stores and waste materials of the various services of the Army and the Royal Air Force in India to the best advantage of the State.

Army Remount Department.—The following are among the most important duties for the remount service:—The provision of animals for the Army in India. The enumeration throughout India of all animals available for transport in war. The animal mobili-

zation of all units, services and departments of the army. A general responsibility for the efficiency of all the animals of the army both in peace and war. The administration of the remount squadron formed in 1922 as a nucleus for expansion into three squadrons on mobilization. Breeding operations of a direct character.

The department is organised on lines corresponding to the remount service in the United Kingdom. Its composition is as follows: The Remount Directorate at Army Headquarters consisting of one Director and a Deputy Assistant Director. 4 Remount officers, one attached to each Command Headquarters, 6 Superintendents of Remount Depots, 5 District Remount officers of horse-breeding areas and the Ahmednagar Stud, 16 Assistant Remount officers and 8 Veterinary officers.

Veterinary Services in India.—The Veterinary services are responsible for the veterinary care, in peace and war, of animals of British troops, Indian cavalry and artillery, I. A. S. C. units, the remount department (excluding horse-breeding operations), etc. The veterinary services include: The establishment of Royal Army Veterinary Corps officers, serving on a tour of duty in India and those of the continuous service cadre. The establishment of warrant and non-commissioned officers, India Unattached List, and veterinary assistant surgeons of the Indian Army Veterinary Corps.

The Indian Army Veterinary Corps is organised in 12 sections, attached in peace-time to Class I veterinary hospitals at certain important stations.

Military Farms Department.—This department, which is under the control of the Quartermaster-General consists of two branches:-

(i) The military grass farms, which provide fodder for the army.

(ii) The military dairy farms, for the provision of dairy produce for hospitals, troops and families.

Educational Services.—The education of the army is under the control of the Army Educational Corps and of Indian officers borne supernumerary to the establishment of units of the Indian Army. The establishment is as follows including training schools:—

British officers.	Indian officers.	B. O.	I. O.	Civilians.
56	46	165	60	238

Terms of service in the Indian army are as follows:—

Cavalry, 7 years' service in army and 8 years in the reserve.

Artillery, 7 years' service in army and 8 in the reserve for gunners and drivers (horse); drivers (mechanical transport) 6 years in army and 9 years in the reserve; and 4 years' service in army for Heavy Artillery personnel.

S. & M. Corps, 7 years' service in army and 8 in the reserve.

Indian Signal Corps, 7 years' service in army and 8 in the reserve.

Infantry (except Gurkhas and trans-frontier personnel of the Infantry other than Orakzais), 7 years in army service and 8 years in the reserve.

Gurkhas and trans-frontier personnel of infantry, 4 years' service in army.

Indian combatant personnel of British infantry 6 years in army.

Indian Military establishments of the Indian Army Ordnance Corps, 4 years' service in the army.

Animal transport personnel of the Indian Army Service Corps, drivers of mechanical transport and all combatants of the Army Veterinary Corps, 6 years' service in army and 9 in the reserve.

All combatants in the Works Corps, 2 years' service in army.

Bandsmen, musicians, trumpeters, drummers, buglers, fifers and pipers, 10 years' service in army.

Except in the case of those enrolled in the Works and of those who are non-combatants, all school-masters, clerks, artificers, armourers, engine drivers, farriers, carpenters, tailors and bootmakers, 10 years' service in army.

The period laid down for service in the army is the minimum and may be extended. Combatants may be enrolled direct into the Reserve, in which case there is no minimum period of service, but no one is allowed to serve in the reserve or in any class of the reserve for a longer period than is permitted by the regulations in force.

Frontier Militia and Levy Corps.—These forces are "Civil" troops, *i.e.*, they are administered and paid by the Civil authorities and not by the Army. They are, however, officered by Officers of the Regular Indian Army. These forces were raised for duty on the North-West Frontier and at present consist of the following:—Kurram Militia, Tochi Scouts, South Waziristan Scouts, Chitral Scouts, Gilgit Scouts, Zhob militia and the Mekran Levy Corps.

The Auxiliary Force.

After the war, the question of universal training for European British subjects came up for consideration, and it was decided that in India, as elsewhere in the Empire, the adoption of compulsory military service would be undesirable. It was recognised, however, that India needed some adequate auxiliary force, if only on a voluntary basis, that could be trained to a fairly definite standard of efficiency; and in the result, an Act to constitute an Auxiliary Force for service in India was passed in 1920. Under this Act membership is limited to European British subjects, and the liability of members for training and service is clearly defined. Military training is graduated according to age, the more extended training being carried out by the younger members, the older members being obliged to fire a musketry course only. It was laid down that military service should be purely local. As the form of service that would be most suitable varies largely according to localities, the local military authorities, acting in consultation with the advisory committee of the Auxiliary Force area, were given the power of adjusting the form of training to suit local conditions.

The Auxiliary Force comprises all branches of the service, cavalry, artillery, engineers, infantry—in which are included railway battalions,—machine gun companies, a Signal Company, and the Medical and Veteri-

nary Corps. Units of the Auxiliary Force are under the command of the local military authority, and the latter has the power of calling them out for service locally in a case of emergency. Their role is to assist in home defence. Training is carried on throughout the year. Pay at a fixed rate is given for each day's training and, on completion of the scheduled period of annual training, every enrolled member of the force is entitled to a certain bonus. Men enrol in the Auxiliary Force for an indefinite period. An enrolled person is entitled to claim his discharge on the completion of four years' service or on attaining the age of 45 years. Till then he can only be discharged on the recommendation of the advisory committee of the area.

The duties connected with the Defence Light Sections at Calcutta, Bombay, Karachi and Rangoon are performed by the Field Companies R. E. (A. F. I.) at those stations, assisted by Indian ranks of Sapper and Miner Units.

Indian Territorial Force.

The Territorial Force is one of the several aspects of the Indianisation of the military services. The force is intended to cater, amongst other things, for the military aspirations of those classes of the population to whom military service has not hitherto been a hereditary profession. It is intended, at the same time, to be a second line to and a source of reinforcement for the regular Indian army. Membership of the force for this latter reason carries with it a liability for something more than purely local service or home defence. It may, in certain circumstances, involve service overseas. The force is the direct successor of the Indian section of the Indian Defence Force created during the war. It has been modelled on the old militia in England. The essence of its scheme of organisation consists in training men by means of annual embodiment for a short period in successive years. By this means Indian Territorial Force units can be given sufficient preliminary training in peace to enable them, after a comparatively short period of intensive training, to take their place by the side of regular units in war.

The Indian Territorial Force consists at present of three main categories, provincial battalions, urban units and the university training corps units. The last are recruited from the staff and students of Indian universities. They are trained all the year round by means of weekly drills during terms and a period of 15 days in camp and are equipped with a permanent staff of British instructors. On ceasing to belong to a university, a member of the corps is discharged. In the case of the university training corps units there is no liability to perform the liability to render actual military service. Their purpose is mainly educative, to inculcate discipline and form character. But, incidentally, they are expected to be a source of supply of both officers and men for the provincial and urban units.

The members of the provincial battalions accept the full liability for service which has been mentioned. Seven such battalions were constituted in the first instance. The number is now eighteen and, though the unit establishment has not been completely filled in all cases, the movement has already achieved a greater degree of success than might have been anticipated at so early a stage. Although for the present the infantry arm only has been created with the addition of the I.T.F. Medical Branch, the force by law may include every other army service.

Men enrol in the provincial battalions for a period of six years, the period being reduced to four years in certain cases. On the completion of the first period they can re-enrol voluntarily for further specified periods. During his first year, every man does preliminary training for one calendar month and during every year he receives one month's periodical training. Members of *urban units* have only a provincial liability. 4 such units were constituted in 1928 in Bombay, Madras, and the United Provinces, one of which has since been disbanded. Members enrolled for a period of 6 years and train all the year round. During his first year every man does 32 days' preliminary training, and in every subsequent year 16 days' periodical training.

The Indian State Forces.

The Indian State Forces, formerly designated "Imperial Service Troops," consist of the military forces raised and maintained by the Rulers of Indian States at their own expense and for State service. It has been the custom in emergency for State troops to be lent to the Government of India, and the Government of India have on many occasions received military assistance of great value from this source. But the rendering of such aid is entirely at the discretion of the Ruling Princes and Chiefs. Government, on the other hand, provide permanently a staff of British officers, termed "Military Advisers and Assistant Military Advisers," to assist and advise the Ruling Princes in organising and training the troops of their States.

After the war had ended, the Indian States, like the Government of India, undertook a military reorganisation, which in a number of cases, has already been carried out. The principal feature of the new arrangements, as adopted more or less generally, is that in future the Indian State Forces should be composed of three categories of troops, namely:

Class A.—Troops in this class are organised on the present-day Indian Army system and establishments, and, with some exceptions, are armed with the same weapons as corresponding units of the regular Indian Army.

Class B.—These troops consist of units which are, in most cases, little inferior in training and discipline to troops of Class A; but they are not organised on present-day Indian Army establishments. They have, as a rule, retained the system of the pre-war formations. Their standard of armament is pitched lower than that of Class A troops.

Class C.—These troops consist in the main of militia formations, which are not permanently embodied. The standard of training, discipline and armament, prescribed for this class, is generally lower than the standard prescribed for Class B troops.

The authorized and actual strength of the

Indian State Forces on the 1st October 1933, amounted to—

	Authorized strength.	Actual strength.
Artillery	1,616	1,599
Cavalry	9,648	9,066
Infantry	34,684	29,506
Camel Corps	466	456
Motor Machine Gun Sections	100	85
Sappers	1,307	1,067
Transport Corps ..	1,560	1,608
Grand total ..	49,371	43,387

Officers.

There are two main categories of officers in the Indian Army; those holding the King's Commission and those holding the Viceroy's Commission. The latter are all Indians, apart from the Gurkha officers of Gurkha battalions, and have a limited status and power of command, both of which are regulated by the Indian Army Act and the rules made thereunder. Within recent years several Indians have received King's Commissions, on entry into the Indian Army through the Royal Military College, Sandhurst and the Royal Military Academy, Woolwich.

King's Commissioned officers for the Indian Army are obtained from two main sources: from among the cadets who pass through the Royal Military College, Sandhurst, and by the transfer to the Indian Army of officers belonging to British units. The former is the principal channel of recruitment; the latter being only resorted to when, owing to abnormal wastage or for some other special reason, requirements cannot be completed by means of cadets from Sandhurst. A third source is from among University candidates. When a cadet has qualified at Sandhurst and has received his commission, he becomes, in the first instance, an officer of the Unattached List, and is posted for a period of one year to a British battalion or regiment in India, where he receives a preliminary training in his military duties. At the end of the year, he is posted as a squadron or company officer to a regiment or battalion of the Indian Army. Administrative services and departments of the army draw their officers from combatant units, as it has hitherto been regarded as essential that every officer should, in the first instance, receive a thorough grounding in combatant, duties, and acquire at first hand an intimate knowledge of the requirements of the combatant arms.

The promotion in rank of King's commissioned officers of the Indian Army is regulated by a time-scale up to the rank of Lieutenant-Colonel but is subject also to certain professional examinations and tests being successfully passed. The rank of Lieutenant-Colonel is in normal course attained at 26 years' service; promotion beyond this rank is determined by selection.

Indian Officers.—One of the most momentous decisions of the Great War, so far as the Indian Army is concerned, was that which rendered Indians eligible to hold the King's commission in the army. King's commissions are obtainable by Indian gentlemen in three ways: (1) By qualifying as a cadet through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich. Examinations are held twice a year in India for the selection of suitable candidates for admission. (2) By the selection of specially capable and deserving Indian officers or non-commissioned officers of Indian regiments promoted from the ranks or those appointed direct as jemadar. These receive their commissions after training at the Royal Military College or Academy as Cadets and qualifying in the usual way. (3) By the bestowal of honorary King's commissions on Indian officers who have rendered distinguished service, but whose age and lack of education preclude their being granted the full King's commission. The first two avenues of selection mentioned afford full opportunity to the Indian of satisfying a military ambition and of enjoying a military career on terms of absolute equality with the British officer, who, as a general rule, also enters the army by qualifying at Sandhurst or Woolwich. Until 1931, ten vacancies at Sandhurst and three at Woolwich were reserved annually for Indian cadets.

A further measure adopted by the Government was the establishment of the Prince of Wales' Royal Indian Military College at Dehra Dun, a Government institution for the preliminary education of Indians who desire to qualify for the King's commission in the army through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich. The arrangements so far made enable a maximum of 70 boys to be in residence at the college at any one time, and the normal course of education is planned to occupy six years. In February 1923, it was decided that eight units of the Indian Army should be completely Indianized. The units selected for Indianization were: 7th Light Cavalry; 16th Light Cavalry; 2nd Bn., Madras Pioneers; 4/19th Hyderabad Regiment; 5th Royal Battalion, 5th Mahratta Light Infantry; 1/7th Rajput Regiment (Q. V. O. L. I.); 1/14th Punjab Regiment; 2/1st Punjab Regiment.

In 1932 a considerable advance in the Indianization of the Army was made by the announcement that it was intended to Indianize a Division of all Arms and a Cavalry Brigade. In order to implement this decision, the following units have been marked for Indianization, 3rd Cavalry, 5/2nd Punjab Regiment, 5/6th Rajputana Rifles, 5/8th Punjab Regiment, 5/10th Baluch Regiment, 5/11th Sikh Regiment, 4/12th Frontier Force Regiment, and 6th Royal Battalion 13th Frontier Force Rifles, in addition to units of Indian Artillery, Engineers, etc., together with the usual complement of ancillary services, to make up a complete Division.

In order to train officers for the Indian Army of the future, the Indian Military Academy at Dehra Dun was opened in October 1932. It will provide officers for all arms cavalry, infantry, artillery and signals.

Training Institutions.

The following institutions exist in India for the higher training of military personnel and for the education of instructors for units:—

Staff College, Quetta.
Senior Officers' School, Belgaum.
School of Artillery, Kakul.
Equitation School, Saugor.
Small Arms Schools (India), at Pachmarhi and Ahmednagar.
Army School of Physical Training, Ambala.
Army Signal School, Poona.

Royal Tank Corps School, Ahmednagar.
Army School of Education, Belgaum.
Army School of Cookery, Poona.
Army Veterinary Schools, Ambala and Poona.
Indian Army Service Corps Training Establishment, Rawalpindi.
Indian Army Ordnance Corps School of Instruction, Kirkee.

The object of these Schools is to ensure to all the units throughout the army a constant supply of officers, warrant officers, non-commissioned officers and men, provided with a thorough up-to-date knowledge of various technical subjects, and with the ability to pass on this knowledge.

Following the procedure adopted at Home, the Small Arms and Machine Gun Schools were amalgamated in February 1927. Instruction in the rifle, light gun, etc., is carried out at Pachmarhi and in the machine gun at Ahmednagar.

The King George's Royal Indian Military Schools at Jhelum, Jullundur and Ajmere, and the Kitchener College, Nowgong, also exist for the education of the sons of Indian soldiers with a view to their finding a career in the Indian Army. The latter at present assists in the training of Indian N. C. Os. for promotion to Viceroy's Commission. The Prince of Wales's Royal Indian Military College at Dehra Dun exists for the preliminary education of Indians who desire to qualify for the King's Commission in the Army through the Indian Military Academy.

Army in India Reserve of Officers.—Previous to the Great War there existed what was called the Indian Army Reserve of Officers, a body of trained officers available to replace casualties in the Indian Army. The war proved that for many reasons this reserve did not fully meet requirements and in 1922 the Army in India Reserve of Officers was constituted.

The revised Regulations for the A. I. R. O. published in 1926 provide that the following gentlemen may be granted commissions in the Reserve:—

(1) Officers who having held King's commissions and retired from H. M.'s forces.

(2) Officials, other than Military officers, serving under the Government of India or a local Government.

(3) Private gentlemen residing in India, possessing the requisite qualifications and previous training.

The Reserve comprises each arm and branch of the Army and the officers are posted to definite branches and units.

All officers are required to undergo periodical training up to a maximum of 30 days a year and receive pay and allowances admissible to regular officers of the same rank and arm of the service, during training.

Members of the Auxiliary Force, India, may become "officers designate" for the grant of commissions in the A. I. R. O., upon the calling to army service of that reserve.

Officers and officers designate receive Rs. 200 annually as a retaining fee, and an outfit allowance of Rs. 400, on joining.

The strength of the Reserve on the 1st January 1934 was 1,398.

Recruitment for the Reserve has been extended to Ceylon, the number to be commissioned in Ceylon being limited to 50.

The Fighting Races.—The fighting classes that contribute to the composition of the Indian Army have hitherto been drawn mainly from the north of India, but the experiences of the great war have caused some modifications in the opinions previously held as to the relative value of these and other fighting men. The numbers of the various castes and tribes enlisted in the Army have since the war undergone fluctuations, and it is not possible at present to give exact information as to their proportions. Previous to the war the Sikhs contributed very large numbers both to the cavalry and infantry, and the contribution of the Gurkhas was also large. The Sikhs, who inhabit the Punjab originated in a sect founded near Lahore by a peasant in the early part of the sixteenth century and in the course of a hundred years grew into a formidable militant power. Muhammadans of various races contribute a still larger proportion to both the cavalry and infantry. These are drawn both from the north and the south of India, as well as from beyond the Frontier. They are all excellent fighting men, hardy and warlike, who have furnished soldiers to all the great powers of India for many hundreds of years. As cavalry the Muhammadans are perhaps unequalled by any other race in the East, being good horsemen and expert men-at-arms.

Next in point of numbers are the Gurkhas of Nepal, of whom there are twenty complete battalions, which during the war were considerably increased. As fighters in the hills they are unsurpassed even by the Pathans in the North-West Frontier, but the Garhwalis and Kumaonis are equally good mountaineers.

The professional military caste of India from time immemorial has been the Rajput, inhabiting not only Rajputana but the United Provinces and Oudh. Of fine physique and martial bearing, these warriors of Hindustan formed the backbone of the old Bengal Army, and have sustained the English flag in every campaign in the East. Their high caste and consequent prejudices in no respect interfere with their martial instincts and efficiency in war. They furnish many battalions. The Garhwalis are Hill Rajputs, good and gallant soldiers, who have proved themselves equal to any other troops on the field of battle and have established an imperishable record in the war both in Europe and in the East. The two battalions which existed in 1914 have since been increased to four. The Jats are a fine and warlike race of Hindus found in the Delhi and Rohtak districts and adjoining territory. It was these people who held out so bravely at Bharatpur and repelled Lord Lake's army in 1805. They have proved themselves good soldiers on the battlefields of Europe. Dogras are good and steady soldiers found in the hilly districts of the Punjab. They fought well in Flanders and in Mesopotamia.

Among those who have rendered signal and gallant service in the war are the Mahrattas of the Deccan and the Konkan, who have revived the reputation held by their race in the days of Shivaji, the founder of the Mahratta Empire. It is probable that their proved efficiency in war will lead to their recruitment in larger numbers in future.

In addition to the castes that have been mentioned other caste men from the south and other parts of India have filled the ranks of the

Sappers and Miners, and done their duty well in every campaign in which they have been engaged.

During the war the Victoria Cross was awarded for conspicuous gallantry to 2 Indian officers, 4 non-commissioned officers and 6 other ranks of the Indian Army.

The Military Cross was awarded to 96 Indian Officers for distinguished service rendered during the Great War and to 3 Indian Officers for service in Waziristan.

A large number of Indian Officers and men were also granted Foreign decorations.

Summary of India's Effort in the War.—In a despatch by the Commander-in-Chief published in July, 1919, the whole operations of the Indian Army during the war are reviewed. His Excellency gives in it the following figures showing the extent of India's contribution in terms of men. On the outbreak on war, the combatant strength of the Indian Army, including reservists, was 194,000 Indian ranks; enlistments during the war for all branches of the service amounted to 791,000, making a total combatant contribution of 985,000. Of this number, 552,000 were sent overseas. As regards non-combatants, the pre-war strength was 45,000; an additional 427,000 were enrolled during the war and 391,000 were sent overseas. The total contribution of Indian personnel has thus been 1,457,000, of whom 943,000 have served overseas. Casualties amounted to 106,594, which include 36,696 deaths from all causes. The number of animals sent overseas was 175,000.*

Budget Expenditure on National Defence.

A part of the Defence expenditure on the Indian Budget is incurred in England, the nature of such expenditure being indicated in the detailed Tables of Army, Marine and Military Engineer Services expenditure. This expenditure is met by transfer of funds from India. From the 1st April 1920 to the 31st March 1927, the accounts were prepared on the basis of the rate of 2*s* per rupee for the conversion of English sterling transaction into rupees. From the 1st April 1927 the accounts are being prepared at the standard rate of 1*s*. 6*d*. per rupee.

As a rule, the receipts collected by the various departments are not set off against expenditure as appropriations in aid, but are shown separately on the receipts side of the budget. This is especially the case with the receipts of the Military Departments, which amount to considerable sums.

The Provincial Governments incur no expenditure for Military purposes.

SUMMARY OF DEFENCE EXPENDITURE (Gross.)

Grand Total ..	51,07,69	46,91,94	46,03,63

The amounts expended in England on effective services consist of such charges as payments to the War Office and Air Ministry in London in respect of British Forces serving in India, the transport to India of these forces, and payments on account of stores taken to India by British Forces, educational establishments in England for Indian Services, leave pay of Indian and British service Officers on the Indian Establishments, purchase of imported stores, etc. The expenditure on non-effective services consists of payments to the War Office in London for retired pay to British forces for services in India and to non-effective and retired officers of the Indian Service, and of various gratuities.

Although a sum of Rs. 460 millions only has been allotted in the Budget for 1933-34 to meet the net expenditure on Military Services Rs. 505·1 millions (including receipts) will be available for expenditure under the heading "Military Services" made up of Rs.391·9 millions for expenditure in India and Rs. 113·2 millions in England.

The gross working expenses of military establishments, such as bakeries, pasture and dairy farms, army clothing factories, and storage depots, army ordnance factories and base mechanical transport workshops are included in the Budget.

The division of expenditure on *Military Engineer Services* between India and England is as shown below:—

	1931–32.	1932–33.	1933–34.
	Closed Accounts.	Revised Estimates.	Budget Estimates.
	(Rupees 000's omitted)		
India	3,94,29	3,27,97	3,64,69
England	4,69	4,60	4,06
Total ..	3,98,98	3,32,57	3,68,75

Cost of the Army.—A Tribunal was set up in 1932 to investigate the amount of India's contribution towards the recruiting and training expenses in England of the British troops and airmen who serve for a part of their time in India. The Tribunal has also examined India's counter-claim to a contribution towards the cost of her defence expenditure.

The Tribunal was an advisory body which met in November with instructions to report to the Prime Minister. The Chairman was Sir Robert Garran, until recently Solicitor-General in the Commonwealth of Australia. Lord Tomlin and Lord Dunedin were nominated by his Majesty's Government, and Sir Shadi Lal, Chief Justice of the Punjab High Court, and Sir Muhammad Sulaiman, the Senior Puisne Judge of the High Court of Allahabad, by the Government of India.

The matters on which the Tribunal will make recommendations have been subjects of controversy for many years, and, as was recognized in the Report of the Simon Commission, the issue bears upon the great constitutional problem now under consideration. One reason for the connexion is the heavy burden of the cost of defence upon India. Taking the Central and Provincial Governments together, it amounts to 29 per cent. of the total expenditure; and if the Central Government alone is considered it amounts to 54 per cent. These calculations take account of net receipts only from semi-commercial undertakings such as railways, posts, and telegraphs.

Capitation payments.—When, after the Mutiny, the troops of the East India Company were amalgamated with those of the Crown a capitation rate of £10 on every British soldier sent to India was fixed. This worked out at an average annual sum of, roughly, £631,000.

In 1870 objections were raised by both sides to the £10 rate, and until 1878 India made payments on account averaging £440,000 per annum. An Act of Parliament confirmed these amounts as full payment, with the effect of writing off outstanding War Office claims. In 1890 the capitation rate was fixed at £7 10s. Meanwhile the British forces in India had been substantially increased, and the altered rate represented an annual expenditure of about £734,000. A committee presided over by Lord Justice Romer was appointed in 1907. It held that the capitation charge was justified in principle. In the following year the Secretaries of State for India and War (Lord Morley and Lord Haldane) agreed to a compromise whereby the rate was raised to £11 8s., the annual charge on India being thereby increased by about £300,000. During the War India met this liability as part of her normal military expenditure, and all extraordinary costs arising from the employment of Forces from India in the various theatres of War were met by the British Exchequer, in accordance with decisions of Parliament.

The great increases in rates of pay and cost of equipment led to the capitation rate being raised in 1920 to £28 10s. Since 1924 India has paid on account each year £1,400,000, compared with War Office claims, backed by elaborate details which amounted in 1926-28 to approximately £4,500,000 and would still exceed the provisional payments by about £300,000 annually. The Government of India has disputed the bill.

The Strength of the Army.

BRITISH TROOPS.

The following table gives the average strength of British troops, and the main facts as regards their health for the quinquennial periods 1910-14 and 1915-19 and for the years 1920 to 1929 :—

Period.	Average strength.	Admissions.	Deaths.	Invalids sent home.	Average constantly sick.
1910-14 average	69,440	39,389	303	488	2,094·57
1915-19	66,199	58,367	583	1,980	3,277·53
1920	57,332	61,429	385	2,314	3,488·08
1921	58,681	60,515	408	749	3,070·04
1922	60,166	37,836	284	714	1,902·32
1923	63,139	37,595	237	979	1,793·31
1924	58,614	38,569	246	879	1,857·95
1925	57,378	36,069	166	997	1,750·19
1926	56,798	36,893	171	910	1,758·60
1927	55,632	34,666	149	829	1,654·22
1928	56,327	33,034	166	556	1,635·99
1929	59,827	38,742	203	671	1,746·84

INDIAN TROOPS.

The average strength of Indian troops, including those on duty in China and Nepal and other stations outside India in 1928 was 131,190.

The following table gives below the actuals and ratios of sickness, deaths, and invaliding for the quinquennial periods 1910-14 and 1915-19 and for the years 1920 to 1929 :—

Period.	Average strength.	Admissions.	Deaths.	Invalids.	Average constantly sick.	Ratio per 1,000 of strength.			
						Admissions.	Deaths.	Invalids.	Average constantly sick.
1910-14 (average)	130,261	71,213	573	699	2,662	544·6	4·39	5·4	20·7
1915-19 (average)	204,298	161,028	3,435	4,829	7,792	788·2	16·81	23·6	38·1

THE EAST INDIES SQUADRON.

Since 1903 a squadron of the Royal Navy, known as the East Indies Squadron, has been maintained in Indian waters. It has naturally varied in strength from time to time. In 1903 the squadron consisted of one second class and three smaller cruisers and four sloops or gunboats. In 1906, it consisted of two second class and two third class cruisers, and remained at this strength until 1910: when one second class cruiser was withdrawn and two smaller vessels substituted, and three cruisers were lent from the Mediterranean to assist in the suppression of the arms traffic in the Gulf. By 1913 the position of the East Indies squadron had considerably improved. The battleship Swiftsure had taken the place of the second class cruiser which had been flagship, and another, second class cruiser replaced the Perseus.

The present composition of the East Indies Squadron (Fourth Cruiser Squadron) is as follows:—

"Hawkins" (Flag), Cruiser: 9,800 tons "Emerald," Cruiser, 7,550 tons; "Enterprise" 7,550 tons Sloops. "Lupin," Cruiser: 7,550. Sloops "Folkestone," "Fowey," "Shoreham" and "Bideford,"

India contributes £100,000 a year towards naval expenditure and approximately £3,000 a year on account of Indian Transport Service performed by the Admiralty, and also maintains the Royal Indian Marine as a Naval Service.

India's Marine Expenditure.

Since 1869 India has paid a contribution of varying amounts to the Imperial Government in consideration of services performed by the Royal Navy. Under existing arrangements which date from 1896-7 the subsidy of £100,000 a year is paid for the upkeep of certain ships of the East India Squadron, which may not be employed beyond prescribed limits, except with the consent of the Government of India. The expenditure amounts to nearly £400,000 annually.

The question of a new distribution of the burden of the cost of Imperial Naval defence was discussed at the Imperial Conference in London in October—November 1926. The matter appeared to be one on which the delegates could form no new decision without further consultations in their respective capitals and no resolution was passed.

The Royal Indian Marine has been reorganized so as to form the nucleus of the Indian Navy. It consists of a Depot Ship 4 Sloops, 2 Patrol vessels and a Survey vessel. A fifth sloop is under construction in England and will replace one of the Patrol vessels.

ROYAL INDIAN MARINE.

The Royal Indian Marine (The Sea Service under the Government of India) traces its origin so far back as 1612 when the East India Company stationed at Surat found that it was necessary to provide themselves with armed vessels to protect their commerce and settlements from the Dutch or Portuguese and from the pirates which infested the Indian coasts. The first two ships, the Dragon and Hoseander (or Osiander), were despatched from England in 1612 under a Captain Best, and since those days under slightly varying titles and of various strengths the Government in India have always maintained a sea service.

The periods and titles have been as follows:—

Hon. E. I. Co.'s Marine	..	1612—1686
Bombay "	..	1686—1830
Indian Navy "	..	1830—1863
Bombay Marine ..	..	1863—1877
H. M. Indian Marine ..	..	1877—1892
Royal Indian Marine ..		1892, Present day.

The Marine has always been most closely connected with Bombay, and in 1668 when the E. India Co. took over Bombay, Captain Young of the Marine was appointed Deputy Governor. From then until 1877 the Marine was under the Government of Bombay, and although from that date all the Marine Establishments were amalgamated into an Imperial Marine under the Government of India, Bombay has continued to be the headquarters and the official residence of the Director.

War Service of the Marine.

1612–1717 Continuous wars against Dutch, Portuguese and Pirates for supremacy of West Coast of India. 1744 War with France, capture of Chandernagore, and French ship Indienne. In 1756 Capture of Castle of Gheria. 1774 Mahratta War, capture of Tannah. Latter part of the eighteenth century, war with French and Dutch, Capture of Pondicherry, Trincomalee, Jafnapatam, Colombo, etc. 1801 Egyptian campaign under Sir Ralph Abercrombie. 1803 War with France. 1810 Taking of Mauritius and capture of French ship in Port Louis. Early part of the nineteenth century suppression of Jowasmi Pirates in the Persian Gulf. 1811 Conquest of Tara. 1813 Expedition against Sultan of Sambar. 1817-18 Mahratta War, capture of Forts at Severndroog. 1819 Expedition to exterminate piracy in the Persian Gulf. 1820 Capture of Mocha. 1821 Expedition against the Beni-koo-Ali Arabs. 1824-26 First Burma War. 1827 Blockade of Berbera and Somali Coast. 1835 Defeat of Beni Yas Pirater. 1838 Expedition to Afghanistan and capture of Karachi. 1838 Capture of Aden. 1840-42 War in China. 1843 Scinde War Battle of Meanee, capture of Hyderabad. 1845-46 Maori war in New Zealand. 1848-49 War in Punjab, siege of Mooltan. 1852 Second Burma War, Capture of Rangoon, Martaban, Bassein, Prome and Pegu. 1855 Persian

War, capture of Bushire, Muhammerah and Ahwaz. 1856–57 War in China. 1857–59 The Indian Mutiny. 1859 Capture of the Island of Beyt. 1860 China War, Canton, Taku Forts, Fatshan and Pekin. 1871 Abyssinian War. 1882 Egyptian Campaign. 1885 Egyptian Campaign. 1885 Third Burma War. 1889 Chin-Lshai Expedition. 1896 Suakin Expedition. 1897 Expedition to Imtirbe, Mombassa E. Africa. 1899–1902 S. . African War. 1900–01 Boxer Rebellion in China relief of Pekin, 1902-04 Somaliland Expedition, Suppression of Arms Traffic operations, Persian Gulf, 1912-14.

During the War 1914-1918 Royal Indian Marine Officers were employed on many and various duties. Royal Indian Marine Ships "DUFFERIN," "HARDINGE," "NORTHBROOK," "LAWRENCE," "DALHOUSIE" and "MINTO" had their guns mounted and served as Auxiliary Cruisers. Officers also served in the Royal Navy in the Grand Fleet, Mediterranean North Sea, North Red Sea and Caspian Sea Fleets.

In addition to transport duties in Indian Ports, Officers were sent to Marseilles, East Africa and Egypt for such duties, and on the entry of Turkey into the War were employed on duties towing and manning River Craft and Barges to and in Mesopotamia, and it was necessary to enlist a number of Temporary Officers, Warrant Officers and men to the numbers of approximately 240, 60 and 2,000 respectively for these and other duties.

When the War Office assumed full control of Operations in Mesopotamia a large number of Regular and Temporary Officers and men were seconded to the Royal Engineers and General Service respectively for duties in the Inland Water Transport which controlled all River Transport work in that country, and these officers held many important executive appointments in that unit.

The movements of all sea transports between India and the various theatres of War were controlled by Marine Officers.

Trawlers were built in the Bombay and Calcutta Dockyards and mine sweeping operations were carried out with these and launches off Bombay and elsewhere, the trawlers were also used for towing duties.

Retired Royal Indian Marine Officers were employed on naval transport duties in England and France, and also in very responsible positions with the Inland Water Transport in France.

Service in the War 1914-18.—The Royal Indian Marine, though a small Service compared with the Army and Navy, played a very active and conspicuous part in the European War. These are set out in detail in the Indian Year Book for 1922 and earlier editions (*q. v.* p. 202 *et seq.*).

Reorganisation Schemes.—After the War the Government of India asked Admiral of the Fleet Lord Jellicoe, who was visiting India, to draw up a scheme for the reorganisation of the Service. His valuable suggestions were unfortunately too ambitious for Indian finances and could not be accepted.

Shortly afterwards the Esher Committee arrived in India to report on the Indian Army and although the R.I.M. was not included in their terms of reference, they strongly recommended that the R. I. M. should be reorganised as a combatant service. The Government of India in 1920 obtained from the Admiralty the services of Rear-Admiral Mawby as Director, R.I.M., to draw up a scheme of reorganisation within limited lines. His scheme, however, was not adopted, and Admiral Mawby resigned his appointment.

The R.I.M. then fell upon hard times; money was scarce, the report of the Inchcape Committee necessitated drastic retrenchments, and the working of the Montagu-Chelmsford reforms resulted in the Local Governments having to defray the cost of the work of R. I. M. ships on their various stations, on lighthouse duties, transport work, carrying of officials, etc. The Local Governments were naturally inclined to think that if they had to pay they would like to have a say in the management, and that if the work could be done cheaper locally, they should arrange to carry out the duties themselves. Further, the Inchcape Committee recommended that the three large troopships should be scrapped and all trooping carried out under contract, which would have left the Marine with only the Survey Department and the Bombay Dockyard.

A Combatant Service.—Happily for the Service, however, the Government of India in 1925 appointed a Departmental Committee under the Chairmanship of General Lord Rawlinson, in his capacity of Minister of Defence and Member of Council in charge of the Marine Portfolio, to submit a scheme for the reorganisation of the Service as a combatant force. This Committee recommended that the Service should be reorganised as a purely combatant Naval Service with the title of Royal Indian Navy, with a strength in the first instance of 4 armed sloops, 2 patrol vessels, 4 mine-sweeping trawlers, 2 surveying ships and a depot ship, the Service in the first instance to be commanded by a Rear-Admiral on the active list in the Royal Navy. The scheme was accepted by the Indian and Home Governments, and the necessary Act to permit India to maintain a Navy was passed through both Houses of Parliament.

To effect the change in the title it was necessary to draw up a new Indian Naval Discipline Act, and this had to be passed in the Legislative Assembly and Council of State in India. The Bill was introduced in February 1928, when the Government were defeated by one vote, the defeat being caused, not by the fact that the people of India did not want an Indian Navy, but because in some cases members did not consider that the Legislature had been properly and fully consulted beforehand. Other members voted against the Bill on principle, as they considered that both Army and Navy should be directly controlled by the Legislature, while the extremists voted against it because they were prepared to vote against any Government Bill which might be introduced.

The blow to the Service was a heavy one, as it was feared that the defeat might put an

end to the reorganisation. The Government, however, decided that the reorganisation should continue on the original lines, except that the title could not be altered, and that the service would have to use the old Discipline Act, a perfectly correct "Articles of War" based on the Naval Discipline Acts.

In 1928, on the recommendation of the Admiralty, His Majesty the King approved of the change in uniform of officers to that of the Royal Navy, with the exception of the buttons of the R. I. M., which bear the Star of India as a distinctive mark, and also of the flying in R.I.M. ships of the White Pennant and the White Ensign of the Royal Navy. The White Ensign was hoisted for the first time on Armistice Day, November 11th, 1928.

The Indian Marine is now reorganised as one of the fighting forces of the Empire under the command of a Flag Officer on the active list of the Royal Navy. Its duties are purely naval and its personnel are trained for war.

Personnel, 1934.

1st Assistant to the Engineer Manager of the Dockyard ..	Engineer Commander W. Richardson, R.I.M.
2nd Assistant to the Engineer Manager of the Dockyard ..	Engineer Lieut.-Comdr. G. W. Underdown, R.I.M.
Marine Store Officer ..	Engineer Commander W. Richardson, R.I.M.
Financial Adviser to the Flag Officer Comdg. R.I.M. ..	C. Rajagopala Aiyar, Esq., M.B.E.
Chief Superintendent to the Flag Officer Comdg. R.I.M. ..	V. G. Rose, Esq.

MARINE TRANSPORT STAFF.

Divisional Marine Transport Officer, Bombay ..	Commander C. H. Boykett, R.I.M.
Asst. Marine Transport Officer, 1st Grade ..	Lieut.-Comdr. H. C. Beauchamp, R.I.M.
Marine Transport Officer, Karachi ..	Lieut-Comdr. R. R. Caws, R.I.M.

CIVILIAN GAZETTED OFFICERS.

Constructor	W. G. J. Francis, Esq.
Assistant Constructor	E. J. Underhay, Esq.
Electrical Engineer	N. T. Patterson, Esq.
Assistant Marine Store Officer ..	J. A. B. Hawes, Esq., (on leave).

OFFICERS.

Captains	9	Engineer-Lieutenant-Commanders, Engineer-Lieutenants and Engineer-Sub-Lieutenants	35
Commanders	15		
Lieutenant-Commanders, Lieutenants, and Sub-Lieutenants	44		
Engineer-Captain	1		
Engineer-Commanders	13		

WARRANT OFFICERS.

Gunners and Boatswains	18
Warrant Writers	4

PETTY OFFICERS AND MEN.

Who are mostly recruited from the Ratnagiri District of the Bombay Presidency and the Punjab.

SHIPS.

Sloop Minesweeping ..	H. M. I. S. Clive	..	2,050 tons	..	1,700 Horse Power.
Sloop	,, Cornwallis	..	1,290 ,,	..	2,500 ,,
Sloop Minesweeping ..	,, Hindustan	..	1,190 ,,	..	2,000 S. H. P.
Sloop Minesweeping ..	,, Lawrence	..	1,225 ,,	..	1,900 Horse Power.
Surveying Vessel ..	,, Investigator	..	1,172 ,,	..	1,[illegible]00 ,,
Depot Ship	,, Dalhousie	..	1,960 ,,	..	
Patrol Vessel ..	,, Pathan	..	695 ,,	..	3,500 S. H. P.
,, ...	,, Baluchi	..	682 ,,	..	3,500 ,,

In addition to the above there are 11 vessels composed of minesweeping and steam trawlers, service launches, target towing tugs, distributed at Bombay, Calcutta, and Karachi.

Dockyards.

There were two Royal Indian Marine Dockyards at Bombay and at Calcutta, the former being the more important. The one at Calcutta has been closed. There are 5 graving docks and a wet basin at Bombay, together with factories.

Medical Staff.

Marine Surgeon, Bombay, Major J. T. Simson, M.B., R.A.M.C.

Officer-in-Charge, Dockyard Dispensary, Captain J. B. D'Souza, M.B.E., I.M.D.

R. I. M. Warrant Officers.

Officer-in-charge, Dockyard Police Force, Gunner, P. O'Haran, R.I.M.

Boatswain of the Dockyard, Boatswain A. H. Lovett, M.B.E., R.I.M.

Appointments.

In addition to the regular appointments in the ships of the Royal Indian Marine, and in the R. I. M. Dockyard, the following appointments under the Government of India, Commerce Department, are held by the officers of the Royal Indian Marine :—

BOMBAY.

Principal Officer, Mercantile Marine Department, Bombay District, Nautical Surveyor, Mercantile Marine Department, Bombay District, Principal Engineer and Ship Surveyor, 2nd, 3rd and 4th Engineers and Ship Surveyors.

CALCUTTA.

Principal Officer, Mercantile Marine Department, Calcutta District; Nautical Surveyor, Mercantile Marine Department, Calcutta District; Principal Engineer and Ship Surveyor, 2nd, 3rd, 4th and 5th Engineers and Ship Surveyors.

MADRAS.

Principal Officer, Mercantile Marine Department, Madras District, and Engineer and Ship Surveyor.

BURMA.

Principal Officer, Mercantile Marine Department, Rangoon District, Nautical Surveyor, Mercantile Marine Department, Rangoon District, and Engineer and Ship Surveyor, Rangoon.

KARACHI.

Principal Officer, Mercantile Marine Department, Karachi District.

ADEN.

Principal Officer, Mercantile Marine Department, Aden District.

CHITTAGONG.

Nautical Surveyor and Engineer and Ship Surveyor.

PORT BLAIR.

Engineer and Harbour Master.

Agriculture.

As crops depend on the existence of plant, food and moisture in the soil, so the character of the agriculture of a country depends largely on its soil and climate. It is true that geographical situation, the character of the people and other considerations have their influence which is not inconsiderable, but the limitations imposed by the nature of the soil and above all by the climate tend to the established of a certain class of agriculture under a certain given set of conditions.

The climate of India, while varying to some extent in degree, in most respects is remarkably similar in character throughout the country. The main factors in common are the monsoon, the dry winter and early summer months, and the intense heat from March till October. These have the effect of dividing the year into two agricultural seasons, the *Kharif* or Monsoon and the *Rabi* or Winter Season each bearing its own distinctive crops. Between early June and October abundant rains fall over the greater part of the continent while the winter months are generally dry, although North-Western India benefits from showers in December and January. The south of the Peninsula, and especially the Madras Presidency, however, is more truly tropical especially in the south, and depends mainly on the N.-E. monsoon; here the two crop seasons can hardly be said to exist. The distribution of the rainfall throughout the year, which is of considerable importance to agriculture, is none too favourable, but is not quite so bad as is often represented. The rainfall is greatest at what would otherwise be the hottest time of the year, *viz.*, mid-summer, and when it is most needed. It should be remembered that in a hot country intermittent showers are practically valueless as evaporation is very rapid. Heavy rainfall concentrated in a limited period, though it has its drawbacks and demands a special system of agriculture, has many advantages in hot countries.

Soils.—Four main soil types can be recognised in India, *viz.*, (1) the Red soils derived from rocks of the Archæan system which characterise Madras, Mysore and the South-East of Bombay and extend through the East of Hyderabad and the Central Provinces to Orissa, Chota Nagpur and the South of Bengal. (2) The black cotton or *regur* soils which over-lie the Deccan trap and cover the greater part of Bombay, Berar and the Western parts of the Central Provinces and Hyderabad with extensions into Central India and Bundelkhand. The Madras *regur* soils though less typical are also important. (3) The great alluvial plains, agriculturally the most important tract in India as well as the most extensive, mainly the Indo-Gangetic Plain embracing Sind, northern Rajputana, most of the Punjab, the plains of the United Provinces, most of Bihar and Bengal and half of Assam. (4) The laterite soils which form a belt round the Peninsula and extend through East Bengal into Assam and Burmah.

The great alluvial plains are characterised by ease of cultivation and rapid response to irrigation and manuring; broadly speaking there are few soils in the world more suited to intensive agriculture so long as the water supply is assured. The other soils are less tractable and call for greater skill in management and are less adapted to small holdings; of these the *regur* soils are the most valuable.

Agricultural Capital and Equipment.—India is a country of small holdings and the commonest type is that which can be cultivated with one pair of bullocks under local conditions. Large holdings are practically unknown, and are mainly confined to the planting industries. Farming is carried on with a minimum of capital, there being practically no outlay on fencing buildings, or implements. Many causes militate against the accumulation of capital and agricultural indebtedness is heavy and the interest on loans high. Great progress has been made by the co-operative credit movement during the last twenty years. There are now 04,187 Co-operative Credit Societies in India with some 4,182,000 members and a working capital exceeding 90 crores of rupees. Not only have these societies brought cheaper credit to the cultivator but they have striven to inculcate the lesson that cheap credit is only valuable if applied to productive purposes and have encouraged thrift.

Equipment.—Practically all cultivation is done by bullocks and the capacity of these as draught animals varies from district to district as well as depending on the cultivator's individual circumstances. The best types in common use are capable of handling what would be considered as light single-horse implements in Europe. In those tracts where irrigation is from wells, bullocks are also used for drawing water; they also drive the sugarcane crusher and tread out the grain at harvest. His implements being few, a cultivator's bullocks form by far the most important item of his movable property.

Implements are made of wood although ploughs are usually tipped with iron points, and there is a great similarity in their shape and general design. The introduction of iron ploughs has made muchprogress in the last few years and many hundred thousands are now in use. The levelling beam is used throughout the greater part of the country in preference to the harrow and roller; and throughout Northern India the plough and the levelling beam are the only implements possessed by the ordinary cultivator.

On black cotton soils the commonest implement is the *bakhar*, a simple form of broad shape plough. Seed drills and drill hoes are in use in parts of Bombay and Madras but throughout the greater part of the country the seed is either broadcasted or ploughed in. Hand implements consist of various sizes of hoes, the best known of which are the *kodal* or spade with a blade set at an angle towards the labourer who does not use his feet in digging, and the *khurpi* or small hand hoe. Of harvesting machinery there is none; grain is separated either by treading out with oxen or beating out by hand, and winnowing by the agency of the wind. Simple reapers and winnowers are slowly coming into use in the wheat tracts. The larger iron ploughs are now a familiar sight in certain black soil areas and the use of other improved implements is growing,

Even motor tractor ploughs are now estimated to number hundreds and a few steam ploughing sets are at work reclaiming land from deep-rooted grasses.

Cultivation.—Cultivation at its best is distinctly good but in the greater part of the country there is plenty of room for improvement. As in any other country success in agriculture varies greatly with the character of the people, depending largely as it does on thrift and industry. In most places considering the large population cultivation is none too good. Agriculture suffers through lack of organization and equipment. Two economic factors tend to keep down the standard of cultivation. Holdings are not only small but fragmented and the Indian laws of inheritance both perpetuate and intensify this evil. Very definite attempts are now being made in several provinces and states to amend matters and consolidate holdings but the process is necessarily slow. Secondly, cultivators rarely live on or near to their holdings but congregate in villages. The need for mutual protection is less than formerly and though tradition dies hard sub-villages are now springing up in many places. For *Rabi* crops which demand a fine seed-bed preparatory tillage consists mainly of repeated treatments with the indigenous plough (or on black soils the *Bakhar*) which serves the purpose of plough, harrow and cultivator, combined with applications of the levelling beam. Crude as these implements are, they produce in Northern India a surface mulch and moist sub-soil which is the aim of all dry-farming operations. For *Kharif* crops the preparation is much less thorough as it is essential to sow without delay. Interculture is usually inadequate. Manure is generally applied to more valuable crops like sugarcane, cotton, tobacco, etc. Seeding is either done broadcast or by drilling behind a wooden plough or drill. Thinning and spacing are not nearly so well done as they might be, and intercultivation is generally too superficial. Harvesting is done by sickle where the crops are cut whole, and there is little waste involved. At their best the ryot's methods are not ineffective but being uneconomical of both cattle and man-power, they are seldom carried out fully. The use of simple improved implements and of machines which lessen the strain on the bullocks, which the agricultural department is steadily fostering, is an important factor in raising the general standard of agriculture.

Irrigation.—The concentration of the principal rainfall in less than a third of the year, which is not the sowing period of the *rabi* crops, places a very definite limit of the yield which can be obtained from the principal cereal crops. Some other crops, *e.g.*, Sugarcane, can hardly be grown indeed without supplementary watering. With adequate irrigation the yield from the principal grain crops in Northern India is doubled even in areas where the monsoon is generous, whilst in the great canal colonies barren desert has become fertile land. The Indian canal system is by far the largest in the world and already irrigates 32 million acres of crops annually. The area will be increased shortly to 40 million acres when works under construction are completed and, when the various new canals are developed fully, will probably reach 50 million acres. The protective effect of the canals in many areas is no less important than the enhanced yield. Protective irrigation works have made agriculture stable instead of precarious in many districts. The Indian canals are of two types—perennial and inundation—and the trend of irrigation practice is to replace the latter by the former wherever possible. The great perennial canals in the North of India draw their supply from snow-fed rivers; the inundation canals run only when the rivers rise with the melting of the snow in April-May and must close when supplies fall at the end of the monsoon. Other canals depend for their supply during the dry part of the year on water stored behind great dams thrown across suitable gorges and are in consequence less dependable than the larger snow-fed systems. Water rates are levied on the area of irrigated crops matured so that Government bears part of the risk of failure of crops. Different rates are charged for different crops and vary somewhat in different parts of India; rates are also lower when the water has to be lifted than when flow irrigation is given.

At the present time the Bombay Presidency possesses the most spectacular irrigation schemes in India—if not in the world. The Lloyd Dam at Bhatgar, 190 feet high, has the greatest cubical contents of any masonry wall in the world; the Wilson Dam at Bhandardara, impounding 272 feet of water, is far and away the highest dam in India, whilst the Sukkur Barrage in Sind across the Indus irrigates a desert whose area far exceeds that of any other scheme conceived by engineers.

Irrigation from Wells.—About one quarter of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet. Their numbers have greatly increased in recent years largely through Government advances for their construction. The recurring cost of this form of irrigation has, however, greatly increased owing to the high price of draught cattle and the increasing cost of their maintenance.

All Agricultural departments are now giving increased attention to the better utilisation of underground water supplies, existing wells being improved by boring and tube wells of large capacity installed and equipped with pumping machinery.

Tank irrigation is common in Central and Southern India. Large quantities of rain water are stored in lakes (or tanks) and distributed during the drier seasons of the year. Often the indirect effect of the tank in maintaining the sub-soil water level is as important as the direct irrigation.

Manures.—Although the number of cattle maintained in India is very high and indeed excessive, there is everywhere a shortage of farmyard manure. This is partly due to the small use of bedding, for which straw can ill be spared, and to the keeping of cattle in the open but mainly to the use of dung as the principal source of village fuel. Hence the supply of organic matter to Indian soils is deficient. Unfortunately the Indian cultivator does not possess

the skill of the Chinaman in the making of composts and much valuable manurial material is wasted in every Indian village and to the detriment of sanitation. Green-manure crops are spreading slowly and the use of oil-cakes, especially castor-cake, for the more valuable crops like sugarcane and tobacco is increasing.

The general trend of the results of experiments carried on by the various agricultural departments is to show that a better supply of organic manures is everywhere important, nitrogen is the most common limiting factor for India as a whole, phosphatic manures are definitely advantageous in certain more limited tracts. Manuring for higher production is gradually spreading as the result of village demonstrations; at present prices of certain artificial fertilisers, notably ammonium sulphate and the newer types of soluble phosphatic manure are definitely profitable not only for tobacco, sugarcane and market garden crops buttfor some staple crops but generaly speaking the fall in the pricer of agricultuie produce has arrested progress in the use of purchased fertilisers.

Rice.—A reference to the crop statistics shows that rice is the most extensively grown crop in India, although it preponderates in the wetter parts of the country, *viz.*, in Bengal, Bihar and Orissa, Burma and Madras. The crop requires for its proper maturing a moist climate with well assured rainfall. The cultivated varieties are numerous, differing greatly in quality and in suitability for various conditions of soil and climate, and the people possess an intimate acquaintance with those grown in their own localities. The better qualities are sown in seed beds and transplanted in the monsoon. Broadcasted rice is grown generally in lowlying areas and is sown before the monsoon as it must make a good start before the floods arrive. Deep water rices grow quickly and to a great height and are generally able to keep pace with the rise in water level.

For transplanted rice the soil is generally prepared after the arrival of the monsoon and is worked in a puddle before the seedlings are transplanted. The land is laid out into small areas with raised partitions to regulate the distribution of the water supply. The seedlings are planted in small bunches containing from 4 to 6 plants each and are simply dibbled into the mud at distances of 6 to 12 inches apart. Either by bunding to retain rainfall or by artificial irrigation, the details varying with locality, the rice fields are kept more or less under water until the crop shows signs of ripening. The area under improved varieties of rice distributed by the agricultural departments now exceeds 2,270,000 acres.

Wheat.—Wheat is grown widely throughout Northern India as a winter crop, the United Provinces and the Punjab supplying about two-thirds of the total area, and probably three-quarters of the total outturn in India. The majority of the varieties grown belong to the species *Triticum vulgare*. Indian wheats are generally white, red and amber coloured and are mostly classed as soft from a commercial point of view. As seen in local markets Indian wheats frequently contain appreciable quantities of other grains and even of extraneous matter due to the method of threshing employed. Wheat for export is well-cleaned and there has been great improvement in this respect of recent years. Most of the Indian wheats are soft weak wheats but there are some well known Maccaroni wheats amongst them. The largest wheat acreage of recent years is but the largest that of 1933-34 provisionally estimated at 34½ million acres. but it is not known if the yield will reach the record harvest of 1930 (which exceeded 10¼ million tons) recent crops have averaged 9¼ million tons per annum which is only slightly, if any thing, above internal requirements. Exports of wheat amounted to 197,000 tons in 1930-31 but have since been nominal Indian wheat having been quoted well above world parity. With the development of irrigation from the Lloyd Barrage Canal in Sind and in the newer Punjab Canal Colonies a further increase in wheat production is practically certain and an export market will again be of importance. The crop is generally grown after a summer fallow and, except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. Rains in January and February are generally beneficial but an excess of rainfall in these months usually produces rust with a diminution of the yield. On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in March and April and the threshing and winnowing go on up till the end of May. The total area under improved varieties of wheat is now reported to approximate to 5 millions of acres.

The Millets.—These constitute one of the most important group of crops in the country, supplying food for the poorer classes and fodder for the cattle. The varieties vary greatly in quality, height and suitability to various climatic and soil conditions. Perhaps the two best known varieties are Jowar (*Sorghum vulgare*) the *great* millet, and Bajra the Bulrush millet (*Pennisetum typhoideum*). Generally speaking the jowars require better land than the bajras and the distribution of the two crops follows the quality of the soil. Neither for jowar nor bajra is manure usually applied though Jowar responds handsomely to high manuring and cultivation is not so thorough as for wheat. The crop is generally sown in the beginning of the monsoon and so it requires to be thoroughly weeded. It is often grown mixed with the summer pulses especially *Arhar*. (*Cajanus indicus*—pigeon pea) and other crops. The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards. In some provinces *rabi* juar is also an important crop. The produce is consumed in the country.

Pulses.—Pulses are commonly grown throughout India in great variety and form at once the backbone of the agriculture, since even the present moderate degree of soil fertility could not be maintained without leguminous rotations, and a primary necessity in the food of a vegetarian population. The yields on the

whole are fairly good, mixed cropping is common. The principal pulses are *Arhar* (*Cajanus indicus*), gram (*Cicer arietinum*), various species of *Phaseolus* and *Pisum*. Reference should be made to Groundnuts which though of modern introduction now forms an important leguminous oil-seed crop in Madras and Bombay, and to a less extent in other provinces and an important article of export.

Exports groundnuts in 1933 amounted to 587,000 tons nearly treble prewar average. The total crop for season 1932-33, was estimated at 3,007,000 tons. That of the current year is forecasted as 3,235,000 tons.

Cotton.—Is one of the most important commercial crops in India and despite the sharp fall both in quantity and values due to the trade depression raw cotton was second the in list of exports for 1932-33. Normally the cotton crop covers some 28 million acres with a yield of some 5½ to 6 million bales. Recently as a result of low prices the area has contracted to 23¼ million acres in 1933-34 estimated to produce 4,633,000 in the fourth special forecast but the ginning returns to date indicate a crop 5½ million bales. Indian mills now consume annually about 2,300,000 bales of Indian cotton and at present some 300,000 bales per annum of imported cotton (Egyptian, Sudan and African) of a staple longer than is produced in India. The principal export is of short staple cotton of ⅞" staple but there is also in normal years an export of Indian medium ⅞" to 1 1/16" staple cottons such as Punjab/American and Karunganni. The area under improved varieties of cotton is now estimated to be approximately million acres. There is no Indian cotton belt; Bombay, the Central Provinces, Hyderabad, Baroda, Madras, the Punjab and the United Provinces all have important cotton tracts producing distinct types. Sowing and harvesting seasons are equally diverse, the former extending from May to December in different parts of the country and the latter from October to May and June. Yields vary greatly in the best irrigated tracts the normal yield is about 200 lbs. of ginned cotton per acre and yields much above these have been recorded whilst in the poorest unirrigated tracts 60 lbs. per acre is a good crop. Of recent years, as the result of the work of the Agricultural Departments and the Indian Central Cotton Committee, the quality and yield of the staple cottons has improved and also the yield and cleanliness of the short-staple tracts.

The Cotton Transport Act, the Cotton Ginning and Pressing Factories Act the Bombay Cotton Markets Act the C. P. Cotton Markets Act and the Madras (commercial crops) Market Act have all been passed at the instance of the Committee and are doing much to check the abuse of adulteration and promote better marketing. Agricultural Departments have continued their campaign of cotton improvement and, apart from improvements in methods of cultivation.

Exports.—The exports of raw cotton from India by sea to foreign countries for the last 5 fiscal years (ending March 31st) were as follows in thousands of bales of 400 lbs. each):—

Countries	1928-29.	1929-30.	1930-31.	1931-32.	1932-33.
United Kingdom	241	270	281	166	167
Other parts of the British Empire.	7	7	6	6	7
Japan ..	1,610	1,640	1,686	1,080	1,035
Italy ..	384	393	362	183	150
France ..	204	53	232	81	124
China (exclusive of Hong-Kong, etc.)	404	556	606	436	134
Belgium ..	347	341	217	121	123
Spain ..	76	80	106	45	52
Germany..	324	344	309	166	152
Other countries	115	176	121	85	64

Total exports from the six principal port (Bombay, Karachi, Madras, Tuticorin, Calcutta and Rangoon) for the cotton season ending August 31st, 1932, totalled 1,606,739 bales as compared to 3,728,265 bales in 1931 and 3,959,849 bales in 1930.

Sugarcane.—India, until recentlya large importer of sugar, is one of the most important sugarcane growing countries in the world, the area under the crop being above 3 million acres. The crop is mostly grown in the submontane tracts of Northern India. The indigenous hard, thin, low-sucrose canes have now largely been replaced by seedling canes of high quality mainly the productions of the Imperial Sugarcane Breeding Station, Coimbatore. The latest actual returns show an area under improved varieities of cane of 1,064,000 acres in 1930-31 of which 6,78,000 acres was in the United Provinces. It is now believed that in Northern India about half the cane area is occupied with these seedlings and the effect of this advance is clear from the fact that though the area under sugarcane for 1932-33 is a record it only exceeds the 5 year average by 21 per cent.(3,305,000 acres) but the yield (4,651,000 tons expressed as *gur*) is an increase of 55 per cent. With the grant of protection by the passing of the Sugar Industry Protection Act 1932 a definite incentive to the increase in sugar production by modern methods has been given and it is estimated that modern factories will produce some 676,000 tons in 1933-34 There has also been a considerable revival of the indigenous *khandsari* open pan process of sugar making. Imports of sugar from foreign countries for 1933-34 are estimated at some 300,000 tons as compared to 901,000 in 1930-31 the fall is partly due to lower purchasing power resulting from the fall in price of agricultural commodities, partly to the abundant supply of cheap *gur* and partly to increased Indian production of sugar. Sugar production has been stimulated in recent years by the protection given to sugar manufacture.

Oilseeds.—The crops classified under the heading are chiefly sesamum, linseed and the cruciferous oilseeds (rape, mustard, etc.) Although oilseeds are subject to great fluctuation in price and the crops themselves are more or less precarious by nature—they cover an immense area.

Linseed requires a deep and moist soil and is thus grown chiefly in Bengal, Bihar, the United Provinces and the Central Provinces. The crop is grown for seed and not for fibre and the common varieties are of a much shorter habit of growth than those of Europe. The yield varies greatly from practically nothing up to 500 or 600 lbs. of seed per acre. In 1932-33 this crop occupied 3,239,000 acres and yielded 403,000 tons. As recently as 1925-26 production was estimated at 501,000 tons and prior to 1914 the linseed area had reached 5 million acres with a yield of 630,000 tons. Indian linseed is of high quality and commands a premium in European markets.

Exports during 1933-34 have again reached the pre-war average being approximately 390,000 tons of which the United Kingdom took the largest share. This is largely the result of the 'Ottawa' Preferene. Prices have improved and Indian linseed having re-established its dominant position in the English market an increase in production is expected.

Sesamum or (Gingelly) is grown mostly in Peninsular India as an autumn or winter crop. About 10 per cent. of the production is exported and the rest consumed locally.

The Cruciferous Oilseeds form an important group of crops in Northern India where they grow freely and attain a fair state of development. The area under rate and Mustard, including an estimated figure for the are a grown mixed with other is about 6½ to 7 million acres annually production in 1932-33, was estimated at 1,025,000 tons of which 115,000 tons were exported a marked improvement in the previous year though still below the average. Several species are grown and there are numerous local varieties. A large portion of the crop is crushed locally for domestic consumption.

Jute.—Two varieties of the plant are cultivated as a crop, Capsularis and Olitorius. Jute growing is confined almost entirely to Bengal, Assam, Bihar and Orissa. The crop requires a rich moist soil. Owing to river inundation this part of India receives a considerable alluvial deposit every year and the land is thus able to sustain this exhausting crop without manure. The crop is rather delicate when young, but once established requires no attention, and grows to a great height (10 to 11 feet). Before ripening the crop is cut and retted in water. After about three weeks submersion the fibre is removed by washing and beating. The area under Jute in 1932 was estimated at 2,143,000 acres as compared to 1,862,000 in the previous year; the production was estimated at 7,097,000 bales as compared to 5,567,000 bales in 1931.

Exports in 1933-34 have shown a distinct recovery on both 1931-32 and 1932-33 but care is still necessary to avoid over-production. In 1930 the area under jute was estimated at 3,492,000 acres and the yield at 11,205,000 bales.

Tobacco is grown here and there all over the country chiefly, however, in Bengal, Bihar, Bombay, Madras and Burma. Of two varieties cultivated *Nicotiana Tabacum* is by far the most common. Maximum crops are obtained on deep and moist alluvium soils and a high standard of cultivation including liberal manuring is necessary. The crop is only suited to small holdings where labour is plentiful as the attention necessary for its proper cultivation is very great. The seed is germinated in seed beds and the young plants are transplanted when a few inches high, great care being taken to shield them from the sun. The crop is very carefully weeded and hoed. It is topped after attaining a height of, say, 2 ft., and all suckers are removed. The crop ripens from February onwards and is cut just before the leaves become brittle. The greater part of the tobacco grown in India is intended for *Hookah* smoking and is coarse and heavy in flavour. Lighter kinds are also produced for cigar and cigarette manufacture of recent years there has been important development in the production, in commercial quantities, of better quality cigarette tobacco both in Madras and in Bihar. India exports about 29 million lbs. of unmanufactured tobacco annually of which about 35 per cent. goes to the United Kingdom. This trade though a small proportion of Indian production (which is estimated at 600,000 tons per annum from an area of 1.3 million acres) it is worth a crore of rupees annually even at present prices.

Livestock.—The livestock population of British India consists mainly of about 23 million cattle, 31 million buffaloes, 25 million sheep, 35 million goats and 3 million horses, mules and donkeys, and in the 51 Indian States for which figures are available, there are 118 million cattle and buffaloes, 28 million sheep and goats, 1 million horses, mules and donkeys and half a million camels. For draught purposes cattle are mainly used everywhere though male buffalo are important as draught animals in the rice tracts and damper parts of the country. Horses and mules are practically never used for agricultural purposes, For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk. The best known breeds are the Murra buffaloes of the Punjab, the Jafferabadi buffaloes of Kathiawar, and the Surti buffaloes of the Bombay Presidency. The cattle and buffalo population in India is abnormally high amounting to over 60 per cent. of the human population. The spread of cultivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle are small, ill-fed and inefficient. Nevertheless the best Indian breeds have many merits. Of the draught types the best known breeds are the Hissar, Nellore, Amrit Mahal, Gujerat (Kankrej), Kangayam, Kherigarh and Malvi; the Sahiwal (Punjab), Gir (Kathiawar), Scindi and Hansi are amongst the best milking breeds On the Government cattle-breeding farms pedigree herds are being built up and from these selected bulls are issued, preference being given to special breeding areas, to villages which undertake to exclude 'scrub' bulls and where serious efforts to maintain a good strain of cow are made. Once established such breeding areas rapidly produce a supply of superior bulls for general distribution and in this way the valuable bulls from Government herds are used to advantage. The premium bull system is also working well in some tracts

Cattle improvement is a slow process at the best and though a start on sound lines has been made in all provinces, continued efforts and persistent endeavour is essential. There is no branch of agricultural improvement where the landowners of India could render greater service.

Dairying.—Though little noticed hitherto dairying forms a very important indigenous industry throughout India. The annual cash value of dairy products has recently been estimated at over 800 crores of rupees and the importance of milk and dairy products to the health and development of the people cannot be over-estimated. Apart from liquid milk the best known products are native butter (ghee) and cheese (dahi During recent years a considerable trade in tinned butter has sprung up and there seems to be no reason why an important industry should not be built up in other dairy products, such as milk-powder, condensed milk and casein. Pure ghee and milk can usually be procured in the villages but in towns dairy products can scarcely be bought unadulterated.

Government of India maintain an Institute of Animal Husbandry and Dairying at Bangalore where students are given 2 year courses for the Indian Dairy Diploma but little provision has hitherto been made for the extensive industrial research into the handling and processing of milk and dairy products under Indian conditions, which is essential for the development of dairying as a village industry. This matter is now receiving the attention of the Imperial Council of Agricultural Research.

Reference is made, use where to the principal grants made by the Council for the promotion of Veterinary Science and improvement of animal husbandry.

It is sufficient here to say that there is a growing recognition of the fact that as India's economic development proceeds a better balance between crop production and animal industry is needed and that the raising of crops for the feeding of Dairy stock, instead of for sale as such, will be of increasing importance.

AGRICULTURAL PROGRESS.

Agricultural Progress.—The historical aspect of agricultural development in India has recently been fully dealt with in the report of the Linlithgow Commission. The Famine Commission as long ago as 1866 made the first proposal for a separate Department of Agriculture but little resulted except the collection of agricultural statistics and other data with the object of throwing light on famine problems. The Famine Commission of 1880 by their masterly review of the possibilities of agricultural development revived interest in the matter and their proposal for a new Department for Agriculture and allied subjects in the Government of India and for provincial departments of agriculture bore fruit eventually. Dr. J. A. Voelker, Consulting Chemist to the Royal Agricultural Society, was invited to visit India and his book "Improvement of Indian Agriculture" is still a valuable reference book. In 1892 an agricultural chemist to the Government of India was appointed. Provincial Departments mainly concerned themselves at first with agricultural statistics but experimental farms were opened at Saidapet in 1871, Poona in 1880, Cawnpore in 1881 and Nagpur in 1883; there were various sporadic attempts at agricultural improvement but no real beginning was made until technical agricultural officers were appointed. Of these the earliest were Mollison in Bombay (subsequently Inspector General of Agriculture), Barber and Benson in Madras, Hayman in the United Provinces and Milligan in the Punjab. In 1901, the first Inspector General of Agriculture was appointed and in the same year an Imperial Mycologist was added followed by an Imperial Entomologist in 1903. The present departments of agriculture, however, owe their existence to the foresight and energy of Lord Curzon whose famous despatch of 1903 marked the commencement of the reorganisation which took place in 1905. That scheme provided for a central research institute at Pusa completely staffed provincial departments of agriculture with agricultural colleges and provincial research institutes and an experimental farm in each important agricultural tract. To the establishment of the Imperial Agricultural Research Institute at Pusa. Lord Curzon devoted the greater part of a generous donation of £30,000 given by Mr. Henry Phipps of Chicago to be applied to some object of public utility preferably connected with scientific research. The Indian Agricultural Service was constituted in 1906. Since that date progress has been steady and continuous. With the advent of the reforms of 1919, agriculture became a provincial transferred subject but the Government of India retained responsibility for central research institutions and for certain matters connected with the diseases and pests of plants and animals. The addition of the Imperial Institute of Animal Husbandry and Dairying (with a branch farm at Wellington), the Imperial Cattlebreeding Farm at Karnal and the Anand Creamery enabled livestock work to be carried out on a scale not possible at Pusa. The Imperial Sugarcane-breeding station at Coimbatore is yet another branch of the Imperial Agricultural Research Institute. Provincial Governments have steadily developed and strengthened their agricultural departments. The total nett expenditure of provincial agricultural departments now exceeds 105 lakhs rupees annually; the nett annual expenditure on the Imperial Department of Agriculture is in the neighbourhood of 11 lakhs.

Parallel developments took place in the provision made for matters connected with animal health. The now world-famous Imperial Institute of Veterinary Research at Muktesar started in 1893 as a modest hill laboratory for research on rinderpest. It is now a fully equipped research Institute which also manufactures protective sera and vaccines of which some 6 million doses are issued annually. The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector General. The departments were completely provincialised in 1919, the Government of India continuing to finance and control the Muktesar Research Institute and its branch station at Izatnagar (Bareilly).

Recent Progress.—As now constituted, the Agricultural Departments include a complete organisation for bringing the results of the application of science to agriculture into the village. At one end of the scale are the agricultural colleges and research institutes—at the other thousands of village demonstration plots where the issue of improved seed, methods, implements and manures is shown under the cultivators' own conditions. Intermediate links in the chain are the experimental farms, where scientific research is translated into field practice, demonstration and seed farms and seed stores. The ascertained results of the work of the agricultural department are striking enough. More than 13 million acres are known to be under improved crops—the further area due to natural spread is indeterminable. Improved methods of cultivation and manuring are steadily spreading, work is in progress on most of the major crops and each year brings new triumphs. The present position has been authoritative reviewed by the Royal Commission on Agriculture which reported in 1928. Recognising how much has already been done in the 20 years since the agricultural departments were created, the Commission also emphasised the enormous field for future work to which all witnesses had drawn their attention. The agricultural departments having shown that the application of science to Indian agriculture is a practical proposition and further that the individual cultivator can be reached and his methods improved, the problem is now to develop and intensify such work so that a general advance in agricultural practice will result. At no time has there been a greater need for co-ordinated effort directed towards the solution of agricultural problems. Only by increased efficiency can in India meet the situation caused by low prices for all agricultural commodities and the intense competition in world markets arising from production in excess of effective demand.

The Government of India has recently provided the Imperial Council of Agriculture Research with Funds for the formation of an Agricultural Marketing Branch and for the appointment of an Expert-Adviser in Marketing who will advise and collaborate with the Provincial officers which are being appointed in several provinces.

THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH.

In Chapter III of their Report, the Royal Commission on Agriculture stated that the most important problem with which they had been confronted was that of devising some method of infusing a different spirit into the whole organisation of agricultural research in India and of bringing about the realisation on the part of research workers in this country that they are working to an end which cannot be reached unless they regard themselves as partners in a common enterprise. They had found not only a lack of sufficiently close touch between the Pusa Research Institute and the provincial agricultural departments but also between the provincial departments themselves. After describing the way in which similar difficulties had been overcome in Canada, the United States and Australia and dismissing as inadequate the constitution of crop committees on the model of the Indian Central Cotton Committee or the constitution of a quasi-independent governing body for Pusa on which the provincial agricultural departments and non-official interests would be represented, the Commission proposed the establishment of an **Imperial Council of Agricultural Research.**

The primary function of the Council would be to promote, guide and co-ordinate agricultural, including veterinary, research in India and to link it with agricultural research in other parts of the British Empire and in foreign countries. It would make arrangements for the training of research workers, would act as a clearing house of information in regard not only to research but also to agricultural and veterinary matters generally and would take over the publication work at present carried out by the Imperial Agricultural Department. The Commission proposed that the Council should be entrusted with the administration of a non-lapsing fund of Rs. 50 lakhs to which additions should be made from time to time as financial conditions permit. Its Chairman should be an experienced administrator with a knowledge, if possible, of Indian conditions and, in addition, there should be two other whole-time members of the Council for agriculture and animal husbandry respectively. The Commission suggested that the Council should consist of thirty-six members, in addition to the Chairman and the two whole-time members. Of these, eight would be nominated by the Government of India, eighteen would represent the provincial, agricultural and veterinary departments, three would represent the Indian Universities, two would represent the Indian Central Cotton Committee and the planting community respectively and five would be nominated by the Council for the approval of the Government of India. The Council would largely work through a Standing Finance Committee and sub-committees. A provincial committee should be established in each major province to work in close co-operation with it. The advisory duties of the Agricultural Adviser to the Government of India would be taken over by the Chairman and whole-time members of the Research Council, his administrative duties being taken over by a whole-time Director of the Pusa Institute.

Constitution of the Council.—In a Resolution issued on May 23rd, 1929, the Government of India stated that whilst they were of opinion that the proposals of the Royal Commission were, on the whole, admirably designed to secure the objects for the attainment of which the establishment of the organisation outlined above was recommended, they considered a Council of thirty-nine members would be too large to be really effective and that it was not desirable that the Legislative Assembly should be deprived of its normal constitutional control over an activity which affects the staple industry of India. They had, therefore decided that the central organisation should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the Council subject to the limitation in regard to the control of funds which is mentioned below and an Advisory Board the functions of which would be to examine all proposals in connection with the scientific objects of the Council which might be submitted to the Governing Body, to report on their feasibility and to advise on any other questions referred to it by the Governing Body. The Governing Body would consist of the Member of the Governor-General's Council in charge of the portfolio of Agriculture, who would be *ex-officio* Chairman, the Principal Administrative Officer of the Council, who would be *ex-officio* Vice-Chairman, one representative of the Council of State, two representatives of the Legislative Assembly, one representative of the European business community elected by the Associated Chambers of Commerce of India and Ceylon, one representative of the Indian business community elected by the Federation of Indian Chambers of Commerce and Industry, the Provincial Ministers of Agriculture, two representatives elected by the Advisory Board and such other persons as the Governor-General in Council might from time to time appoint.

The Advisory Board would consist of all those whose inclusion in the Council was recommended by the Royal Commission with the exception of the representatives of the Central Legislature and the representatives of the European and Indian commercial communities, who, under the modified scheme, would be members of the Governing Body. In view of their exclusion from the Advisory Board, the university representation would be increased from three to four and the scientific representation by the addition of the Director of the Indian Institute of Science, Bangalore, a representative of the Forest Research Institute, Dehra Dun, and a representative elected by the Indian Research Fund Association. A representative of the Co-operative Movement would also be added. The Principal Administrative Officer to the Council would be *ex-officio* Chairman of the Advisory Board.

The Government of India further announced that for the lump grant of Rs. 50 lakhs recommended by the Royal Commission, they had decided to substitute an initial lump grant of Rs. 25 lakhs, of which Rs. 15 lakhs would be paid in 1925-30, supplemented by a fixed minimum grant annually. The annual grant would be Rs. 7·25 lakhs, of which Rs. 5 lakhs would be devoted to the furtherance of the scientific objects of the Council and the remaining Rs. 2·25 lakhs to the cost of its staff and secretariat. The Council would have an entirely free hand in regard to the expenditure of the grants made to it for scientific purposes subject to the condition that no liability in respect of such matters as leave or pension contributions after the research for which the grant had been given would be incurred. In regard to the grant to meet the cost of staff, establishment, etc., the Council would be in the same position as a Department of the Government of India Secretariat.

The Council has since been constituted a separate Department of the Government of India for the purpose of administering this grant.

The Government of India also stated their decision that the Council should not be constituted under an Act of the Imperial Legislature as recommended by the Royal Commission but should be registered under the Registration of Societies Act, XXI of 1860. In pursuance of this decision, a meeting of those who would constitute the Society was held at Simla in June, 1929, to consider the terms of a memorandum of association and the Rules and Regulations. At that meeting, it was announced that His Exalted Highness the Nizam's Government had offered a donation of Rs. 2 lakhs to the funds of the Council. This offer was gratefully accepted and the Revenue Member of the Nizam's Government has been added to the Governing Body, the Directors of Agriculture and of Veterinary Services becoming members of the Advisory Board. Since then donations of one lakh each, payable in 20 equal annual instalments, have been made by the Mysore, Baroda and Cochin States and each nominates one representative to the Governing Body of the Council and two technical members to the Advisory Board. The Bhopal State has also been admitted as a constituent member of the Council on payment of a donation of Rs. 50,000 in 20 equal annual instalments and has been allowed the same representation on the Council as has been granted to the States of Hyderabad, Mysore, Baroda and Cochin. The North West Frontier Province having been constituted a Governor's province is now represented on the Governing Body by the Minister in charge of Agriculture and on the Advisory Board by the Agricultural Officer and the Superintendent, Civil Veterinary Department.

Personnel.—In addition to the 17 *ex-officio* members the Governing Body includes the following gentlemen:—

The Hon'ble Diwan Bahadur G. Narayanaswamy Chetty, elected by the Council of State; Lal Hari Raj Swaroop, M.L.A. and Maulvi Mohd. Shafi Daoodi, M.L.A., elected by the Legislative Assembly; Sir Joseph Kay and Mr. Walchand Hirachand representing the business community; Messrs. Carpenter and Kerr, elected by the Advisory Board, and the Hon'ble Sir Frank Noyce, additional member appointed by the Governor-General in Council. The Chairman of the Council is the Hon'ble Member of the Council of His Excellency the Governor-General for the time being in charge of the portfolio of Agriculture.

The whole-time officers of the Council are:—The Vice-Chairman—Diwan Bahadur Sir T. Vijayaraghavacharya, K.B.E. The Expert

Advisers: Mr. B. C. Burt, C.I.E., M.B.E., I.A.S.; Colonel A. Olver, C.B., C.M.G., F.R.C.V.S.; and the Secretary—Rai Sahib Malik Charan Das, I.S.S.

The Advisory Board consists of the Vice-Chairman, the Expert Advisers, the Heads of the Agricultural Departments in the Provinces, the Heads of the Agricultural and/or Veterinary Departments in the contributing States, the Chief Agricultural Officer, Sind, the Directors, Imperial Institute of Agricultural Research, Pusa, Imperial Institute of Veterinary Research, Muktesar, and Indian Institute of Science, Bangalore, the Director of Veterinary Services in India, and the Chief Publicity Officer, Indian States Railways as *ex-officio* members together with the following nominated or elected members:—

Representatives of the Provincial Veterinary Departments.—Mr. P. T. Saunders, nominated by the Government of Madras; Mr. E. S. Farbrother, nominated by the Government of Bombay; Mr. P. J. Kerr, nominated by the Government of Bengal; Khan Bahadur Sheikh Niaz Muhammad Khan, nominated by the Government of the U.P.; Mr. T. F. Quirke, nominated by the Government of the Punjab; Mr. D. T. Mitchell, nominated by the Government of Burma; Major P. B. Riley, nominated by the Government of B. & O.; Major R. F. Stirling, nominated by the Government of C.P.:—Mr. Guru Prasanna Sen, nominated by the Government of Assam; Mr. S. I. A. Shah, nominated by the Government of N.W.P.F.

Representatives of the Inter-University Board.—Dr. J. C. Ghosh, Head of the Department of Chemistry, Dacca University; Dr. T. Ekambaram, Professor, Presidency College, Madras.; Mr. C. T. Mudaliyar, Retired Principal, Agricultural College, Coimbatore. Dr. L. K. Hyder, Member, Public Service Commission; (India).

Representative of the Indian Tea Association and of the Southern India Planters' Association.—Mr. P. H. Carpenter.

Representative of the Indian Central Cotton Committee.—Rao Bahadur Bhimbhai R. Naik.

Representative of the Co-operative movement.—Diwan Bahadur T. Raghaviah, C.S.I.

Representative of minor administrations under the Government of India.—Mr. A. M. Mustafa, Agricultural Officer, Baluchistan.

Representative of the Forest Research Institute, Dehra Dun.—Mr. C. G. Trevor, C.I.E., I.F.S., Offg. Inspector-General of Forests.

Representative of the Indian Research Fund Association.—Lt.-Col. A. J. H. Russell, Public Health Commissioner with the Govt. of India.

Members appointed by the Governor-General in Council.—Mr. Mohd. Azhar Ali, M.L.A.; Dr. Nazir Ahmad, Director of Technological Laboratory, Matunga; Mr. G. K. Devadhar, C.I.E., and Dr. S. S. Nehru, Ph.D., I.C.S.

The work of the Council.—It is an important feature of the Research Council's constitution that it stands in the same relation to all research institutions whether central or provincial (or State), and whether official or unofficial. Though certain of its activities are administered direct the Council has no permanent research institute of its own and its normal method of promoting agricultural and veterinary research is by means of research grants to existing institutions. Proposals for research come up for consideration in two ways. Under the first applications for grants to provincial institutions including the universities, are made by Local or State Governments, usually on the advice of the Provincial Agricultural Research Committees. The decision whether or not a particular scheme with or without modification should receive a grant depends largely on the extent to which it is of general importance and on the extent to which the proposals can be co-ordinated with research work already in progress. The second method is a natural corollary to the one just described. The Council through its Advisory and Special Committees reviews the progress and position of work in agricultural and veterinary science and frames schemes for the filling of lacunæ—this process is continuous and is further assisted by the recommendations of the Board of Agriculture in India and its Committees. At present the following standing committees of the Council are at work: The Sugar Committee, the Fertilisers Committee, the Locust Committee, the Oil Crushing Industry Committee, the Joint Committee of the Imperial Council of Agricultural Research and the Indian Central Cotton Committee, Animal Nutrition Committee, Dairying Committee and the Cattle Breeding Committee. Sub-Committees of the Advisory Board to deal with the detailed special proposals are set up from time to time as required.

A valuable feature of the Council's organisation is its elasticity and for that reason though certain definite principles laid down by the Governing Body are followed in regard to expenditure on research rigid rules have been avoided. Actually the schemes financed by the Council fall into the following classes:—

(*i*) Special all-India schemes of research which call for a special central but not necessarily permanent organisation and which are administered direct by the Council, *e.g.*, Sugar Technology and Locust Research. Agricultural Marketing and Statistical aspect of Field Experiments and Animal Husbandry.

(*ii*) Scheme of research requiring temporary expansion of the work of a central research institute, *e.g.*, the two sub-stations at Karnal for cane-breeding and economic Botany (under the Imperial Sugarcane expert and the Imperial Economic Botanist respectively).

(*iii*) Co-ordinated schemes of research in several provinces where grants in aid are given for work to be carried out provincially as part of a general scheme. Examples are found in:—

(*a*) The Rice research scheme in Madras, Bengal, U.P., Burmah, B. & O. and Assam.

(*b*) The Sugarcane testing station scheme (U.P., Punjab, B. & O., Bombay, Bengal, Assam, all collaborating with the Coimbatore cane breeding station).

(*c*) Fruit Research.

(*d*) Dry Farming Research, (Bombay, Madras and Hyderabad).

(*iv*) Research schemes carried out by arrangement in one province or State on a problem of all-India importance or affecting several provinces.

As examples of this may be mentioned:—The experimental and demonstration sugar factory and training scheme in sugar technology at the Harcourt Butler Technological Institute, Cawnpore, U.P., the Bombay Fruit-Storage and Transport scheme; the Madras Potato Breeding scheme.

Grants to Universities to enable research workers on the University staff to expand existing research of agricultural importance or to develop the agricultural aspect of their own research. The following statement shows the schemes received from Universities or Colleges in India and approved by the Council up to the end of 1933:—

Statements showing schemes of Agricultural and Veterinary Research received from the Universities or Colleges in India and sanctioned by the Council up to December 1932.

Name of University.	Schemes.	Amount sanctioned.
		Rs.
Dacca	Research work on soils and the nutrition of the rice plants by Dr. J. C. Ghosh	34,080
Dacca	Investigation of the organic constituents of Indian soils by Prof. J. C. Ghosh	11,200
Calcutta	Research into properties of colloid soil constituents by Dr. J. N. Mukherjee	14,100
Calcutta	For statistical investigation on experimental errors in field trials by Prof. P. C. Mahalanobis	11,500
Punjab	Investigation on the "wither-tip" of citrus trees by Dr. H. C. Chaudhuri.	12,600
Punjab	Investigation on the relation between Physico-chemical properties and fertility of soils by Dr. S. S. Bhatnagar ..	8,300
Punjab	Research on the standardisation of Physico-chemical single value measurements most suitable for Indian soils by Dr. A. N. Puri	13,500
Punjab	Research on the effect of ions on plant growth by Dr. S. S. Bhatnagar	6,000
	Investigation of an electric method of Hygrometry by Prof. J. B. Seth for 2 years	3,600
Madras	Research in the cytological study of Indian crop plants ..	25,830
Ravenshaw College, Cuttck.	Research on water Hyacinth by Prof. Parija of Ravenshaw College, Cuttack	9,646
Agra College	Research work on cereal rusts by Dr. Mehta of Agra College	1,03,100
Agra College	Research work on investigation on Physiologic forms of wheat rusts by Dr. Mehta of Agra College	3,000
Royal Institute of Science, Bombay.	Research work on the Physiology of rice plant of Prof. R. H. Dastur	10,800
Indian Institute of Science, Bangalore.	(*i*) Scheme for the preparation of cheap synthetic manure from town refuse and waste materials	4,950
	(*ii*) Scheme for the extension of sewage farm investigation with special reference to Papaya and Plantain cultivation	18,340
	(*iii*) Scheme for the extension of work on "quality" in crops	5,400
Vishwa Bharati* Institute of Rural Reconstruction, Sriniketan.	Development of methodology in rural research	18,750
School of * Tropical Medicine, Calcutta.	Research in systematic collection of medicinal plants and study of food poisons in India by Col. Chopra	62,860
Allahabad* Agricultural Institute.	Research on the composition of milk by Dr. Sam Higginbottom	8,600

* Funds not yet allotted for these schemes.

Statement showing fresh schemes of Agricultural and Veterinary Research received from Universities or Colleges in India and approved by the Imperial Council of Agricultural Research during 1933.

Name of University.	Scheme.	Amount
		Rs.
Calcutta*	Scheme for statistical studies relating to Agricultural work in India by Prof. P. C. Mahalanobis for five years ..	40,000
Punjab	Research work on the effects of ions on the growth of plants by Dr. S. S. Bhatnagar for 6 months	900
Punjab*	Investigations on the relations of Physico-chemical factors to the fertility of soils by Dr. S. S. Bhatnagar for seven months	2,420
Punjab*	Investigation of the wither-tip of citrus trees by Dr. H. C. Chaudhuri for 4 months	2,200
Lucknow*	Enquiry into the Helminthiasis of cattle, sheep and goats in the United Provinces by Prof. G. C. Thapar for 5 years	25,460
Indian Institute of Science, Bangalore.*	Study of the composition and nutritive value of milk of the cow, buffalo and goat for three years	50,588

* Funds not yet allotted for these schemes.

The principal whole time research officers employed under the Council are:—

Expert Adviser. Agricultural Marketing—Mr. A. M. Levingstone (I. C. A. R. Headquarters.)

Sugar Technologist—Mr. R. C. Srivastava, M.Sc., Harcourt Butler Technological Institute, Cawnpore.

Locust Research Entomologist—Rao Sahib Y. Ramchandra Rao, Karachi.

Entomologist at Locust Sub-Station—Dr. K. R. Karandikar, Pasni.

Agricultural Statistician—Mr. M. Vaidyanathan (I. C.A.R. Headquarters).

Chief Economist—Mr. R. D. Kapoor (I. C. A.R. Headquarters).

The following research schemes have been sanctioned by the Governing Body of the Imperial Council of Agricultural Research.

STATEMENT A.—SCHEMES TO WHICH THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH IS ALREADY COMMITTED.

PART I. SUGAR SCHEMES.—(*a*) Research Schemes.

Serial No.	Description of scheme.	Sanctioned grant.	Expenditure to end of 1933-34.	Balance to be spent.	REMARKS.
		Rs.	Rs.	Rs.	
1	Construction and testing of improved juice boiling bel	4,000	3,906	14	
2	Lump sum grant to Shahjahanpur Research Station for a detailed examination of new seedling cane	6,000	6,000	..	
3	Lump sum grants of Rs. 8,000 each to United Provinces, Bihar and Orissa and Punjab Governments for experiments in designing of a satisfactory small power sugarcane crushing mill. A further grant of Rs. 5,000 sanctioned for the Punjab .	29,000 (24,000 Rs. 5,000 extra grant to the Punjab.)	29,000	..	
4	Bombay-Deccan Sugarcane Research Scheme	5,22,000 (from 1931-32 to 1935-36).	1,80,468	3,41,532	
5	Grant to Harcourt Butler Technological Institute, Cawnpore	2,25,000 (from 1930-31 to 1934-35).	1,65,000	60,000	

PART I. SUGAR SCHEMES.—(*a*) Research Schemes.

Serial No.	Description of Scheme.	Sanctioned grant.	Expenditure upto end of 1933-34.	Balance to be spent.	REMARKS.
		Rs.	Rs.	Rs.	
6	Scheme for the establishment of a Sugarcane Research Station in Bihar and Orissa and for the appointment of a Sugarcane Specialist	*1,92,800 (from 1931-32 to 1936-37).	1,09,978	82,822	* Round figure only.
7	Scheme for the establishment of a Sub-Station of the Coimbatore Imperial Sugarcane Station at Karnal	82,000 (from 1931-32 to 1935-36).	43,970	38,030	
8	Scheme submitted by the Imperial Mycologist, Pusa, for research on "Mosaic" and other Cane diseases at Pusa ..	85,000 from 1932-33 to 1934-35).	38,997	26,003	
9	Bengal Scheme for Sugarcane Crushing and Gur Boiling	5,700 (from 1930-31 to 1932-33).	5,652	48	
10	Sugarcane Seedling Testing Station at Dacca	13,100 (from 1931-32 to 1935-36).	6,411	6,689	
11	Grant to the Mysore Durbar for breeding of thick canes	21,000 (from1933-34)	5,900	15,100	
12	Economic enquiry into the cost of production of crops in the principal Sugarcane and cotton tracts in India	4,43,200 (from 1932-33 to 1935-36).	1,27,500	3,15,700	Half the expenditure to be borne by the Indian Central Cotton Committee.
13	Research on the genetics of Sugarcane at the Imperial cane breeding stations, Coimbatore	12,333 (5 years.)	7,400	29,600	
14	Research on Sugarcane in the Madras Presidency	1,50,100 (5 years.)	41,500	1,08,600	
15	Establishment of a Sugarcane research station in the Punjab	1,33,000 (5 years).	30,000	1,03,000	
16	Investigation into various problems of sugar industry in the United Provinces..	1,01,300 (5 years).	33,000	63,300	
17	Establishment of a Research and Testing Station for the indigenous system of gur and sugar manufacture by the Sugar Technologist to the Council	1,67,400 (5 years).	67,000	1,00,400	
18	Extension of Sugarcane work at the Jorhat Experimental Station, Assam	48,000	21,200	26,800	
19	Enquiry into the production of khandsara sugar in the United Provinces	2,000	3,000	..	
	Grand Total ..	22,48,600	9,26,962	13,22,638	

STATEMENT A.

PART I.

Sugar Schemes.

(*b*) *Statement showing the cost of establishments employed under the Imperial Council of Agricultural Research.*

Serial No.	Description.	Sanctioned Annual Grant.	REMARKS.
		Rs. a. p.	
1	Sugar Committee	9,200 0 0	Funds are provided from year to year.
2	Sugar Technologist.—		
	(*a*) Main office	45,000 0 0	Funds are provided from year to year.
	(*b*) Sugar Cable Service	12,000 0 0	Funds are Receipts not taken into account. Practically the service is self-supporting.
3	Chief Economist and his staff	8,200 0 0	Sanctioned for about 4 years.
4	Indian Sugar Trade Information Service ..	7,000 0 0	Sanctioned for five years. Anticipated receipts not taken into account. The service is likely to be self-supporting.
	(Total sanctioned cost for five years Rs. 35,306).		
	Total ..	81,400 0 0	

SCHEMES TO WHICH THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH IS ALREADY COMMITTED.

PART II.

General Schemes other than Sugar.

(*a*) *Research Schemes.*

Serial No.	Description of scheme.	Sanctioned grant.	Expenditure to end of 1933-34.	Balance to be spent.	REMARKS.
1	2	3	4	5	6
	Agricultural Schemes.	Rs.	Rs.	Rs.	
1	Botanical Sub-Station at Karnal .	1,33,900	86,506	47,394	
2	Grant to Dacca University ..	38,100	28,747	9,353	
3	Professor Mukherjee's Scheme of research into properties of Colloid Soil Constituents	14,100	10,945	3,155	
4	Professor Mahalanobis' scheme of investigation on experimental errors in field trials	11,500	11,000	500	
5	Grant to Principal, Agra College, Agra, for investigation into the rusts of wheat and barely ..	54,600	30,800	23,800

1	Grant to the Government of Burma for a scheme of research into parasites to control the beetle pest of sugarcane in Burma ..	11,200	2	Grant to the Government of the North West Frontier Province for a scheme for sugar-cane research in the North West Frontier Province	64,250
				Total ..	75,450

STATEMENT B.

List of Schemes approved by the Council but not yet undertaken owing to lack of funds.

PART (*b*)—*General Schemes other than Sugar.*

Serial No.	Description.	Cost.	Serial No.	Description.	Cost.
		Rs.			Rs.
1	Financial assistance to the oil technological Section of the Harcourt Butler Technological Institute	30,000	10	Extension of work on 'quality' in crops by the Indian Institute of Science (2 years)	5,400
2	Establishment of an All-India Animal Husbandry Bureau	15,000	11	Professor J. B. Seth's scheme for investigating an electric method of Hygrometry (2 years)	3,600
3	Professor Mahalanobis' Statistical scheme	40,000	12	Grant to the Central Provinces Government for investigation into vaccination of cattle against rinderpest ..	46,700
4	Crops— Tobacco Expert for Bengal (5 years) Tobacco Expert for Madras (5 years) .. Tobacco Expert for Punjab (2 years) ..	1,33,150	13	Grant to the Government of North West Frontier Province for an entomological survey scheme in the North West Frontier Province ..	34,740
5	Research on the composition of milk (2 years)	8,600	14	Research in systematic collection of medicinal plants and study of food poisons in India by Colonel Choopra (5 years)	62,860
6	Extension of work on animal nutrition in the Madras Presidency (5 years) ..	49,930	15	Grant to the Government of Bombay for research in sheep-breeding (for 10 years)	85,122
7	Investigation on the organic Constituents of Indian soils (5 years)	11,200	16	Grant to the Government of Assam for investigation into fruit cultivation in Assam	37,424
8	Preparation of cheap synthetic manure from town refuse and waste materials by the Indian Institute of Science, Bangalore (2 years)	4,950	17	Grant to the Government of Bengal for research into diseases of poultry in Bengal	65,579
9	Investigation of the Chemistry of malting Cholam (Sorghum) (3 years)	15,256			

Serial No.	Description.	Cost. No.	Serial	Description.	Cost.
		Rs.			Rs.
18	Research in the cytological study of Indian crop plants (5 years)	25,830	30	Dr. Puri's scheme for work on the standardization of Physico-chemical single value measurements most suitable for Indian soils (5 years)	13,500
19	Mysore-Investigation of Indian Fish poisons ..	15,288	31	Grant to Dr. Thapar for investigation into Helminthiasis of cattle, sheep, etc.	19,790
20	Grant to the Government of Mysore for investigating into Johne's disease among animals	24,400	32	Grant to the Government of Madras for research on rural pisciculture	47,660
21	Scheme for the investigation of Tuberculosis and Johne's disease among animals ..	2,00,000	33	Grant to the Bihar and Orissa Government for research on the economics of irrigation from tube-wells	73,680
22	Grant to the Government of Madras for research in oil seeds in Madras	57,100	34	Grant to the Government of Assam for a scheme of cattle nutrition	69,788
23	Scheme for conducting research in Warble Flies at the Muktesar Institute ..	32,400	35	Punjab Government scheme for the installation of wheat milling and baking laboratory at Lyallpur	22,300
24	Grant to the Government of the United Provinces for research on Sunn Hemp .	34,266	36	Study of the composition and nutritive value of milk of the cow, buffalo and goat .	50,588
25	Animal Nutrition Research Scheme, Bangalore:—		37	Research into the indigenous drugs of India with special reference to their toxicology	73,080
	(*a*) Value of oil cakes and oil seeds for working bullocks	45,490	38	Scheme for the development of methodology in rural research by the Viswa Bharati Institute of Rural Reconstruction, Sriniketan (3 years)	18,750
	(*b*) Extension of laboratory facilities	23,100	39	Grant to the Government of Bombay for a scheme of poultry breeding research in Western India	13,045
26	Extension of sewage farm investigations with special reference to Papaya and Plantain cultivation (3 years)	18,340		Total ..	16,93,006
27	Scheme by Dr. P. E. Lander for determining the feeding values of certain food grains, oil seeds and oil-cakes for working bullocks and dairy cattle	38,570		Sugar Scheme ..	75,450
28	Statistical basis of the estimates of production of crops in India	5,000		Grand Total ..	17,68,456
29	Feeding values of oil seeds, cakes and other concentrates to milch animals ..	46,530			

STATEMENT C.

STATEMENT SHOWING COST OF EXPIRED SCHEMES.

	Sugar Schemes.	Rs.
1	Lump sum grant to Shahjahanpur Research Station for a detailed examination of new seedling cane ..	6,000
2	Deputation of a chemist to Bhopal to test K.B. Hadis' process of manufacturing Sugar by open pan method	1,080
3	K. B. Hadis' Commercial Test of Bilari under Lal Har Sahai Gupta	12,920
4	Deputation of the Sugar Technologist to Europe and America	12,666
	Total ..	32,666 or 32,700

	Agricultural Schemes.	
1	Grant to Dr. K. C. Mehta for :— (*a*) Investigation of rusts of wheat and barley ..	41,432
	(*b*) Investigation into the Physiologic forms of wheat rusts	4,008
	(*c*) Giving some relief from a part of his duties at college	4,182
2	Hemp marketing officer ..	13,864
3	Investigation into the vitamin contents of mangoes by Dr. Zilva	1,015
4	"Water Hyacinth" by Professor Parija	9,646
5	Standardisation of Physico-Chemical single value measurements most suitable for Indian Soils by Dr. A. N. Puri	5 250
6	Grants to Provinces for collecting data on manurial experiments conducted in the past	17,329
7	Distribution of Sodium Fluosilicate to Indian States ..	1,757
8	Cost of exhibits in connection with commercial samples room of the High Commissioners' office	516
		98,999 or 909,00

	Animal Husbandry Schemes.	Rs.
1	Testing of Drug Plasmoquine	523
2	All India Legislation for the control of animal disease .	415
	Total Rs. ..	938

(I)

Contributions, etc.

1	Contribution to Royal Veterinary College, London ..	1,009

(II)

Deputation of India's Representatives at International Conferences.

1	Deputation of Dr. K. C. Mehta and others to the International Botanical Congress at Cambridge in 1930 ..	2,432
2	Expenditure on the Third Entomological Conference in London in 1930.. ..	741
3	Expenditure on the International Veterinary Conference in London in 1930 ..	525
4	Expenditure on the Conference of workers interested in problems of fruit production within the Empire held in London in 1930..	193
5	Indian Delegation to the International Institute of Agriculture, Rome ..	5,159
6	India's representation at the Ninth International Dairy Congress, Copenhagen, 1931	3,372
7	Cost of India's representation at the Preparatory Conference to the Second World Wheat Conference, Rome.	857
8	Cost of India's representatives at the Soil Workers Conference held in London in 1930..	163
	Total Rs. ..	13,542

(III)

General Schemes.

1	Honorarium to Dr. Agharkar	750
2	Honorarium to Mr. Amar Nath	500
	Total ..	1,250

(IV)

Grand Total of (I), (II), (III) and (IV)	16,639
Sugar Schemes	32,700
Agricultural Schemes ..	99,000
Animal Husbandry and General Schemes	16,639
Grand Total ..	1,48,339

AGRICULTURAL PRODUCE.

The following table shows the area under the principal crops, in British India, and their territorial distribution for 1931-32. The sown area is always greater than the area of cultivated land, owing to double cropping. The figures represent thousands of acres: —

Provinces.	Rice.	Wheat.	Sugar Cane.	Tea.	Cotton.	Jute.	Linseed.	Rape & Mustard.	Sesamum.	Castor Seed.	Ground Nut.	Barely.

Note.—The acreage of crops given in this table is for British India only, but the yield includes the crops in certain Indian States also.
* Groundnut, cocoanut, castor and other oilseeds. † The statistics of the production of tea, jute and rubber are for calendar years.
‡ Includes yield of other tracts for which no forecast is made.
$ Other dyes & tanning materials, other drugs & materials and miscellaneous non-food crops.

Irrigation.

The chief characteristics of the Indian rainfall are its unequal distribution over the country, its irregular distribution throughout the seasons and its liability to failure or serious deficiency. The normal annual rainfall varies from 460 inches at Cherrapunji in the Assam hills to less than three inches in Upper Sind. The greatest rainfall actually measured at any station in any one year was 905 inches, recorded at Cherrapunji in 1861, while at stations in Upper Sind it has been nil. There are thus portions of the country which suffer as much from excessive rainfall as others do from drought.

The second important characteristic of the rainfall is its unequal distribution throughout the seasons. Except in the south-east of the peninsula, where the heaviest precipitation is received from October to December, by far the greater portion of the rainfalls during the south-west monsoon, between June and October. During the winter months the rainfall is comparatively small the normal amount varying from half an inch to two inches, while the hot weather, from March to May or June, is practically rainless. Consequently it happens that in one season of the year the greater part of India is deluged with rain and is the scene of the most wonderful and rapid growth of vegetation; in another period the same tract becomes a dreary, sun-burnt waste. The transition from the latter to the former stage often occurs in a few days. From the agricultural point of view the most unsatisfactory feature of the Indian rainfall is its liability to failure or serious deficiency. The average annual rainfall over the whole country is about 45 inches and there is but little variation from this average from year to year, the greatest recorded being only about seven inches. But if separate tracts are considered, extraordinary variations are found. At many stations annual rainfalls of less than half the average are not uncommon, while at some less than a quarter of the normal amount has been recorded in a year of extreme drought.

Scarcity.—Classing a year in which the deficiency is 25 per cent. as a dry year and one in which it is 40 per cent. as a year of severe drought, the examination of past statistics shows that, over the precarious area, one year in five may be expected to be a dry year and one in ten a year of severe drought. It is largely in order to remove the menace of these years that the great irrigation systems of India have been constructed.

Government Works.—The Government irrigation works of India may be divided into two main classes, those provided with artificial storage, and those dependent throughout the year on the natural supplies of the rivers from which they have their origin. In actual fact, practically every irrigation work depends upon storage of one kind or another but, in many cases, this is provided by nature without man's assistance. In Northern India, upon the Himalayan rivers, and in Madras, where the cold weather rains are even heavier than those of the south-west monsoon, the principal non-storage systems are found.

The expedient of storing water in the monsoon for utilization during the subsequent dry weather has been practised in India from time immemorial. In their simplest form, such storage works consist of an earthen embankment constructed across a valley or depression, behind which the water collects, and those under Government control range from small tanks irrigating only a few acres each to the huge reservoirs recently completed in the Deccan which are capable of storing over 20,000 million cubic feet of water. By gradually escaping water from a work of the latter type, a supply can be maintained long after the river on which the reservoir is situated would otherwise be dry and useless.

The Three Classes.—Previously all irrigation works were divided into three classes Productive, Protective and Minor, but during the triennium 1921-24 the method of determining the source from which the funds for the construction of Government works was provided was changed, and now all works, whether major or minor, for which capital accounts are kept, have been re-classified under two heads, Productive and Unproductive, with a third class embracing areas irrigated by non-capital works. The main criterion to be satisfied before a work can be classed as productive is that it shall, within ten years of the completion of construction, produce sufficient revenue to cover its working expenses and the interest charges on its capital cost. Most of the largest irrigation systems in India belong to the productive class. The total capital outlay direct and indirect on irrigation and navigation works, including works under construction, amounted at the end of the year 1929-30 to Rs. 130 crores.

Unproductive works are constructed primarily with a view to the protection of precarious tracts and to guard against the necessity for periodical expenditure on the relief of the population in times of famine. They are financed from the current revenues of India, generally from the annual grant for famine relief and insurance, and are not directly remunerative, the construction of each such work being separately justified by a comparison of the value of each acre protected (based upon such factors as the probable cost of famine relief, the population of the tract, the area already protected and the minimum area which must be protected in order to tide over a period of severe drought) with the cost of such protection.

Nearly one-eighth of the whole area irrigated in India from Government works is effected by minor works for which no capital account is kept.

Growth of Irrigation.—There has, during the last fifty years, been a steady growth in the area irrigated by Government irrigation works. From 10¼ million acres in 1878–79 the area annually irrigated rose to 19¼ million acres at the beginning of the century and to 31 million acres in 1930–31. This record was, however, surpassed in the year 1929–30, when the total area irrigated by all classes of works in India, excluding the Indian States, amounted to 31½ million acres.

The main increase has been in the class of productive works, which irrigated 4¼ million acres in 1878–79 and rose to 20,756,209 acres in 1926–27. During the year 1930–31 the areas irrigated by productive and unproductive works amounted to 22,446,783 acres and 4,195,701 acres respectively.

The area irrigated in 1930–31 was largest in the Punjab, in which province 11.49 million acres were irrigated during the year. In addition about 1.49 million acres were irrigated from channels which although drawing their supplies from British canals, lie wholly in the Indian States. The Madras Presidency came next with an area of 7.6 million acres, followed by the United Provinces with 4 million and Sind with 3.7 million acres.

Capital and Revenue.—The total capital invested in the works has risen from Rs. 42,36 lakhs in 1900–01 to Rs. 136.44 crores in 1930–31. The gross revenue for the year was Rs. 1,209 lakhs and the working expenses Rs. 569 lakhs, the net return on capital being, therefore, 4.7 per cent. In considering the latter figure, it must be remembered that the capital invested includes considerable expenditure, *viz.*, Rs. 4,096 lakhs upon four projects of the first magnitude *viz.*, the Cauvery Metur Project, the Lloyd (Sukkur) Barrage Project, the Sarda Canal Project and the Sutlej Valley Project, which were under construction and contributed little or nothing in the way of revenue. Of the several provinces, the return on the capital invested in productive works was highest in the Punjab, where the canals yielded 12.64 per cent.

Charges for Water.—The charges for water are levied in different ways in the various provinces. In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals. In others, as in parts of Madras and Bombay, different rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for water. These methods may however be regarded as exceptional. Over the greater part of India water is paid for separately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown. Lower rates are often levied in cases where irrigation is by "lift," that is to say where the land is too high for the water to flow on to it by gravity and consequently the cultivator has to lift it on to his field.

Various other methods of assessment have been tried, such as by renting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful. The cultivator fully understands the principle of "No crops, no charge" which is now followed as far as possible in canal administration, but has no confidence in a system under which his liability for water rate is independent of the area and quality of his crop.

The rates charged vary considerably with the crop grown, and are different in each province and often upon the several canals in a single province. Thus in the Punjab, they vary from Rs. 7–8–0 to Rs. 12 per acre for sugarcane, from Rs. 4 to Rs. 7–8–0 per acre for rice, from Rs. 3–4–0 to Rs. 5–4–0 per acre for wheat, from Rs. 3 to Rs. 4–4–0 per acre for cotton and from Rs. 2 to Rs. 3–4–0 per acre for millets and pulses. Charge is made for additional waterings. Practically speaking, Government guarantees sufficient water for the crop and gives it as available. If the crop fails to mature, or if its yield is much below normal, either the whole or part of the irrigation assessment is remitted.

A somewhat different system, the long lease system, is in force in parts of Bengal and the Central Provinces, under which the cultivators pay a small rate for a term of years whether they take water or not. In these provinces where the normal rainfall is fairly high, it is always a question whether irrigation will be necessary at all, and if the cultivators have to pay the full rate, they are apt to hold off until water becomes absolutely essential, and the sudden and universal demand then usually exceeds the supply. By paying a reduced rate every year for a term of years they become entitled to water when required; consequently there is no temptation to wait till the last possible moment, and the demand is much more evenly distributed throughout the season.

Taken as a whole, irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives.

Triennial Comparisons.—The average area irrigated in British India by Government works of all classes during the triennium 1927-30 was nearly 30 million acres.

The results obtained in each province are given in the table below :—

Provinces.	Average area irrigated in triennium 1925-28.	Triennium 1927-30.
Madras	7,205,587	7,277,967
Bombay (Deccan)	440,536	406,748
Sind	3,385,379	3,579,592
Bengal	97,182	90,054
United Provinces	2,698,265	3,639,867
Punjab	10,442,730	11,200,550
Burma	1,939,029	1,994,321
Bihar and Orissa	930,112	907,067
Central Provinces	417,850	400,438
North-West Frontier Province	369,343	403,064
Rajputana	24,820	31,984
Baluchistan	22,319	22,407
Total ..	27,973,152	29,954,059

Productive Works.—Taking productive works only, a triennial comparison is given in the following table. It will be seen that the average area irrigated by such works during the triennium was one-and-a-half million acres more than in the previous period :—

Provinces.	Average area irrigated in previous triennium 1924-27.	Average area irrigated in triennium 1927-30.
Madras	3,732,271	3,821,815
Bombay-Deccan	2,699	2,637
Sind	2,894,468	2,661,519
United Provinces	2,462,061	3,372,506
Punjab	9,755,740	10,775,794
Burma	1,531,403	1,378,393
Central Provinces	153,942	21,889
North-West Frontier Province	200,413	207,750
Total ..	20,732,997	22,202,303

Taking the productive works as a whole, the capital invested in them was, at the end of 1930-31, Rs. 92 crores. The net revenue for the year was Rs. 627 lakhs giving a return 6·81 per cent. as compared with 9 per cent. in 1918-19 and 9¾ per cent. in 1919-20. In considering these figures it must be remembered that the capital invested includes the expenditure upon several works which have only lately come into operation and others which are under construction, which classes at present contribute little or nothing in the way of revenue; moreover only receipts from water rates and a share of the enhanced land revenue due to the introduction of irrigation are credited to the canals, so that the returns include nothing on account of the large addition to the general revenues of the country which follows in the wake of their construction.

Unproductive Works.—Turning now to the unproductive works, the areas irrigated in the various provinces during the triennium were as below :—

Provinces.	Average area irrigated in previous triennium 1924-27.	Average area irrigated in triennium 1927-30.
Madras	271,455	266,849
Bombay-Deccan	277,709	239,278
Sind	527,737	331,722
Bengal	73,381	67,802
United Provinces	207,312	252,643
Punjab	243,613	424,756
Burma	268,110	539,253
Bihar and Orissa	889,733	904,303
Central Provinces	230,280	333,482
North-West Frontier Province	156,911	195,314
Rajputana	23,272	31,984
Baluchistan	22,070	22,407
Total ..	3,191,588	4,109,793

Non-capital Works.—The results obtained from the non-capital works are given below :—

Provinces.	Average area irrigated in previous triennium 1924-27.	Average area irrigated in triennium 1927-30.
Madras	3,174,731	3,189,303
Bombay-Deccan	157,025	164,833
Sind	87,279	86,351
Bengal	22,135	22,252
United Provinces	8,006	14,717
Punjab	349,768	*Nil.*
Burma	72,870	76,676
Bihar and Orissa	2,246	2,764
Central Provinces	45,689	45,067
Total ..	3,919,749	3,601,963

Capital Outlay.—The total capital outlay, direct and indirect, on irrigation and navigation works, including works under construction, amounted at the end of 1930-31 to Rs. 136 crores. The gross revenue for the year was Rs. 12,09 lakhs, and the working expenses Rs. 5,69 lakhs; the net return on capital was therefore 4.7 per cent. Of the several provinces, the return on the capital outlay invested in productive works was highest in the Punjab, where the canals yielded 12·64 per cent. In Madras the percentage of return was 6·17 while in the United Provinces a return of 4·93 per cent. was realised. In considering these figures it must be remembered that the capital invested includes considerable expenditure upon three projects of the first magnitude *viz.*, the Sarda Oudh canals, the Lloyd Barrage project and the Cauvery (Mettur) project which were under construction and contributed little or nothing in the way of revenue.

Irrigated Acreage.—A comparison of the acreage of crops matured during 1930-31 by means of Government irrigation systems with the total area under cultivation in the several provinces is given below :—

Provinces.	Net area cropped. Acres.	Area irrigated by Government irrigation works. Acres.	Percentage of area irrigated to total cropped area.	Capital cost of Government irrigation & Navigation works to end of 1930-31. In lakhs of rupees.	Estimated value of crops raised on areas receiving State irrigation. In lakhs of rupees.
Madras	39,193,000	7,573,000	19·3	17,63	22,33*
Bombay-Deccan	26,264,000	403,000	1·5	10.38	2,02
Sind	4,336,000	3,716,000	85·7	21,90	6,87
Bengal	28,399,000	73,000	0·3	4,85	27
United Provinces	43,022,000	3,989,000	9·3	25,12	14,43
Punjab	30,265,000	11,485,000	3··0	33,38	2,477
Burma	18,023,000	2,098,000	11·6	6,62	6,35
Bihar and Orissa	29,779,000	890,000	3·0	6,28	6,39
Central Provinces	20,650,000	423,000	2·1	6,63	1,40
North-West Frontier Provinces	2,423,000	405,000	16·7	2,94	1,28
Rajputana	377,000	20,000	5·3	35	5
Baluchistan	457,000	22,000	4·8	36	3
Total ..	243,188,000	31,097,000	12·7	1,36,44	86,19

* Exclusive of the value of crops raised on some 3 million acres irrigated by non-capital works.

New Works.—The major works of exceptional importance are the **Sukkur Barrage** and Canals in Sind, the Cauvery (Mettur) project in Madras, and the Sutlej Valley Canals in the Punjab. The Sukkur Barrage, which was opened by His Excellency the Viceroy early in 1932, is the greatest work of its kind in the world, measuring 4,725 feet between the faces of the regulators on either side. The total cost of the scheme is estimated at Rs. 20 crores which the barrage accounts for about Rs. 6 crores and the canals for Rs. 14 crores. A gross area of 7½ million acres is commanded, of which 6½ million acres is culturable and an annual area of irrigation of 5½ million acres is anticipated, of which 2 million acres represent existing inundation irrigation which will be given an assured supply by the new canals. The ultimate annual net revenue forecasted as obtainable from the project, after paying working expenses, is Rs. 194 lakhs, which represents a return of 10 per cent. on capital. This is the return from water rates alone, but a further large increase in general revenues may safely be reckoned upon from the area of 3 million acres of waste which will be brought under cultivation. There will be increases on this account under practically every head of revenue, such as railways, customs, stamps, excise and the like, not to mention the addition to the country's wealth owing to the production, on land at present barren, of crops to the value of Rs. 2,500 lakhs per annum.

The Sutlej Valley Works consist of four weirs, three on the Sutlej and one on the Panjab, as the Chenab is called below its junction with the Sutlej, with twelve canals taking off from above them. The total area to be irrigated is 5,108,000 acres, or nearly 8,000 square miles. Of this, 2,075,000 acres are perennial and 3,033,000 acres non-perennial irrigation. 1,942,000 acres are in British territory, 2,825,000 acres in Bahawalpur and 341,000 acres in Bikaner.

The total cost of the scheme was estimated at Rs. 1,460 lakhs. Upon this a return of 12¼ per cent. is anticipated from water-rates alone. But the scheme has another, and even more important source of revenue. On the introduction of irrigation, no less than 3¾ million acres of desert waste, the property of the three parties concerned, at present valueless, will become available for colonisation and sale. It is customary, in the *pro-forma* accounts of irrigation projects, to credit a scheme with the interest on the sale proceeds of Crown waste lands rendered culturable by its construction; if this is included, the annual return on the works will amount to nearly 38 per cent. It bids fair, indeed, to rival the Lower Chenab Canal, the return from which was more than 50 per cent. in 1929-30. These anticipations may need modification, however, in view of the fact that a revised estimate for the project amounts to Rs. 2,376 lakhs.

The Cauvery Reservoir project, which will cost nearly 6½ crores of rupees and will extend irrigation to a new area of 301,000 acres, is making satisfactory progress. In Bombay Presidency the Bhandardara Dam, 270 feet in height, was completed at the end of 1925 and the Bhatgar Dam at the end of 1926. The Damodhar River (Canal) project, which will irrigate 180,000 acres of rice lands in the Burdwan and Hooghly Districts of Bengal was commenced during the year 1926-27. Excellent progress has been made with the Sarda-Oudh Canals in the United Provinces and the system was inaugurated by H. E. the Viceroy in the autumn of 1928. This project will irrigate more than a million acres.

A comprehensive irigation programme extending over a period of 14 years is under investigation in the Central Provinces. The possibility of increasing irrigation in the North-West Frontier Province is receiving attention, whilst in Bombay Presidency there is a proposal to increase the supply in Lake Fife either by raising the present dam or by constructing subsidiary storage dams in branch valleys.

WELLS AND TANKS.

So far we have dealt only with the great irrigation schemes. They are essentially exotic, the products of British rule; the real eastern instrument is the well. The most recent figures give thirty per cent. of the irrigated area in India as being under wells. Moreover the well is an extremely efficient instrument of irrigation. When the cultivator has to raise every drop of water which he uses from a varying depth, he is more careful in the use of it; well water exerts at least three times as much duty as canal water. Again, owing to the cost of lifting, it is generally used for high grade crops. It is estimated that well-irrigated lands produce at least one-third more than canal-watered lands. Although the huge areas brought under cultivation by a single canal scheme tend to reduce the disproportion between the two systems, it must be remembered that the spread of canals increases the possibilities of well irrigation by adding, through seepage, to the store of subsoil water and raising the level.

Varieties of Wells.—Wells in India are of every description. They may be just holes in the ground, sunk to subsoil level, used to a year or two and then allowed to fall into decay. These are temporary or kacha wells. Or they may be lined with timber, or with brick or stone. They vary from the kacha well costing a few rupees to the masonry well, which will run into thousands, or in the sandy wastes of Bikanir, where the water level is three hundred feet below the surface, to still more. The means of raising the water vary in equal degree. There is the *picottah*, or weighted lever, raising a bucket at the end of a pivoted pole, just as is done on the banks of the Nile. This is rarely used for lifts beyond fifteen feet. For greater lifts bullock power is invariably used. This is generally harnessed to the *mot*, or leather bag, which is passed over a pulley overhanging the well, then raised by bullocks who walk down a ramp of a length approximating to the depth of the well. Sometimes the *mot* is just a leather bag, more often it is a self-acting arrangement, which discharges the water into a sump automatically on reaching the surface. By this means from thirty to forty gallons of water are raised at a time, and in its simplicity, and the ease with which the apparatus can be constructed and repaired by village labour, the *mot* is unsurpassed in efficiency. There is also the Persian wheel, an endless chain of earthenware pots running round a wheel. Recently attempts have been made, particularly in Madras, to substitute mechanical power, furnished by oil engines, for the bullock. This has been found economical where the water supply is sufficiently large, especially where two or three wells can be linked. Government have systematically encouraged well irrigation by advancing funds for the purpose and exempting well watered lands from extra assessment due to improvement. These advances, termed *takavi*, are freely made to approved applicants, the general rate of interest being 6¼ per cent. In Madras and Bombay ryots who construct wells, or other works of agricultural improvement, are exempt from enhanced assessment on that account. In other provinces the exemption lasts for specific periods, the term generally being long enough to recoup the owner the capital sunk.

Tanks.—Next to the well, the indigenous instrument of irrigation is the tank. The village or the roadside tank is one of the most conspicuous features in the Indian scene. The Indian tank may be any size. It may vary from a great work like Lakes Fife and Whiting in the Bombay Presidency or the Periyar Lake in Travancore, holding up from four to seven billion cubic feet of water, and spreading their waters through great chains of canal, to the little village tank irrigating ten acres. They date back to a very early stage in Indian civilisation. Some of these works in Madras are of great size, holding from three to four billion cubic feet, with water spreads of nine miles. The inscriptions of two large tanks in the Chingleput district of Madras, which still irrigate from two to four thousand acres are said to be over 1,100 years old. Tank irrigation is practically unknown in the Punjab and in Sind, but it is found in some form or other in all other provinces, including Burma, and finds its highest development in Madras. In the ryotwari tracts of Bombay and Madras all but the smallest tanks are controlled by Government. In the zemindari tracts only the large tanks are State works. According to the latest figures the area irrigated from tanks is about eight million acres, but in many cases the supply is extremely precarious. So far from tanks being a refuge in famine they are often quite useless inasmuch as the rainfall does not suffice to fill them and they remain dry throughout the season.

Bibliography.—Annual Review of Irrigation in India, 1930-1931, Delhi, Manager, Government of India Publications. Price Rs. 1-2-0. Also Annual Review of Irrigation in India 1930-31, Delhi, Manager of Publications. Price Rs. 1-2-0. The annual irrigation reports in India used to be as arid as the Sahara, consisting of a dull statistical record. They have been greatly improved of recent years and have now assumed a quite satisfactory form. The major review appears once every three years. The first of these triennial reviews was issued in 1922. Between the triennial reviews there is issued a briefer statement recording the progress of each particular year.

Meteorology.

The meteorology of India like that of other countries is largely a result of its geographical position. The great land area of Asia to the northward and the enormous sea expanse of the Indian Ocean to the southward are determining factors in settling its principal meteorological features. When the Northern Hemisphere is turned away from the sun, in the northern winter, Central Asia becomes an area of intense cold. The meteorological conditions of the temperate zone are pushed southward and we have over the northern provinces of India the westerly winds and eastward moving cyclonic storms of temperate regions, while, when the Northern Hemisphere is turned towards the sun, Southern Asia becomes a super-heated region drawing towards it an immense current of air which carries with it the enormous volume of water vapour which it has picked up in the course of its long passage over the wide expanse of the Indian Ocean, so that at one season of the year parts of India are deluged with rain and at another persistent dry weather prevails.

Monsoons.—The all-important fact in the meteorology of India is the alternation of the seasons known as the summer and winter monsoons. During the winter monsoon the winds are of continental origin and hence, dry, fine weather, clear skies, low humidity and little air movement are the characteristic features of this season. The summer rains cease in the provinces of the North-West Frontier Province and the Punjab about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather conditions extend slowly eastward and southward so that by the middle of October, they embrace all parts of the country except the southern half of the Peninsula, and by the end of the year have extended to the whole of the Indian land and sea area, the rains withdrawing to the Equatorial Belt. Thus the characteristics of the cold weather from October to February over India are:—Westerly winds of the temperate zone over the extreme north of India; to the south of these the north-east winds of the winter monsoon or perhaps more properly the north-east Trades and a gradually extending area of fine weather which, as the season progresses, finally embraces the whole Indian land and sea area. Two exceptions to these fine weather conditions exist during this period, *viz.*; the Madras coast and the north-west of India. In the former region the north-east winds which set in over the Bay of Bengal in October coalesce with the damp winds of the retreating summer monsoon, which current curves round over the Bay of Bengal, and blowing directly on to the Madras coast gives to that region the wettest and most disturbed weather of the whole year, for while the total rainfall for the four months June to September, *i.e.*, the summer monsoon, at the Madras Observatory amounts to 15·36 inches the total rainfall for the three months October to December amounts to 29·48 inches. The other region in which the weather is unsettled, during this period of generally settled conditions, is North-west India. This region during January, February and part of March is traversed by a succession of shallow storms from the westward. The number and character of these storms vary very largely from year to year and in some years no storms at all are recorded. In normal years, however, in Northern India periods of fine weather alternate with periods of disturbed weather (occurring during the passage of these storms) and light to moderate and even heavy rain occurs. In the case of Peshawar the total rainfall for the four months, December to March, amounts to 5·26 inches while the total fall for the four months, June to September, is 4·78 inches, showing that the rainfall of the winter is, absolutely, greater in this region than that of the summer monsoon. These two periods of subsidiary "rains" are of the greatest economic importance. The fall in Madras is, as shown above, of considerable actual amount, while that of North-west India though small in absolute amount is of the greatest consequence as on it largely depend the grain and wheat crops of Northern India.

Spring Months.—March to May and part of June form a period of rapid continuous increase of temperature and decrease of barometric pressure throughout India. During this period there occurs a steady transference northward of the area of greatest heat. In March the maximum temperatures, slightly exceeding 100° occur in the Deccan; in April the area of maximum temperature, between 100° and 105°, lies over the south of the Central Provinces and Gujarat; in May maximum temperatures, varying between 105° and 110°, prevail over the greater part of the interior of the country while in June the highest mean maximum temperatures exceeding 110° occur in the Indus Valley near Jacobabad. Temperatures exceeding 120° have been recorded over a wide area including Sind, Rajputana, the West and South Punjab and the west of the United Provinces, but the highest temperature hitherto recorded is 126° registered at Jacobabad on June 12th, 1897. During this period of rising temperature and diminishing barometric pressure, great alterations take place in the air movements over India, including the disappearance of the north-east winds of the winter monsoon, and the air circulation over India and its adjacent seas, becomes a local circulation, characterised by strong hot winds down the river valleys of Northern India and increasing land and sea winds in the coast regions. These land and sea winds, as they become stronger and more extensive, initiate large contrasts of temperature and humidity which result in the production of violent local storms. These take the forms of dust storms in the dry plains of Northern India and of thunder and hailstorms in regions where there

is inter-action between damp sea winds and dry winds from the interior. These storms are frequently accompanied with winds of excessive force, heavy hail and torrential rain and are on that account very destructive.

By the time the area of greatest heat has been established over North-west India, in the last week of May or first of June, India has become the seat of low barometric pressures relatively to the adjacent seas and the whole character of the weather changes. During the hot weather period, discussed above, the winds and weather are mainly determined by local conditions. Between the Equator and Lat. 30° or 35° south the wind circulation is that of the south-east trades, that is to say from about Lat. 30°-35° south a wind from south-east blows over the surface of the sea up to about the equator. Here the air rises into the upper strata to flow back again at a considerable elevation to the Southern Tropic or beyond. To the north of this circulation, *i.e.*, between the Equator and Lat. 20° to 25° North, there exists a light unsteady circulation, the remains of the north-east trades, that is to say about Lat. 20° North there is a north-east wind which blows southward till it reaches the thermal equator where side by side with the south-east Trades mentioned above, the air rises into the upper strata of the atmosphere still further to the northward and in the immediate neighbourhood of land there are the circulations due to the land and sea breezes which are attributable to the difference in the heating effect of the sun's rays over land and sea. It is now necessary to trace the changes which occur and lead up to the establishment of the south-west monsoon period. The sun at this time is progressing slowly northward towards the northern Tropic. Hence the thermal equator is also progressing northward and with it the area of ascent of the south-east trades circulation. Thus the south-east trade winds cross the equator and advance further and further northward, as the thermal equator and area of ascent follows the sun in its northern progress. At the same time the temperature over India increases rapidly and barometric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea areas. Thus we have the southern Trades circulation extending northward and the local land and sea circulation extending southward until about the beginning of June the light unsteady interfering circulation over the Arabian Sea finally breaks up, the immense circulation of the south-east Trades, with its cool, moisture laden winds rushes forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by oceanic conditions—the **south-west monsoon** proper. This is the most important season of the year as upon it depends the prosperity of at least five-sixths of the people of India.

When this current is fully established a continuous air movement extends over the Indian Ocean, the Indian seas and the Indian land area from Lat. 30° S. to Lat. 30° N. the southern half being the south-east trades and the northern half the south-west monsoon. The most important fact about it is that it is a continuous horizontal air movement passing over an extensive oceanic area where steady evaporation is constantly in progress so that where the current enters the Indian seas and flows over the Indian land it is highly charged with aqueous vapours.

The current enters the Indian seas quite at the commencement of June and in the course of the succeeding two weeks spreads over the Arabian Sea and Bay of Bengal up to their extreme northern limits. It advances over India from these two seas. The Arabian Sea current blows on to the west coast and sweeping over the Western Ghats prevails more or less exclusively over the Peninsula, Central India, Rajputana and north Bombay. The Bay of Bengal current blows directly up the Bay. One portion is directed towards Burma, East Bengal and Assam while another portion curves to south at the head of the Bay and over Bengal, and then meeting with the barrier of the Himalayas curves still further and blows as a south-easterly and easterly wind right up the Gangetic plain. The south-west monsoon continues for three and a half to four months, *viz.*, from the beginning of June to the middle or end of September. During its prevalence more or less general though far from continuous rain prevails throughout India, the principal features of the rainfall distribution being as follows. The greater portion of the Arabian Sea current, the total volume of which is probably three times as great as that of the Bengal current, blows directly on to the west coast districts. Here it meets an almost continuous hill range, is forced into ascent and gives heavy rain alike to the coast districts and to the hilly range, the total averaging about 100 inches most of which falls in four months. The current after parting with most of its moisture advances across the Peninsula giving occasional uncertain rain to the Deccan and passes out into the Bay where it coalesces with the local current. The northern portion of the current blowing across the Gujarat, Kathiawar and Sind coasts gives a certain amount of rain to the coast districts and frequent showers to the Aravalli Hill range but very little to Western Rajputana, and passing onward gives moderate to heavy rain in the Eastern Punjab, Eastern Rajputana and the North-west Himalayas. In this region the current meets and mixes with the monsoon current from the Bay.

The monsoon current over the southern half of the Bay of Bengal blows from south west and is thus directed towards the Tenasserim hills and up the valley of the Irrawady to which it gives very heavy to heavy rain. That portion of this current which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low-lying districts of East Bengal and immediately thereafter coming under the influence of the Assam Hills is forced upwards and gives excessive rain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advances from the southward over Bengal, is then deflected westward by the barrier of the Hi-

malayas and gives general rain over the Gangetic plain and almost daily rain over the lower ranges of the Himalayas from Sikhim to Kashmir.

To the south of this easterly wind of the Bay current and to the north of the westerly wind of the Arabian Sea current there exists a debatable area running roughly from Hissar in the Punjab through Agra, Allahabad and part of Chota Nagpur to Orissa, where neither current of the monsoon prevails. In this area the rainfall is uncertain and would probably be light, but that the storms from the Bay of Bengal exhibit a marked tendency to advance along this track and to give it heavy falls of occasional rain.

The Total rainfall of the monsoon period (June to September) is 100 inches over part of the west coast, the amount diminishes eastward, is below 20 inches over a large part of the centre and east of the Peninsula and is only 5 inches in South Madras; it is over 100 inches on the Tenasserim and South Burma coast and decreases to 20 inches in Upper Burma: it is over 100 in the north Assam Valley and diminishes steadily westward and is only 5 inches in the Indus Valley.

The month to month distribution for the whole of India is:—

May	..	2·6 inches.
June	..	8·3 "
July	..	11·9 "
August	..	10·5 "
September	..	7·2 "
October	..	3·2 "

Cyclonic storms and cyclones are an almost invariable feature of the monsoon period. In the Arabian Sea they ordinarily form at the commencement and end of the season, *viz.*, May and November, but in the Bay they form a constantly recurring feature of the monsoon season. The following gives the total number of storms recorded during the period 1877 to 1901 and shows the monthly distribution:—

	Jan.	Feb.	Mar.	Apl.	May	June
Bay of Bengal	..	..	1	4	13	28
	July	Aug.	Sep.	Oct.	Nov.	Dec.
Bay of Bengal	41	36	45	34	22	8
	Jan.	Feb.	Mar.	Apl.	May	June
Arabian San	..	..	..	2	15	..
	July	Aug.	Sep.	Oct.	Nov.	Dec.
Arabian Sea	2	..	1	1	5	..

The preceding paragraphs give an account of the normal procession of the seasons throughout India during the year, but it must be remembered, that every year produces **variations from the normal**, and that in some years these variations are very large. This is more particularly the case with the discontinuous element rainfall. The most important variations in this element which may occur are:—

(1) Delay in the commencement of the rains over a large part of the country, this being most frequent in North Bombay and North-west India.

(2) A prolonged break in July or August or both.

(3) Early termination of the rains, which may occur in any part of the country.

(4) The determination throughout the monsoon period of more rain than usual to one part and less than usual to another part of the country. Examples of this occur every year.

About the middle of September fine and fresh weather begins to appear in the extreme north-west of India. This area of fine weather and dry winds extends eastward and southward, the area of rainy weather at the same time contracting till by the end of October the rainy area has retreated to Madras and the south of the Peninsula and by the end of December has disappeared from the Indian region; fine clear weather prevailing throughout. This procession with the numerous variations and modifications which are inseparable from meteorological conditions repeats itself year after year.

(*For monsoon of* 1933, *see page* 327).

INDIA METEOROLOGICAL DEPARTMENT.

Functions of the Department.—The India Meteorological Department was instituted in 1875 to combine and extend the work of various provincial meteorological services which had sprung up before that date. The various duties which were imposed on the Department at the time of its formation were from time to time supplemented by new duties. The main existing functions, more or less in the historical order in which they were assumed, may be briefly summarised as follows :—

(*a*) The issue of warnings to ports and coastal districts of the approach of cyclonic storms.

(*b*) The issue of storm warnings by wireless to ships in the Indian seas, and the making of arrangements for the collection of meteorological data from ships.

(*c*) The maintenance of systematic records of meteorological data and the publication of climatological statistics. These were originally undertaken in order to furnish data for the investigation of the relation between weather and disease.

(*d*) The issue to the public of up-to-date weather reports and of rainfall forecasts. These duties were originally recommended by a Committee of Enquiry into the causes of famine in India.

(*e*) Meteorological researches of a general character, but particularly regarding tropical storms and the forecasting of monsoon and winter rainfall.

(*f*) The issue of seasonal rainfall forecasts.

(*g*) The issue of telegraphic warnings of heavy rainfall by special telegrams to district officers on departmental warning lists (*e.g.*, canal and railway engineers), and by means of the ordinary daily weather telegram to the public in general.

(*h*) Supply of meteorological, astronomical and geophysical information in response to enquiries from officials, commercial firms or private individuals.

(*i*) Technical supervision of rainfall registration carried out under the control of provincial Government authorities.

(*j*) The study of temperature and moisture conditions in the upper air by means of instrument-carrying balloons and of upper winds by pilot balloons.

(*k*) The issue of weather reports and warnings to aircraft, civil and military, the latter being in collaboration with the Royal Air Force.

(*l*) Study of meteorology in relation to agriculture, a subject on which the Royal Commission on Agriculture in India made recommendations.

In addition to these meteorological duties the India Meteorological Department was from time to time made responsible for or undertook various other important duties, such as—

(*m*) Determination of time in India and the issue of time-signals, also the determination of errors of chronometers for the Royal Indian Marine and the Royal Navy.

(*n*) Observations and researches on terrestrial magnetism at Bombay and atmospheric electricity at Bombay and Poona.

(*o*) Regular study (mainly by spectroscopic examination) of the sun at the Solar Physics Observatory at Kodaikanal.

(*p*) Maintenance of seismological instruments at various centres.

Definitions of different types and classes of Observatories.—Before proceeding to indicate the organisation of the Meteorological Department, it may be helpful to introduce here the following definitions :—

Forecast Centre at which weather observations are collected by telegrams from a number of stations in order to form the basis of weather reports and forecasts issued therefrom. These may be (*a*) Main Centres, serving a large area for general purposes, or (*b*) Regional Centres serving more limited areas for special purposes.

Upper Air Observatory undertaking observations of upper winds, and of upper air temperatures, humidities and pressures up to heights of about 15-20 miles by means of sounding balloons (*i.e.*, balloons with self-recording instruments attached).

Air Observatory to which Royal Air Force supply aeroplane data of temperatures and humidities up to heights of 2 or 3 miles.

Pilot Balloon Observatory at which pilot balloons (*i.e.*, balloons without attached instruments) are released and observed through special theodolites for the determination of wind directions and velocities at various heights in the free atmosphere. The minimum staff is two full-time observers for one balloon flight per day and 3 full-time observers and a balloon maker for two balloon flights per day.

A meteorological or **weather observatory** for the observations of such elements as can be recorded by an observer with the help of instruments on the ground (as distinct from upper air observations obtained by means of balloons, etc.). Observatories where the staff is provided and paid for by other agencies, *e.g.*, Indian States, are called non-departmental although instruments are supplied by the Meteorological Department. These surface observatories are classified according to the number of observations per day and the number and kind of instruments to be read. Thus :

First class weather observatory which is furnished with autographic instruments for continuously recording pressure, temperature, humidity, wind direction and velocity, and rainfall, in addition to instruments read by eye. It may also undertake special observations (*e.g.*, on atmospheric electricity). The staff required varies from two part-time observers to about four full-time observers according to the amount of special work and of computation and tabulation of data.

Second class weather observatory at which observations are taken twice daily and usually telegraphed to one or more forecast centres. The existing standard times of observation in India are 8 hrs. (Local Time) and 17 hrs. (Indian Standard Time), the observations being made by a part-time observer on Rs. 25 per mensem. At certain second class observatoreis, practically all of which are non-departmental, observations are recorded twice daily, at 10 and 16 hrs. (Local Time) but not telegraphed.

Third class weather observatory where readings are taken daily at 8 hrs. and sent by telegram daily or by post at the end of each month to one or more forecast centres. At each observatory of this type there is one part-time observer on Rs. 15 a month.

Fourth class weather observatory at which observations (*a*) of temperature, wind and rainfall only or (*b*) of temperature and rainfall only are recorded. The staff of a 4th class observatory is one part-time observer on pay not exceeding Rs. 12 a month.

Fifth class weather observatory at which a part-time observer on Rs. 5 p.m. records and telegraphs rainfall only.

Magnetic Observatory equipped with instruments for continuously recording the principal magnetic elements.

Seismological station equipped with one or more continuously recording seismographs.

Time Observatory equipped with instruments for the determination of time from observations of sun and stars and from European wireless time signals.

Solar Physics Observatory equipped with photo-heliograph, spectro-heliograph, etc.

Auxiliary centre where a Professional or Meteorological Assistant receives copies of weather reports from the forecasting centres for transmission to pilots.

Organisation.—It is necessary to note that practical meteorology implies a meteorological organisation, not merely individual meteorologists relying upon their own personal and purely local observations. The making of a single forecast in any of the larger meteorological offices of the world requires the organised co-operation of some hundreds of persons. In India some 340 observers co-operate daily to take simultaneous observations at about 250 separate places and hand in their reports to telegraphists, who transmit them to forecast centres, where, for rapid assimilation, clerks decode them and chart them on maps; meteorological experts then draw therefrom the conclusions on which their forecasts are based. There are other observatories, which take observations for climatological purposes, but do not telegraph them. An efficient system of telegraphic communication of weather reports is an essential feature in all meteorological organisations. This is recognised in the International Telecommunication Convention.

As aviation has been and still is making increasing demands on meteorologists in India, it is easier to understand the constitution and needs of the department if we first consider the organisation unconnected with the development of aviation. This organisation consisted of a central office, 5 principal sub-offices, 23 pilot balloon observatories and 270* weather observatories principally of the third class distributed over a region stretching from Persia, Aden and Zanzibar on the west to Burma on the east. Of the six principal sub-offices, the one at Madras was closed down in 1932 as a measure of retrenchment. A brief summary of the present functions of the five remaining offices, apart from their duties on behalf of aviation, is given below:—

(*a*) **Headquarters Office, Poona (F. U. W.)**—The general administration of the department is carried on by the Headquarters Office in Poona. In addition, it is in immediate and complete charge of all second, third, fourth and fifth class weather observatories in Kashmir, Gujarat, Central India, the Central Provinces and the Peninsula and is responsible for the scrutiny of records and checking and computation of data received from them. It receives telegraphic reports of morning observations collected at practically all pilot balloon and first, second, third and fifth class observatories in India and issues daily a telegraphic summary of general weather conditions with forecasts of probable changes in weather during the next 24 hours for the whole country. It prepares and publishes the Daily, Weekly and Monthly Weather Reports, and an Annual Volume entitled the "India Weather Review"; and issues two annual volumes containing rainfall data of about 3,000 stations in India. In collaboration with the Agra Observatory, it also publishes an annual volume containing all upper air data collected in India. It undertakes the issue of heavy rainfall warnings for practically the whole country except north-east India, and the issue of warnings for storms in the Arabian Sea. It is responsible for the preparation of normals of rainfall, temperature, humidity, etc., for all observatories in India. It collects and examines weather logs from ships in the Arabian Sea. It supplies all weather observatories with instruments and stores from the stock, which it maintains. It is also

* The actual numbers were 10 first class, 2 second class, 200 third class and 29 each fourth and fifth class.

responsible for the design, specification, test and repair of all meteorological instruments. On its transfer from Simla to Poona, the Headquarters Office was equipped as an upper air observatory and a first class weather observatory and has also been designed to provide facilities for research in theoretical and practical meteorology. Publications of meteorological research in the Department are edited and issued from Poona.

A branch for agricultural meteorology was started a year and a half ago; it has been sanctioned for a period of three years and is financed by the Imperial Council of Agricultural Research. The work of this new branch can be classed under two heads: (*a*) statistical and (*b*) experimental. The programme of statistical investigation includes a critical enquiry into the available data on the area and yield of crops for the various presidencies and districts in India, after careful selection, the correlation of some of them with the accumulated meteorological data. On the experimental side, the scheme aims to study micro-climatology, evolve suitable instruments for such work, standardize methods of observations and in general undertake a detailed study of the air layer near the ground.

(b) Meteorological Office and Observatory, Alipore, Calcutta (F. P. W1, S.T.).—The Alipore Office serves as a regional forecast centre and is responsible for the publication of the Calcutta Daily Weather Report for north-east India, for storm-warning in the Bay of Bengal and heavy rainfall warning in north-east India. It has charge of all second, third, fourth and fifth class observatories in the area comprising Burma and the Bay Islands, Assam, Bengal, Bihar and Orissa and the east United Provinces, including the checking and computation of data therefrom. It also supplies time signals by time ball to Fort William, by wireless to shipping at sea and by telegraphic signal throughout the Indian telegraph and railway systems. It is also a first class weather observatory, pilot balloon observatory and seismological station.

(c) Upper Air Observatory, Agra (U. W1. S.).—Agra Observatory is the headquarters of all pilot balloon work in India. It is responsible for the maintenance and supervision of the work of the pilot balloon observatories in India, Burma and the Persian Gulf and supplies them with the equipment necessary to carry on their daily observations; these duties have necessitated the provision of a hydrogen factory to make hydrogen gas and compress it into tubes, as well as the provision of a workshop for the repair and manufacture of upper air and other instruments. All data from pilot balloon observatories are collected, checked and statistically summarised at Agra. This observatory is also the principal centre of upper air research work in India. The sounding balloon work there (in the course of which balloons have provided information of conditions up to as great a height as 90,000 feet) has been responsible for most of our present knowledge regarding the free atmosphere over India. There is a seismological station attached to this observatory.

(d) Colaba and Alibag Observatories (W1. S.T.M.).—These observatories specialise in the study of geophysics, particularly terrestrial magnetism and seismology, and in addition carry on the duties of a first class weather observatory. The routine magnetic work at Alibag, as well as the publication of the magnetic data, is arranged in accordance with the recommendations of the International Commission for Terrestrial Magnetism. The observatories take star or sun observations for the determination of time; and the Colaba Observatory is responsible for the time-ball service at the Bombay Harbour and the rating of chronometers belonging to the Royal Indian Marine and Royal Navy. In recent years researches on atmospheric electricity and microseisms in relation to major weather phenomena over the sea have also been undertaken there.

(e) Kodaikanal (Sp. W1. S.).—The observatory at Kodaikanal specialises in the study of the physics of the sun, and is specially equipped for spectroscopic observations and research. The routine work is decided in accordance with recommendations of the International Astronomical Union which prevent any serious overlapping of work in the comparatively few solar physics observatories in the world. This observatory also undertakes the duties of a first class weather observatory and a seismological station.

Special Organisation to meet the needs of Aviation.—The above represents the activities and organisation of the Department unconnected with aviation in India. With the development of civil and military aviation and rather rapid expansion of their activities in recent years fresh duties of a different character devolved upon the Department and necessitated a more or less complete overhaul of the pre-existing arrangements. Aviators require detailed information about the weather; they wish to know winds at different levels, have information about visibility, fogs, dust-storms, thunderstorms, height of low clouds, etc., along with forecasts of changes in these elements. Many of these are local, short-lived and rapidly changing phenomena.

Definite recommendations regarding the nature of information to be supplied to aircraft, the exhibition of current weather information at aerodromes and the meteorological organisation of international airways have been embodied in Annexe G of the International Convention of Air Navigation. In accordance with these recommendations, expert meteorologists should be stationed at aerodromes at reasonable intervals along the airway to supply to the aviation personnel current information and forecasts of weather conditions along the routes up to the next aerodrome of the same class. Forecast centres should be established at least at each main aerodrome along aerial routes and forecasts prepared at such centres should be transmitted to the other aerodromes for the information of pilots. Other recommendations refer to hours and kind of observations and manner of codifying them.

In Europe practically all observatories record and telegraph readings at least thrice daily, whiles tations near air routes do so every three hours. In the United States of America readings are made at least twice daily at all observa-

tories, every three hours at most observatories near air routes and every hour at observatories along air routes. In addition, every aerodrome receives by telewriter frequent regular reports from certain stations along the air routes, a few of these at half-hourly and most at hourly intervals in order that the aviators may be supplied with current up-to-date information of actual weather on the air route itself. The network of observatories in Europe and America is closer than the existing network in India.

A consideration of the meteorological needs of the Indian air-routes, in conjunction with the International recommendations and the meteorological practices of other countries, showed that at each observatory in India fuller and more frequent observations should be taken and be made available to aviators in internationally approved codes, and that the number of observatories and of forecasting centres should be increased. Between 1927 and 1930 forecasting centres were opened at Karachi, Delhi and, Rangoon, which, along with that at Calcutta provided a meteorological service for the international air-route across northern India, and it was the function of these offices gradually to organise a service that would provide the minimum recommended in Annexe G of the International Air Convention. The preparation of two weather charts per day was arranged at these forecast centres and steps were taken to raise to 2nd class status most of the existing weather observatories reporting to them and to create some new observatories*. Further, on account of the fuller observations required, new instructions for observers were drawn up, new registers for the recording of observations and new telegraphic codes more in conformity with international agreement and suited to the changed method of recording observations were prepared. These were introduced at practically all the observatories in India and Burma and also at stations along the Persian Gulf and Mekran coasts. It is regretted that, as a result of the general need for retrenchment the Meteorological Offices at Delhi and Rangoon. had to be closed with effect from the 1st January 1932 and that the meteorological service is, therefore, not able to attain the standard recommended in Annexe G of the International Convention even along the main northern air-route. The sole forecast centre in southern India is at Poona, where facilities are available for the issue of only one forecast daily.

With the opening of a chain of new wireless stations along the air route, a system of exchange of current weather reports at specified hours between stations on the route was introduced, with the co-operation of the Director of Wireless and the Director of Civil Aviation, enabling each wireless station to have in a collected form the information regarding actual weather at neighbouring stations on the air-route, for supply to fliers. Stations taking part in the scheme are Karachi, Jodhpur, Delhi, Allahabad, Calcutta, Chittagong, Akyab, Sandoway, Bassein and Victoria Point. Apart from routine observations at stated times, it is possible for fliers to obtain information of current local weather at any time by wireless, by special requisition.

For the Karachi-Madras service, arrangements exist for communicating current weather information to aerodromes from a few observatories on the route to supplement the information available in the reports supllied by the forecasting centres.

The Meteorological Department is also helping private flying in the country by undertaking to provide facilities at the several departmental centres for the training and examination of candidates for pilot's licenses who have to attain a certain amount of proficiency in meteorology as a part of their course.

The centres which supply forecasts for aviators are those at Quetta, Peshawar, Karachi, Calcutta and Poona, whose functions in this respect are indicated below†.

(*a*) **Quetta and Peshawar (F. W1. P. A.).**—Aviation on a regular basis was first started in this country by the Royal Air Force in north-west India, and the need to arrange for local forecasting was first experienced there. Two forecasts centres were accordingly started about seven years ago at Quetta and Peshawar, each under an R. A. F. Meteorologist who was entrusted with the charge of issuing forecasts of weather over the Lahore-Peshawar-Quetta-Karachi air routes for R. A. F. aeroplanes and detailed local forecasts and warnings each for his own immediate neighbourhood. The Meteorological Department has been supplying instruments for the use of the R. A. F. Meteorologists, meeting the cost of the staff of clerks and observers at each centre and supplying data by telegram from its observatories. An officer of the Indian Meteorological Service is now temporarily holding the post of the R. A. F. Meteorologist at Quetta.

(*b*) **Karachi (F. W1. P. A.).**—A forecast centre was established six years ago at Karachi, its initial function being the issue of weather reports and forecasts for the flying sector Karachi to Chahbar. Later, on the request of the Air Ministry, its area of responsibility extended up the Persian Gulf to Bushire on the west, and, when regular flying began in India, to Jodhpur on the east. The closure of Delhi Meteorological Office extended the Karachi Office's area as far eastwards as Allahabad. On the newly started Karachi-Madras air route it is responsible for the supply of weather reports and forecasts for the section between Karachi and Ahmedabad.

The forecasting office is temporarily located in Karachi Cantonment and will be transferred to Drigh Road Civil Aerodrome when buildings

* In connection with the Bushire to Rangoon aviation schemes 10 new pilot balloon observatories, 36 new weather observatories and a change in the status of more than half the existing 3rd class observatories were sanctioned bringing the total number of observatories, to 13 first, 175 second, 67 third, 29 fourth and 22 fifth class observatories.

† Fuller details of the aviation organisation are contained in the departmental pamphlet entitled "Meteorological Organisation in India for the supply of weather information to aviators."

are provided there. Meanwhile, a first class weather observatory and pilot balloon station have been started at Drigh Road.

The Karachi Office administers all second, third, fourth and fifth class observatories in Persia* and Arabia, Baluchistan, the North-West Frontier Province, the Punjab, Sind, Rajputana and the west United Provinces. As the basis of the weather reports and forecasts issued to aviators, it prepares two weather charts daily, drawn up mainly from observations received from the observatories under its own control. A daily weather report is also being published, as an experimental measure.

(*c*) **Calcutta.**—On the opening of the main trans-India air-route, Calcutta was made responsible for weather reports and forecasts to aviators between Gaya and Akyab. On the closure of the Meteorological Offices at Delhi and Rangoon, the region of responsibility was extended to Allahabad on the west and to Victoria Point on the south-east. An afternoon weather chart was added to meet the needs of aviation, and the area of the long-established morning chart has been extended with each extension of the area of responsibility.

(*d*) **Poona.**—The new forecasting centres the increased status of most weather observatories and generally increased activities of the Department have added considerably to the administrative and executive responsibility of the headquarters office at Poona. This office is responsible for the issue of weather reports to aviators on routes in central and southern India. In connection with the newly opened Karachi-Madras air service, this office will be responsible for the issue of weather reports for the major section, *viz.*, Ahmedabad to Madras. On certain occasions early morning observations of cloud heights made at Bombay are received and notified, by visual signal on the roof of the office building, to the passing air mail on its flight from Bellary to Bombay.

The auxiliary centres (C) are situated at RANGOON, AKYAB, DUM DUM†, ALLAHABAD and JODHPUR. The Professional or Meteorological Assistant stationed at these centres is authorised to add to the weather report received from the forecasting centres his own conclusions about the LOCAL weather situation. The latest information available regarding the local surface conditions and upper winds can also be obtained from him.

Possible developments, as financial conditions permit.—Some of the main lines, along which developments are to be desired as soon as financial conditions allow, are indicated briefly below :—

(*a*) The extension of the current weather report scheme on the wireless chain along the Trans-India air-route, by including immediate reports of adverse weather, transmission of upper wind information, and transmission twice daily at regular times of weather forecasts for each part of the air-route.

(*b*) The institution of a second daily weather Chart at Poona and additional facilities at Madras and some of the intermediate stations along the Karachi-Madras route.

(*c*) The improvement of the skeleton weather services along all air-routes, up to the standards recommended by the International Air Convention.

(*d*) Exchange of synoptic weather data by wireless with neighbouring countries—Siam, Malaya, Indo-China, etc.

(*e*) Broadcasting of a "continental" bulletin of synoptic weather data for the region, Persia to Indo-China, to help towards completion of the series of "continental" weather broadcasting stations at Annapolis (U.S.A.), Rugby, Moscow, etc., in the northern hemisphere.

(*f*) Further development of marine meteorology, in accordance with the recommendations of the International Convention on the Safety of Life at Sea.

(*g*) Development of upper air research in South India, which was one of the reasons for the transfer of the headquarters Office from Simla to Poona.

(*h*) Improvement of staff conditions in the workshop attached to the Poona Headquarters Office.

* Surface observations at Persian stations are taken at 4 and 14 hours. Greenwich Mean Time. (Add 5½ hours to convert to Indian Standard Time.)

† At present the functions of this centre are being carried on by the Meteorological Office at Calcutta, for want of proper building accommodation at Dum Dum.

MONSOON OF 1933.

The S. W. Monsoon of the year was markedly regular in its incidence and gave good rains well distributed in space and time over the whole country, and more or less in excess of the normal for each month throughout the season. All Divisions were well served as also the Sub-Divisions severally with the exception of East United Provinces and East Central India which returned small deficiences.

June.—The Arabian Sea current incident earlier than usual under the influence of a disturbance rising off the West coast of the Peninsula, was established on the Malabar coast on the 22nd May, and by the end of that month rapidly extended northwards over the Konkan coast and into the Bombay Deccan. Its activity, however, waned during the first week in June and the rainfall was confined to the West coast only upto Ratnagiri and to the Bombay Deccan. The current invigorated once again about the middle of the month under the influence of a low pressure wave moving northwards from Kanara-Konkan coast to Guzrat between the 18th and 21st June, carried the monsoon rains further northwards along the West coast and into Guzrat and Rajputana. By the 20th June it had extended into East and North Punjab, and by the 22nd into Kashmir and the North-West Frontier Province. Under the influence later of two low pressure areas over Bengal and West United Provinces the activity of the current over its own field was maintained to the end of the month.

The Bay monsoon current advancing in the wake of a storm in the Bay of Bengal was incident on the Burma coast during the last week in May. It extended into Assam by the 4th June and over the rest of North East India by the 9th. Under the stimulating action of a depression rising off the Circars-Orissa coast on the 12th June and moving north Westwards to Orissa, the activity of this branch was maintained upto the 20th, extending the rains also over the North Madras coast and into the East Central Provinces. In the last week of the month the formation of a depression over Bengal and of a low pressure area over the North West Provinces, influenced widespread rains practically over its whole field of activity, heavy in the neighbourhood of the depressions and causing severe floods in the West United Provinces. Notable heavy excesses were returned by the United Provinces, Punjab, Rajputana, Central India, and Hyderabad, respectively, of 76, 41, 164, 45, and 70 per cent. Averaged over the plains of India, the month's total rainfall was 10.06 inches, 16 per cent. in excess.

July.—Early in the month the monsoon was confined in the main to Malabar, Kanara, Hyderabad and Burma, and in the hills and sub-montane districts from Assam to Punjab. The current revived about the 12th July and its activity was fairly maintained to the end of the month under the influence of four depressions in the Bay which followed one after another traversing the country northwestwards. Fairly good rain was gathered generally over the country, specially along and around the tracks of the disturbances. The total rainfall for the month was 12.04 inches which was 2 per cent. in excess.

August.—For the first two weeks the activity of the currents on both sides was maintained under the influence and movements of two disturbances rising in the Bay, which taking the usual northwesterly course across the central parts of the country, gave widespread and heavy rains along and around their tracks. With the disappearance of these disturbances, the current weakened in the Peninsula, in the central parts of the country, and in lower Burma. The formation once again about the 18th August of a low pressure area this time off the West coast and moving northwards, invigorated the Arabian Sea branch keeping it active over the Peninsula to the end of the month. The Bay branch was strengthened after the 20th by a depression which formed over and moved from Bihar to South East Bengal between the 21st and 28th. It gave strong monsoon rains over the field of activity of this branch specially along the track of the disturbance. Notable excesses were returned by Punjab, North-West Frontier Province, Rajputana, Bombay, and Mysore, respectively, of 118, 66, 85, 80 and 117 per cent. The total fall for the month averaged over the plains of India was 12.33 inches, 14 per cent. in excess of the normal.

September.—Both branches continued to remain active during the month stimulated by four disturbances. The first rising off the West coast in the Arabian Sea about the 5th September and moving northwards to the Kathiawar coast by the 12th, strengthened that branch causing widespread rains in the western half of the Peninsula including Guzrat. The other three disturbances rising one after another in the Bay after the 7th kept that branch in active vigour to the end of the month, giving widespread rains practically over the whole country. Notable heavy excesses were returned by Punjab, North-West Frontier Province, Sind, Bombay, Cental, India, and Central Provinces, respectively, of 163, 134, 98, 64, 41 and 72 per cent. The total rainfall for the month was 8.85 inches, 20 per cent. in excess of the normal.

October.—During the month conditions determining the recession of the S. W. Monsoon current were evident. Early in the month thunderstorms prevailed in North East India and later upto the 11th over most of the Peninsula. A storm which formed in the Bay and a depression in the Arabian Sea about the 12th temporarily revived the currents upto the 22nd and determined widespread rains in the Peninsula, the central parts of the country, the United Provinces and North East India. For the rest of the month fairly good rains were gathered over the south of the Peninsula, and on the south Burma coast. The incursions of a Western disturbance about the middle of

the month and another about the 25th, which passing eastwards through Kashmir and giving widespread rains in Kashmir and the North-West Frontier Province heralded the retreat of the S. W. Monsoon and the establishment of the N. E. Monsoon. Notable excesses of rainfall were returned by the United Provinces, Central India, Hyderabad, and Mysore, respectively, of 131, 51, 45, and 53 per cent. Averaged over the plains of India the month was 3.61 inches whi in excess.

The total rainfall for the September—averaged over th was 43.7 inches which was 12 The following table gives det of the seasonal rainfall of the

Famine.

To the student of Indian administration nothing is more remarkable than the manner in which great problems arise, produce a corresponding outburst of official activity to meet them and then fall into the background. This general truth is illustrated by a study of the history of famine in India. For nearly forty years it was the bogey of the Indian administrator. The forecasts of the rains were studied with acute anxiety. The actual progress of the rains was followed with no less anxiety, and at the first signs of a bad or poor season the famine relief machinery was furnished up and prepared for any emergency. The reason for this is clear if we examine for a brief space the economic condition of the Indian peasantry. Nearly three-quarters of the people are directly dependent on agriculture for their daily bread. Very much of this agriculture is dependent on the seasonal rains for its existence. Immense areas in the Bombay Presidency, Madras, the United Provinces and Central India are in a region of erratic and uncertain rainfall. The rainy season is short and if for any natural reason there is a weakness, or absence, of the rain-bearing currents, then there is either a poor harvest or no harvest at all. In Western lands everyone is acquainted with the difference between a good and a poor season, but western countries offer no parallel to India, where in an exceptionally bad year wide tracts of thickly populated land may not produce even a blade of grass. In the old days there were no railways to distribute the surplus of one part of India to the districts where the crop had failed. There were often no roads. The irrigation works were few and were themselves generally dependent on the rainfall for their reserves. The people lived from hand to mouth and had no store of food to fall back upon. Nor had they any credit. In the old days then they died. Commencing with the Orissa famine in 1865-67 the Government of India assumed responsibility for the saving of human life in such crises. After the famine of 1899-1900 this responsibility was also shouldered by the Indian States. Stage by stage this responsibility was expressed in the evolution of a remarkable system of famine relief covering the whole field. But now that machinery has reached a remarkable degree of perfection, it is rusting in the official armouries, because the conditions have changed. The whole of India is covered with a network of railways, which distributes the produce of the soil to the centres where food is required. The extension of irrigation has enormously increased the product of the soil and rendered large areas much less dependent on the monsoon rainfall. At the same time the scientific study of the problems of Indian agriculture has raised the capacity of even the "dry" zones. The peasantry has accumulated a certain reserve against the rainless days from the prosperity which accompanied the period of high prices. The rapid spread of the co-operative credit movement has mobilised and strengthened rural credit. The spread of manufacturing enterprise has lightened the pressure on the soil. The relation of famine to the question of Indian administration has therefore changed. In an exceptionally bad year it may create administrative difficulties: it has ceased to be an administrative and social problem

Famine under Native Rule.

Famines were frequent under Native rule, and frightful when they came. "In 1630," says Sir William Hunter, in the History of British India, "a calamity fell upon Gujarat which enables us to realise the terrible meaning of the word famine in India under Native rule. Whole cities and districts were left bare of inhabitants." In 1631 a Dutch merchant reported that only eleven of the 260 families at Swally survived. He found the road thence to Surat covered with bodies decaying on the highway where they died, there being none to bury them. In Surat, that great and crowded city, he could hardly see any living persons; but "the corpses at the corner of the streets lie twenty together, nobody burying them. Thirty thousand had perished in the town alone. Pestilence followed famine." Further historical evidence was adduced by Sir Theodore Morrison in his volume on the Economic Transition of India. It has come to be seen that whilst railways have checked the old-fashioned practice of storing grain in the villages they have made the reserves, where they exist, available for the whole of India. In India there is now no such thing as a food famine; the country always produces enough food for the whole of the population; famine when it comes is a money famine and the task of the State is confined to providing the means for those affected by drought to earn enough to buy food. The machinery whereby this is done will be examined after we have seen the experiences through which it was evolved.

History of Recent Famines.

The Orissa famine of 1865-67 may be taken as the starting point because that induced to first great and organised effort to combat distress through State agency. It affected 180,000 square miles and 47,500,000 people. The Bengal Government was a little slow in appreciating the need for action, but late food was poured into the district in prodigious quantities. Thirty-five million units were relieved (a unit is one person supported for one day) at a cost 95 lakhs. The mortality was very heavy, and it is estimated that a million people or one-third of the population, died in Orissa alone. This was followed by the Madras famine of 1866, and the famine in Western India of 1868-70. The latter famine introduced India to the great migration from Marwar which was such a distinguishing feature of the famine of 1899-1900; it is estimated that out of a total population of a million and a half in Marwar, one million emigrated. There was famine in Behar in 1873-74, then came the great South Indian Famine of 1876-78. This affected Madras, Mysore, Hyderabad and Bombay for

two years and in the second year extended to parts of the Central and United Provinces and to a small tract in the Punjab. The total area affected was 257,000 square miles and the population 58,500,000. Warned by the excessive expenditure in Behar and actuated by the desire to secure economy the Government relief programme was not entirely successful. The excess mortality in this famine is said to have been 5,250,000 in British territory alone. Throughout British India 700,000,000 units were relieved at a cost of Rs. 8¾ crores. Charitable contributions from Great Britain and the Colonies aggregated Rs. 84 lakhs.

The Famine Codes.

The experiences of this famine showed the necessity of placing relief on an organised basis. The first great Famine Commission which sat under the presidency of Sir Richard Strachey, elaborated the Famine Codes, which amended to meet later experience, form the basis of the famine relief system to-day. They recommended (1) that employment should be given on the relief works to the able-bodied, at a wage sufficient for support, on the condition of performing a suitable task; and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land-owning classes should be assisted by loans, and by general suspensions of revenue in proportion to the crop failure. In sending a Famine Code to the provincial governments, the Government of India laid down as the cardinal feature of their policy that the famine wage "is the lowest amount sufficient to maintain health under given circumstances. Whilst the duty of Government is to save life, it is not bound to maintain the labouring population at its normal level of comfort." Provincial codes were drawn up, and were tested by the famine of 1896-97. In that 307,000 square miles were affected, with a population of 69,500,000. The numbers relieved exceeded 4,000,000 at the time of greatest distress. The cost of famine relief was Rs. 7½ crores, revenue was remitted to the extent of Rs. 1½ crore, and loans given aggregating Rs. 1¾ crore. The charitable relief fund amounted to about Rs. 1¾ crore, of which Rs. 1½ crore was subscribed in the United Kingdom. The actual famine mortality in British India was estimated at 750,000. The experiences of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, comparable with it in severity, and that the expense was moderate. But before the Local Governments had been given time to digest the proposals of this Commission or the people to recover from the stock, the great famine of 1899-1900 supervened.

The Famine of 1899-1900.

This famine affected 475,000 square miles with a population of 59,500,000. In the Central Provinces, Berar, Bombay, Ajmer, and the Hissar district of the Punjab famine was acute: it was intense in Rajputana, Baroda, Central India, Hyderabad and Kathiawar. It was marked by several distinctive features. The rainfall over the whole of India was in extreme defect, being eleven inches below the mean. In several localities there was practically no rain. There was in consequence a great fodder famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train. Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be famine immune, were affected; the people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late to save life. A very large area in the Indian States was affected, and the Marwaris swept from their impoverished land right through Central India like a horde of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale. At the end of July 4,500,000 persons were supported by the State, Rs. 10 crores were spent on relief, and the total cost was estimated at Rs. 15 crores. The famine was also marked by a widespread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme responsibility of saving human life. Aided by loans to the extent of Rs. 3½ crores, the Indian States did a great deal to bring their administration into line with that in British India. Although actual deaths from starvation were insignificant, the extensive outbreaks of cholera, and the devastating epidemic of malaria which followed the advent of the rains induced a famine mortality of approximately a million. The experiences of this famine were collated by the Commission presided over by Sir Antony MacDonnell. This Commission reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines. The cardinal feature of their policy was moral strategy. Pointing out that if the people were assisted at the start they would help themselves, whilst if their condition were allowed to deteriorate it proceeded on a declining scale, they placed in the forefront of their programme the necessity of "putting heart into the people." The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans, the early suspension of revenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance, and a full enlistment of non-official help. The wage scale was revised; the minimum wage was abolished in the case of able-bodied workers; payments by results were recommended; and proposals were made for saving cattle.

The modern system.

The Government of India are now in possession of complete machinery to combat the effects of drought. In ordinary times Government is kept informed of the meteorological conditions and the state of the crops; programmes of suitable relief works are kept up-to-date, the country is mapped into relief circles, reserves of tools and plant are stocked

If the rains fail, policy is at once declared, non-officials are enlisted, revenue suspended and loans for agricultural purposes made. Test works are then opened, and if labour in considerable quantities is attracted, they are converted into relief works on Code principles. Poor houses are opened and gratuitous relief given to the infirm. On the advent of the rains the people are moved from the large works to small works near their villages, liberal advances are made to agriculturists for the purchase of plough, cattle and seed. When the principal autumn crop is ripe, the few remaining works are gradually closed and gratuitous relief ceases. All this time the medical staff is kept in readiness to deal with cholera which so often accompanies famine, and malaria, which generally supervenes when the rains break.

Famine Protection.

Side by side with the perfection of the machinery for the relief of famine has gone the development of famine protection. The Famine Commission of 1880 stated that the best, and often the only means of securing protection from the extreme effects of famine and drought, are railways and irrigation. These are of two classes, productive and protective. Productive works being estimated to yield profits which will pay interest and sinking fund charges are met from loans; protective works, which do not pay, directly from revenue. In order to guarantee that there should be continuous progress with protective works, the Famine Insurance Grant was instituted in 1876. It was decided to set apart from the general revenues Rs. 1½ crores annually or one million sterling. The first charge on this grant is famine relief, the second protective works, the third the avoidance of debt. The chain of protective railways is now practically complete. Great progress is being made with protective irrigation. Acting on the advice of the Irrigation Commission an elaborate programme of protective irrigation works has been constructed, particularly in the Bombay Deccan—the most famine-susceptible district in India—and in the Central Provinces.

Under the Statutory Rules framed under the Government of India Act of 1919, Provincial Governments (except Burma and Assam) are required to contribute from their resources a fixed sum every year for expenditure on famine. These annual assignments can be expended on relief of famine only, the sum not required for this purpose is utilised in building up a Famine Relief Fund. The Fund provides, as its main and primary object, for expenditure on Famine Relief proper, the word "Famine" being held to cover famine due to drought or other natural calamities. The balance at the credit of the Fund is regarded as invested with the Governor-General in Council and is available for expenditure on famine, when necessary and, under certain restrictions, on protective and other works for relief of famine.

The Outlook.

Such in brief is the official programme and organisation which has been built up out of the experience and practice of the past. Yet everything goes to show that Government activity to save human life will never be wanted in the future on the colossal scale of former times, even so recently as 1899-1900. Each succeeding failure of the rains indicates that there has been in silent progress an economic revolution in India. In the year 1918 the rains failed more seriously and over a wider area than during any monsoon in the recent history of India. The deficiency in the rainfall was more marked than in the great famine of 1899. Yet such was the increased resisting power of the people that instead of a demand for State relief from over five millions, the maximum number at any time in receipt of public assistance was never so large as six hundred thousand. The shock to the social life of the community was insignificant; the effects of the drought completely disappeared with the good rains of the following year.

Increased Resisting Power.

The causes of this economic change in the conditions of India, whose influence is widespread are many. We can only briefly indicate them here. There is a much greater mobility in Indian labour. Formerly when the rains failed the ryot clung to his village until State relief in one form or another was brought almost to his doors. Now at the first sign of the failure of the rains he girds up his loins and goes in search of employment in one of the industrial centres, where the supply of labour is, when general economic conditions are normal, rarely equal to the demand, or on the constructional works which are always in progress either through State or private agency in the country. Then the ryot generally commands some store of value, often mistermed a hoard. The balance of exports in favour of India in normal times is approximately £50 millions a year. The gold and silver bullion in which this is largely liquidated is distributed all over the country, in small sums or in ornaments, which can be drawn upon in an emergency. The prodigious coining of rupees during the last two years of the war, and the continuous absorption of gold by India, represent small diffused savings, which take this form owing to the absence of banking institutions and lack of confidence in the banking system. There has been a large extension of irrigation. More than one-third of the land in the Punjab is now under irrigation, and in other Provinces, particularly in the famine-susceptible tracts of the Bombay Deccan, irrigation works have been constructed, which break the shock of a failure of the rains. The natural growth of the population was for some years reduced by plague and famine diseases, followed by the great influenza epidemic of 1918-19, which swept off five millions of people. This prevented the increase of congestion, but brought some areas particularly in the Indian States, below their former population-supporting capacity. (The 1931 census showed an increase of over 30 million in the population since 1921.) The increase of railways distributes the resources of the country with ease; the spread of the co-operative credit movement has improved rural credit. Finally, there is the considerable development of manufacturing industry, which is generally short of labour and helps to absorb the surplus of a famine year. Whilst the Government is completely equipped with a famine code, there is no reason to suppose that there will ever recur such an emergency as

that of 1899. Famine can now be efficiently met by the liberal distribution of tagavi, the suspension and remission of the land revenue demand, the relief of the aged and others who cannot work, the provision of cheap fodder for the cattle, with possibly some assistance in transporting the affected population of the famine-affected tract to the industrial centres.

The increased resisting power of the people was effectively demonstrated during the famine of 1920–21, which was due to the failure of the monsoon towards the end of the year 1920. The distress which appeared in the end of 1920 persisted during the early months of 1921 and regular famine was declared in parts of Madras, Bombay, Central Provinces and Baluchistan. Local distress prevailed also in Bengal, Punjab and Central India. The largest number of persons on relief of all kinds did not exceed 0·45 million which was considerably less than 3% of the total population of the area affected by the failure of the monsoon.

The Indian People's Famine Trust.

Outside the Government programme there is always scope for private philanthropy, especially in the provision of clothes, help for the superior class poor who cannot accept Government aid, and in assisting in the rehabilitation of the cultivators when the rains break. At every great famine large sums have been subscribed, particularly in the United Kingdom, for this purpose, and in 1899-1900 the people of the United States gave generous help. With the idea of providing a permanent famine fund, the Maharaja of Jaipur gave in 1900 a sum of Rs. 15 lakhs, in Government securities to be held in trust for the purposes of charitable relief in seasons of general distress.

This Trust in a few years became swollen to Rs. 28,10,000 and has ever since been maintained at that figure. It is officially called the Indian People's Famine Trust, and was constituted under the Charitable Endowment Act, 1890. The income of the Trust is administered by a board of management consisting of 13 members appointed from different provinces and Indian States, Sir Ernest Burdon, KT., C.S.I., C.I.E., I.C.S., Auditor-General in India, is the Secretary & Treasurer of the Trust. The original endowmennt of Rs. 28,10,000 above mentioned is permanently invested and the principal never taken for expenditure. The income from it is utilised for relief work as necessary and unexpended balances are temporarily invested, so as to make available in years of trouble savings accumulated when expenditure is not necessary. The temporary investments— in Government Securities—at the end of 1933 stood at Rs. 7,82,751-13-0 and the cash balance at the same time was Rs. 41,260-8-0, so that the total available for expenditure at the commencement of 1934 was Rs. 8,24,012-5-0.

The whole conditions to meet which the Trust was founded have changed in recent years. This is the result of the improved policy of Government in regard to famine relief and of the difference in the meaning of the word famine in consequence of the improvement of transport communications and other factors affected by modern progress. An area stricken by failure of seasonal rains now obtains supplies from other regions in a manner impossible before the development of railways and of modern marketing practice and Government help its people by loans given direct or through Co-operative Societies to tide them over the period of scarcity. The experience of successive visitations of scarcity in different parts of the country also proves that the general economic progress of the people makes them able to meet temporary periods of stress in a manner formerly unimaginable. Famine in the old terrible sense of the term has in fact ceased to occur. This was well illustrated by the events of 1919, when the land suffered from a failure of the rains more general throughout India and worse in degree than any previously recorded by the Meteorological Department but the crisis was borne with a minimum of suffering. The demands upon the Famine Trust have consequently so greatly diminished in their original sense that hardly any money is now distributed from it for the relief of famine in the proper sense of the word, resulting from rain failure and expenditure has mainly become grants of assistance to sufferers from floods. The total expenditure upon real famine in the old sense was only Rs. 50,000 during the year 1929, while expenditure on relief of distress caused by floods was Rs. 4,75,000 in the same year. The terms of the Trust fortunately, permit of management on lines according with modern needs.

The following statement shows the income and expenditure of the Trust during the past twenty-three years, the figures at the end of 1933 being the latest available for a complete year.

(a) Includes a bequest of Rs. 26,545.
(b) Includes Rs. 3,366 refunded from the grant made in 1900 for the maintenance of Rajputana Orphans.
(c) Represent refunds from grants made in previous years.
(d) Includes Rs. 182 and Rs. 25,000 refunded from the grants made in 1927 to Bihar and Orissa and Bombay respectively.
(e) In addition a sum of Rs. 25,000 being the surplus balance of the grant made in 1927 to the Bombay Central Flood Relief Fund was allowed to be transferred to the Bombay Government for relief of distress in Sind.
(f) Includes Rs. 37,691 transferred from United Provinces Orphan's Fund representing it cash balance at the end of 1932-33.

Hydro-Electric Development.

India promises to be one of the leading countries of the world in regard to the development of hydro-electric power and great strides in this direction have already been made. India not only specially lends itself to projects of the kind, but peremptorily demands them. Cheap motive power is one of the secrets of successful industrial development and the favourable initial conditions caused by the war, the enthusiasm for industrial development which has seized nearly all classes of educated Indians, and the special attention which the circumstances of the war have compelled Government to direct towards the scientific utilisation of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years. Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way. India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil. These commodities are all difficult to obtain, and costly in India except in a few favoured areas. Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy. Water power and its transmission by electricity offer, on the other hand, immense possibilities, both as regards the quantity available and the cheapness at which the power can be rendered, in all parts of India.

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year. Perennial rivers with sufficient water throughout the year are practically non-existent in India. Water, therefore, must be stored for use during the dry season. Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfalls occur and the progress already made in utilising such opportunities by the electrical transmission of power affords high encouragement for the future. Further, hydro-electric schemes can frequently be associated with important irrigation projects, the water being first used to drive the turbines at the generating stations, and then distributed over the fields.

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India. On this recommendation the Government of India in 1918 appointed the late Mr. G. T. Barlow, C.I.E., then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr. J. W. Meares, M.I.C.E., Electrical Adviser to the Government of India. Mr. Barlow died, but Mr. Meares issued a preliminary report in September, 1919, summarising the state of knowledge of the problem in India and outlining a programme of investigation to be undertaken in the course of the inquiry. Mr. Meares showed that industries in India absorbed over a million horse power, of which only some 285,000 h.p. is supplied by electricity from steam, oil or water; the water power so far actually in sight amounts to 1¾ million horse-power, but this excludes practically all the great rivers, which are at present uninvestigated. Thus the minimum flow of the seven great rivers eastward from the Indus is stated to be capable of giving not less than three million horse-power for every thousand feet of fall from the Himalayas, while similar considerations apply to rivers in other parts. Some doubt is expressed as to the estimate of seven million horse-power in the Irrawaddy and Chindwin rivers, given in the report of the London Conjoint Board of Scientific Studies.

The Report points out that the Bombay Presidency holds a unique position owing to its great existing and projected schemes at Lonavla, the Andhra Valley, the Nila Mula and the Koyna Valley and has the still greater advantage of possessing a firm ready to develop its resources.

Bombay Hydro-Electric Works.

The greatest water-power undertakings in India—and in some respects the greatest in the world—are the Tata hydro-electric schemes recently brought to fruition, and constantly undergoing expansion, for the supply of power in the city of Bombay. Bombay is after London the most populous city in the British Empire and it is the largest manufacturing town in Asia. Its cotton mills and other factories use over 100,000 horse power of mechanical energy and until a year or two ago this was almost entirely provided by steam, generated by coal coming from a distance—mostly Bengal. The Tata Hydro-Electric Power Scheme, now an accomplished fact, marked one of the big steps forward made by India in the history of its Industrial development. It was the product of the fertile brain of Mr. David Gostling, one of the well known characters of Bombay, nearly a generation ago. The exceptional position of the Western Ghats, which rise 2,000 feet from sea-level which is a very short distance of the Arabian Sea, and force the monsoon as it sweeps to land, to break into torrential rain at the mountain passes was taken full advantage of and the table lands behind the Ghats form a magnificent catchment area to conserve this heavy rainfall in. Mr. Gostling pressed the scheme on the attention of Mr. Jamsetji Tata for years, and with perseverance collected data which he laid before that pioneer of the larger industries in India. He summoned the aid of experts from England to investigate the plan. The scheme was fully considered for six long years. Meanwhile both Mr. J. N. Tata and Mr. David Gostling passed away, but the sons of the former continued the work of their father and on Mr. Gostling's death, Mr. R. B. Joyner's aid was sought to work out the Hydraulic side of the undertaking.

The scheme completed, a syndicate secured the license from Government and an endeavour was made to enlist the support of financiers of England who tried to impose terms which were not acceptable. Meanwhile, the attention of Sir George Clarke (now Lord Sydenham), then Governor of Bombay, and an engineer of distinction himself, was drawn to the scheme. The interest shown by him drew the attention of Indian Chiefs in the Presidency of Bombay and outside it to its possibilities, funds flowed in and a company was started.

The hydro-electric engineering works in connection with the project are situated at and about Lonavla above the Bhor Ghat. The rainfall is stored in three lakes at Lonavla, Walwhan and Shirawta, whence it is conveyed in masonry canals to the forebay or receiving reservoir. The power-house is at Khopoli, at the foot of the Ghats, whither the stored water is conveyed through pipes, the fall being one of 1,725 feet. In falling from this height the water develops a pressure of 750 lbs. per square inch and with this force drives the turbines or water wheels. The scheme was originally restricted to 30,000 electrical horse power, but the Company, in view of the increasing demand for power from the Bombay mills, decided to extend the works by building the Shirawta Dam, the capacity of the scheme being increased to more than 40,000 electrical horse power. The works were formally opened by H. E. the Governor of Bombay on the 8th February 1915. At present there are about 44 mills with motors of the aggregate b. h. p. of 55,000 h. p. in service. In addition to the cotton and flour mills which have contracted to take supply from the Company for a period of ten years, an agreement has been completed whereby the Tata Hydro-Electric Company, the Andhra Valley Power Supply Company and the Tata Power Company between them supply the whole of the electric power required by the Bombay Electric Supply and Tramways Company, Limited, and also the power for the electrification of the Harbour Branch and Bombay-Kalyan section of the G. I. P. Railway. There remain many prospective buyers of electrical energy and the completion of the Company's full scheme will not suffice for all such demands. Besides the Bombay cotton mills, which alone would require about 100,000 horse power, there are, for instance, tramways, with possibilities of suburban extensions. The probable future demand is roughly estimated at about 160,000 h. p. Recently the Company has embarked upon a considerable scheme of extensions, these involving the impounding of a fourth lake at Kundley, near Lonavla, the duplication of the pipe line and the installation of additional machinery at the power house at Khopoli.

Investigations undertaken by Mr. H. P. Gibbs, with a view to further developing the electrical supply led to the discovery of a highly promising water storage site in the valley of the Andhra river, situated near the present lakes previously overlooked, as altogether different treatment and design were required. In this instance the draw off point is 11 miles upstream from the dam and at a level 112 ft. above the lowest river bed level at the dam. The water is taken through a tunnel 8,700 ft. long driven in solid trap rock through the scarp of the ghauts of which the pressure pipes are an extension. Seventy feet of the upper water in the lake can be drawn off comprising 75 per cent. of the total amount of water stored both above and below draw off level. A scheme was prepared to be carried out by a separate company and providing for holding up the Andhra river by a dam, about a third of a mile long and 192 feet high, at Tokerwadi. This dam holds up a lake nearly twelve miles long, the further end of which approaches the brink of the Ghats at Khand. Here, a tunnel, a mile and a quarter long, carries the water to the surge chamber, whence it enters the pipes for a vertical drop of about 1,750 feet to the generating station at Bhivpuri, about 17 miles from the generating station at Khopoli. The scheme is designed to yield 100,000 horse power in its full development. Power is being supplied to some thirty factories in Bombay absorbing roughly 40,000 electrical horse-power, as well as to the Bombay Electric Supply and Tramways Company and to the G. I. P. Railway for the first stage of their electrification scheme.

Just as the Andhra project has been developed as a northward extension of the original scheme, so a southward development also originated by Mr. Gibbs and developable on lines similar to those of the Andhra project is now practically completed under the name of the Nila-Mula scheme, the name arising from the fact that the valleys of the Nila and Mula rivers are being dammed for the conservation of water for it. A company entitled The Tata Power Co., Ltd., was floated in the autumn of 1919.

A lake having an area of sixteen square miles and a catchment area of 112 square miles has been formed at Mulshi by the erection of a masonry dam 4,100 feet in length and 158 feet in height. At the end of the lake opposite to the site of the dam, a tunnel has been cut through the Western Ghats to a total length of 14,500 feet, at the further end of which the water enters the pipe line and descends to the turbine power house at Bhira, 1,750 feet below. The head of water is sufficient to generate 150,000 electrical horse-power at 11,000 volts, and after being transformed up to 110,000 volts the current is transmitted to the receiving station at Dharavi, Bombay, through an overhead line approximately 80 miles in length. Five generating units each of 30,000 electrical horse-power are being erected, and of these two are already in commercial operation. The power will be absorbed by mills, factories and local area not yet electrified in Bombay and suburbs as well as by the B. B. & C. I. Railway's suburban service, the G. I. P. Railway's electrified service within thirty miles of Bombay and the evergrowing needs of the B. E. S. & T. Company.

Nearly 100 miles southward of this Messrs. Tata propose to erect two dams in the huge valley of the Koyna river, proposed by Mr. A. T. Arnall and developable on lines similar to the two projects by Mr. Gibbs above mentioned, partly to supply power to Bombay and partly to develop a great assembly of electro-chemical industries near the power installation. The prelimi-

nary investigations for this scheme are still proceeding. The catchment area for the lake will be 346 square miles and there will be a total storage after the rains of 112,600 million cubic feet, which will be sufficient to supply a normal load of 350,000 horse power for 8,000 hours per year. The preliminary estimates provided for a capital of Rs. 810 lakhs to carry out the scheme.

Mysore Installation.

The first hydro-electric scheme undertaken in India or, indeed, in the East, was that on the River Cauvery, in Mysore State, which was inaugurated, with generating works at Sivasamudram, in 1902. The Cauvery rises in the British district of Coorg, and flows right across Mysore. The first object with which the installation was undertaken was the supply of power to the goldfields at Kolar. These are 92 miles distant from Sivasamudram and for a long time this was the longest electrical power transmission line in the world. Current is also sent to Bangalore, 59 miles away, where it is used for both industrial and lighting purposes.

The initial undertaking has constantly been expanded since its inauguration, so that its total capacity, which was at first 6,000 horse power, is now approximately 25,000 h.p. This is the maximum obtainable with the water which the Cauvery affords and, therefore, with the number of consumers, large and small, rapidly increasing, the necessity of a completely new installation elsewhere, to be operated in parallel with or separately from that at Sivasamudram, has been recognised. Two projects offer themselves. The first would involve the use of the River Shimsha, a tributary of the Cauvery which has natural falls, and the second, known as the Mekadatu project, would have its power house on the Cauvery, 25 miles down-river from Sivasamudram and just within the borders of Mysore State, adjacent to the Madras Presidency. The head of water available at Sivasamudram is 400 feet, that on the Shimsha 618 feet net, which would generate 39,500 e. h. p. At Mekadatu the Cauvery runs in rapids and a dam and a channel 20,000 feet long with a 22½ feet bed would be necessary. There would be three generating units, each giving an output of 4,000 e.h.p. Future extensions yielding an additional 8,000 h.p. could be made. The progressive spirit which has marked the management of the works since their inception now characterises the manner in which the problem of further extensions are being considered.

Works in Kashmir.

A scheme of much importance from its size, but more interesting because of the developments that may be expected from it than for the part which its current supply already plays in the life of the countryside, is one installed a few years ago by the Kashmir Durbar, utilising the River Jhelum, near Baramulla, which lies thirty-four miles north-west of Srinagar. The head works of the Jhelum power installation are situated six and a half miles from the power house and the main connection between the two is a great timber flume. These works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the generation of 20,000 electrical horse power. Four pipes 600 feet long lead from the forebay to the power house, and from forebay to waterwheel there is an effective head of 395 feet. There are four vertical waterwheels, each coupled on the same shaft to a 1,000 k.w., 3-phase, 2,300 volt, 25-period generator running at 500 r.p.m., and each unit is capable of taking a 25 per cent. overload, which the generator end is guaranteed to maintain with safety for two hours. The power house is of sufficient capacity to allow of 15,000 k.w. generating plant being installed within it. Two transmission lines run side by side as far as Baramulla, 21 miles distant, at which point one terminates. The other continues to Srinagar, a further 34 miles. The installation at Baramulla was originally utilised for three floating dredgers and two floating derricks, for dredging the river and draining the swampy countryside and rendering it available for cultivation, but these operations have temporarily been curtailed, so that only one dredger is now in operation. The lighting of Baramulla has been taken in hand with satisfactory results and it is expected that the lighting demand will rapidly increase and that a small demand for power will soon spring up. At Srinagar, the line terminates at the State silk factory, where current is supplied not only for driving machinery and for lighting, but for heating. The greater part of Srinagar city is now electrically lighted and during the past year a motor load of over 100 k.w. has been connected with the mains, motors being hired out to consumers by the Electrical Department. This step was taken with a view to educating the people in the use of electric power and it has been entirely successful.

Recent Progress.

Apart from the development of the three projects in the Bombay Presidency the past few years have witnessed comparatively little progress in hydro-electric works. The Mandi Project in the Punjab, which utilises the water of the Uhl river for the generation of power with which a large number of towns in that province will be electrified came into operation in 1933. The scheme has been formulated in three stages. The first is to develop 48,000 horse-power from the ordinary discharge of the river; the second involves the formation of a storage reservoir by the construction of a dam and would double the electrical output; whilst the third would utilize the same water several miles down-stream and provide an additional 64,000 horse-power. Only the first stage is at present constructed. Another interesting project is the hydro-electric grid scheme in the United Provinces which will carry electric power to a large number of towns and villages and will, it is anticipated, assist greatly in the development of rural areas.

A small plant was completed and put into operation at Naini Tal during 1923, and the erection of another small plant was commenced

at Shillong, but otherwise there is nothing to record. It is interesting to note, however, that preliminary investigations are proceeding with a view to the erection of hydro-electric plants in various parts of India. In the tea districts of Kalimpong and Kurseong, for example, it is proposed to harness a promising water-power site and to supply current to an important area in which are situated more than two hundred tea factories.

The Sutlej Hydro-Electric Project, at one time appeared to be one of the most promising propositions in the country, but owing to financial considerations it has now been indefinitely shelved. In Southern India a large number of sites have been investigated, and of these one on the Pykara river in the Nilgiris and another on the Kallar river on the borders of Travancore have been selected for development if and when the financial considerations can be satisfactorily settled. The Pykara river scheme is of some magnitude, and it is estimated that upwards of 50,000 horse-power will be available for electro-chemical industries which it is proposed to establish at Calicut on the West Coast. The Kallar river project is very much smaller, but it is interesting in being a scheme in which the Government of Madras and the Travancore Darbar will be jointly responsible, for the power house will be located on the British side of the river and the current transmitted to and distributed in Travancore State. Finally, there is a big combined project of hydro-electrification and irrigation in Hyderabad State. This scheme is still very much in the air, but the fact that it is under consideration is worthy of being placed on record in view of the somewhat unusual circumstance in India, that the tail water from the turbines will be made available for agricultural purposes and not allowed to run to waste.

The fact that the Bombay Electric Supply and Tramways Company has shut down its steam-driven generating plant and now takes its supply in bulk from the various Tata companies has been recorded above, and it is of more than passing interest to note that the Poona Electric Supply Company has recently adopted a similar course. This is a phase of hydro-electric distribution which is quite in its infancy in India, but it is possible to foresee the time when every village within a couple of hundred miles of a hydro-electric power station will receive its supply of electric current in bulk, thus greatly reducing capital and administrative charges and minimising the price of current to the consumer. It is a system which has become something of a fine art in California, where current is transmitted by overhead wires for many hundreds of miles at a pressure of 200,000 volts, or double the pressure commonly employed in India for overhead long-distance transmission.

Local Self-Government.

A field of the administration of India profoundly affected by the Reforms of 1919 is that of local government. This is one of the subjects transferred to Indian ministers, and under their leadership considerable developments have been essayed. On the whole, the progress of local government in India for the past quarter of a century has been disappointing. The greatest successes have been won in the Presidency towns, and particularly by the Municipality of Bombay. The difficulties in the way of progress were manifest. Local government had to be a creation —the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration. Again, the powers entrusted to local bodies were insignificant and the financial support was small. There are however many indications that the dry bones of the mofussil are stirring.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from the villages are built up the larger administrative titles—tahsils, sub-divisions, and districts.

"The typical Indian village has its central residential site, with an open space for a pond and a cattle stand. Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood-cutting.... The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a little community with its own organisation and government, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, *e.g.*, in the greater part of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads."—(*Gazetteer of India.*)

The villages above described fall under two main classes, *viz.*—

Types of Villages.—"(1) The 'severalty' or raiyatwari village which is the prevalent form outside Northern India. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers, though some of the non-cultivated lands may be set apart for a common purpose, such as grazing, and waste land may be brought under the plough only with the permission of the Revenue authorities, and on payment of assessment. The village government vests in a hereditary headman, known by an old vernacular name, such as *patel* or *reddi*, who is responsible for law and order, and for the collection of the Government revenue. He represents the primitive headship of the tribe or clan by which the village was originally settled."

"(2) The joint or landlord village, the type prevalent in the United Provinces, the Punjab and the Frontier Province. Here the revenue was formerly assessed on the village as a whole, its incidence being distributed by the body of superior proprietors, and a certain amount of collective responsibility still, as a rule, remains. The village site is owned by the proprietary body who allow residences to the tenantry, artisans, traders and others. The waste land is allotted to the village, and, if wanted for cultivation, is partitioned among the shareholders. The village government was originally by the *punchayet* or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities; but the artificial character of this appointment, as compared with that which obtains in a raiyatwari village is evidenced by the title of its holder, which is generally *lambardar*, a vernacular derivative from the English word 'number.' It is this type of village to which the well-known description in Sir H. Maine's *Village Communities* is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants of labourers under them."

Village Autonomy.—The Indian villages formerly possessed a large degree of local autonomy, since the native dynasties and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now disappeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the increase of communications, the growth of individualism, and the operation of the individual *raiyatwari* system, which is extending even in the north of India. Nevertheless, the village remains the first unit of administration; the principal village functionaries—the headman, the accountant, and the village watchman—are largely utilised and paid by Government, and there is still a certain amount of common village feeling and interests.

Punchayets.—For some years there was an active propaganda in favour of reviving the village council-tribunal, or *Punchayet* and the Decentralisation Commission of 1908 made the following special recommendations:—

"While, therefore, we desire the development of a *punchayet* system, and consider that the objections urged thereto are far from insurmountable we recognise that such a system can only be gradually and tentatively applied, and that it is impossible to suggest any uniform and definite method of procedure. We think that a commencement should be made by giving certain limited powers to *Punchayets* in those villages in which circumstances are most favourable by reason of homogeneity, natural intelligence, and freedom from internal feuds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages. Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination between the circumstances of different villages; and there is a considerable consensus of opinion that this new departure should be made under the special guidance of sympathetic officers."

This is, however, still mainly a question of future possibilities, and for present purposes it is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too early to say what life they have. The Punjab Government has passed a Village Punchayat Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judicial power, both civil and criminal of a minor character, may be assigned. In Bihar a Village Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases. Other Governments are taking steps in the same direction.

Municipalities.—The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute, from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self-government, these Acts did not proceed far. It was not until after 1870 that much progress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, medical, charity, and local public works. New Municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced. In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government. Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of municipal bodies, a wide extension being given to the elective system, while independence and responsibility were conferred on the committees of many towns by permitting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility, some items of provincial revenue [illegible] ited to and capable of development under [illegible] al management being transferred, with a proportionate amount of provincial expenditure, for [illegible] al objects. The general principles thus laid down have continued to govern the administration of municipalities down to the present day.

The Present Position.—There are some 781 municipalities in British India, with something over 21 million people resident within their limits. Of these municipalities, roughly 710 have a population of less than 50,000 persons and the remainder a population of 50,000 and over. As compared with the total population of particular provinces, the proportion resident within municipal limits is largest in Bombay, where it amounts to 20 per cent., and is smallest in Assam where it amounts to only 2 per cent. In other provinces it varies from 4 to 9 per cent. of the total population. Turning to the composition of the municipalities, considerably more than half of the total members are elected and there is a steady tendency to increase this proportion. Ex-officio members are only 7 per cent. and nominated 25 per cent. Elected members are almost everywhere in a majority. Taking all municipalities together, the non-officials outnumber the officials by nearly six to one. The functions of municipalities are classed under the heads of Public Safety, Health, Convenience and Instruction. For the discharge of these responsibilities, there is a municipal income of Rs. 14·03 crores derived principally from taxation, just over one-third coming from municipal property, contributions from provincial revenues and miscellaneous sources. Generally speaking, the income of municipalities is small, the four cities of Calcutta, Bombay, Madras and Rangoon together providing over 40 per cent. of the total. The heaviest items of this expenditure come under the heads of "Conservancy" and "Public Works" which amount to 14 per cent. and 13 per cent. respectively, "Water-supply" comes to 13 per cent., "Drainage" to 4 per cent. and "Education" to over 11 per cent. In some localities the expenditure on education is considerably in excess of the average. In the Bombay Presidency, excluding Bombay City, for example, the expenditure on education amounts to more than 21 per cent. of the total funds, while in the Central Provinces and Berar is is over 17 per cent.

District Boards.—The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards. In almost every district of British India save in the province of Assam, there is a board subordinate to which are two or more sub-district boards; while in Bengal, Madras and Bihar and Orissa, there are also Union Committees. Throughout India at large there are some 207 district boards with 584 sub-district boards besides 455 Union Panchayats in Madras. This machinery has jurisdiction over a population which was over 221 millions in 1930-31. Leaving aside the Union Committees and Union Boards or Panchayats the members of the Boards numbered over 16,000 in 1930-31, of whom 73 per cent. were elected. As in the case of municipalities the tendency has been throughout India to increase the elected members at the expense of the nominated and the official members. The Boards are practically manned by Indians, who constitute 96 per cent. of the whole membership. Only 11 per cent. of the total members of all boards are officials of any kind. The total income of the Boards in 1930-31 amounted to Rs. 16·57 crores, the average income of each board being Rs. 2,00,000. The most important item of revenue is provincial rates, which represent a proportion of the total income varying from 25 per cent. in Bombay and in the N. W. F. Province to 63 per cent. in Bihar and Orissa. The principal objects of expenditure are education which has come re-

Local Self-Government.

A field of the administration of India profoundly affected by the Reforms of 1919 is that of local government. This is one of the subjects transferred to Indian ministers, and under their leadership considerable developments have been essayed. On the whole, the progress of local government in India for the past quarter of a century has been disappointing. The greatest successes have been won in the Presidency towns, and particularly by the Municipality of Bombay. The difficulties in the way of progress were manifest. Local government had to be a creation —the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration. Again, the powers entrusted to local bodies were insignificant and the financial support was small. There are however many indications that the dry bones of the mofussil are stirring.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from the villages are built up the larger administrative titles—tahsils, sub-divisions, and districts.

"The typical Indian village has its central residential site, with an open space for a pond and a cattle stand. Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood-cutting.... The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a little community with its own organisation and government, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, *e.g.*, in the greater part of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads."—(*Gazetteer of India.*)

The villages above described fall under two main classes, *viz.*—

Types of Villages.—"(1) The 'severalty' or raiyatwari village which is the prevalent form outside Northern India. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers, though some of the non-cultivated lands may be set apart for a common purpose, such as grazing, and waste land may be brought under the plough only with the permission of the Revenue authorities, and on payment of assessment. The village government vests in a hereditary headman, known by an old vernacular name, such as *patel* or *reddi*, who is responsible for law and order, and for the collection of the Government revenue. He represents the primitive headship of the tribe or clan by which the village was originally settled."

"(2) The joint or landlord village, the type prevalent in the United Provinces, the Punjab and the Frontier Province. Here the revenue was formerly assessed on the village as a whole, its incidence being distributed by the body of superior proprietors, and a certain amount of collective responsibility still, as a rule, remains. The village site is owned by the proprietary body who allow residences to the tenantry, artisans, traders and others. The waste land is allotted to the village, and, if wanted for cultivation, is partitioned among the shareholders. The village government was originally by the *punchayet* or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities; but the artificial character of this appointment, as compared with that which obtains in a raiyatwari village is evidenced by the title of its holder, which is generally *lambardar*, a vernacular derivative from the English word 'number.' It is this type of village to which the well-known description in Sir H. Maine's *Village Communities* is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants of labourers under them."

Village Autonomy.—The Indian villages formerly possessed a large degree of local autonomy, since the native dynasties and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now disappeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the increase of communications, the growth of individualism, and the operation of the individual *raiyatwari* system, which is extending even in the north of India. Nevertheless, the village remains the first unit of administration; the principal village functionaries—the headman, the accountant, and the village watchman—are largely utilised and paid by Government, and there is still a certain amount of common village feeling and interests.

Punchayets.—For some years there was an active propaganda in favour of reviving the village council-tribunal, or *Punchayet* and the Decentralisation Commission of 1908 made the following special recommendations:—

"While, therefore, we desire the development of a *punchayet* system, and consider that the objections urged thereto are far from insurmountable we recognise that such a system can only be gradually and tentatively applied, and that it is impossible to suggest any uniform and definite method of procedure. We think that a commencement should be made by giving certain limited powers to *Punchayets* in those villages in which circumstances are most favourable by reason of homogeneity, natural intelligence, and freedom from internal feuds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages. Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination between the circumstances of different villages: and there is a considerable consensus of opinion that this new departure should be made under the special guidance of sympathetic officers."

This is, however, still mainly a question of future possibilities, and for present purposes it is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too early to say what life they have. The Punjab Government has passed a Village Punchayat Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judicial power, both civil and criminal of a minor character, may be assigned. In Bihar a Village Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases. Other Governments are taking steps in the same direction.

Municipalities.—The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute, from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self-government, these Acts did not proceed far. It was not until after 1870 that much progress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, medical, charity, and local public works. New Municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced. In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government. Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of municipal bodies, a wide extension being given to the elective system, while independence and responsibility were conferred on the committees of many towns by permitting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility, some items of provincial revenue suited to and capable of development under local management being transferred, with a proportionate amount of provincial expenditure, for local objects. The general principles thus laid down have continued to govern the administration of municipalities down to the present day.

The Present Position.—There are some 781 municipalities in British India, with something over 21 million people resident within their limits. Of these municipalities, roughly 710 have a population of less than 50,000 persons and the remainder a population of 50,000 and over. As compared with the total population of particular provinces, the proportion resident within municipal limits is largest in Bombay, where it amounts to 20 per cent., and is smallest in Assam where it amounts to only 2 per cent. In other provinces it varies from 4 to 9 per cent. of the total population. Turning to the composition of the municipalities, considerably more than half of the total members are elected and there is a steady tendency to increase this proportion. Ex-officio members are only 7 per cent. and nominated 25 per cent. Elected members are almost everywhere in a majority. Taking all municipalities together, the non-officials outnumber the officials by nearly six to one. The functions of municipalities are classed under the heads of Public Safety, Health, Convenience and Instruction. For the discharge of these responsibilities, there is a municipal income of Rs. 14·03 crores derived principally from taxation, just over one-third coming from municipal property, contributions from provincial revenues and miscellaneous sources. Generally speaking, the income of municipalities is small, the four cities of Calcutta, Bombay, Madras and Rangoon together providing over 40 per cent. of the total. The heaviest items of this expenditure come under the heads of "Conservancy" and "Public Works" which amount to 14 per cent. and 13 per cent. respectively, "Water-supply" comes to 13 per cent., "Drainage" to 4 per cent. and "Education" to over 11 per cent. In some localities the expenditure on education is considerably in excess of the average. In the Bombay Presidency, excluding Bombay City, for example, the expenditure on education amounts to more than 21 per cent. of the total funds, while in the Central Provinces and Berar is is over 17 per cent.

District Boards.—The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards. In almost every district of British India save in the province of Assam, there is a board subordinate to which are two or more sub-district boards; while in Bengal, Madras and Bihar and Orissa, there are also Union Committees. Throughout India at large there are some 207 district boards with 584 sub-district boards besides 455 Union Panchayats in Madras. This machinery has jurisdiction over a population which was over 221 millions in 1930-31. Leaving aside the Union Committees and Union Boards or Panchayats the members of the Boards numbered over 16,000 in 1930-31, of whom 73 per cent. were elected. As in the case of municipalities the tendency has been throughout India to increase the elected members at the expense of the nominated and the official members. The Boards are practically manned by Indians, who constitute 96 per cent. of the whole membership. Only 11 per cent. of the total members of all boards are officials of any kind. The total income of the Boards in 1930-31 amounted to Rs. 16·57 crores, the average income of each board being Rs. 2,00,000. The most important item of revenue is provincial rates, which represent a proportion of the total income varying from 25 per cent. in Bombay and in the N. W. F. Province to 63 per cent. in Bihar and Orissa. The principal objects of expenditure are education which has come re-

markably to the front within the last three years and civil works such as roads and bridges. Medical relief is also sharing with education though in a less degree the lion's share of the available revenue.

Improvement Trust.—A notable feature in the recent sanitary history of India is the activity played by the great cities in the direction of social improvements. In Bombay and Calcutta the Improvement Trusts are continuing their activities which are described in a separate chapter (q.v.). In Bombay the work of the Improvement Trust is being developed by the Bombay Development Directorate. Other cities are beginning to follow the examples of these great cities and Improvement Trusts have been constituted in Cawnpore, Lucknow and Allahabad in the United Provinces and in several of the larger cities of the Provinces of India. Their activities have, however, been severely curtailed by the financial stress.

Provincial Progress.—There was passed in *Bengal* in 1919 a Village Self-Government Act embodying the policy of constituting Union Boards at the earliest possible date for groups of villages throughout the province. The number of these boards continues to increase, rising from 1,500 to more than 2,000. In 1930-31 the number of Union Boards rose to 4,510. There are also 12 Union Committees. Though they are in their infancy as yet, many of them show a remarkable aptitude for managing their own affairs.

In *Bombay* the development of village self-government is also proceeding, as the result of an Act for constituting, or increasing the power of village committees which was passed in 1920 by the Legislative Council. In this presidency, some 145 out of 155 municipalities had a two-thirds elected majority of councillors in the year 1930-31; and a distinct step forward has been projected by the administration in the direction of liberalizing the constitution of all municipal bodies. The policy of appointing a non-official president has been extended both to district and sub-district boards, and a large number of non-officials have also been appointed presidents of sub-districts (taluka) boards. In *Madras* also the institutions of local self-government continued to progress in an encouraging manner. The number of district boards in the Presidency in 1931 was 25 with 1,005 members. The number of sub-district boards was 130. The total number of Municipal Councils during the year 1930-31 continued to be 81 and the proportion of Indian to European and Anglo-Indian members further increased. In 1930-31 there were 54 municipal councils, consisting entirely of Indian members, as against 51 in the previous year. The average imposition of taxation per head of population is still very low, being only about Rs. 2-8.

In the *United Provinces* the new District Boards, which consist of non-official members only with elected non-official Chairman, were plunged straight-way into financial difficulties. In some cases the necessity for retrenchment was immediate, resulting in the curtailment of medical relief and of allotments for the ordinary repairs of roads. Additional taxation has so far not been generally imposed and the Boards are still suffering from inexperience in husbanding public money and obtaining the full value for their expenditure. In the case of Municipal Finances, there has been some change for the better. The new municipalities have shown a great interest in all forms of civic activity but they are still hampered in their work by political and communal obsessions. They are reluctant to impose new taxation but a considerable programme of expenditure lies before them.

In the *Punjab* municipal administration continued to show improvement, the general attitude of the members in regard to their responsibilities being promising for progress in the future. Generally speaking the finances are in a more satisfactory position than was the case in previous years. Expenditure on water-supply schemes is steadily increasing.

In the *Central Provinces*, the year 1920 witnessed the passing of a Local Self-Government Act intended to guide into proper channels the undoubtedly growing interest in public matters. The continued reduction of official members and chairman, and the wider powers of control given to local bodies have been an incentive to the development of local self-government, leading to an increased sense of public duty and responsibility. Another very important measure regulating municipalities was passed into law in 1922. Its chief features are the extension of the Municipal franchise, the reduction of official and nominated members, the extension of the powers of Municipal Committees and the relaxation of official control.

In the *North-West Frontier Province*, the institution of local self-government is somewhat of a foreign growth. Certain of the municipal committees are still lax in the discharge of their responsibilities, and meetings are reported to be infrequent, but the attendance of non-official members is gradually increasing. Concerning Municipal administration the Local Government reports that the members continue to take a very great interest in their duties and that their attitude towards the responsibility is imposed upon them is on the whole satisfactory. Communal feeling shows itself in certain localities; but is in many instances off-set by the public spirit and initiative of individual members and there are considerable symptoms of advance in independence of action and in the smooth working of the Committees. An important-extension of the elective principle has recently been made and it is hoped that this is proving a success.

District and Local Boards.

The following table gives the membership, Income and Expenditure of District and Local Boards in the same financial year:—

Province.	No. of Boards	No. of Members.		Income (excluding Balances).					Expenditure.				
		Elected.	*Ex-officio* and Nominated.	Provincial Rates.	Civil Works.	Other Sources.	Total.	Incidence per Head.	Education.	Civil Works.	Sanitation, Hospital, etc.	Debt and Miscellaneous.	Total.

Calcutta Improvement Trust.

The Calcutta Improvement Trust was instituted by Government in January, 1912, with a view to making provision for the improvement and expansion of Calcutta by opening up congested areas, laying out or altering streets, providing open spaces for purposes of ventilation or recreation, demolishing or constructing buildings and re-housing the poorer and working classes displaced by the execution of improvement schemes.

The origin of the Calcutta Improvement Trust must, as in the case of the corresponding Bombay body, upon which the Calcutta Trust was to a large extent modelled, be looked for in a medical enquiry which was instituted into the sanitary condition of the town in 1896, owing to the outbreak of plague. It was estimated that the Trust might in the ensuing 30 years have to provide for the housing of 225,000 persons. The population of Calcutta proper, which includes all the most crowded areas, was 649,995 in 1891, and increased to 801,251, or by 25 per cent., by 1901. The corresponding figure according to the 1921 Census was 993,508 and this had increased by 1931 to 1,196,734.

The problem of expansion was difficult, because of the peculiar situation of Calcutta, which is shut in on one side by the Hooghly and on the other by the Salt Lakes.

Preliminary investigations continued for several years, so that it was only in 1910 that legislation was eventually introduced in the provincial legislature and the Trust instituted by it. The Bill provided for a large expenditure on improvement schemes and the provision of open spaces and for special local taxation to this end. It also provided for the appointment of a wholetime chairman of the Board of Trustees and the membership of the Trust was fixed at eleven.

The following constituted the Board of Trustees at 31st March 1933 :—Mr. C. W. Gurner, (Offg.) I.C.S., Chairman; Mr. J. C. Mukherjea, Bar-at-Law, Chief Executive Officer, Calcutta Corporation (*ex-officio*); Mr. S. C. Ghosh, elected by the Corporation of Calcutta under Section 7 (1) (*a*) of the Calcutta Improvement Act, 1911; Mr. Prabhudayal Himatsinghka elected by the elected Councillors, Corporation of Calcutta, under Section 7 (1) (*b*) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. Charu Chandra Biswas, C.I.E., elected by Councillors other than elected Councillors of the Corporation of Calcutta, under Section 7 (1) (*c*) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. W. H. Thompson, elected by the Bengal Chamber of Commerce; Sir Hari Sankar Paul, Kt., elected by the Bengal National Chamber of Commerce; Mr. Unsud Dowla Rai Badridas Goenka Bahadur, C.I.E., Rai Bahadur Dr. Haridhan Dut, Mr. A. J. Thompson, A.R.I.B.A., appointed by the Local Government.

During the 21 years that it has now been at work, the Trust have decided, and partly or entirely carried through, several improvement schemes for opening up congested areas, laying out or widening streets and providing open spaces.

In Central Calcutta many highly insanitary *bustees* have been done away with and several roads of an improved type laid out, the most important of which is the Chittaranjan Avenue, 100 ft. wide, which at present extends from Beadon Street to Chowringhee, and will shortly be extended to Shambazar Street on the north. It is intended ultimately to extend it up to the Chitpur bridge. But at present there is the direct connexion between Chitpur bridge and the Barrackpore Trunk Road, as Lockgate Road has been severed by the sidings of the Eastern Bengal Railway. In these circumstances the Board considered that traffic would be better served by postponing the extension to Chitpur Bridge and constructing a road to Shambazar which is the terminus of the Barrackpore Trunk Road and of the Dum-Dum-Jessore Road. A scheme known as Scheme No. XXXVII has been sanctioned by Government under Section 48 of the Calcutta Improvement Act which provides *inter alia* for the extension of Chittaranjan Avenue up to Raja Rajballab Street and for the construction of a new 84 feet new road connecting it with Cornwallis Street. The Section of Chittaranjan Avenue near the Chowringhee end is well placed for commerce and trade and is likely before long to gain increased importance by being linked up with Dalhousie Square by means of a new road 84 feet wide which the Trust proposes to construct between Mission Row and Mangoe Lane.

In the north of the City, two large and thirteen small parks have been constructed in different quarters. Of the two large parks one is named Deshabandhu Park and the other Cossipore-Chitpore open space measuring 53 bighas and 156 bighas respectively. The Cossipore-Chitpore Park has a small artificial lake and the layout of the areas surrounding the lake has been taken in hand. Four football grounds have been provided for schools and clubs of North Calcutta. Some tennis courts are also being made. The Deshabandhu Park has also been provided with play-grounds. Several wide roads have been driven through this highly congested area. The approaches to the City have also been adequately widened.

Some progress has also been made with that highly congested area to the west of the City by opening up new roads and widening the existing ones. This Scheme is known as Maydapati, Scheme No. XXVII.

The new 84 ft. road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Ghat has been completed so that there is now a continuous main traffic route with the same width of roadway as Chittaranjan Avenue, extending right across Calcutta from Strand Road on the west to Upper Circular Road on the east. The widening of Maniktala Road between Upper Circular Road and Maniktala Bridge which has been completed forms a further extension of this main roadway which will eventually continue at a width of 100 ft. to the extreme eastern limit of Maniktala. Another important scheme which is now complete is the new 60 ft. road between Derpanarayan Tagore Street and Pathuriaghat Street which, with its side roads, opens up a very congested area and forms a portion of a main projected north and south road through Bara Bazar from Harrison Road to a new main east-and-west diagonal road through Ahiritollah.

The passing of the Calcutta Improvement (Amendment) Act, 1931, which empowers the Board of Trustees in certain cases to levy betterment fees on properties which abut on to a new or widened street instead of acquiring the properties has made it financially possible for the Trust to proceed with some portion of its original programme for the improvement of Barabazaar. The Kalakar Street scheme in Barabazaar which forms the southern section of the aforesaid road is one of the schemes to which the new Act is to be applied. It has been published under Section 43 of the Calcutta Improvement Act, and sanctioned by Government Another scheme which has received the sanction of Government and to which the new Act is to be applied is the widening of a short length of Darmahatta Street and it will be interesting to see how the methods of assessment provided for in the Act will work out in practice.

The Suburban Areas to the south and south-east of Calcutta required greater attention and extensive development schemes were undertaken. Several open spaces and squares have been made in various parts. Insanitary tanks requiring approximately 2 crores c.ft. of earth have been filled up. Russa Road which forms the southern approach to the town has been widened to 150 ft. for a length of one mile and 100 ft. for a length of another mile. It now gives a most pleasant drive from Chowringhee to Tollygunge. To improve the drainage of this area a 100 ft. wide East to West road, from Ballygunge Railway Station to Chetla Bridge, and for recreation an artificial lake of 167 bighas with adequate grounds has been completed.

Another small lake has also been completed and a road is being constructed round it to link up with the road surrounding the main lake. The road round the main lake has been surfaced with asphalt and lighted with electricity and is much frequented in the evenings. Sites for Club houses adjoining the main lake have been allotted to several clubs. Excavation has been continued in a new section of the lake which is to be attractively laid out with an island to which the public will have access by means of a footbridge. The Calcutta Tramways Co., Ltd., have now extended tram tracks from Russa Road along New Sewer Road to Ballygunge Station.

The Board of Trustees have framed a scheme for the extension southwards of Lansdowne Road which has received Government sanction; acquisition of land was completed and all the new and widened roads have been completed and opened to traffic; surplus lands are now ready for sale; the Board in pursuance of its policy of "carrying out schemes in the centre of the town and in the suburbs simultaneously, so as to have an adequate supply of suburban sites for residential buildings to meet the needs of those displaced from overcrowded areas in the centre of the town has also framed a scheme known as Scheme No. XXXIII for the improvement of another section of the undeveloped area between Russa Road and the Lake District. This too has received sanction of Government and land acquisition is in progress.

To the east of the city, several new roads have been constructed in Scheme No. VIIIC (New Ballygunge Road—Park Circus to Old Ballygunge Road). They are now open to traffic, and the majority of them are surfaced with asphalt. Arrangements have been made for lighting the roads with electricity. The development of Calcutta east of Lower Circular Road, between Park Circus and Middle Road Entally, is a pressing need, but the work can only proceed slowly in small sections. The Trust in the execution of this scheme cannot ignore the bustee dwellers, who are pushed further east, as the development from bustee conditions to blocks of masonry buildings proceeds. The utilisation of highly-improved lands for bustee purposes is not an economic proposition, but at the same time, it is necessary to provide the essentials of sanitation for the working classes.

The linking up of Amherst Street with Loudon Street by a broad thoroughfare has commenced. The Trust is constructing a large park near Park Circus, Scheme No. VIII, known as Eastern Park, measuring 65 bighas. It will have a large playing field for football and tennis. The Gorachand Road Scheme provides for the completion of the northern portion of this park and the commencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally. As the scheme involved the demolition of a large number of bustees, investigations were made to ascertain the best means of reducing the displaced bustee population as a result of which a Rehousing Scheme at Christopher Road which will cost the Trust Rs. 2,70,000 for land acquisition and Rs. 1,97,000 for engineering works has been framed and has received the sanction of Government.

The public squares vested in the Calcutta Corporation in 1911 had a total area of about 96 acres. In 1912, Mr. Bompas, the first Chairman of the Trust, pointed out that in the ratio, *viz.*, about 9 per cent. of its public open spaces which measured about 1,250 acres (including the Maidan, the Horticultural and the Zoological Gardens) to its total acreage, Calcutta was almost on a par at that time with London possessing 6,675 acres of public parks or gardens, while its percentage exceeded that of New York, Berlin and Birmingham. But about 1,000 acres of Calcutta's 1,250 was accounted for in

the Maidan and new open spaces in other parts of Calcutta were an urgent need. Up to date the Trust had added (including the new lake at Dhakuria)—another 250 acres.

Lastly for the housing of the displaced population the Trust has undertaken on a large scale the following schemes :—

In the early stages three blocks of three storied tenement buildings containing 252 lettable rooms were built in Wards Institution Street for persons of the poorer classes. It was found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect *bastis* of their own, the class of structures they were accustomed to live in. These chawls were then filled with persons of limited means, *e.g.*, school masters, poor students, clerks and persons of the artisan class. As many as 1,200 people are housed in these chawls, these buildings, including land, cost Rs. 2,44,368 and are let at very low rents—ground floor rooms at Rs. 5 per mensem and top floor rooms on Rs. 6 per mensem, each room measuring 12′×12′ with a 4 ft. verandah in front opening on to a central passage 7 ft. wide. The total collection of rent during the year 1932-33 including previous year arrear was Rs. 14,601.

As these chawls failed to attract the people for whom they were meant, the Board next tried an experiment in providing sites for bustees. Two sites with a lettable area of 16 bighas were acquired within the area of Maniktola Municipality, but they failed to attract because they were out of the way and were expensive.

Kerbala Tank Lane Re-Housing Scheme.—In this scheme 4 detached and 35 semi-detached houses were built. The detached houses were sold as this scheme never became popular with the class of tenants for whom they were originally intended. Owing to this unpopularity the Board further decided to throw open to tenants of all classes 18 out of the remaining 35 semi-detached houses. This change of policy, however, produced no effect on the letting.

Owing to want of suitable tenants the entire dwellings in Kerbala Tank Re-housing scheme had been sold by private sale shortly after the 31st March 1927.

Bow Street Re-Housing Scheme.—Seven blocks of buildings containing one-roomed, two-roomed and three-roomed suites have been constructed to re-house Anglo-Indians displaced by the operations of the Trust. This scheme has proved a striking success. There are 132 suites for letting and the rent received from these suites during the year 1932-33, amounted to Rs. 30,574.

Paikpara Re-Housing Scheme.—This scheme has an area of 36 bighas well laid out in 96 building sites. A new re-housing scheme has been undertaken by the Board, as already stated, at Christopher Road for the Bustee population to be displaced by the execution of scheme No. XXXV (Eastern Park, to Gorachand Road). A special feature of the new scheme is that the land is to be developed as a model bustee for displaced bustee dwellers. Special facilities are offered to dishoused persons for securing land in various improved areas for reinstatement purposes.

Bridges.—Some progress has been made in replacing the old bridges of Calcutta, which is hemmed in by canals and railway lines inadequately bridged, by modern and up-to-date bridges to suit the growing traffic requirements. The opportunity is being taken of widening the Maniktala, Narikeldanga and Beliaghata Bridge approaches on both sides—on the west (in the case of Maniktala and Narkeldanga Bridges) right up to Circular Road. The new bridges of the city will in their traffic capacity compare favourably with those of London. The new Bridges at Maniktala, Beliaghata and at Shambazar have roadways of 37 feet, with two footpaths each 10 feet in width. The Chitpore Bridge reconstruction of which has been taken in hand has been redesigned as a reinforced Concrete bridge capable of accommodating four lines of fast traffic and two lines of slow traffic and should be completed in 1933-34. The Alipore Bridge, the reconstruction of which has been Completed, is to have a roadway of 30 feet (3 traffic widths) and 2 footpaths of 6 feet each, and these are also to be the probable widths of the Tollygunge and Hastings Bridges which need re-building. The Chelsea, Hammersmith and Waterloo Bridges have all-over widths of 45, 39 and 42 feet, respectively, the roadways being 29, 27 and 28 feet, that is 3 traffic widths. Even London Bridge with an all-over width of 65 feet has only a 37-foot roadway (4 traffic widths) and Westminster Bridge which is 84 feet in width spares only 54 feet (*i.e.*, 6 traffic widths, like the 60 feet of Kidderpore Bridges for wheeled traffic.

Financial.—Capital charges during the year 1932-33 amounted to Rs. 60.67 lakhs which included Rs. 51.02 lakhs spent on land acquisition and Rs. 7.59 lakhs on engineering works. The gross expenditure of the Trust on Capital Works up to the end of the year 1932-33 was Rs. 13,59,35,000. To meet this large expenditure, the Trust has borrowed Rs. 2,48,50,000; other Capital receipts (mainly from the sale of land and buildings) have yielded Rs. 6,64,89,000 and the revenue fund from its annual surplus (after providing for the service of loans has contributed Rs. 4.46 crores to Capital Works.

The Indian Ports.

The administration of the affairs of the larger ports (*Calcutta, Bombay, Madras, Karachi, Rangoon and Chittagong*) is vested by law in bodies specially constituted for the purpose. They have wide powers, but their proceedings are subject in a greater degree than those of municipal bodies to the control of Government. At all the ports the European members constitute the majority and the Board for Rangoon consists mainly of European members.

Figures for 1931-32 relating to income, expenditure and capital debt of the six principal ports managed by Trusts (Aden is excluded from the tables) as obtainable from the Department of Commercial Intelligence and Statistics (India) are shown in the following table:—

	Income.	Expenditure.	Capital Debt.
	Rs.	Rs.	Rs.
Calcutta	2,67,01,863	3,13,44,345	24,57,49,754
Bombay	2,65,35,984	2,88,04,964	21,84,76,466
Madras	33,69,109	32,67,262	1,63,88,439
Karachi	67,60,868	73,64,590	4,25,09,000
Rangoon	75,67,473	78,53,757	5,68,43,517
Chittagong	7,55,762	7,52,293	* 24,25,961

* Includes the first instalment of Rs. 15 lakhs, the second instalment of Rs. 5 lakhs, and the third instalment of Rs. 2 lakhs, of a loan of Rs. 50 lakhs from the Government of Bengal.

CALCUTTA.

The Commissioners for the Port of Calcutta are as follows:—

Mr. T. H. Elderton, Chairman.

Mr. W. A. Burns, Deputy Chairman and Traffic Manager.

Elected by the Bengal Chamber of Commerce.—Mr. J. S. Henderson; Mr. A. L. B. Tucker; Mr. M. A. Hughes; Mr. K. J. Nicolson; Mr. S. D. Gladstone; Mr. J. Reid Kay.

Elected by the Calcutta Trades Association.—Mr. C. H. Pratt.

Elected by the Bengal National Chamber of Commerce.—Rai Bahadur, A. C. Banerjee C.I.E.; Mr. Nalini Ranjan Sarkar; Mr. J. C. Banerjee.

Elected by the Indian Chamber of Commerce.—Mr. G. L. Mehta.

Elected by the Municipal Corporation of Calcutta.—Mr. D. J. Cohen.

Nominated by Government.—Commander R. H. Garstin, O.B.E., R.I.M.; Sir Hugh Hannay; Rai Bahadur B. R. Singh; Mr. V. E. D. Jarard; Mr. G. N. Bower.

The principal officers of the Trust are—

Traffic Manager.—Mr. W. A. Burns.

Chief Accountant.—Mr. J. Dand, C.A.

Chief Engineer.—Mr. J. R. Rowley, A.K.C., M. Inst. C.E.

Deputy Conservator.—Commander C. V. L. Norcock, O.B.E., R.N.

Medical Officer.—Lt.-Col. W. L. Harnet, M.B., F.R.C.S., I.M.S.

Consulting Engineer and London Agent.—Mr. J. Angus, M. Inst. C.E.

The traffic figures and the income of the Trust for the last fifteen years are as follows:—

Year.	Docks.			Jetties.	Stream.		Nett tonnage of shipping entering the Port.	Income.
	General Exports	Coal Exports	Imports.	Imports.	Exports.	Imports.		
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Rs.

BOMBAY.

BOARD OF TRUSTEES.—*Nominated by Government.*—Mr. W. R. S. Sharpe, M. INST. T (Chairman); Vice-Admiral Sir Humphrey Walwyn, K.C.S.I., C.B., D.S.O., R.N.; Mr. Syed Munawar; Mr. C. W. E. Arbuthnot, C.I.E.; Mr. H. K. Kirpalani, I.C.S.; Mr. M. Slade, I.C.S., Major-General H. Needham, C.B., C.M.G., D.S.O.; Mr. M. W. Brayshay and Mr. A. E. Tyldenpattenson. *Elected by the Bombay Chamber of Commerce.*—Mr. T. E. Cunningham; Mr. E. C. Reid; Mr G. H. Cooke; Mr. W. G. Lely and Mr. W. M. Petrie. *Elected by the Indian Merchants' Chamber.*—Sir Purshotamdas Thakurdas, Kt., C.I.E., M.B.E.; Mr. Lakhmidas Rowjee Tairsee; Mr. Gordhandas Goculdas Morarji; Mr. Ratilal M. Gandhi and Mr. A. D. Shroff. *Elected by the Bombay Municipal Corporation.*—Mr. Meyer Nissim and Mr. Hoosenally M. Rahimtoola. *Elected by the Millowners' Association.*—Mr. A. Geddis.

The following are the principal officers of the Trust:—

Secretary, N. M. Morris, *Deputy Secretary*, A. S. Bakre, M.A., Bar-at-Law.

ACCOUNTS DEPARTMENT.

Chief Accts., C. P. Gay; *Deputy Accts.*, J. F. Pereira, B.A.; *Sr. Asstt. Accts.*, W. E. McDonnell; *Asstt. Accts.*, H. W. Scott; A. N. Moos; *Junior Asstt. Accts.*, O. Hyde, R. Cour-Palais, A. R. Javeri; *Cashier*, V. D. Jog; *Ry. Audit Inspectors*, M. J. Merzello, J. P. D'Souza; *Supdt. Establishment Branch*, H. N. Baria.

ENGINEERING DEPARTMENT.

Chief Engineer, G. E. Bennett, M.SC., M. Inst. C.E., M.I. Mech. E.; *Deputy Chief Engineer*, A. Hale-White, M.A., M.Inst.C.E. *Executive Engineers*, G. E. Terrey, A.M.I.C.E., J. A. Rolfe; *Senior*

Asstt. Engineers, P. E. Vazifdar, L.C.E., F. M. Surveyor, B.Sc. (Glas.), A.M.I.C.E., E. L. Everatt, A.M.I.C.E., H. N. Baria, L.C.E.; *Chief Draftsman*, L. B. Andrew, M.I. Struct. E.; *Personal Asst. to the Chief Engineer*, T. B. Hawkins; *Mechanical Superintendent*, R. B. Mc Gregor, A.M.I.M.E.; *Asstt. Mechanical Superintendents*, B. C. Sharpe, A.M.I.M.E., S. J. Watt, M.I.L.E., D. V. Kohli, B.Sc., and A. C. Strelley. M.I. Mar. E., A.M.I.M.E., *Chief Foreman*, B. Shaw.

Docks Department.

Docks Manager, C. N. Rich, B.A.; *Deputy Docks Managers*, F. A. Borissow, W. G. H. Templeton and F. Seymour Williams, D.S.O.; *Deputy Manager (Office)*, P. A. Davies; *Asstt. Docks Managers, 1st and 2nd Grade*, E. C. Jolley, A. Mattos, L. E. Walsh, F. J. Warder, E. J. Kail, D. L. Lynn, C. O. A. Martinez, P. B. Fenner, Nanabhoy Framji, Ardeshir Maneckji and J. M. Duarte; *Cash Supervisor*, T. D'Silva; *Cashier*, Robert Fernandez.

Railway Department.

Railway Manager, D. G. M. Mearns; *Deputy Railway Managers*, A. F. Watts and H. A. Gaydon; *Asstt. Railway Manager*, S. G. N. Shaw, P. M. Boyce and M. E. A. Kizilbash; *Asstt. Traffic Supdt.*, W. H. Brady; *Office Supdt.*, Subrahmanya Raghunathan.

Port Department.

Deputy Conservator, Captain A. G. Kinch, D.S.O., R.I.M. (Retd.); *Senior Dock Master, Alexandra Dock*, E. G. Worthington; *Dock Master, Alexandra Dock*, J. L. Williams; *Dock Master, Victoria Dock*, N. E. Davidson; *Dock Master, Prince's Dock*, C. T. Willson; *Port Department. Inspector and Supdt. of Police, Bombay Port Trust Harbour Patrol*, W. P. Bigg; *Office Supdt.*, Moses Samuel.

Pilot Establishment.

Harbour Master, R. Walker; *Master Pilots*, G. England and C. B. M. Thomas.

Pilots, J. S. Nicholson, R. C. Vint, A. M. Thomson, H. W. L. T. Davies, H. H. Church, W. E. Brown, W. L. Friend, R. H. Friedlander, W. Sutherland, H. Lloyd Jones, J. Cook, G. E. Firth; *Probationary Pilot*, S. T. Elliot.

Land and Bunders Department.

Manager, F. H. Taylor, F.S.I., M.R.S.I.; *Deputy Manager*, B. C. Durant; *Personal Asstt.*, R. G. Deshmukh, B.A., LL.B.; *Office Supdt.*, W. O'Brien; *Asstt. Managers*, W. H. Cummings and C. P. Watson; *Chief Inspector*, G. C. Battenberg; *Head Clerk*, D. A. Pereira.

Stores Department.

Controller of Stores, H. E. Lees; *1st Assistant*, W. J. Wilson; *2nd Assistant*, B. F. Davidson; *Statistical Supdt.*, H. L. Barrett.

Medical Department.

Administrative Medical Officer, Dr. W. Nunan, B.A., M.D., B. Ch.; *Medical Officers*, Dr. F. D. Bana, M.B., M.R.C.S. (South District), Dr. A. D. Karkhanawalla, M.B.B.S. (North District); *Superintendent, Antop Village*, Dr. M. Vijayakar, L.M. & S.

The revenue of the Trust in 1932-33 amounted to Rs. 2,30,78,445 and the expenditure to Rs. 2,46,02,916. The result of the year's working was a deficit of Rs. 15,81,682 under General Account which has been met from the Revenue Reserve Fund, and a surplus of Rs. 57,210 under Pilotage Account, which has been transferred to the Vessels Replacement Fund. The balance of the Revenue Reserve Fund at the close of the year amounted to Rs. 56,56,906. The aggregate capital expenditure during the year was Rs. 6,20,926. The total debt of the Trust at the end of the year amounted to Rs. 21,72,50,504, repayment of which is provided for by annual sinking fund contributions from revenue; the accumulation of the sinking fund as at 31st March 1933 was Rs. 554·42 lakhs., in addition to this apart from property appreciation, the Reserve and other funds total Rs. 91·46 lakhs.

The trade of the Port of Bombay during the last official year aggregated Rs. 189 crores in value.

The number of steam and square-rigged vessels which during recent years have entered the docks or been berthed at the harbour walls and paid dues, excluding those which have unloaded and loaded in the stream:—

Year.	Number.	Tonnage nett.
1911 to 1916 (average)	1,668	3,437,354
1916 to 1921 ,,	2,086	4,758,888
1921 to 1926 ,,	1,962	4,574,817
1926-27	1,842	4,386,312
1927-28	2,027	4,864,344
1928-29	1,966	4,828,376
1929-30	1,965	4,895,326
1930-31	1,970	4,773,492
1931-32	1,866	4,588,577
1932-33	1,836	4,691,183

The two dry docks were occupied during the year 1932-33 by 134 vessels, the total tonnage amounting to 496,985 which was less than the previous year by 10,737 tons.

KARACHI.

The members of the Board of Trustees of the Port of Karachi are as follows:—

Chairman.—E. M. Duggan, B.SC., M. Inst. C.E.; Tikamdas Wadhumal, M.A. (Oxon), Bar.-at-Law, (*Vice Chairman*, elected by the Board), elected by the Karachi Municipal Corporation.

Appointed by Government.—F. Buckney, B.A., (Collector of Customs); T. C. Hales, V.D., (Divisional Superintendent, North Western Railway); Major A.G. Armstrong, (D. A. A. & Q. M. G., Sind Independent Brigade Area); Mir Ayub Khan, Bar.-at-law.

Elected by the Karachi Chamber of Commerce.—W. D. Young, (Cooper & Young); J. W. Anderson, (Grahams Trading Co., (India), Ltd.); G. H. Raschen, (Forbes, Forbes Campbell & Co., Ltd.); H. S. Bigg-Wither, O.B.E., (Burma-Shell Oil Storage & Distributing Co. of India, Ltd.).

Elected by the Karachi Indian Merchants' Association.—Lala Jagannath Ralaram, Tandon, B.SC., (R. B. Brijlal Jagannath); Chellaram Shewaram, (Shewaram Rewachand).

Elected by the Buyers' and Shippers' Chamber.—Jamshed Nusserwanji, (Karachi Steam Roller Flour Mills, Ltd.); Mohamedali A. K. Alavi, (Yusafali Alibhoy Karimji & Co.).

The Principal Officers of the Port Trust:—

Chief Engineer.—W. P. Shepherd-Barron, M.C., M. Inst. C.E.

Deputy Chief Engineer.—H. A. L. French, M. Inst. C.E.

Chief Accountant.—B. A. Inglet, B.A., C.A.

Traffic Manager.—A. A. L. Flynn, V.D., C.M.Z.S.

Deputy Conservator.—J. A. Scarr.

Chief Storekeeper.—R. A. Donde.

Secretary.—L. J. Mascarenhas.

Revenue receipts and expenditure of the Port of Karachi for the year 1932-33:—

Revenue receipts Rs. 59,22,000. Special Receipts Rs. 82,800. Revenue Expenditure Rs. 62,91,000. Deficit Rs. 2,86,000. Reserve Fund Rs. 43,28,000.

SHIPPING.

Number of vessels which entered the Port during the year 1932-33 exclusive of vessels put back and fishing boats was 3,234 with a tonnage of 2,268,236 as against 3,314 with a tonnage of 2,411,610 in 1931-32. 841 steamer of all kinds entered the Port with a tonnage of 2,134,689 against 912 and 2,278,390, respectively in the previous year. Of the 841 steamers 671 were of British Nationality.

The imports during the year totalled 745,000 tons against 788,000 tons in the previous year. The shipments were 914,000 tons in 1932-33 against 963,000 in 1931-32.

The total volume of imports and exports was 1,659,000 tons against 1,751,000 tons in the previous year.

MADRAS.

The following gentlemen are the Trustees of the Port of Madras:—

Officials.—G. G. Armstrong, O.B.E., M.C., V.D., M. Inst. T., (Chairman and Traffic Manager), C. R. Watkins, C.I.E. (Collector of Customs), Capt. B. Gordon, R.I.M. (Presidency Port Officer).

Non-Officials—(1) Nominated by Government H. N. Colam; Sir Percy Rothera, Kt., O.B.E., M.Inst. C.E., I.M.I.E.

Representing Chamber of Commerce, Madras—R. D. Denniston, A. S. Todd.

Representing Southern India Chamber of Commerce, Madras.—M. R. Ry. M. Ct. M. Chidambaram Chettiyar Avergal, The Hon'ble Diwan Bahadur G. Narayanaswamy Chetty Garu, C.I.E.

Representing Madras Trades Association.—W. W. Ladden, A. A. Hayles.

Representing Southern India Skin & Hide Merchants' Association.—Yakub Hasan Sait.

Representing Madras Piece-Goods Merchants' Association.—Abdus Subhan Sahib, B.A.

Principal Officers are:—Port Engineer—G. P. Alexander, A.M., Inst. C.E.

Deputy Coservator of the Port of Madras—Lt.-Commander A. D. Berrington, K.N.R., (Retd.)

Deputy Traffic Manager.—J. G Lord.

Chief Accountant.—M. R. Ry. G. Venkatraya Pai Avergal, M.A.

Mechanical and Electrical Engineer.—Major E. G. Bowers, M.C., M.I.E.E., A.I.R.O.

Assistant Mechanical Engineer.—S. W. White, M.I. Mar. E., A.M.N.I.A.

1st Engineer and Dreadging Master—J. E. Burke.

Assistant Engineers.—M. R. Ry. V. Dayananda Kamath Avergal, B.A., B.E., M. R. Ry. S. Nagabushanam Avergal, B.A., M.E., A..I.E.E.

Assistant Engineer (Electrical.)—M. R. Ry. K. Subramania Aiyar Avergal, M.E., I.E.E.

Harbour Master—A. Mackenzie.

Assistant Harbour Masters—Mr. S. Prytherch, Mr. L. T. Lewis, Mr. L. J. Whitlock.

Assistant Traffic Manager.—M. R. Ry. M. S. Venkataraman Avergal, B.A., L. A. Abraham, B.A., F.C.I.

Deputy Chief Accountant.—M. R. Ry. R. Rangaswami Aiyar Avergal, B.A.

Deputy Chief Accountant (Engineering).—M. R. Ry. V. Mathuswami Aiyar Avergal, B.A.

Office Manager.—M. R. Ry. G. M. Ganapathi Aiyar Avergal.

The receipts of the Trust during 1932-33 on Revenue Account from all sources were Rs. 29,86,394 as against Rs. 33,60,109 in 1931-32 and the gross expenditure out of revenue was Rs. 32,12,510 as against Rs. 32,67,262 in 1931-32. No contribution to Reserve funds was made during 1932-33. 694 vessels with an aggregate net registered tonnage of 23,33,140 tons called at the port during the year against last year's figure of 774 vessels with a net registered tonnage of 2,690,008 tons.

RANGOON.

The personnel of the Commissioners for the Port of Rangoon is comprised of seventeen members—

Appointed by Government.—J. A. Cherry, C.I.E., M.L.C., (Chairman); T. Cormack, C.A.; Captain H. W. B. Livesay, O.B.E., R.I.M. and A. O. Deas.

Ex-officio.—Messrs. C. F. Grant, M.A. I.C.S., (Chairman), Rangoon Development Trust); M. Slade, I.C.S. (Collector of Customs); and B. M. Crosthwaite, V.D. (Agent, Burma Railways).

Elected by the Burma Chamber of Commerce.—Messrs. M. L. Burnet; C. G. Wodehouse, M.L.C.; R. B. Howison, M.L.C.; and K. B. Harper.

Elected by the Rangoon Trades Association.—W. C. Penn, M.L.C.

Elected by the Chinese Chamber of Commerce.—Tan Po Aye, B.A., Bar-at-Law.

Elected by the Burma Indian Chamber of Commerce—S. N. Haji and M. D. Dadabhoy.

Elected by the Burmese Chamber of Commerce.—U. Thein Maung, B.A., M.M.F. (Vice-Chairman).

Elected by the Corporation of Rangoon.—U. Thein Maung, M.L.C.

Principal Officers are:—

Secretary.—C. Witcher.

Chief Accountant.—S. A. Wetherfield, B.A. A.C.A.

Chief Engineer.—W. D. Beatty, B.A., B.A.I., M. Inst. C.E.

Deputy Conservator.—H. N. Gilbert.

Traffic Manager.—E. J. B. Jeffery.

Port Surveyor.—Commander C. M. L. Scott, R.N. (Retd.)

The income and expenditure on revenue account for the Port of Rangoon in 1932-33 were:—

	Rs.
Income	68,82,554
Expenditure	70,76,097

The capital debt of the Port at the end of the year was Rs. 6,42,20,695-14-3. The balance (including investments at cost) at the credit of the different sinking funds on 31st March 1933 was Rs. 2,34,91,048-13-11.

The total sea-borne trade of Rangoon during the year 1932-33 was 4,623,286 tons of which 1,222,070 tons were imports, 3,378,672 tons exports and 22,544 tons transhipment. The total number of vessels (excluding Government vessels) entering the port was 1,580 with a total net registered tonnage of 4,109,215 showing a decrease in the number of vessels and of 4,69,272 tons in the net tonnage as compared with the previous year.

CHITTAGONG.

Chittagong in Eastern Bengal, lying on the right bank of the river Karnafuli at a distance of 12 miles from the sea, was already an important Port in the sixteenth century, when the Portuguese gave it the name of Porto Grande.

The construction of the Assam-Bengal Railway has facilitated the transport of trade with Assam and Eastern Bengal for which the Port of Chittagong is the natural outlet.

Chittagong, Bengal, Lat. 22° 21'N; Long. 91° 50'E, 1933 Pop. 53,156.

TRADE

Imports—Salt, mineral oil, machinery, tea estate, stores, rice, coal and railway material.

Exports—Wax, jute, tea, hides, cotton, capas, rice, paddy eggs, poultry and livestock.

Accommodation—Vessels of any size can proceed 9 miles up the Karnafuli to Chittagong at H.W.O.S. draught of 23 ft. to 26 ft.

There are 5 berths for ocean-going vessels at the Assam-Bengal Railway jetties, also two sets of fixed moorings.

Jetties are 2,100 ft. long, provided with hydraulic cranes 17 to lift 35 cwts and 4 to lift 10 tons, ample shed accommodation, and jetties are in direct rail communication with the Assam-Bengal Railway system, cargo in bulk being dealt with direct into wagons. Depth at jetties about 32 feet.

Provisions.—Fresh provisions, good drinking water and coal obtainable.

There are three river bars affecting navigation controlled by large suction dredger.

Night pilotage is in force except during the S.W. monsoon.

Charges.—Port dues 4 annas 6 pies, per reg. ton. Hospital dues 2 pies per reg ton. Harbour Master's fee Rs 32. Mooring and unmooring in fixed berths Rs. 32, swinging berths Rs. 16. Berth alongside jetties Rs. 40, per day, night work and holidays extra.

Pilotage not exceeding—	Rs. a.		Rs. a.
10 ft. to 20 ft. from ..	67 8	to	304 4
21 ft.	337 8		
22 ft.	384 4		
23 ft.	439 4		
24 ft.	486 0		
25 ft.	553 8		
26 ft.	634 8		

Towage by Port Commissioners' Tug.

Port Authority: Port Commissioners, Chittagong.

Officials.—Deputy Conservator, Lieut.-Commander, F. W. Angell, R.I.M.; Port Engineer, F. J. Green, B.Sc., M.I.C.E., &c.; Lloyds Agents, James Finlay & Co.

VIZAGAPATAM HARBOUR PROJECT.

The question of creating a harbour at Vizagapatam to supply an outlet for a large area of fertile country adjacent to the east coast of India, hitherto undeveloped, with considerable mineral resources and without suitable access to the outside world, was first formulated by the Bengal-Nagpur Railway Company. That the creation of such a port would have beneficial influence on this area was unquestioned, for it is pointed out that Vizagapatam, lying as it does in front ofthe only practicable gap in the barrierr of the Eastern Ghats, is formed by nature to be the outlet of the Central Provinces, from which a considerable amount of trade has taken this route in the past, even with the imperfect communications, hitherto available. A necessary complement of the scheme is the construction of the proposed railway from Parvatipuram to Raipur which, with the existing coastline of the Bengal Nagpur Railway would make a large and rich area tributary to the proposed port, and obviate the long and expensive circuit by Calcutta. A link would also be supplied in the most direct route to Rangoon from Europe by way of Bombay, while, from an imperial point of view, the possible provision of a fortified port on the long and almost unprotected stretch of coast between Colombo and Calcutta is held to be a consideration of great importance. The lofty projecting headland of the Dolphin's Nose would offer facilities for this purpose.

The Government of India with the approval of the Secretary of State and the Legislative Assembly, have sanctioned the construction of the new railway line from Raipur to Parvatipuram. The work is completed and the line opened to Traffic. They have also decided to develop the port of Vizagapatam under their direct control and the port has accordingly been declared to be a Major Port.

The work is being carried out by a staff of Engineers under direct charge of an Engineer-in-Chief who comes under the administrative charge of an Administrative Officer for the development scheme, a post which is held ex-officio by the Agent of the B. N. Railway. An Advisory Committee consisting of the above mentioned officers and representatives of the Local Government, the Vizagapatam Port Administration and the commercial interest concerned, has also been constituted to advise in the development of the harbour.

The scheme for the construction and development of the Harbour will be carried out in stages according to the demand of trade. The first stage has been completed sufficiently to enable the Harbour to be opened. Ships started using the Harbour in October 1933 and the official opening by His Excellency the Viceroy took place on 19th December 1933.

The present provision includes a 1000 ft. diameter Turning Basin together with access to the three quay Berths and an Entrance Channel dredged out to afford a passage 300 ft. wide at the bottom. Vessels of 26 ft. draft are admitted at present and deepening is in progress to allow vessels of 28'-6" maximum draft enter in the near future.

A quay wall comprising three 500 ft. Berths has been completed and equipped with 3-ton electric cranes. Storage accommodation aggregating 140,000 sq. ft. of covered area, in three single storied sheds has been provided in the vicinity of the quay, equipped with full railway and road facilities. Special facilities have been provided for the storage and shipment of manganese ore. In addition to the quays, four Mooring Berths have been installed, around the Basin and additional facilities provided for dealing with lightered cargo.

A large area of land has been reclaimed in the course of the dredging operations and it has been laid out in blocks served by broad roadways. Plots are available for office sites and for industrial concerns. Water supply and electric lighting have been arranged for.

The floating equipment of the Harbour comprises three tugs of 1500, 600 and 150 H. P. respectively.

A graving dock with an entrance 60 ft. 6 in. broad has been provided; but though adapted for future extension and for use by vessels larger than the dredging craft which now use it; length of ships is at present restricted to 300 feet.

The port is at present capable of dealing with lifts of 15 tons.

The sea entrance channel is protected on the South Side by the provision of a sand trap and protecting Breakwater.

At present ships enter and leave the Harbour at day time only and pilotage is compulsory.

The future administration of the Port is still under consideration by the Government of India. At present, the Agent of the Bengal Nagpur Railway holds Administrative charge of the Port. He is represented at Vizagapatam by a Deputy Conservator, which office is held *ex officio* by the Engineer-in-Chief. All matters in connection with port traffic and land are under the charge of the Traffic Manager. The Port Railways are being worked by the B. N. Railway Company.

The principal officers are :—

Administrative Officer.—V. E. D. Jarrad.

Engineer-in-Chief and Deputy Conservator—O. B. Rattenbury, B. Sc., M.I.C.E., M.I.E.

Traffic Manager.—E. G. Lilley, B.A.

Education.

Indian education is unintelligible except through its history. Seen thus, it affords the spectacle of a growth which, while to one it will appear as a blunder based on an initial error easily avoided, to another it stands out as a symbol of sincerity and honest endeavour on the part of a far-sighted race of rulers whose aim has been to guide a people alien in sentiments and prejudices into the channels of thought and attitude best calculated to fit them for the needs of modern life and western ideals. There is to-day no subject in the whole area of administrative activity in India which presents greater complexities and differences of opinion than education. Government, local bodies and private persons of learning have in the past devoted their limited funds to meeting the demands of those who perceived the benefits of education, rather than to cultivating a desire for education where it did not exist. The result is that the structure has become top-heavy. The lower classes are largely illiterate, while the middle classes who constitute the bulk of the *intelligentsia* are in point of numbers at least educated to a pitch equal to that of countries whose economic conditions are more highly developed. As might be expected from this abnormal distribution of education, the form which it has eventually assumed contains corresponding defects. There have, however, in recent years been strong movements, leading to the passing of Primary Education Acts in several Provinces, in favour of the expansion of primary education among the masses.

The Introduction of Western Learning—In the early days of its dominion in India, the East India Company had little inclination for the doubtful experiment of introducing western learning into India. Warren Hastings, the dominating figure of the time, was a genuine admirer of the laws and literature of the East. His policy was to enable the ancient learning to revive and flourish under the protection of a stable government, and to interfere as little as possible with the habits and customs of the people. Even the Act of 1813 which set apart a lakh of rupees for the introduction and promotion of a knowledge of the sciences was interpreted as a scheme for the encouragement of Sanskrit and Arabic. In the following year the Court of Directors instructed the Governor-General to leave the Hindus "to the practice of usage, long established among them, of giving instruction in their own homes, and to encourage them in the exercise and cultivation of their talents by the stimulus of honorary marks of distinction and in some cases by grants of pecuniary assistance."

It was from sources other than Government that the **desire for western knowledge** arose in India. In 1816, David Hare, an English watchmaker in Calcutta, joined hands with the enlightened Brahmin, Mohan Roy, to institute the Hindu College for the promotion of western secular learning. The new institution was distrusted both by Christian missionaries and by orthodox Hindus, but its influence grow apace. Fifteen years later, the Committee of Public Instruction in Bengal reported that a taste for English had been widely disseminated and that independent schools, conducted by young men reared in the Hindu College, were springing up in every direction. In Bombay, the Elphinstone Institution was founded in memory of the great ruler who left India in 1827. A still more remarkable innovation was made in 1835 by the establishment of the Calcutta Medical College, whose object was to teach "the principles and practice of medical science in strict accordance with the mode adopted in Europe." Many pronounced the failure of the undertaking to be inevitable; for, under the Hindu custom the higher castes were forbidden to touch the dead. This obstacle was surmounted by Madusudan Gupta who, with a few courageous pupils, began the dissection of a human body. From that time onward Indians of the highest castes have devoted themselves with enthusiasm and with success to the study of medicine in all its branches.

Another impetus to the introduction of western learning was the devotion of **Christian missionaries.** The humanitarian spirit, which had been kindled in England by Wesley, Burke and Wilberforce, influenced action also in India. Carey, Marshman and Ward opened the first missionary College at Serampore in 1818; and twelve years later, Alexander Duff reversed the whole trend of missionary policy in India by his insistence on teaching rather than on preaching, and by the foundation of his school and College in Calcutta. In Madras, the missionaries had been still earlier in the field; for as early as in 1787 a small group of missionary schools were being directed by Mr. Schwarz. The Madras Christian College was opened in 1837. In Bombay, the Wilson School (afterwards College) was founded in 1834.

Lord William Bentinck's minute of 1835 (based upon Macaulay's famous minute) marks of somewhat tardy acceptance by Government of the new policy. Government then determined, while observing a neutrality in religious matters to devote its available funds to the maintenance of secondary schools and colleges of western learning to be taught through the medium of English. But this decision did not entail that Oriental learning should be neglected; still less that the development of the vernaculars should be discouraged. Other changes powerfully contributed to the success of the new system. The freedom of the press was established in 1835; English was substituted for Persian as the language of the Courts in 1837; and in 1844 Sir Henry Hardinge ordained that preference in Government appointments should be given to those who had received a western education. In the following decade the new learning took firm root in India: and, though the Muhammadans still held aloof, the demand for English schools outstripped the means of Government for providing them. Fortunately there has been of late a marked appreciation among Muslim leaders of the need of improving the instructional level of their co-religionists; and in many of the provinces of India a great impulse towards educational advance among the Muhammadan community is now noticeable.

GROWTH AND ORGANISATION OF ENGLISH EDUCATION.

An epoch in Indian educational history is marked by Sir Charles Wood's despatch in 1854. Perhaps its most notable feature was the emphasis which it laid on the importance of primary education. The old idea that the education imparted to the higher classes of society would filter down to the lower classes was discarded. The new policy was boldly "to combat the ignorance of the people which may be considered the greatest curse of the country." For this purpose Departments of Public Instructions were created on lines which do not differ very materially from the Departments of the present day. The despatch also broke away from the practice followed since 1835 whereby most of the available public funds had been expended upon a few Government schools and colleges, and instituted a policy of grants-in-aid to private institutions. "Such a system as this, placed in all its degrees under efficient inspection, beginning from the humblest elementary institution and ending with the university test of a liberal education would impart life and energy to education in India, and lead to a gradual but steady extension of its benefits to all classes of people." Another feature of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Madras and Bombay three years later. The affiliating type of university then became the pivot of the Indian education system. It has undoubtedly been of value in several ways. It enabled Government to select recruits for its service on an impartial basis ; it did much, through the agency of its Colleges to develop backward places ; it accelerated the conversion of Indians to a zeal for western education ; and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scholars, but corporations of administrators ; they did not deal directly with the training of men, but with the examination of candidates; they were not concerned with learning, except in so far as learning can be tested by examination. The colleges were fettered by examination requirements and by uniform courses; their teachers were denied that freedom which teachers should enjoy : and their students were encouraged not to value training for its own sake but as a means for obtaining marketable qualifications. In certain important respects the recommendations in the despatch were not followed. The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts; they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions; they recommended the establishment of university chairs for advanced study. They were aware of the dangers of a too literary course of instruction ; they hoped that the system of education would rouse the people of India to develop the vast resources of their country ...and gradually, but certainly, confer upon them all the advantages which accompany the healthy increase of wealth and commerce. The encouragement of the grant-in-aid system was advocated to an even greater extent by the Education Commission of 1882, which favoured the policy of withdrawing higher education from the control of Government within certain limits and of stimulating private effort. In theory the decision was correct, but in practice it was irretrievably wrong. In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay. And, in the course of time, an unworkable system of dual control grew up, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eye on the private institutions and to be content with the development of a few favoured Government institutions. There can be little wonder that, under such a system of neglect and short-sightedness, evils crept in which are now being removed gradually by the establishment of independent Boards of Intermediate Education charged with the administration of the high school and intermediate stages of education.

The Reforms of 1902-4.

In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universites over the schools and colleges. The Chancellors of the Universities were empowered to nominate 80 *per cent.* of the ordinary members of the Senates and to approve the election of the remainder : the Government retained the power of cancelling any appointment, and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sanction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, the inspection of schools being ordinarily conducted by the officers of the Department of Public Instruction. Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government sanction, for these objects: but their scope was in practice limited to post graduate work and research. The territorial limits of each university were defined, so that universities were precluded from any connexion with institutions lying outside those boundaries. Neither the Commission nor the Government discussed the fundamental problems of university organisation, but dealt only with the immediate difficulties of the Indian system. They did not inquire whether the affiliating system could be replaced by any other mode of organisation, nor whether all schools might be placed under some public authority which would be representative of the universities and of the departments. They assumed the permanent validity of the existing system, in its main features, and set themselves only to improve and to strengthen it.

* High Schools include vernacular high schools also in some provinces.

(*a*) Includes scholars in University Departments and in the Intermediate and Second Grade Colleges (including Intermediate colleges of the new type.)

N.B.—In the educational tables of most provinces the new census figures of 1931 have been used; hence the percentages for 1913 are not strictly comparable with those for 1930.

Recent Developments.

Government of India Resolutions on Indian Educational Policy.—The Indian Universities Act of 1904 was followed by two important resolutions of the Government of India on Indian Educational Policy—one in 1904 and the other in 1913. The resolution of 1904 was comprehensive in character and reviewed the state of education in all its departments. The following passage from it summarises the intentions of Government:—"The progressive devolution of primary, secondary and collegiate education upon private enterprise and the continuous withdrawal of Government from competition therewith was recommended by the Educational Commission in 1883 and the advice has generally been acted upon. But while accepting this policy, the Government of India at the same time recognise the extreme importance of the principle that in each branch of education Government should maintain a limited number of institutions, both as models for private enterprise to follow and in order to uphold a high standard of education. In withdrawing from direct management it is further essential that Government should retain a general control, by means of efficient inspection, over all public educational institutions." The comprehensive instructions contained in this resolution were followed in the next few years by the assignment to the provinces of large Imperial grants, mainly for University, technical and elementary education. The resolution of 1913 advocated, *inter alia*, the establishment of additional but smaller Universities of the teaching type; it reaffirmed the policy of reliance on private effort in secondary education; it recommended an increase in the salaries of teachers and an improvement in the amounts of grants-in-aid; and it insisted on proper attention being paid to the formation of character in the education given to scholars of all grades. It further discussed the desirability of imparting manual instructions and instruction in hygiene; the necessity for medical inspection; the provision of facilities for research; the need for the staffing of the girls' schools by women teachers and the expansion of facilities for the training of teachers. The policy outlined in 1913 materially accelerated progress in the provinces, but the educational developments foreshadowed were in many cases delayed owing to the effects of the Great War.

Department of Education, Health and Lands of the Government of India.—In 1910 a **Department of Education** was established in the Government of India with an office of its own and a Member to represent it in the Executive Council. The first Member was Sir Harcourt Butler. In 1923, the activities of the Department were widened, in the interests of economy, by absorption in it of the Department of Revenue and Agriculture. The enlarged Department has been designated the Department of Education, Health and Lands. Sir Fazl-i-Husain and Mr. G. S. Bajpai are the present Member and Secretary, respectively. The Department possesses an educational adviser styled Educational Commissioner. The present Educational Commissioner is Sir George Anderson, Kt., C.S.I., C.I.E., M.A.

Calcutta University Commission.—The Report of the Calcutta University Commission was published in August 1919 and in the following January the Government of India issued a Resolution summarising the main features of the Report and the recommendations of the Commissioners.

The Government of India drew special attention to the following points in the Report:—

(*i*) High schools fail to give that breadth of training which the developments of the country and new avenues of employment demand.

(*ii*) The intermediate section of University education should be recognized as part of school education and should be separated from the University organisation.

(*iii*) The defects of the present system of affiliated colleges may be mitigated by the establishment of a strong central teaching body, the incorporation of unitary universities (as occasion arises), a modification of the administrative machinery which will admit of fuller representation of local interests, and supervision of different classes of institutions by several appropriately constituted bodies.

The Commission gave detailed suggestions for the reorganisation of the Calcuttta University, for the control of secondary and intermediate education in Bengal and for the establishment of a unitary teaching University in Dacca. These measures concerned only Bengal: but it was generally recognised that some of the criticism made by the Commissioners admit of a wider application. Committees were consequently appointed by the Universities of Madras, Bombay, Patna and the Punjab to consider the findings of the Commission. In the United Provinces two committees were appointed, one to prepare a scheme for a unitary teaching University at Lucknow, the second to consider measures for the reorganisation of the Allahabad University and the creation of a Board to control secondary and intermediate education.

In Bengal the first outcome of the Commission's Report was the passing of the Dacca University Act in the Imperial Legislative Council in March 1920 mentioned in detail elsewhere. It is remarkable that the University which appears to have been least affected by the recommendations of the Calcutta University Commission has been the Calcutta University itself. In spite of many discussions and draft proposals by both the University and the Government the organisation of the Calcutta University has remained unaffected.

The Reforms Act.—The Reforms Act of 1919 has altered the conditions of educational administration in India. Education is now a 'transferred' subject in the Governors' provinces and is, in each such Province, under the charge of a Minister. There are, however, some exceptions to this new order of things. The education of Europeans is a 'Provincial reserved' subject, i.e., it is not within the charge

of the Minister of Education; and to the Government of India are still reserved matters relating to Universities like Aligarh, Benares and Delhi and all such new universities as may be declared by the Governor-General in Council to be central subjects. The Government of India are also in charge of the Chiefs' Colleges and of all institutions maintained by the Governor-General in Council for the benefit of members of His Majesty's Forces or of other public servants or of the children of such members or servants.

Hartog Committee on Education.—The most notable event in recent years has been the appointment of the Auxiliary Committee of the Indian Statutory Commission, under the Chairmanship of Sir Philip Hartog, to report on the growth of education in India. The report of the Committee, which was published in 1929, constitutes a valuable document on the present state of education in India.

Lindsay Commission.—Another Commission, which deserves mention, was appointed in 1929 by the International Missionary Council to investigate the various problems connected with the higher education provided by the various Missionary bodies working in India. It was presided overby Dr. A. D. Lindsay, Master of Balliol College, Oxford. The Commission visited India in 1930-31 and its report was published in 1931.

The Punjab University Enquiry Committee was appointed in 1932 and submitted its report in the following year. The committee reported that "the University is overburdened by the immense area of its jurisdiction and by the ever-increasing number of its students many of whom are ill-fitted for such education." The main recommendation was that the school system should be re-adjusted so that many pupils would be diverted at an earlier age to vocational and other forms of education.

Administration.—The transfer of Indian education to the charge of a Minister responsible to the Provincial Legislative Council, of which he himself is an elected member, has brought the subject directly under popular control in the ten major provinces. Generally speaking, education, excluding European education, is not, however, under the charge of a single Minister in all the provinces of India. Generally speaking education, excluding European education, is not, however, under the charge of a single Minister; certain forms of education have been transferred to the technical departments concerned and come within the purview of the Minister in charge of those departments. In each province, the Director of Public Instruction is the administrative head of the Department of Education and acts as adviser to the Education Minister. He controls the inspecting staff and the teaching staff of Government institutions and is generally responsible to the local government for the administration of education. The authority of Government, in controlling the system of public instruction, is in part shared with and in part delegated to Universities as regards higher education and to local bodies as regards elementary and vernacular education. In some provinces, boards of secondary, or of secondary and intermediate, education have also been set up and have to some extent relieved the Universities in those provinces of their responsibilities in connection with intermediate education and with entrance to a University course of studies. Institutions under private management are controlled by Government and by local bodies by "recognition" and by the payment of grants-in-aid, with the assistance of the inspecting staffs employed by Government and in rarer cases by local bodies.

Educational Services.—Until recently, the educational organisation in India consisted mainly of three services—(*i*) the Indian Educational Service, (*ii*) the Provincial Educational Service, and (*iii*) the Subordinate Educational Service. The Indian Educational Service came into existence as a result of the recommendations made by the Public Services Commission of 1886, and in 1896 the Superior Educational Service in India was constituted with two divisions—the Indian Educational Service staffed by persons recruited in England and the Provincial Educational Service staffed by persons recruited in India. These two divisions were originally considered to be collateral and equal in status, though the pay of the European recruit was higher by approximately 50 per cent. than the pay of the Indian recruit. Gradually, however, status came to be considered identical with pay and the Provincial Educational Service came to be regarded of inferior status to the Indian Educational Service. Later as a result of the recommendations of the Islington Commission of 1912-16, the Indian Educational Service was formed into a superior educational service and all posts were thrown open to Indian recruitment. The Provincial Educational Service was simultaneously reorganised and a number of posts, generally with their Indian incumbents, were transferred to the superior service. This reorganisation resulted in a considerable Indianisation of the superior educational services in India. It was then laid down that the proportion of Indians in this service should on an average be 50 per cent. of the total strength, excluding the posts in Burma.

In 1924, all recruitment to the Indian Educational Service was stopped as a result of the recommendations of the Royal Commission on the superior services in India. The Commission recommended that "for the purposes of local Governments no further recruitment should be made to the all-India services which operate in transferred fields. The personnel required for these branches of administration should in future be recruited by local Governments". The Commission further recommended in regard to the question of the future recruitment of Europeans that "it will rest entirely with the local Governments to determine the number of Europeans who may in future be recruited. In this matter the discretion of local Government must be unfettered but we express the hope that Ministers on the one hand will still seek to obtain the co-operation of Europeans in these technical departments and that qualified Europeans on the other hand may be no less willing to take service under local Governments than they were in the past to take service under the Secretary of State". As a result of the acceptance of these recommendations, the Indian Educational Service is dying out and with the gradual retirement of its existing

members, the history of the service which has had a brief but fine record will be brought to an end. The present organisation of education in the provinces is largely the work of members of this service; while in the sphere of higher education, it has trained many men of more than ordinary attainments.

The new Provincial Educational Services, which function under provincial control as the superior educational services, have been constituted in most provinces. These schemes vary from province to province, but it may be generally remarked that, while the rates of pay are not uniform, they consist of two main classes—class I into which the existing Indian Educational Services have been merged for the time being, and class II which may be said to represent the old Provincial Educational Service.

The existing Provincial and Subordinate Educational Services in the provinces have been affected, more in some provinces than others, by the changes which have taken place since 1919. Communal interests have influenced recruitment, and in some places they have influenced promotions also, in a direction which has not always tended towards service contentment. But these results are the natural consequences of the devolution of control of education and power of recruitment to provincial and local authorities and will for some time continue to affect the efficiency of the Education Departments in the provinces.

Statistical Progress.

The two tables given below afford useful comparisons with previous years and serve to illustrate the growth and expansion of education in India.

(*a*) STUDENTS.

Year.	In Recognised Institutions.			In All Institutions (Recognised and Unrecognised).		
	Males.	Females.	Total.	Males.	Females.	Total.
1911–12	5,253,065	875,660	6,128,725	5,828,182	952,539	6,780,721
1916–17	6,050,840	1,156,468	7,207,308	6,621,527	1,230,419	7,851,946
1921–22	6,401,434	1,340,842	7,742,275	6,962,979	1,418,422	8,381,401
1926–27	8,777,739	1,751,611	10,529,350	9,315,140	1,842,356	11,157,496
1927–28	9,260,266	1,899,890	11,160,156	9,778,737	1,996,445	11,775,222
1928–29	9 515,109	2,032,388	11,547,497	10,028,086	2,137,753	12,165,839
1929–30	9,748,749	2,149,853	11,898,602	10,256,914	2,258,212	12,515,126
1930–31	9,796,683	2,260,154	12,056,837	10,313,493	2,375,593	12,689,086
1931–32	9,752,937	2,359,529	12,122,466	10,273,888	2,492,649	12,766,537

(*b*) EXPENDITURE.

Year	Total expenditure on education in British India.	
	Public Funds.	Total.
	Rs.	Rs.
1911–12	4,05,23,072	7,85,92,605
1916–17	6,14,80,471	11,28,83,068
1921–22	11,49,61,178	18,37,52,969
1926–27	15,59,23,968	24,58,47,572
1927–28	16,45,80,915	25,82,78,819
1928–29	17,12,24,514	27,07,32,258
1929–30	17,50,03,644	27,42,82,018
1930–31	17,99,26,248	28,31,61,446
1931–32	16,84,19,016	27,18,56,622

In 1931–32 the total expenditure on education in British India amounted to Rs. 27,18,56,622 of which 45·1 per cent. came from Government funds, 16·1 per cent. from District Board and Municipal funds, 22·9 per cent. from fees and 15·2 per cent. from all other sources.

The average annual cost per scholar amounted to Rs. 22-6-9 as follows: to Government funds Rs. 10-4-5, to local funds Rs. 3-9-10, to fees Rs. 5-2-2 and to other sources Rs. 3-6-4.

The following table provides an interesting and valuable comment on the state of education in India in 1931-32. Although the statistical returns show 12 millions of pupils at school, it will be seen that over 76 per cent. of these are in the lower primary stage; and it may safely be deducted that over 80 per cent. of those at school never become literate. Of course, the total number of pupils at school is not a safe criterion of the state of education, and a sounder standard of comparison would be that number multiplied by the average period spent at school.

Primary Schools	204,384	201,470	9,362,748	9,454,360
Special Schools	8,891	7,260	315,650	271,094
Total of Recognised Institutions	227,189	222,804	12,056,837	12,122,466
Unrecognised Institutions ..	34,879	34,988	632,249	644,071
Grand total of all Institutions	262,068	257,792	12,689,086	12,766,537

Primary Education.—The primary schools are mainly under the direction of the local boards and municipalities. In 1911, the late Mr. G. K. Gokhale pleaded in the Imperial Legislative Council for a modified system of compulsory primary education, but Government was unable to accept the proposal mainly for financial reasons. In recent years, eight provincial legislatures have passed Primary Education Acts authorising the introduction of compulsory education by local option. Bombay led the way in this matter by a private Bill which was passed into law in February 1918. The other private Bills which followed were those of Bihar and Orissa passed in February 1919, of Bengal passed in May 1919 and of the United Provinces, passed in June 1919. Of the Government measures, the Punjab Act was passed in April 1919, the Central Provinces Act in May 1920, the Madras Act in December 1920 and the Assam Act in 1925. The City of Bombay Primary Education Act of 1920 extends generally the provisions of the 1918 Act to the Bombay Corporation also enabling it to introduce free compulsory education ward by ward. Not content with this, the Bombay legislature passed a new Act in 1923 to provide for compulsory elementary education and to make better provision for the management and control of primary education in the Bombay Presidency. The Bombay and the United Provinces Acts apply only to municipalities, the Bengal Primary Education Act applies, in the first instance, to municipalities, but is capable of extension to rural areas. Boys only are included within the scope of the Punjab, Bihar and Orissa and Bengal Acts, while the Central Provinces Act is capable of extension to girls, and the remaining Acts are applicable to both sexes. The United Provinces legislature passed a second Primary Education Act in 1926, *viz.*, the United Provinces District Boards Primary Education Act. It allows the District Boards to introduce compulsion within their areas. All the Acts are drafted on very similar lines. If a local body at a special meeting convened for the purpose decides by a two-thirds majority in favour of the introduction of compulsion in any part of the area under its control, it may then submit to Government, for approval, a scheme to give effect to its decision. The scheme must be within the means of the local body to carry out with reasonable financial assistance from Government. Ordinarily the age limits of compulsion are from six to ten years though provision is made for prolonging the period. Provision is also made in all the Acts for the exemption of particular classes and communities and for special exemption from attendance in cases of bodily infirmity. Walking distance to a school is generally defined as one mile from the child's home. The employment of children who should be at school, is strictly forbidden and a small fine is imposed for non-compliance with an attendance order. The Acts generally provide that, subject to the sanction of the local Government, education where compulsory shall be free. The Madras Elementary Education Act of 1920 contained such provision, but it has recently been amended so as to allow fees to be charged in schools under private management situated in areas where education is compulsory, reserving however a number of free places for poor pupils in such schools in areas where there are no free schools. Such in brief are the ordinary provisions of the various provincial Education Acts. Local bodies have not however shewn as yet any great alacrity in availing themselves of the opportunity afforded them by these Acts.

Compulsory Primary Education.—The following table shows the urban and rural areas in which compulsion had been introduced by the year 1931-32 :—

Province.	Acts.	Areas under "Compulsion."	
		Urban areas.	Rural areas.
Madras	Elementary Education Act, 1920	25	7 (*a*)
Bombay ..	Primary Education (District Municipalities Act, 1918).	4	..
	City of Bombay Primary Education Act, 1920	1(*b*)	..
	Primary Education Act, 1923	5	2
Bengal	Primary Education Act, 1919 & 1930 ..	1	..
United Provinces.	Primary Education Act, 1919	37	..
	District Boards Primary Education Act, 1926.	..	24 (*c*)
Punjab	Primary Education Act, 1919	54	2,924 (*d*)
Bihar and Orissa.	Primary Education Act, 1919	1	3
Central Provinces and Berar.	Primary Education Act, 1920	24	422 (*e*)
Assam	Primary Education Act, 1926	..	..
Delhi	(Punjab Act extended to Delhi, 1925) ..	1	10
	Total ..	153	3,392

(*a*) Taluk Boards (the number of villages in 1930-31 was 206).
(*b*) For Bombay City only.
(*c*) Excludes *Banda Board* in whose area compulsory education was abolished in February 1931.
(*d*) Individual School arreas.
(*e*) Villages.

N.B.—This table does not include areas for which schemes of compulsory primary education are under consideration or have been sanctioned but not yet introduced. It includes, on the other hand, areas in which such schemes have been partially introduced.

The poverty of local bodies is usually the cause assigned to their diffidence to introduce compulsory education to any appreciable extent.

On the 31st March 1932, there were 201,470 recognised primary schools in British India containing 9,454,360 scholars. (The latter figure does not include scholars reading in the primary classes of secondary schools). The total direct expenditure on primary schools, during the year 1931-32, amounted to Rs. 8,12,60,290.

Secondary and High School Education.—In 1911-12 there were 1,219 high schools in India and in 1930-31 the number had risen to 3,036 the number of scholars in the former year being 390,881, and in the latter year 930,186. Some attempts have been made to give a greater bias towards a more practical form of instruction in these schools. The Commission of 1882 suggested that there should be two sides in secondary schools," one leading to the entrance examination of the universities, the other of a more practical character, intended to fit youths for commercial and other non-literary pursuits." Some years later, what were called B and C classes were started in some schools in Bengal but, as they did not lead to a university course, they have not been successful. In more recent years the Government of India have advocated the institution of a school *final* examination in which the more practical subjects may be included. Efforts have also been made to improve the conduct of the matriculation and to emphasise the importance of oral tests and of school records. In Madras, this examination, which was placed under the direction of a Board representative of the University and of Government, proved somewhat cumbrous and certain modifications were made. In the United Provinces and the Central Provinces the control of secondary education has been made over to special Boards created for this purpose. Similarly, the Administration of Delhi has established a Board of Secondary Education for that province and the Government of India have established a Board of Intermediate and High School Education, with headquarters at Ajmer, for Rajputana, Central India and Gwalior. In the Punjab the school leaving examination is conducted by a Board. But the main difficulty

has not yet been touched. The University which recognises the schools has no money wherewith to improve them: and the Department of Public Instruction, which allots the Government grants, has no responsibility for the recognition of schools, and no connexion whatever with the private unaided schools. This dual authority and this division of responsibility have had unhappy effects. The standard of the schools also is very low so that the matriculates are often unable to benefit by the college courses. In some provinces an endeavour has been made to raise the standard of the schools by withdrawing from the University the Intermediate classes and by placing them in a number of the better schools in the State.

There are schools for Europeans and Anglo-Indians which are placed under the control of special inspectors for European Schools. The education of the domiciled community has proved to be a perplexing problem, and in 1912 a conference was summoned at Simla to consider the matter. The difficulty is that European Schools are very remote from the general system of education in India. But efforts are being made to bring these schools more into line with the ordinary schools, and Indian Universities generally are affording special facilities for Anglo-Indian boys who may proceed for higher education in Indian colleges.

Medium of instruction in public schools.—The position of English as a foreign language and as a medium of instruction in public schools was discussed by a representative conference which met at Simla in 1917 under the Chairmanship of Sir Sankaran Nair, the then Education Member. Although it was generally conceded that the teaching of school subjects through a medium which was imperfectly understood led to cramming and memorising of text-books, the use of English medium was defended by some on the ground that it improved the knowledge of English. The result of the conference was therefore inconclusive. Some local authorities have since then approved of schemes providing for the recognition of local vernaculars as media of instruction and examination in certain subjects. There seems to be no doubt that the use of the vernacular as the medium of instruction and examination is gradually increasing all over India.

Boy Scout Movement.—A happy development in recent years has been the spread of the boy scout movement which has had an excellent effect in all provinces in creating amongst boys an active sense of good discipline.

The following statistics show the wide extent of the movement:—

Boy Scouts, 1932.

Province.	No. of groups.	Total of all ranks.
Madras	389	11,282
Bombay	1,008	36,642
Bengal	..	8,526
United Provinces	245	6,291
Punjab	1,140	37,462
Burma	205	5,904
Bihar and Orissa	234	8,241
Central Provinces	1,328	36,167
Assam	96	2,425
North-West Frontier Province	91	4,116
Coorg	..	..
Delhi	9	791
Ajmer-Merwara	..	..
Baluchistan	14	551
Bangalore	21	865
Other Administered Areas	49	2,494
Indian States	760	27,994
Total ..	5,589	189,751

Girl Guide Movement.—This movement is making steady progress. There is, however, a lack of those competent and willing to give instruction.

Medical Inspection.—Arrangements have been made for medical inspection of scholars but progress has been hampered by the shortage of funds and the continued indifference of parents. In the United Provinces, schools are now inspected by officers of the Public Health Department. In Madras, the scheme of medical inspection of schools has been made compulsory in all Government institutions, and it has been made a condition of recognition that all secondary schools should introduce the scheme. As a measure of economy, however, the payment of grants for medical inspection has been suspended, but the question of reorganising the system on an improved basis is under consideration. Owing to lack of funds, it has not been possible for the Bombay Government to set up an agency to direct and organise medical inspection work in schools on a satisfactory basis. In Burma, the work of medical inspection has been temporarily suspended on account of retrenchment. In Bihar and Orissa, certain posts of school medical officers were abolished in 1932, for the same reason, but it has since been found possible to revive them. There is, however, still need for adequate facilities for the treatment of children suffering from diseases. The experimental measure introduced in five districts of the Punjab, however, appears to be working well in the Gurgoan district alone. The number of diseased boys who were treated successfully has risen from 46 to 69 per cent. in the district.

The activities of Junior Red Cross and St. John Ambulance Societies have been particularly beneficial in improving the health of school children and in interesting them in the health of others.

Intermediate Colleges.—One important part of the Calcutta University Commission's recommendations has been accepted by the Government of the United Provinces and the Government of India and incorporated in the Acts establishing the Lucknow and Dacca and reconstituting that of Allahabad, namely, the separation of the intermediate classes from the sphere of university work and of the two top classes of night schools from the rest of the school classes. The separated classes have been combined together and the control over them has been transferred from the University to a Board of Secondary and Intermediate Education. Such a Board was constituted for the Dacca University area by a notification of the Government of Bengal in 1921. It contains twenty-the members of whom seven are elected by the University. The United Provinces Board was constituted by an Act passed in the same year. It consists of some forty members of whom approximately one-quarter represent the Universities in the Province. The Aligarh Muslim University has, however, reverted to the old system under which the Intermediate classes form part of the University, and the separate Intermediate College has been abolished. In Ajmer-Merwara, the Intermediate classes are under a separate Board which operates in Rajputana, Central India and Gwalior. Intermediate Colleges of the new type have also been established in the Punjab, but they are affiliated to the Punjab University.

Professional and Technical Education.—A research institute in agriculture was started by Lord Curzon at Pusa in Bihar, which has done valuable work. Conferences have been held at Pusa, Simla and Poona, with the object of providing a suitable training in agriculture. A Royal Commission on Agriculture has submitted its report and as a result of its recommendations an Imperial Council of Agricultural Research has been established by the Government of India at their headquarters. Among commercial colleges, the most important is the Sydenham College of Commerce in Bombay. Industrial institutions are dotted about India, some maintained by Government, others by municipalities or local boards, and others by private bodies. The most important are the Victoria Jubilee Technical Institute in Bombay. The Indian Institute of Science at Bangalore, the product of generous donations by the Tata family. The tendency in recent years has been to place these institutions under the control of the Departments of Industries. In addition to a number of engineering schools, there are Engineering Colleges at Roorkee, Sibpur, Poona, Madras, Rangoon, Patna and Benares each of which except that at Roorkee is affiliated to a university. The engineering colleges maintain a high standard and great pressure for admission is reported from several provinces. There are schools of art in the larger towns where not only architecture and the fine arts are studied, but also practical crafts like pottery and iron work. There are two forest colleges at Dehra Dun and Coimbatore and a Technical Institute is in existence at Cawnpore and a Mining School at Dhanbad. Mining and metallurgy are also taught by the Mining and Metallurgical College at Benares which provides a 4-year course leading to a B.Sc. degree in each subject. Provision has been made by the Government of India for the training of cadets for the Mercantile Marine Service and a ship "I.M.M.T.S. Dufferin" has been stationed for this purpose in Bombay waters.

The majority of these institutions are not under the control of provincial department of education. The following table shows in summary form the number of such institutions and of students attending them :—

Type of Institution.	1931.		1932.	
	Institutions.	Students.	Institutions.	Students.
Training colleges and normal schools for teachers.	762	33,623	656	30,350
Law colleges and schools ..	14	6,631	14	7,278

Total (British India) ..	1,503	94,610	1,398	92,034

Universities.

The first University in India, that of Calcutta, was founded in 1857. Between 1857 and 1887 four new Universities, at Bombay, Madras, Lahore and Allahabad were added. These five universities were all of the affiliating type. They consisted of groups of colleges, situated sometimes several hundred miles apart, and bound together by a legally constituted central organisation, which determined the qualifications for admission, prescribed the courses of study, conducted the examinations and exercised a mild form of control over the affiliated colleges. There was nothing under the system to limit the number of institutions affiliated to a University; and for thirty years, *i.e.*, from 1887 to 1917, the growing demand for university education was met, not by the creation of new universities, but by enlarging the size of the constituent colleges and by increasing their number. By 1917 this inflation had been carried on so far that the composition of the original five universities stood as follows:—

University.	Colleges.	Scholars.
Calcutta	58	28,618
Bombay	17	8,001
Madras	53	10,216
Punjab	24	6,558
Allahabad	33	7,807

It had become obvious that further expansion on the same lines was no longer possible without a serious loss of efficiency and the Government of India had recognised in their resolution of 1913 the necessity of creating new local teaching and residential universities in addition to the existing affiliating universities. The development of this policy was accelerated by the strength of communal feeling and the growth of local and provincial patriotism, leading to the establishment of a number of teaching universities. The new type of universities has since been strongly advocated by the Calcutta University Commission which has offered constructive proposals as to the lines to be followed in university reform.

There are now 18 Universities in India, of which two are situated in Indian States. The following table gives the latest available figures and certain other particulars about these Universities :—

Statistics of Universities—1933.

University.	Type.†	Original Date of Foundation.	Faculties.‡	No. of Members of Teaching Staff in 1932.		No. of Students in 1932.		No. of Students who graduated in Arts and Science in 1932.	Remarks.

Inter-University Board.—The idea put forward by the Indian Universities Conference in May 1924 for the constitution of a central agency in India took practical shape and an Inter-University Board came into being during 1925. Twelve out of fifteen universities joined the Board. Its functions are:—

(*a*) to act as an inter-university organisation and a bureau of information;

(*b*) to facilitate the exchange of professors;

(*c*) to serve as an authorised channel of communication and facilitate the co-ordination of university work;

(*d*) to assist Indian universities in obtaining recognition for their degrees, diplomas and examinations in other countries;

(*e*) to appoint or recommend, where necessary, a common representative or representatives of India at Imperial or International conferences on higher education;

(*f*) to act as an appointments bureau for Indian universities;

(*g*) to fulfil such other duties as may be assigned to it from time to time by the Indian Universities.

Each member University has to make a fixed annual contribution towards the expenses of the Board.

The meetings of the Board are held yearly. The Board consists of one representative of each of the member Universities and one representative of the Government of India.

The Board has not yet had much influence on University policy in India but it has done a considerable amount of useful work in collecting information and in stimulating thought regarding current University problems.

Education of Indian Women and Girls.—There is still a leeway to be made good. All the influences which operate against the spread of education amongst the boys are reinforced in the case of women by the *purdah* system and the custom of early marriage.

Arts colleges, medical colleges, and the like admit students of both sexes, and a few girls attend them. The Lady Hardinge Medical College for Women at Delhi gives a full medical course for medical students. The Shreemati Nathibai Damodher Thackersey Indian Women's University was started some ten years ago by Professor Karve. It is a private institution and is doing good pioneer work.

The All-India Women's Conference on Educational Reform, which holds its meetings annually and has constituent conferences established all over the country, is also doing much useful work. An All-India Women's Education Fund Association has also been established in connection with this Conference. This association appointed in 1930 a special committee to enquire into the feasibility of establishing a central Teachers' Training College of a specialised Home Science character. This committee reported at the end of the year recommending the establishment of such a college "on absolutely new lines which would synthesise the work of existing provincial colleges by psychological research" and the Governing Body of the Association supported the proposal at the Annual General Meeting of the Association which has adopted it. A college, called the Lady Irwin College, has since been established in New Delhi.

The comparative statement below shows the state of women's education during 1931-32.

	No. of Institutions.			No. of Scholars.

Education in the Army.—The Army in India undertakes the responsibility of the education of certain sections of the community. Its activities are directed into various channels with certain definite objects, which may be summarised as follows :—

(*i*) The education of the soldier, British and Indian, in order to :—

(*a*) develop his training faculties;
(*b*) improve him as a subject for military training and as a citizen of the Empire;
(*c*) enhance the prospects of remunerative employment on his return to civil life.

(*ii*) The fulfilment of the obligations of the State to the children of soldiers, serving and ex-service (British and Indian).

(*iii*) The provision, as far as possible, of training for the children of soldiers, who have died in the service of their country.

(*iv*) The creation of a body of Indian gentlemen educated according to English public school traditions, which should provide suitable candidates for admission to the Royal Military College, Sandhurst.

The Prince of Wales' Royal Indian Military College, Dehra Dun.—A Royal Military College has been established at Dehra Dun. The aim of this institution is to provide education on the lines of an English public school for the sons of Indian gentlemen, both civil and military, up to the standard required for the passing of the entrance examination of the Royal Military College, Sandhurst.

The Indian Military Academy, Dehra Dun.—As a result of the recommendations of the Indian Military College Committee, which was appointed by the Government of India in 1931, the Indian Military Academy has been instituted at Dehra Dun. With the inauguration of this Academy, a new chapter in Indian history has opened. This Academy, which is to be as good as any similar institution in England, will train Indian young men for King's Commissions in the Army.

Chiefs' Colleges.—For the education of the sons and relatives of the Chiefs and Princes of India, whose families rule over one-third of the Indian continent, five Chiefs' Colleges are maintained, *viz* :—

(*i*) Mayo College, Ajmer, for Rajputana Chiefs;
(*ii*) Daly College, Indore, for Central India Chiefs;
(*iii*) Aitchison College, Lahore, for Punjab Chiefs;
(*iv*) Rajkumar College, Rajkote, for Kathiawar Chiefs; and
(*v*) Rajkumar College, Rajpur, for Central Provinces and Bihar and Orissa Chiefs.

In point of buildings, staffs and organisation these institutions approach English Public Schools. Students are prepared for a diploma examination conducted by the Government of India. The diploma is regarded as equivalent to the matriculation certificate of an Indian University. A further four-year course of University standard called the Higher Diploma is conducted at the Mayo College. The Intermediate and final examination for this Diploma are also held by the Government of India. Its standard is roughly equivalent to that of the B.A. diploma of an Indian University.

Indigenous Education.—Of the 12,766,537 scholars being educated in India 644,071 are classed as attending 'private' or 'unrecognised' institutions. Some of these institutions are of importance: The Gurukula near Hardwar and Sir Rabindra Nath Tagore's school at Bolpur have attained some fame; and the numerous monastery schools of Burma are well-known. Connected with every big Mosque in northern India there is some educational organisation and the schools attached to the Fatehpuri and Golden Mosques at Delhi and the Dar-ul-Ulm, Deoband, are noted. These institutions generally have a religious or 'national' atmosphere.

The Ayurvedic and Unani Tibbia College, Delhi, founded by the late Hakim Ajmal Khan, is an important unrecognised institution. It provides instruction in the indigenous system of medicine up to the highest standard and also gives some training in surgery.

Indian students in Foreign Countries.—Indian students still proceed to foreign countries, mainly, to Great Britain, America, Japan and Germany, to complete or supplement their education. About thirty years ago the number of Indian students in Great Britain was 400. The number now is well over 2,000, including students at Universities on the Continent and in the United States of America.

The distribution of these scholars in 1931-32 was as follows :—

1.	In Great Britian and Ireland—		
	England	1,451	
	Wales	30	
	Scotland	235	=1,753
	Ireland	37	
2.	In Europe—		
	Austria	5	
	France	34	
	Germany	72	= 117
	Sweden	1	
	Switzerland	5	
3.	United States of America :—		= 195
	Total		=2,065

Provincial Statistics.—The four tables, which are given below, summarise the salient features of educational progress in the different provinces in British India, and will be of general interest.

(i) *Number of Institutions*, 1931-32.

BOY SCOUTS.

The Boy Scouts movement, initiated in England by Lord Baden Powell (the Chief Scout), has spread widely in India, both among Europeans and Indians. The Viceroy is Chief Scout of India and the heads of Provinces are Chief Scouts in their own areas. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance—inculcating loyalty and thoughtfulness for others—and teaching them services useful to the public and handicrafts useful to themselves.

It is confidently anticipated that in the Boy Scout Movement will be found a natural means of bridging the gulf between the different races existing in India. The movement is non-official, non-military, non-political and non-sectarian. Its attitude towards religion is to encourage every boy to follow the faith he professes. Every boy admitted as a Scout makes a three-fold promise to do his best: (1) to be loyal to God, King and country; (2) to help others at all times; and (3) to obey the Scout law. The law referred to lays down—

1. That a Scout's honour is to be trusted;
2. That he is loyal to God, King and country his parents, teachers, employers, his comrades' his country and those under him;
3. That he is to be useful and to help others;
4. That he is a friend to all and a brother to every other scout, no matter to what social class the other belongs;
5. That he is courteous;
6. That he is a friend to animals;
7. That he obeys orders;
8. That he smiles and whistles under all difficulties;
9. That he is thrifty;
10. That he is clean in thought, word, and deed.

INDIAN HEADQUARTERS.

Patron.—H. R. H. The Prince of Wales, K.G.

Chief Scout for India.—His Excellency The Right Hon'ble The Earl of Willingdon, G.M.S.I., G.M.I.E., G.C.M.G., G.B.E.

Chief Commissioner.—(Vacant.)

Secretary to the Chief Scout.—E. C. Mieville, Esq., C.M.G.

Deputy Secretary to the Chief Scout.—O. C. B. St. John, Esq.

Assistant Secretary to the Chief Scout.—Rai Sahib G. Dutta.

Organising Secretary for India.—G. T. J. Thaddaeus, Esq.

General Council for India—

Ex-officio.—The Chief Commissioner for India.
The Provincial Commissioners.
The Presidents of Provincial Councils.

Elected.—(Not completed.)

Nominated.—(Not completed.)

Provincial Commissioner for Bombay Presidency—Sir Chunilal Mehta, M.A., LL.B., K.C.S.I.

Provincial Secretary for Bombay—B. T. Char, Esq., B.A.

The Co-operative Movement.

Prolegomena.—The co-operative movement in India has now been with us for more than a quarter of a century, having been introduced in 1904 when the Co-operative Credit Societies' Act was passed by the Government of India. During this period it has taken root in the soil and grown with wonderful rapidity, not only in the British Indian provinces but also in the Indian States. Though essentially meant for the betterment of the agriculturists, it has spread to urban areas likewise for the benefit of the small man in towns, be he the toiling factory operative or the ill-paid clerk or the small tradesman. It is being increasingly realised that co-operation is not a branch of knowledge but a method which enables the small men to stand up against the powerful forces of competition and exploitation, to gather strength and improve his economic condition by the mighty forces of association and co-ordinated action in a co-operative society, permeated with the co-operative spirit of thrift, self-reliance and mutual aid, so well summarised in the motto of the Co-operative Union of Manchester—"Each for all and all for each." This method has, therefore, been adopted not only for the betterment of the agriculturists and the economic regeneration of the rural masses but has also been applied for the cure of the many economic ills of the small man in towns. But though the movement has thus developed in very many directions, it is still predominantly an agricultural movement and that too chiefly for the organisation of agricultural finance on a co-operative basis. It would, therefore, be proper before we proceed further, if we indicate broadly the main features of the economic position of the agriculturist in this country.

Rural Poverty.—The outstanding feature of Indian rural economy that is bound to arrest the attention of any observer is the appalling poverty of the rural population. The various estimates, official and non-official, that have been made of the income per head of population in India at various times leave the matter absolutely in no doubt. The Central Banking Enquiry Committee estimates that the average income of an agriculturist in British India does not work out at a higher figure than Rs. 42 a year. The vast magnitude of this evil will be better realised when we take into account the predominance of the agricultural population in India. In 1891 61 per cent. of the total population of the country lived on agriculture; this percentage rose to 66 in 1901 and to 73 per cent. in 1921; in 1931, the percentage has fallen a little to 67. The poverty of the agriculturist may be due to a variety of causes, but we cannot ignore the fact that agriculture has in a large measure ceased to be an industry worked for profit; the cultivator labours not for a net return but for subsistence. The extent of an **average holding** which works out at about 6 acres for an agricultural family of 5 persons is too inadequate to maintain it in ordinary comfort even with the low standard of living which is so characteristic of the rural population of India. Moreover the Indian cultivator is in a large measure exposed to the vicissitudes of seasons and the **vagaries of the monsoon.** In every 5 years there is but one good year, one bad year and three indifferent years. These unfavourable conditions might be mitigated to some extent by a well conceived policy of **irrigation** by the State; but so far, of the total cultivated area in the country, about 16 per cent. only has irrigation facilities from rivers, tanks or wells while the remaining 84 per cent. depends merely on rainfall. Thus the frequency of failure of crops, owing to drought and floods and pests, coupled with the low vitality and high mortality of the live stock, render the economic position of the cultivator worse still. The inadequacy of the **subsidiary occupations** to supplement the slender income from agriculture contributes further to his extreme economic weakness. He has sufficient spare time on his hands to devote himself to subsidiary occupations but he has been exposed to the full blast of competition of forces from the rest of the world and many of the industries on which he relied in the past have suffered largely from or been wiped out by the competition of machine-made articles. The recent fall in the world prices of agricultural produce has affected him powerfully for he is now being drawn steadily into the sphere of influence of markets both national and international and he has neither the organisation nor the credit facilities to help him as in countries like the United States of America and Canada and several European countries. In addition to these numerous difficulties, the Indian agriculturist has another serious handicap in this that he is largely **illiterate.** The percentage of literacy in India is still very low being only 8 per cent. and any progress in agriculture is well nigh impossible without the background of general education. All these factors lead to the most outstanding feature of Indian rural economy—the chronic and almost hopeless **indebtedness** of the cultivator. The Central Banking Enquiry Committee has estimated that the total rural indebtedness in India is about Rs. 900 crores. Though indebtedness of the agricultural population has been there from old times, it is acknowledged that the indebtedness has risen considerably during the last century and more especially during the last 50 years. This colossal burden of debt is the root problem which has got to be faced in any attempt towards the economic regeneration of the masses. Numerous causes have been advanced to account for rural indebtedness and we already have pointed out some of the general causes which give rise to it. A peculiarity, however, that we notice is that the debt which remains unpaid during the lifetime of the cultivator who contracted it passes on as a burden to his heirs so that many agriculturists start their career with a heavy burden of ancestral debt which they in their turn pass on with some further

increase to their successors. Ignorance and improvidence, extravagance and conservatism have further been held forth as the reasons for the continued growth of this heavy load. A marriage festival in the family tempts him to launch out into extravagance while funeral feasts prove no less costly. All these factors—the uneconomic nature of the agricultural industry, chronic and heavy indebtedness and illiteracy form a thoroughly depressive background of Indian rural economy.

Genesis of the Movement.—It is no wonder under the circumstances detailed above to find that the Indian agriculturist has constant recourse to borrowing and that too not only for any land improvement that he may contemplate but for his current agricultural needs as also for periodical unproductive purposes such as weddings and funeral feasts. The absence of any banking organisation in the country-side has driven him into the arms of the **sowcar** or the mahajan who, while proving a very accommodating person, has exercised a grip on him from which it has been found almost impossible to extricate him. The usurious rates of interest charged, coupled with various devices which increase still further the actual rate of interest, and the numerous services which the sowcar performs as a retail tradesman and the buyer of his produce, make him the dominant force in the village, reducing the agriculturist to the position of a serf, toiling for generation after generation, without ever hoping for a release from his clutches, getting a bare subsistence as a reward for all the trouble that he might take and therefore becoming listless, fatalistic and absolutely unprogressive. The gravity of the situation in certain parts of the Bombay Presidency was brought to the fore by the agrarian riots that took place in the Poona District in 1878, and protective legislation in the form of the Deccan Agriculturists' Relief Act was passed in the following year. In 1882, Sir William Wedderburn suggested the institution of an agricultural bank for relieving the indebtedness of the cultivators, but the scheme was dropped as being impracticable and financially unsound. In 1883 the Land Improvements Loans Act was passed and this was followed in the next year by the Agriculturists Loan Act enabling Government to advance loans repayable by easy instalments and at low rates of interest for improvements and also for current agricultural needs. In 1892 Sir Frederick Nicholson submitted a report to the Madras Government on the possibility of introducing land and agricultural banks and the discussion thus initiated by him was continued by Mr. Dupernex of the U. P., in his "Peoples' Banks for Northern India". The Government and Government officials continued to take greater interest in the matter and tried to find a suitable solution. The caste system of the Hindus and the ideas of common brotherhood among the Moslems were evidences of the peoples' natural aptitude for co-operation and the *nidhis* of Southern India furnished a practical proof of this aptitude. These *nidhis* were mutual loan funds whereby the members in turn got the use in lump of a considerable capital repayable by small easy instalments. The system depended upon association, confidence and honest dealing. The Government of India in 1901 appointed a committee to consider the question of the establishment of agricultural banks in India and the report of this committee resulted in the passing of the Co-operative Credit Societies' Act of 1904. The co-operative movement was thus launched in India on the 25th March, 1904. The Act aimed at encouraging thrift, self-help and co-operation amongst agriculturists, artisans and persons of limited means and the societies that were to be started were intended to be small simple credit societies for small and simple folks with simple needs and requiring small sums only. Knowledge of and confidence in their fellow members which are the keynote of success were ensured by providing that a society should consist of persons residing in the same town or village or group of villages and should be members of the same tribe, class or caste. In order to provide facilities in urban areas for the small man, urban societies were also permitted. It was laid down that four-fifths of the members in the case of rural societies should be agriculturists and in the case of urban societies—non-agriculturists. The Act introduced the principle of unlimited liability for rural societies following the Raiffeisen system in Germany, though it permitted urban societies to choose the Schulze-Delitzch model. Profits in rural societies were to be carried to a reserve fund or applied to the reduction of the rate of interest but the bonus could be distributed to the members only after requirements in this direction had been fully met, while in the urban societies 25 per cent. of the profits were to be carried to the reserve fund. The local Governments were empowered to appoint special officers called Registrars of Co-operative Societies, whose duty it would be to register societies formed under the Act, to get the accounts of such societies audited by a member of their staff and in general to see that the societies worked well. The main business of the societies was to raise funds by deposits from members and loans from non-members, Government and other bodies and to distribute the money thus obtained as loans to their members. Soon after the passing of the Act, various Provincial Governments appointed Registrars, who with the assistance of local honorary workers began to organize co-operative societies which started working with loans given freely for the purpose to them by Government. The seed thus sown has grown to-day in the course of 30 years into a fine tree with twigs and branches, spread out in many directions. In spite of several weaknesses in the co-operative movement in India to-day, it is beyond dispute that the movement has been a powerful instrument towards the awakening of the country-side and has led to a steady improvement in various directions of the life of the Indian cultivator. Moreover, the use of the vote, the elective system, self-help, self-reliance, compromises, gives and takes, work on an organized plan, rounding of angularities are great items in the training up of a citizen and the co-operative societies have been great schools for political and civic education. Since the launching of the movement in 1904, there have been amendments of the co-operative law

and committees and commissions of enquiry to remedy defects and to suggest further lines of action. These we shall note later on.

Growth of Co-operation.—In the first few years of the movement the number of societies grew up very slowly but the growth was considerably accelerated from 1910 and the average number of societies from 1910 to 1915 was about 1,100. The pace of growth still further quickened and now there are about 94,000 agricultural societies and over 10,000 non-agricultural ones. Table II shows the distribution of these societies by provinces. It will appear from the table that progress in different parts of India has not been uniform. Bengal, the Punjab and Madras have the largest **number of Societies**—while the other major provinces like Bombay, Bihar and Orissa, the United Provinces and the Central Provinces, Burma and Assam show distinctly smaller figures. The Punjab with over 20,000 societies stands first in the number of societies (88) per one lakh inhabitants, while Bengal which has a larger number of societies than the Punjab stands second in that respect with 47. The progress in smaller areas, like Coorg and Ajmer-Merwara, must be regarded as very satisfactory in view of their small population, since the number of societies per one lakh inhabitants works out in their case at 127 and 111 respectively. It is satisfactory to note that the co-operative movement has spread not only among the British Indian Provinces but also in Indian States and compared to the total population, Bhopal and Gwalior lead in this matter though the premier States of Kashmir, Mysore, Baroda and Hyderabad have also made considerable progress. Even more instructive are the figures in Table IV. The total **number of members** of primary societies stands on the 30th of June 1932 at 43 lakhs. Taking the normal family at a little under 5, it is clear, therefore, that more than two crores of the people of India are being served by this movement. There is no single movement in the country fraught with such tremendous possibilities for the uplift of masses as the co-operative movement and there is no single movement with such a large percentage of the population affected by it. Though the Punjab leads in the number of members of societies (28.8) per one thousand inhabitants, Bombay comes next with 25.9, while Madras and Bengal rank thereafter. This shows that the size of societies varies in different provinces and that Bombay, while having a smaller number of societies, has a larger average of membership per society as compared with the other provinces of British India. Of the smaller areas, Coorg takes a leading place with 72.8 members per one thousand inhabitants, while Travancore has an average of 43.6. Membership is a much better test in many respects of progress than the number of societies and from this point of view, the progress in Bombay, the Punjab, Coorg, Travancore and Bhopal must be regarded as distinctly satisfactory. There is, however, a third aspect also of the growth of the movement. Merely the number of societies, or the membership in the societies is not an index of the work that is being done and of the benefits which are being conferred by the movement on the population affected. The societies are predominantly credit organisations or rather small banking institutions and the part that they play can be better appreciated from their **working capital** than from merely the numbers of members. In this direction also we must note the marvellous progress so far achieved by the movement. From about Rs. 68 lakhs, which was the average up to 1910, the working capital has advanced very rapidly and stands to-day at about Rs. 93 crores. It is pleasing to note from Table V that this large sum has been derived mostly from non-Government sources. The share capital, the reserve fund and the deposits from members together contribute about Rs. 31 crores and this is really owned capital or the members' own money. The provincial or central banks contribute almost an equal sum and so do the non-members or the outside public. This latter item shows to a remarkable extent the growth of public confidence in co-operative institutions and speaks well in general of the management of the societies and the very useful purpose they serve in the banking organisation of the country. The distribution of the working capital by provinces and States (Table VI) gives us a further insight into the progress made in this direction by the co-operative movement in different parts of India. The Punjab leads in this respect also with 125 annas per head of population while Bombay comes next with 105. Madras and Bengal fall behind with 58 and 52 respectively. Among the smaller areas, Ajmer-Merwara comes out first with 127 annas per head of population while Coorg follows with 91. Of the Indian States, Indore takes the first place with 71 and Bhopal follows closely with 57. Bombay stands an easy first in the matter of deposits from members which amount to about three crores out of a total working capital of about 14 crores and this is one of the best tests of the success of a co-operative society. It is obvious from a glance at the figures in the tables that there has been very rapid progress in the number of societies, in their membership and in the working capital of these societies. The Punjab, generally speaking, leads in many respects with Bombay coming close behind. The smaller areas and the Indian States have also achieved considerable progress though the movement there started comparatively later. The agricultural societies predominate in all the provinces and States while non-agricultural, that is, urban societies show a much slower development. While there is much room for satisfaction at the phenomenal growth of the movement in rural and urban areas, it must be admitted, however, that merely the figures of the number, membership and working capital are not enough to base conclusions upon. But before we proceed further, we must now explain the chief component parts of the structure, as it has now been built up, of the co-operative movement in the country.

Financial Structure of the Movement.—Apart from the comparatively few co-operative societies at present working in India for non-credit purposes, it must be recognised that whether in urban or rural areas, a co-operative society largely means a small bank or a credit institution for providing financial accommodation to its members on a co-operative basis. Of these credit institutions, by far the greater

proportion is rural. The rural credit society has, for its main purpose, the financing of the agriculturist and as such it needs funds. The original idea of co-operative credit lies in making available to the needy the surplus of the well-to-do brethren through the medium of the society; but in Indian villages, the well-to-do and the needy rather form distinct groups, the former playing or trying to play the sowcar. Thus instead of comprising more or less all sections of the population of the village, the society is rather made up of the needy section only, at any rate, very largely. Even otherwise, the slender savings of the well-to-do would not be enough to meet the wants of the needy and each village society is not, therefore, able to be self-sufficient, making available the deposits of its well-to-do members as loans for the needy ones. The heavy load of unproductive debt of the average Indian farmer, his habit of investing his savings, if any, in lands and ornaments, and his illiteracy and consequent lack of the banking habit, soon made it apparent that the rural credit societies could not be expected to raise the required funds in deposits either from members or locally. The question of funds for the working of a rural co-operative society thus becomes a vital question indeed. Central banks have therefore been brought into existence at the district head-quarters in order to raise money from towns and make them available to the primary rural societies. Following up the idea further, it has been found necessary to have a provincial bank at the provincial head-quarters to serve as a balancing centre for the central banks and to make available larger funds for the primary societies through the central banking institutions. The financial structure of the co-operative movement is thus largely composed of three parts—(*i*) the Agricultural Credit Society, (*ii*) the Central financing agencies, and (*iii*) the provincial banks. Obviously one more part in the structure seems possible and desirable, namely, an Apex All-India Co-operative Bank. So far, however, such an All-India Bank has not been started and the provincial banks have been content with an All-India Provincial Co-operative Bank's Association.

Agricultural Credit Societies.—The success of these societies is closely related to their very peculiar constitution. In an ordinary joint stock company, a member is liable only to the extent of the value of his share holding and his liability is therefore limited; but in the case of agricultural credit societies, the liability is unlimited, that is to say, members are jointly and severally liable to the creditors of the society for the full amount of the debts incurred by it. Such a liability would never be acceptable to any person, unless he was imbued with the broader vision of brotherhood between members and unless he himself had an active voice in the management of the society and had a more or less full knowledge of the character and antecedents of his fellow members. Co-operative credit is the capitalisation of character and unlimited liability is the great instrument to secure the admission into a society as members of these persons only, who by their character and antecedents deserve to be taken into that brotherhood which imposes such an obligation as unlimited liability on all, so that they either swim or sink together. To secure success, therefore, the proper selection of members is of the utmost importance; and it has been unfortunate that in India this has not been in practice as well kept in view as it should have been, in the eager desire to promote the formation of more and yet more societies.

Credit is a blessing only if turned to productive account; if used up for unproductive purposes, it is a curse. It would enrich the producer but it would only impoverish the consumer. It is capable of fruitful employment by the intelligent but it leads the illiterate and the ignorant towards perdition. The Indian agriculturist needs money for productive purposes, such as his current agricultural needs, land improvement, purchase of stock and implements, manures and seeds as also for unproductive purposes, such as repayment of old debts, weddings and funerals. He thus requires credit not only as a producer but also as a consumer—a producer who hardly makes profits from his industry and a consumer who has no past savings to enable him to tide over a bad period, but who is a perpetual borrower ready to live for to-day and letting the to-morrow take care of itself. He is besides ignorant and illiterate and though sufficiently conversant with the routine of his industry, hardly awake to the need or scope for improvements in his methods. Under such circumstances, it is imperative for the management of the rural co-operative society very carefully to scrutinise the loan applications and examine the purpose for which loans have been asked and to see carefully that the loan when sanctioned is used for the specific purpose. And yet, it is in this respect that there is considerable scope for improvement.

The **funds** of an agricultural credit society are raised from entrance fees, share capital, deposits or loans from non-members, loans from the central or provincial banks, loans from Government and the reserve fund. Entrance fees are collected chiefly to meet preliminary expenses of organisation and purchase of account books and forms. The levy is generally very small. In some localities members contribute a small share capital and in some they do not. In the Punjab, the United Provinces and to a very great extent in Madras and Burma societies based on the share capital system are the rule, while in other provinces the share and the non-share societies flourish side by side. The share capital of these co-operative societies is not regarded as a dividend-earning investment but is primarily looked upon as a contribution to the common capital. The income from entrance fees and share capital is however small compared with the financial requirements of the members. The large sources from which funds are derived are deposits and loans. The volume of deposits which a society is able to secure on terms offered by it is an index of the measure of the public confidence it has inspired and the soundness and the stability of its financial position. The ideal placed before these societies is the development of members' deposits to the extent of making the society financially self-sufficient. These deposits by members further serve the purpose of stimulating thrift and saving habit among them, and are, therefore,

eminently desirable. Attempts are everywhere made to encourage them, but the response has been small, except in the province of Bombay, where it forms about ¼ of the total working capital. Regarding the encouragement of deposits from non-members however in the agricultural credit societies, the Indian Central Banking Enquiry Committee sounded a note of caution. Loans from central banks therefore furnish the bulk of the working capital of these agricultural credit societies at present.

Low dividends and voluntary services resulting in low cost of management, has made it possible to divert a substantial proportion of the profits of these societies to reserve funds, and thereby provide against unforeseen losses, bad debts and losses on the realisation of certain assets such as by investment depreciation. The general practice in regard to the use of the reserve fund in the business of the societies is that it is used as ordinary working capital.

The funds collected by the agricultural credit societies in India at present are by no means negligible. They aggregate to more than thirty-five crores of rupees. Their financial position as on the 30th of June 1932 stood thus :—

	In thousands of rupees.
Share capital	4,38,98
Reserve Fund	7,20,08
Deposits	3,22,81
Loans	20,03,35
Total Working Capital ..	35,09,25

The figures show that these tiny agricultural societies in India work with about Rs. 15 crores of their own capital (including members' deposits in this head) as against their outside borrowed capital of about Rs. 20 crores. The owned capital was thus about 46 per cent. of their total working capital, and this proportion is rising steadily as years pass by.

So far as the **period** for which loans are advanced is concerned, they are classified as short, intermediate and long. Short-term and intermediate credits are intended to meet current outgoings and to facilitate production. The current outgoings and expenses of production include the buying of cattle and agricultural implements; purchase of manure and seeds; expenses of transplantation in the case of wet cultivation and weeding and hoeing of dry crops and of reaping, gathering and threshing; maintenance of the farmer, his family and livestock and payment of revenue and rent; and outlay on various items of improvements effected in the ordinary course of husbandry such as levelling, deep ploughing irrigation, clearance, drainage, fencing, and installation of pumping plant. Long-term credit is meant for obtaining fixed capital to be invested permanently or for long periods, for the purchase of land, acquisition of costly equipments, consolidation and improvement of holdings and repayment of past debts.

The Provincial Banking Enquiry Committees are practically unanimous in stating that agricultural credit societies cannot safely advance loans to their members for more than three years (that is to say, short and intermediate loans) and that the proper agency to advance long-term loans is the Co-operative Land Mortgage Bank. These considerations are not now properly appreciated, but the necessity for their application is being more and more recognised.

Central Financing Agencies.—The formation of banks in urban areas on co-operative principles, with the sole object of raising funds for advances to societies having been found necessary to place the financial structure of the movement on a sound basis, the Co-operative Act of 1904 was amended in 1912 and the Co-operative Societies Act II of that year provided for the registration of central banks with the sole object of financing societies. Soon thereafter the number of central financing agencies grew rapidly all over the country, especially in the United Provinces. The function of these central societies was not only to supply the required capital to the primary societies but also to make the surplus resources of some societies available for other societies suffering from a deficiency of funds and to provide proper guidance and inspection over them. On the 30th June 1932 the number of central banks was 595.

Central banks can be classified into three types as follows :—(1) banks of which the membership is confined to individuals, (2) banks of which the membership is confined to societies, (3) banks which include both individuals and societies among their members. The first class includes any bank in which the shareholders consist entirely of individuals or in which societies are admitted as shareholders on exactly the same footing as individuals without any special provision for securing their representation on the board of management or for reserving a definite portion of the share capital for them and where there is no restriction on the distribution of profits to shareholders; such banks have now practically disappeared. The second class consists of a purely co-operative type of bank where membership is confined only to societies and the general policy and management are wholly controlled by them. This type in theory is the most suitable agency to finance co-operative societies, and represents the ideal to which the financial structure of co-operation must aspire. The management of such a **Banking Union** is usually rural and local and its operations are generally confined to a small area, enabling the affiliated societies to take a direct part in its administration and control, and enabling the union in its turn to be in constant touch with its societies. The successful working of a banking union requires competent men with local influence and knowledge as members of primary societies and a compact and co-operatively well developed area. Such unions therefore are not attempted in most places in the country. In a mixed type of co-operative bank, the member societies are assigned a certain proportion of the shares and given suitable representaton on the board, and the services of individual sympathisers are also secured for the movement by admitting them as shareholders; and this is the type of central bank which predominates in the country as a whole. Roughly speaking, if a straight line is drawn across the map of the country from Calcutta to Karachi, unions of the pure federal type are numerous to the north of this line while central banks of the mixed type predominate in the South.

There are four main sources from which a central bank derives its working capital which stood in 1931-32 at Rs. 30·6 crores: (*a*) Share capital, (*b*) Reserve, (*c*) Deposits, (*d*) Loans.

The total paid up share capital of central banks in British India and Indian States in 1931-32 was a little under Rs. 3 crores. No individual shareholder is generally permitted to hold shares of more than Rs. 1,000 while an affiliated society is required to subscribe to the shares of a central bank in proportion to its borrowings. In Bombay, Burma, Delhi, Coorg, Gwalior and Indore, the shares of central banks are fully paid up while in other provinces and Indian States the shares are not fully paid up but carry a reserve liability. The liability attaching to shares is ordinarily limited to their face value but in a few provinces the liability fixed is generally four to ten times the face value of each share. In addition to the statutory reserve, almost all central banks have special reserves created for special purposes or objects, such as bad debts, building, and dividend equalisation. The total amount of reserve funds and other reserves of central banks in British India and the Indian States in 1931-32 was a little over Rs. 2¼ crores.

The paid up share capital and reserves of central banks constitute the owned resources of these banks as distinguished from borrowed resources and provide the guarantee fund against which additional funds are raised by them in the shape of deposits or loans. It is usual to prescribe a suitable proportion between the owned and borrowed resources of central banks in each province. The most usual proportion observed in practice between the borrowed and owned resources in all parts of the country is 1 to 8. Deposits from members and non-members constitute the bulk of the borrowed capital of central banks. The total amount of deposits held by central banks in the year 1931-32 from individuals and other sources amounted to Rs. 18·5 crores, and from primary societies to Rs. 2·7 crores. Deposits in central banks are mainly of two kinds, *viz.*, savings and fixed. Current deposits are not universal but confined only to selected central banks in selected areas. The principle usually observed by these banks is not to grant loans to societies for periods longer than those for which deposits are available, and where loans for long periods are advanced, the periods of deposits are also comparatively long. The receipts and payments of deposits are generally spread over the year except in Bihar and Orissa where, due to the one-date-deposit-system, deposits whenever received are repayable on the 31st May every year. In addition to funds obtained by deposits, central banks raise loans either from outside banks, from other central banks, from the local provincial bank or from Government. The total amount of loans held by the central banks in 1931-32 from outside banks, from other co-operative banks and from the provincial banks was Rs. 3·7 crores and from Government Rs. 52 lakhs. Excepting in Burma central banks in other provinces of British India do not directly borrow loans from Government; the central banks of Indian States, excepting Mysore, do to a greater or less extent hold loans from Government, while in Gwalior, loans from Government constitute the most important item of the total working capital. Borrowings from outside banks are generally confined to accommodation obtained from the Imperial Bank of India against Government Securities or Promissory Notes executed by societies in favour of the central bank and endorsed by the latter in favour of the Imperial Bank. This accommodation is, however, limited and advances from other joint stock banks are also now rare. The main source of loans is, therefore, the provincial bank, and where a provincial bank exists, the central banks are generally prohibited from having any direct dealings with either the Imperial Bank or any other joint stock bank or with one another. This rule is however not rigidly observed in the Punjab and Madras. Several central banks in the country, due to their long standing, now possess sufficient resources to be independent of any outside financial assistance but they all continue credit arrangements mainly with the provincial bank on which they rely for emergencies.

In the initial stages, several central banks developed from ordinary urban societies which granted advances to individual shareholders. A few of such central banks have continued the practice and the amount advanced by central banks to individual members during the year 1931-32 was Rs. 95 lakhs chiefly in the Punjab, Bombay and Madras. This practice, however, is gradually being abandoned as the chief function of a central bank is to finance societies and to serve as their balancing centre. The total advances made by central banks to societies at the end of the year 1931-32 amounted to about Rs. 8 crores.

The ultimate security for all advances of a central bank to an agricultural society is the property of its members, but the basic security is personal and depends on mutual knowledge and joint responsibility of the members. The difficulty in accurately gauging the degree to which a society as a whole has developed the sense of mutual obligation among its members in assessing its credit, has forced a central bank to place more reliance on the tangible assets of its members. A statement of each society prepared by, or under the direct supervision of the field staff of each central bank or Government, showing the estimated value of the immoveable and moveable property owned by each member, and showing the total value of the assets of the society, is taken as the basis and the extent to which a society is permitted to borrow which is usually limited to one-third of this. In some provinces, a system of normal credits is introduced which replaces both cash credits and fixed loans. Before the normal maximum credit of a society is assessed, a statement of the normal credits of its members is prepared, containing information regarding the assets of the members and also their requirements, the purpose of their requirements and the estimate of their earning and saving capacity. After checking, on the basis of this statement, a central bank sanctions a maximum credit to each society for the year, withdrawable at short notice. These credit statements, like the assets statements of societies, are revised every year and the period of loans granted under these statements does not generally exceed three years.

In some of the provinces, central banks grant both long and short term loans to societies, while in others loans to societies are generally for short periods. The average period of loans to societies varies from one to five years in different parts of the country. The period of a loan generally depends on the purpose for which the loan is required. Loans granted for current agricultural purposes are repayable either in one or two years, whereas loans required for improvements in lands and debt redemption are repayable in five to ten years. But it is not now considered advisable for central banks, relying mainly on deposits for their resources, to make long term advances, and some of the provinces have definitely adopted the policy of advancing short term loans to societies and that too for current agricultural purposes only.

After meeting management expenses the profits of central banks are distributed as allocations to reserves and dividends to shareholders. The combined net profits of the 595 central banks of the country during the year 1931-32 amounted to Rs. 52 lakhs on the total working capital of Rs. 31 crores; the rate of dividend paid varied from 6 to 10 per cent. in different parts of the country but the most usual rate paid was 6 per cent. per annum.

Provincial Co-operative Banks.—In India, at present, all the major provinces except the United Provinces have apex banks functioning in them. There are apex institutions in two of the Indian States, Mysore and Hyderabad, though in the others also there are institutions corresponding to the apex bank or functioning as such. The Bank in Burma being in liquidation, there are nine such institutions in all out of which, seven are in British India and two in the Indian States. The constitutions of these institutions vary considerably; but the functions of all these institutions are more or less the same, namely, the co-ordination of the work of the central banks and provincialization of finance in them. It is found that in a large majority of the apex banks, the constitution is a mixed one, that is, both in the general body of the banks as well as in the directorate, there are individual shareholders as well as representatives of co-operative societies and central banks. The apex banks in the Punjab and Bengal however do not permit individuals to hold shares in them, and have as their shareholders co-operative societies only, both primary and central. By a special provision, however, on the directorate, the Punjab bank takes the Registrar of Co-operative Societies, and Bengal takes three individuals as men of position in the province, as against 15 representatives of co-operative institutions. In the Central Provinces and Berar, the general body of the bank consists of representatives of central banks as well as individual shareholders and the directorate is composed of 34 representatives of co-operative institutions and 5 individuals including the Governor of the C. P and Berar Co-operative Federation as an ex-officio director. In Bombay, Madras, Bihar and Orissa, Hyderabad and Mysore, individuals representatives of central banks and of the co-operative societies compose the general body but the composition of the directorate varies. In Madras the representatives of the primary societies do not find a place while in Hyderabad and Mysore those of central banks are not included. In Bombay out of 14 directors, 7 represent individuals including by convention the head of the Provincial Co-operative Institute. In Madras the number of directors representing individuals is 5 as against 31 representatives of co-operative institutions; in Bihar and Orissa 6 including the Registrar as against 14; in Hyderabad, 13 including the Registrar as against 8; and in Mysore, 5 as against 8. It is clear that on the directorate of the apex banks co-operative institutions are well represented indeed.

The aim and purpose of the apex banks as already stated, is to co-ordinate the working of the banks on a provincial basis and to act as the balancing centre of the various central banks in the province. In order that the co-operative movement may function efficiently and profitably, it has been found necessary that the connection that has to be established between it and the money market should be brought about through the apex institution; and the central banks have accordingly to deal with outside agencies only through the apex bank. Though this principle is accepted, there is a great deal of divergence in practice. In Madras, Bengal and the Punjab, central banks have been permitted to deal directly with the Imperial Bank of India, while in Bombay central banks have dealings only with the provincial bank. Interlending among central banks is prevented in order that there may not be intermingling of the liabilities of the central banks. It has also been thought necessary to restrict the dealings of apex banks with the primary societies and permit them only th ough central banks. In certain provinces, the apex banks do not deal with the primary societies at all, while in certain others they still continue to finance primary societies in areas where central banks have not come into existence. This seems to be the case in Bihar and Orissa, Bombay, Burma and Mysore. The provincial bank in Bombay has thirty branches covering the few districts that have no local banks or parts of districts not taken over by local banks for some reason or other. The bank has an inspecting staff of its own, in addition to the office staff at branches. With the work of branches, however, are associated local advisory committees, composed of elected representatives of the affiliated societies, and certain powers, including the authority to sanction loans, are delegated to the committees.

All apex banks both in British India and in the Indian States depend for their working capital largely on deposits from the affiliated co-operative societies as also from the public. It is, therefore, thought necessary to insist upon the maintenance of fluid resources on a certain scale and in some provinces the Government of the province has prescribed definite rules with regard to the maintenance of fluid resources. The period for which deposits are accepted determine the maximum period for which they can lend out these borrowed funds to their clients, and in every province the apex bank has fixed for itself a maximum term, beyond which no loans are, in general,

sanctioned to the borrowing client. The following figures will clearly show the position and transactions of the apex banks in 1931-32:—

Provincial Banks, 1931-32.

	In thousands of rupees.
Working Capital—	
Share Capital	66,99
Reserve and other funds	47,94
Deposits and loans—	
from individuals	4,81,97

While accepting deposits from co-operative banks and the general public, most of the apex banks have also dealings in current account with the latter. The Punjab bank does not encourage such accounts with individual non-members, as it does not wish to enter into competition with central banks. Apex banks also generally carry on ordinary banking business, such as collecting hundis and dividends from companies and collecting the pay and pensions of public servants. The provincial banks of Bombay, Madras and the Punjab have floated long-term debentures. The Bombay bank has so far issued debentures of the value of Rs. 9·8 lakhs and these debentures are recognised as a trustee security. The bank at Madras has floated debentures of the value of 2.18 lakhs on the security of a floating charge of the general assets of the bank, while the Punjab bank has issued debentures of the value of 5 lakhs. As in every banking institution, these banks also are frequently troubled with surpluses and deficits, though at different times in the different institutions. There is therefore interlending of surplus funds between these apex banks; and during the period of shortage of funds, deposits are accepted from surplusing banks, and some of them call for special season deposits allowing favourable rates of interest to tide over the period of shortage. The All-India Provincial Co-operative Banks' Association enables the member banks to ascertain which of them are surplusing in the period and by correspondence to arrange for inter-provincial borrowings.

In all provinces the apex banks have connected themselves with the Imperial Bank of India and have secured cash credit accommodation on furnishing security. In the earlier stage the Imperial Bank was pleased to permit the accommodation on the deposit of co-operative paper duly endorsed in their favour; but of late a change has come over in some provinces in the method of business, and the accommodation given to the various apex banks on the strength of co-operative paper has either been withdrawn fully or is to be withdrawn by stages. As regards the Punjab, the arrangement whereby the apex bank can borrow against co-operative paper is still in force, and has not been altered in any way. The security upon which the accommodation allowed is the Government of India Promissory Note. Owing to the curtailment of accommodation on the strength of co-operative paper, the ease with which the provincial banks were raising credit to meet the seasonal demands of the affiliated central banks is no longer there. What repercussions this will make on the movement has yet to be seen as the curtailment has taken effect only recently. The apex banks, like all co-operative societies, enjoy the facilities of free transfer of funds from one place to another by means of remittance transfer receipts. This concession is granted for transfer for genuine co-operative purposes, but it has recently been ruled by the Government of India that if any remittance represents a transaction on which exchange has been earned, the facility of free transfer of funds will not be made available. Co-operative banks, however, claim the continuance of the concession on the ground that they are rendering a public service by cheapening the cost of transfer of funds from the metropolies to a petty trade centre or *vice versa*, places where no other organized banking agencies are available. It is only if some concessional treatment is shown by Government—there being no other arrangement for transfer of funds—that they will be able to extend their operations in centres of agricultural trade, develop banking facilities in rural areas, and spread the knowledge and use of cheques and other instruments of credit among the rural population.

Audit and Supervision.—The proper working of co-operative societies requires an efficient system of audit and supervision. The audit is a statutory function of the Registrar and his responsibility to the public is thus a serious one. The general purposes of an audit such as ascertaining whether the accounts of the society are properly kept and preparation of a correct statement of the society's financial position, are common to the audit of joint-stock and co-operative concerns. But the Co-operative Act requires the auditor of a co-operative society to examine the overdue debts, if any, and to value the assets and liabilities of the society, and by implication, this statutory direction imposes on the auditor the obligation to find out whether the affairs of the society are conducted in accordance with co-operative principles, and the audit extends somewhat beyond the bare requirements of the Act and embraces an enquiry into all the circumstances which determine the general position of a society. It is, for instance, the duty of the auditor to notice any instances in which the Act, or bye-laws have been infringed to verify the cash balance and certify the correctness of the accounts; to ascertain that loans are made fairly, for proper periods and objects, and on adequate security; to examine repayments in order to check book-adjustments or improper extensions; and generally to see that the society is working on sound lines and that

the Committee, the office bearers and the ordinary members understand their duties and responsibilities.

The general position regarding audit, however, is unsatisfactory on the whole. The Indian Central Banking Enquiry Committee remark that audit in most places is defective and does not conform to the statutory requirements as explained and amplified by the Maclagan Committee.

Though, in every province, the audit agency ultimately derives its power from the Registrar, it is being done in different provinces by different agencies. In the Punjab, audit is carried on by a staff of inspectors of the Provincial Co-operative Union, each inspector being given a number of societies. In Bihar and Orissa, the Co-operative Federation's staff does the audit and the Registrar controls the staff and arranges for the test audit of a percentage of societies by his officers. In other provinces, the agricultural credit societies are audited by the Registrar's staff, which in many of them is said to be inadequate. In some localities the societies have formed audit unions for their audit. In most provinces some contribution towards the cost of the audit is levied from the societies audited by the departmental or the provincial federations staff, as in the Punjab and Bihar and Orissa. Recently an audit fee has been levied in Bombay so that it is only in Madras that the audit of agricultural societies is practically free.

Audit, supervision and inspection are closely allied and not wholly separable in a simple organisation like the primary agricultural credit society. Broadly speaking, audit lays the emphasis on accounts, supervision on administration, and inspection on finance, though they overlap in some respects. In India, internal supervision of co-operative societies is organised differently in different provinces. In Madras and Bombay, the primary credit societies have been federated into small local SUPERVISING UNIONS on the governing bodies of which the societies are represented. Attempts have also been made to federate these local unions into district councils or boards of supervision. There are two types of local unions—the guaranteeing union and the supervising union. Experience has shown that the system of guaranteeing unions did not yield any useful results and it has therefore been abandoned in all the provinces, except in Burma and Bihar and Orissa though even there their abandonment is only a question of time. Unions for supervision were first started on a large scale in Madras and now form an integral part of the co-operative structure there. The unions have a membership of 20 to 30 societies each and their main duties relate to supervision, promotion of the interest of members seeing that the accounts are in order, assistance in the preparation of credit statements, stimulation of land recoveries, promotion of co-operative education, and organisation of non-credit activities. The brunt of the work falls on full time paid supervisors are working under the direction of the managing committees. The supervisors are recruited from persons specially trained for the work. Bombay has in the last few years abandoned the system of guaranteeing unions and has adopted the Madras system of the supervising unions. On the 30th June 1932, there were in all 1,090 unions of which 355 were in Burma. Most of the 113 in Bihar and Orissa are guaranteeing unions. The number of unions in Madras was 431 and in Bombay 118. The total number of societies affiliated to the unions in these last two provinces was 11,009 and 3,014 respectively. The system of supervising unions, however, does not seem to be working well in Madras or in Bombay though no final opinion can yet be pronounced on their usefulness as agencies for supervision. In Madras district federations are disappearing and supervision is being taken up more and more by financing banks. The Bombay Reorganisation Committee has recently pronounced a hostile verdict and has suggested the replacement of supervising unions by departmental auditors who, it is contemplated, would be able to attend to supervision as well when each one of them is placed in charge of a smaller number of societies. This suggestion is, however, not likely to be accepted by the Government of Bombay who are considering the strengthening of the system of supervising Unions by insisting on better qualifications for the supervisors and by creating District Boards of supervision to ensure the proper and efficient working of the Unions. The central banks have a body of inspectors and field workers who visit periodically the societies affiliated to them and these officers too in a sense assist in the supervision of societies. Thus, at present, there are 3 distinct agencies, the departmental auditor, the bank inspector and the supervisor—which are performing very similar and co-related functions. The Second All-India Co-operative Institutes' Conference held at Hyderabad (Deccan) in 1931 considered this question fully and formulated a scheme in this connection which has been substantially approved by the Indian Central Banking Enquiry Committee. The scheme suggested that district audit unions should be established, composed of representatives of societies—primary and central—and that these unions should be affiliated to or federated in the provincial institutes, federations or unions which should be made responsible for providing a satisfactory agency for audit and supervision. Inspection of societies was a responsibility and duty of the central financing agencies and should remain so. The audit staff to be appointed by the provincial and district unions should be recruited from well trained and competent men from amongst those who are licensed by the Registrar. The number of societies entrusted to such an auditor should not be more than 60 so as to permit efficient audit and supervision. The different provinces will, however, continue, it appears, their own systems, though the scheme suggested by the All-India Conference for a uniform system of audit for all provinces should really work well.

For the audit of larger societies, like the central financing agencies and urban banks, the Registrar engages a staff of special auditors. A great deal of complaint has, however, recently been made in this connection on the ground that these societies in addition to the departmental audit have to provide for their own audit independently. These private auditors are persons with recognised qualifications and charge less for the work done by them. Under these circumstances, departmental audit means unnecessary duplication of work and unnecessary waste of money. There is no reason why the departmental audit

should not be abolished and the bigger societies allowed to appoint their own auditors from amongst persons qualified and approved by the Registrar.

Overdues.—Among the most important tests of the success or otherwise of a co-operative credit society is undoubtedly the promptness in repayment of loans by members and it is in this respect that one has to recognise that in India, the societies have not attained any very great measure of success. On the 30th June 1932, the overdue loans in agricultural societies amounted to Rs. 11,63,33,585 as compared with Rs. 9,90,66,470 the year before; the working capital of the agricultural societies was Rs. 35,09,24,484; the loans due by individuals were Rs. 28,98,42,696. The overdue loans were therefore 33 per cent. of the working capital and 40 per cent. of the total loans due by individuals. The position is however rendered more serious when one realises that the figures are considerably obscured by book entries and extensions of the date of repayment and in some cases, by the farmers' borrowing from the sowcar to pay the society's dues and that the percentages represent merely an average for all-India. The following table shows the position by different provinces on the 30th June 1932.

Overdue Loans in Agricultural Societies, 1931-32.

(in lakhs of rupees.)

Province.	Working Capital.	Loans due by individuals.	Overdue loans by individuals.	Percentage of overdue loans to	
				Working capital.	Loans due.

Others	86	75	15	17	20
Total ..	35,09	28,98	11,63	33	40

The position has since June 1932 grown more serious, since the fall of prices of agricultural produce and the world crisis and trade depression have reduced the repaying capacity of the agricultural borrower considerably and increased the terrible load of overdue loans in rural credit societies. This continued growth of overdue loans is an ominous portent and reflects very badly on the soundness of the co-operative structure. The loans having been based on the basis of the assets of members, the ultimate solvency of the societies is beyond dispute; but severe pressure on members and the consequent wholesale liquidation of societies would react very seriously both politically and economically. The causes that have led to this phenomenon, which menaces the entire existence of the co-operative movement are chiefly to be found in not basing the loans sanctioned on the repaying capacity of the borrowing member, in sanctioning loans for unproductive though perhaps necessary social or domestic purposes or for the redemption of old debts and generally in the uneconomic nature of the agricultural industry. The loose scrutiny of the purposes stated in the loan applications and the absence of a careful watch on the way the loan is spent by the members, which must be the case, where almost every member is a borrower or a surety to other borrowers and where the societies are composed almost wholly of the needy section of the village, the well-to-do standing aloof, the remissness in exerting pressure and in taking action against the defaulter, even when he is wilfully defaulting, add considerably to the growth of this menace of excessive overdues. The central financing agencies are more concerned with the assets that in the last resort are the security for their lendings and, with more funds than they could use, are more eager even than the Registrar himself for organising new credit societies.

One of the weaknesses of co-operative finance consists in its inelasticity, dilatoriness and inadequacy. The introduction of the normal credit system in the societies,—a practice which is gaining currency in Bombay and Madras reduces the evil to some extent; but as it is, the cultivator is forced to resort to the money-lender also for accommodation. The co-operative

societies have thus, it must be admitted, lost their co-operative character in a great measure and have become business bodies without, however, the efficiency that should characterise them. The recent Committee on Co-operation in Bihar and Orissa views "with a considerable degree of dismay the general failure to make the ordinary agricultural credit society a self-governing and truly co-operative institution". The Bombay Reorganisation Committee states that "in view of the figures quoted, it is evident that the movement has ceased to a great extent to be co-operative". Whether such a verdict is quite justifiable or not, it is obvious that the situation is disquieting enough and very great caution in registering new credit societies and the correlating of loans to the repaying capacity of the borrowers as emphasised by the Bihar and Orissa Committee seem to be the urgent needs of the day.

Land Mortgage Banks.—The loans advanced by co-operative societies to their members and by the central financing agencies to their constituent societies are, from the very nature of the source from which they derive the bulk of their finance, for short or intermediate terms only. By concentrating upon the growth and multiplication of rural credit societies and thus upon facilities for short and intermediate term loans, the co-operative movement did not provide for the redemption of old debts or for increasing the earnings of agriculturists which alone would prevent any further increase in their debts and have the way for the paying off of the old ones. It does not seem to have been adequately realised that the removal or the lightening of the heavy load of indebtedness does not depend so much upon the easy terms on which co-operative finance can be made available, as upon the ascertainment of the amount of individual indebtedness to the sowcar, upon so fully financing the agriculturists that they could be prevented from resorting to the sowcar any more, and above all on making agriculture an industry sufficiently paying to leave a little saving after all legitimate current expenditure on agriculture and the household has been met, so that this saving could be applied to the liquidation of old debts. The mistaken notion associated with the start of the movement that co-operative credit could serve this purpose and which has clung more or less till now as evidenced by permitting this purpose to be regarded as a legitimate purpose for loans is largely responsible for increasing the load yet further. Short or intermediate term loans can, if judiciously employed, prevent any further increase in the burden, though even that in the present state of uneconomic agriculture seems scarcely possible; but it cannot leave any adequate margin of saving which could be employed to redeem past follies or misfortune. The sowcar, it is often forgotten, is the village retailer as also the purchaser of the villagers' produce and what he cannot recover from the borrower by way of interest or the part payment of the principal of the loans, he can more than make good on the threshing floor or in his shop. The co-operative movement by concentration on the credit side has attacked him on one front only, so that the risks of non-payment are saddled on the society while the profits of the merchant and the retail shop-keeper are still enjoyed by the sowcar; the attack ought to have been on all fronts. However, under the circumstances, the clarification of the situation of indebtedness is most desirable as a preliminary towards tackling the important questions of the redemption of old debts. The Indian Central Banking Enquiry Committee has wisely emphasised the need for a vigorous policy of debt conciliation on a voluntary basis and for exploring the possibility of undertaking legislation to secure, if need be, the settlement of debts on a compulsory basis. A simple Rural Insolvency Act as recommended by the Royal Commission on Agriculture and endorsed by the Central Banking Committee would also be an important step towards liberating those, who have already given up all their assets, from the incubus of ancestral and old debts, so that at least they and their heirs could start with a clean slate. In any case, the need for long term loans to the agriculturists for land improvement and for the redemption of old debts seems obvious, and it has now been recognised that the time has come for the provision of this facility by the starting of land mortgage banks.

There are three main types of such banks. The strictly co-operative type is an association of borrowers who raise credit by the issue of mortgage bonds bearing interest and made payable to bearer and is well illustrated in the German Landschaften. The commercial type is represented by the Credit Foncier of France, which works for profit and declares dividends. The third type—the quasi co-operative has a mixed membership of borrowers and non-borrowers, operating over fairly large areas and formed with share capital and on a limited liability basis. The banks organised so far in India are in a sense of the co-operative type, though strictly speaking they belong to the quasi co-operative variety, admitting as they do to the membership a few non-borrowing individuals for attractive initial capital as well as business talent, organising capacity and efficient management.

At present there are 12 co-operative land mortgage banks in the Punjab. Two of these operate over whole districts, the rest confine their operations to a single tehsil. Bombay has three land mortgage societies, which have only recently started their operations. Bengal has two, Assam has five, while Madras has 38 primary land mortgage banks and a central land mortgage bank has been started recently. It is too early to pronounce on the success or otherwise of these few banks. Among the objects for which these banks advance loans are the redemption of old debts, improvement of land and method of cultivation and the purchase of land in special cases. The Central Banking Committee think however that for a long time to come the resources of these institutions will be mainly required for enabling the cultivator to redeem his land and his house from mortgage and to pay off his old debts. One feels, however, extremely doubtful whether the emphasis should not be laid on the intensive and extensive development of agriculture, since as pointed out above, unless agriculture becomes a paying industry, the redemption is impracticable and illusory. The bulk of the funds of these banks will have to be raised by debentures and for this purposes, there will have to be in the provinces central land mortgage banks as in Madras. The provincial co-operative banks cannot function

as such except as a temporary measure, as in Bombay and the Punjab. Government will have also to render assistance to these institutions for the success of the debenture issue, and its guaranteeing the interest as in the Punjab ought to meet all reasonable needs, though in special cases there would not be much harm in the Government purchasing debentures of a certain value. While mutual knowledge of and control over one another among members is the insistent feature in the case of the unlimited liability credit society, the insistence in the case of a land mortgage bank with limited liability is on the capacity and business habits of the directorate, in order to ensure sound valuation of security, careful investigation of titles, correct assessment of borrower's credit and repaying capacity and on the efficient management of affairs.

Propaganda, Education and Training.—In the initial stages of the movement, it fell on the Registrar to carry on propaganda and organize co-operative societies. For this purpose the assistance of non-official honorary workers was imperative and in the various provinces a band of such workers was brought into existence, who as honorary organisers of the district or talukas actively co-operated with the officials in carrying on propaganda, organising new societies as a result thereof and looking after the societies so started in some measure. With the rapid growth of co-operative societies, however, it was felt that for the further propagation of the movement it was desirable to carry on work by the non-officials in a more organised manner and for that purpose co-operative institutes were started in the various provinces. In some provinces, like Bombay, these institutions are mixed institutions with a membership of individual sympathisers and workers and of co-operative societies. In others, like Madras and the United Provinces, individuals were not admitted as members and the institutions became provincial unions of co-operative societies. In some provinces, like Bihar and Orissa, they became federations of co-operative societies, while in others, like Bengal and Assam, they are known as co-operative organisation societies. Whatever the exact form assumed by these provincial institutions, their functions were more or less the same in all provinces, comprising propaganda and the focussing of non-official co-operative opinion on the various problems that confronted the movement from time to time. They derive their funds by subscriptions from their members and from Government grants and the work that they have hitherto been able to do has doubtless earned for them a position of considerable importance, in the co-operative movement. They have been the powerful instruments of bringing together the non-official element in the movement which though essentially a popular movement, had to be started under the auspices of the State, and their conferences and council meetings have become more or less like provincial co-operative parliaments where officials and non-officials meet together, exchange views on important questions and formulate policies. They have come to be regarded in an ever increasing measure as the third arm of the movement, the Registrar and his staff representing the administrative side performing more or less the functions assigned to them under the statute, the provincial bank with the central banks and banking unions representing the financial side and as such concerned more with the financing of the movement and the institutes, unions, federations or organisation societies representing the propagandist side and as such concerned more with educating popular opinion and representing non-official views to the authorities. A few years back, the All-India Co-operative Institutes' Association was established, with a view to co-ordinate the activities of the provincial institutes, to formulate non-official co-operative opinion on important co-operative problems from time to time and to encourage the growth of co-operative literature.

It was soon perceived that one of the serious handicaps to the successful working of co-operative societies was the ignorance of the members and the absence of trained men as office-bearers of societies. Illiteracy of the rural population, however, has been found too big a problem for these institutes and they have, therefore, attempted only to spread knowledge of co-operation and co-operative principles to the members of societies and to train up the office-bearers in various ways. Education has thus developed into an important function of these institutes. In Bombay, the Institute has created a special education board which maintains co-operative schools at different centres and conducts periodically training classes suitable for different types of workers and employees of co-operative societies. In order to do its work thoroughly it has started branches in the districts and divisions which also start elementary training classes for the members of the managing committees at different centres and generally assist in the spread of co-operative education. In the Punjab, however, co-operative education has been organised by the Co-operative Department, though the Punjab Co-operative Union renders active assistance therein. In Bihar and Orissa a permanent Co-operative Training Institute has been established at Sabour in the Bhagalpur Division which is controlled by a governing body which includes the Registrar, and a few representatives of the Co-operative Federation. Madras has organised 6 training institutes, which have been registered as co-operative societies. The Provincial Union there, however, does organise training classes for employees of central banks, urban societies and unions. In the United Provinces, Bengal and the Central Provinces, arrangements for co-operative training and education have not yet been properly made, though there also it is the Department assisted by the provincial union which organises the training classes. The need for proper co-operative training and education has been felt in an increasing degree in recent years and the Central Banking Enquiry Committee has recommended very strongly the establishment of provincial co-operative colleges and an All-India Co-operative College for the higher training of more important officials in the Department, banks or societies. No action apparently has been taken till now on these recommendations, but there is no doubt whatever that any serious attempt at improvement of the co-operative societies in the country must include a proper organisation of co-operative education not only for the office-bearers of societies or the managers and inspectors of central and provincial banks but also

for the inspectors, auditors and assistant registrars of the co-operative departments.

In some provinces, like the Punjab and Bihar and Orissa, the provincial union or federation has been actively associated in discharging the Registrar's statutory function of the audit of societies and the Second All-India Co-operative Institutes' Conference held at Hyderabad (Deccan) in 1931 also expressed an opinion that the Registrar's statutory obligation in this matter could be discharged by a system of licensing and that audit should be a function entrusted to the provincial unions or federations. If this idea of a uniform system of audit through the provincial unions be accepted, it will naturally follow that they will also have to assume the responsibility for supervision of the co-operative societies. The departmental audit or inspection by the central banks cannot dispense with the need of careful supervision, which to be effective must be from within and the provincial federation or union is obviously the best agency for this friendly and efficient supervision. The combination of the functions of audit and of supervision as suggested by the All-India Conference and endorsed by the Central Banking Enquiry Committee would mean improved efficiency in the working of the movement while de-officialising it considerably and giving it the popular touch it lacks. It must, however, be remembered that the institutes and unions are not quite unofficial in this that in some provinces, like the Punjab and Bihar and Orissa, the Registrar is the ex-officio president or member and practically controls them. At present, the situation as regards co-operative societies is disquieting enough and there are two schools of thought on the wisest course to pursue to bring about a radical improvement. One school is in favour of tightening the official control while the other seeks to strengthen the institutes and make them more non-official and efficient than ever before. Though all agree on the goal of ultimate de-officialisation and though all agree that the present system of part official and part non-official control of the movement is not conducive to progress, opinions conflict whether the remedy lies in officialisation or de-officialisation of the movement at the present time.

Non-Credit Agricultural Co-operation.—For some years past increasing attention has been directed on other forms of co-operation for the benefit of the rural population. Credit is but one of the needs of the cultivator; its organisation through co-operation touches but the fringe of the problem; and different provinces have been experimenting upon the application of co-operative organisation to meet his different non-credit needs. The problems of irrigation, consolidation of holdings, improved sanitation, fencing, cattle insurance, dairying and supply of agricultural requisites and above all the marketing of agricultural produce have been therefore engaging the attention of co-operators and societies for these purposes have been established here and there and have been working with varying success. In a land of ignorant and illiterate agriculturists, it would appear wiser to adopt the rule of one village, one society; but the complexities of the non-credit forms of co-operation have induced the authorities to avoid the multiple-purpose or general society and to favour the single purpose society, and we have the curious spectacle of an agriculturist being viewed as one person with a bundle of needs, each one of which it is proposed to meet separately. The sowcar was to him the one person to whom he could always look forward whether for the supply of agricultural requisites and domestic requirements or for the sale of his produce or for credit. Now he is made to resort to society A for credit, to society B for marketing, to society C for the supply of manures and seeds, to society D for the supply of tools and implements, to society E for fencing, to society F for irrigation, to society G for consolidation of holdings to society H, for social reform and better-living and—but why continue the sorry tale. A single society trying to meet all the needs of the agriculturist would attack the sowcar on all fronts and would become a live force in the village which would tend to promote the ideal embodied in the famous phrase: Better living, better farming and better business. However, co-operative opinion in India has not yet accepted the wisdom of this and yet believes in the theory of almost water-tight compartments. The agricultural non-credit societies in India on the 30th June 1932 were 4,107 distributed as under:—

Non-Credit Agricultural Societies, 1931-32.

Province.	Purchase and Purchase and sale.	Production.	Production and sale.	Other forms of co-operation.	Total.
Madras	89	....	21	370	480
Bombay	41	17	72	106	236
Bengal	89	933	270	42	1,334
Bihar and Orissa	3	3	2	5	13
United Provinces	....	....	42	330	372
Punjab	19	158	1,069	85	1,331

Other areas	....	3	13	15	31
Total ..	347	1,140	1,565	1,055	4,917

Of these the most important are the marketing societies, particularly for the sale of cotton in Bombay, the irrigation and milk societies in Bengal and the consolidation of holdings and better living societies in the Punjab.

Marketing Societies.—Marketing of agricultural produce is the real crux of the whole question of rural prosperity and betterment and as group marketing is always more effective than individual marketing, especially in India where the individual producer is illiterate and constitutes a small unit, co-operative marketing has been accepted now as one of the most desirable ideals to work for. It is only the complexity of the working of co-operative sale societies, the difficulty of providing for marketing finance, the lack of expert knowledge on the part of co-operative officials and the lack of godown and storage facilities that have prevented the rapid multiplication of sale societies and their efficient working. It is really in the development of this form of co-operative effort that ultimate success must be sought for in India, for credit alone could never bring comfort. Where it has been tried with success, the results have been extremely satisfactory to the members. The tremendous headway made in European countries like Denmark and in the United States of America in co-operative marketing organisation and the successful examples of the cotton sale societies in Bombay should arrest attention and invite concentration on the co-operative organisation of agricultural marketing. The jute and paddy sale societies of Bengal have not met with success, it is true; but the cotton grower in Gujarat and the Bombay Karnatak has reaped considerable benefit from the cotton sale societies. Absence of fraud in weighment, adequate and high prices, insurance of the produce against risks of fire, prompt payment of sale proceeds, financial accommodation till the produce is sold, information of daily price fluctuations in the Bombay market, supply of gunnies and genuine and certified seed, bonus and a dividend are no small gains to the agriculturist, who was otherwise at the mercy of the *adatya* or worse still of his village sowcar. The Gujarat societies cover a smaller area than those of the Karnatak; but the cohesion, loyalty and unity of purpose among their members makes them more co-operative. There the agriculturists of three or four villages growing a similar strain of cotton combine themselves into a society, pool their cotton and sell it jointly by private treaty and not by auction as in the Karnatak. The cotton sale societies of Surat have recently combined in a federation which has taken over the co-operative ginning factory already started by the members. A few societies for the sale of other articles have also been organised in Bombay, such as jaggery, tobacco, chillies, paddy, onions and arecanut. Bengal has several jute sale societies with a Jute Wholesale at Calcutta and several paddy sale societies with a sale depot in Calcutta. The Punjab has several commission shops which provide storage facilities so that the grower could wait for better prices, but which sell to local merchants yet, rather than to the merchants at the port. Madras has a number of sale societies, but their transactions are small and they have not yet made much progress.

Consolidation of Holdings.—The law of primogeniture, by which the eldest son alone succeeds to the property of his ancestor and which is in force in some European countries does not obtain in India. Each heir is given a proportionate share of each item of the inherited property and not a share of the whole, equivalent to his portion. The result is that successive generations descending from a common ancestor inherit not only smaller and smaller shares of his land but inherit that land broken up into smaller and smaller plots. This continuous partition of each field amongst heirs leads to fragmentation, which is accentuated by the expansion of cultivation, irregularly over the waste, by purchase and sales, by the extinction of families in default of direct heirs and the division of their property amongst a large number of distant relatives, and by the break up of the joint family system and the custom of cultivation in common.

The disadvantages of fragmentation are obvious. A part of land is wasted owing to fragmentation being so excessive as to prevent any agricultural operations, and another part is lost in boundaries. Fragmentation involves endless waste of time, money and effort; it restrains the cultivator from attempting improvement; it prevents him from adopting scientific methods of cultivation; it discourages him from carrying out intensive cultivation; it enforces uniformity of cropping, and especially restricts the growing of fodder crops in the period during which cattle are usually sent out to graze on the fields. The economic loss due to this system can be easily imagined, and the only solution is consolidation of holdings. This most difficult important and interesting experiment originated in the Punjab in the year 1920. The procedure adopted in establishing a Co-operative Consolidation of Holdings Society is to call together all persons directly interested in land in a given village, persuade them to accept the by-laws whereby a majority in a general meeting might approve a method of repartition, and then carry out actual adjustment of fields and holdings in such a manner that no single individual might have any grievance. As the result of patient work which has now extended over ten years, some very striking results have been achieved and the movement for consolidation in the Punjab has assumed the dimensions of an important agricultural reform. It is steadily gaining in popularity, and, as more staff is trained and the people become better educated to the advantages of the system, the figures for the area consolidated are mounting up year by year. This work began in 1920-21 and in the 10 years that have elapsed since then, 2,63,462 acres have been consolidated by the end of July 1930, out of the whole cultivable area of about 30 millions, at an average cost of Rs. 2-5 per acre.

Improvement of agriculture is general, where holdings have been brought together. New ploughs and other implements are used, new crops or new varieties of an old crop are sown, sand is removed from light soil, and planting of trees or seeds is carried out. The general effect of consolidation is to increase rents, and decrease causes of litigation and quarrels. Rents have risen, yields have increased, new land has been brought under the plough and dry land brought under irrigation. New wells have been sunk, and old ones repaired. Access has been obtained to the roadways, farming has

become more intensive, and fruit trees have been planted. The great disadvantage of consolidation through co-operation is that the pace is slow compared with the area to be consolidated. Therefore, compulsion will be necessary for a wide extension and its introduction is only a matter of time but it is better to await the growth and development of a strong public opinion in its favour rather than incur the risk of a premature resort to legislation which might bring the scheme into odium.

In the Central Provinces some success in consolidation has been achieved in the Chattisgarh Division where scattered holdings are particularly common and it is not rare to see 10 acres broken into 40 plots. The Local Government found it desirable to resort to legislation, and passed the Central Provinces Consolidation of Holdings Act in 1928. Any two or more permanent holders in a village holding together not less than a certain minimum prescribed area of land, may apply for the consolidation of their holdings, but the outstanding feature of the Act is that it gives power to a proportion, not less than one-half of the permanent right-holders, holding not less than two-thirds of the occupied area in a village, to agree to the preparation of a scheme of consolidation, which scheme, when confirmed, becomes binding on all the permanent right-holders in the village and their successors in interest.

In Bombay a Bill was introduced in the Legislative Council in 1928 to deal with certain features of the problem. When this Bill was introduced a good deal of opposition was created and it had to be ultimately dropped.

There are 11 societies for consolidation of holdings in the United Provinces, and 11 in the Baroda State based on the Punjab model.

Irrigation Societies.—Another very interesting and useful type of non-credit society is the Irrigation Society so predominant in Bengal. From a humble beginning of 3 societies in 1919, the irrigation movement to-day claims about 1,000 societies in the western districts of Bengal with a membership of over 20,000, a paid up share capital of over Rs. 2 lakhs and a working capital of over Rs. 4 lakhs. These societies fall chiefly under two classes: those for new construction and those for reconstruction and re-excavation. Irrigation is a necessity in the western districts of Bengal where the country is mostly elevated, undulating and easily drained with no possibility of water logging and the distribution of rainfall is extremely variable. In the Sundarbans, land is still below high water level and embankments are necessary to prevent the ingress of salt water. Considerable success has been attained in the Sundarbans tracts. The greatest progress so far has been made in the construction of small irrigation works in the districts of the Burdwan division. Embankments for flood protection and reservoirs to control floods and ensure a constant supply of water for irrigation are beyond the scope of co-operative effort while drainage schemes for the improvement of agricultural and sanitary conditions have so far not been taken up. The main features of irrigation societies are : (*i*) they are on a multiple liability basis ; (*ii*) the number of shares to be subscribed by members is fixed so as to meet full costs and is based also on the area of land which will be benefited ; (*iii*) funds are further raised if necessary by deposits and loans to be paid off from the instalments on shares as they fall due; (*iv*) a levy of water-rate or of the capital cost of maintenance provides for the proper maintenance of completed schemes. Madras also has a number of such irrigation societies.

Milk Societies.—One of the notable contributions of Bengal to the co-operative movement is the immense organization built up for the co-operative sale and supply of milk, consisting of, in the first place, the 108 rural societies which are the producing centres, and, in the second, the Calcutta Milk Union which is the distributing centre. The rural society which is the unit of the organization, generally covers a village, and its members are *bona fide* milk producers whose primary occupation is agriculture with milk production as their secondary occupation. The societies, which are all of the limited liability type, are affiliated to the Milk Union at Calcutta, which is a central society. It supervises, controls, and finances the individual societies, and arranges for the distribution and sale of their milk in Calcutta. Just as only milk producers are enlisted as members of milk societies, so only milk societies can be members of the Calcutta Milk Union. It is thus a pure type of Central Society, which does not include any individual shareholder.

The milk obtained from the societies in a group is collected at a depot which is under the charge of a depot manager, whose duty it is to receive the milk in properly sterilized cans, measure it, note the general conditions and the lactometer point, and give a receipt to the carrier. The working of the depots is looked after by the depot supervisor. Above the supervisors there are the depot manager and the society managers. There is also the Veterinary Inspector who examines and treats the cattle belonging to the societies and looks after the milking arrangements and the sanitary condition of the cowsheds. Above them all is a Government officer, placed on special duty in the Co-operative Department. He is the Superintendent of Milk Societies all over Bengal and the Chairman of the Calcutta Milk Union. The Union has devised very careful measures to ensure the purity of milk supplied to its customers. These measures include the installation of a pasteuring plant and a boiler. The Union has got a motor lorry and has introduced the cycle lorry system of delivery. The milk is also carried by hand carts and coolies for delivery to customers. The Union at present supplies milk to most of the big Calcutta hospitals, to fashionable restaurants and to a large number of individual customers, through a number of depots and distributing centres, located at convenient places all about the city. Besides the Calcutta Milk Union, five other unions have also been formed and two of these, at Darjeeling and Dacca, have already attained a fair measure of success.

The milk co-operative societies are societies of producers, though the desire to make pure and cheap milk available to consumers may have been mainly responsible for their birth. Whenever they had a chance, they have justified their existence by ensuring a better price for producers, while they have proved their utility to consumers by providing pure milk at a reasonable rate. Calcutta has set an example which Bombay, Madras and other large cities may well follow. Madras has already several milk

societies with a Union in the City for distribution, and the Bombay Municipality is seriously considering the co-operative solution of the milk problem of the city of Bombay.

Rural Reconstruction.—One of the main reasons why the achievements of the co-operative movement fall so short of the expectations of the promoters and workers lies in the extreme backwardness of the rural population and it is not too much to state that the ultimate success or otherwise of the co-operative movement lies bound up with general, rural development and progress. So long as agriculturists remain steeped in illiteracy and ignorance, are heavily and almost hopelessly indebted, have a fatalistic and listless outlook on life and have an extremely low standard of living, carrying on agriculture with simple tools and implements in more or less a primitive fashion, no great approach to the ideals and the goal of the co-operative and all other rural movements is possible. The co-operative movement itself is indeed a great experiment in rural reconstruction aiming to protect the agriculturist from exploitation of the usurer, the middleman dalal and the merchant; but concentration on the credit side of the movement with but half-hearted attempts for the co-operative organisation of supply and marketing, a growing multiplicity of institutions for various purposes and above all the neglect of the educational, sanitary, medical and the social sides of village life explain very clearly why the achievements of the movement during the last 29 years have fallen far short of its objective. Rural reconstruction has, however, of late years claimed an increasing amount of attention; but so far attempts on a mass scale have not been made; what has been done has been individual effort—the efforts of individuals fired by the impulse of social service and moved by enthusiasm to utilise their opportunities to the best advantage by contributing to the welfare of the humble village folk. The best known of such centres is at Gurgaon in the Punjab. The work done there covers education, sanitation, medical relief, improvement of agriculture, female education and maternity welfare. At Lyalpur in the Punjab also schemes of rural reconstruction have grown out of co-operative societies embarking upon the wider functions of cattle-breeding, improvement of cattle and agriculture, adult education, thrift, better living and arbitration of disputes. The Vishva-Bharati of Dr. Rabindranath Tagore has a special department devoted to rural reconstruction which has started 6 co-operative rural reconstruction societies in the villages of the Birbhum District. Sir Daniel Hamilton has developed the deltaic lands of Sunderbans by establishing colonies there on modern lines. In the Madras Presidency the Provincial Co-operative Union runs 8 rural reconstruction centres and the work at Alamaru has been eminently successful. Mr. V. N. Mehta was responsible for the rural reconstruction scheme in Benares. At all the centres, co-operation has been enlisted in the service of rural reconstruction and societies have been started which take up various items in that work. The anti-malarial societies of Bengal are also attempts in the same direction, the effort being restricted to only one aspect of the situation.

In the Central Provinces and Berar the local Government carried on from November 1929 a special campaign of rural uplift in the Pipariya Circle in the Hoshangabad District, concentrating the efforts of all departments concerned with rural uplift in that area. An agricultural assistant, a veterinary assistant surgeon, and an assistant medical officer were placed on special duty there, while the Deputy Educational Inspector, Sohagpur taluka, and the circle auditor of Pipariya undertook extra work and special propaganda and the Deputy Commissioner and Sub-Divisional Officer toured and supervised the work. The campaign has yielded concrete results. Interesting experiments in a few selected villages are in progress in the Nimar and Betul districts and Government wait only for improvement in financial and political conditions to launch more ambitious schemes. In Bombay by the starting of Taluka Development Associations and the creation of the Divisional Boards of Agriculture and Co-operation some co-ordination has been brought about between the Departments of Agriculture and Co-operation. The Bombay Reorganisation Committee proposed the creation of a Board of Rural Welfare with the Director of Agriculture as chairman and Deputy Directors of Co-operation, Agriculture and Veterinary Science as members. The later part of 1933 saw a considerable impetus imparted to the cause of rural reconstruction in India. His Excellency Sir Frederick Sykes, Governor of Bombay, concentrated on village uplift and carried on an intensive propaganda in that behalf which has led to the formulation of a scheme whereby the work will be carried on earnestly by District Committees under the guidance of the District Collectors, the work being co-ordinated by Divisional officers. The Punjab has appointed Mr. Brayne of Gurgaon fame as Commissioner for Rural Reconstruction and Bengal has made a similar appointment, and it appears that all provincial Governments are devoting considerable thought to this very important work.

Better Living Societies.—The Punjab has been responsible for introducing this very desirable type of co-operative society to promote better living among its members. There are about 300 such societies in that province and they have been doing quite important work in their own way. The societies do not collect any levy from their members, except the small entrance fee and they lay down a programme of work and make rules for carrying it out from year to year, violation of which is punishable with fine under the by-laws. Though these societies in the first instance have for their object the curtailment of ruinous expenditure on marriages and other social occasions, they have also helped in various other matters; so that apart from saving to their members thousands of rupees each year, they are contributing to the general village uplift in some measure. Some of these societies have levelled and paved and swept the village lands, some have promoted sanitation, some have induced the villagers to improve ventilation in their houses, some have repaired and roofed the village drinking well, some have arranged that all manure should be pitted, some have discouraged expenditure on jewellery, and some have stopped waste on farms. Thus in a variety of ways these societies generally have been great factors in the improvement of conditions in the life of the village. It is earnestly hoped that such better living societies

will be started in large numbers in the various provinces of India or better still that the co-operative credit societies would take upon themselves the function performed by these societies and that the term better living be given as wide a connotation as possible so that the co-operative movement would be doing good to itself and the nation by carrying on the general work of village uplift, as well as its own economic objective of strengthening the position of the agriculturist.

Educational Societies.—Though the problem of illiteracy is a very large problem indeed and though education is one of the chief responsibilities of Government it is interesting to find that because of the great reaction which illiteracy has on the efficient working of co-operative societies, educational societies have been started in some of the provinces—notably the Punjab. In that province, there are two kinds of societies, one for adult education and the other for compulsory education of children. In the former the members pay a small entrance fee and a small monthly fee to make up the pay of the teacher, who is generally the school master of the primary school receiving a small extra pay for the additional work. Such of these schools as are well conducted are later on taken over by the District Boards. Various other agencies in that province have also started similar schools with the result that their number has gone up to about 2,000. The compulsory education schools for children are started by parents, fees are collected as in the case of the adult schools for engaging a teacher and there are about 150 such schools imparting tuition up to the IV Standard. Though such educational societies may not have done all the good they aimed at doing, there is no doubt whatever that they bear testimony to the realization of the marked correlation of education and co-operation. The United Provinces is gradually following the lead given by the Punjab and they also have started a number of schools. In Bihar and Orissa, the co-operative credit societies give considerable impetus to primary education amongst the members making it possible to open and run a number of path-shalas and schools by adequate contributions. In Bengal many societies spend on education and some of them maintain night schools, as a result of which in one district alone there are 38 such schools, 2 upper primary schools and one English middle school. The Ganja cultivators' societies spend large amounts out of their profits on education and help 3 high schools and 87 primary schools. Societies in Bombay also spend fairly large amounts by making grants to schools and giving prizes and scholarships.

Anti-malarial Societies.—Among other things, the need for improvement in village sanitation, an important constituent of "better living" arrested the attention of co-operators particularly in Bengal, which pays a heavy toll, year after year, from that terrible scourge—malaria and kala-azar—and where, unlike many other provinces, the rural death rate is higher than the urban death rate. There is some talk at present of experimenting with plasmoquin to render mosquitoes immune from infection and thus prevent the spread of infections. Bengal has thus rendered a distinct service by organising successfully a campaign in rural areas for arresting or checking in some measure the ravages of malaria. The first co-operative anti-malarial society was the Panihaty Society registered in March 1918, and in July 1919, the Central Society was launched. The whole movement in this direction owes considerably to Dr. Gopalchandra Chatterjee. The Central Society aimed at organising a network of anti-malarial and public health societies, at carrying on propaganda, at guiding the rural societies and acting as an expert advisory body. There are now about 600 rural societies, often in inaccessible places and the Central Society now acts as merely an organising body, leaving the function of supervision to local bodies, through whom Government give grants to them. The members of the rural societies pay a monthly subscription of from 4 annas to a rupee, and each of these maintain a medical man on the subsidy system, who attends to the families of members free of charge. They depend for funds on subscriptions, donations, and grants from members, benevolent individuals and Government. They do not pay their way and therein indeed lies their weakness. The actual anti-malarial work consists of filling up all stagnant pools and ditches within the village areas during the dry season and kerosining all stagnant accumulations of water, immediately after the rains. Many dispensaries and schools are being maintained, some on a share basis, others on a charity basis, and these societies have done the great service of bringing the services of qualified medical men within easy reach of inaccessible rural areas.

Urban Credit Societies.—While the chief objective of the co-operative movement was from the first to do service to the rural population, it must be remembered that the Act of 1904 permitted 2 classes of societies,—rural and urban, recognising thus the suitability of the co-operative method for solving the problems of urban population also. At present there are in all 10,753 non-agricultural societies with a membership of 11,81,989. Of these, 5,262 are credit societies, the rest being societies for other purposes.

The urban co-operative credit societies for consumers resolve themselves into three types. (*i*) The salary-earners' society; (*ii*) the mill-hands' society; and (*iii*) the communal society. *The salary-earners' societies* have been generally organised on the occupational basis, the members being employees in the same firm or Government office. The strength of such a society lies in the absence of communal jealousies and factions, in the higher level of culture and intelligence of the members and the spirit of discipline that prevails in a modern well-conducted office. A great accession of strength accrues to the society from the sympathy of the employer or head of the office, through whom recoveries of instalments of loan repayments could be arranged from the pay sheet and the danger of overdues practically eliminated. The basis of the society is very good, and the working generally sound. Monthly subscriptions inculcate the habit of saving, so essential and useful to the salariat and the society can well act as a great and useful feeder for the co-operative investment trust, which is the logical development of the thrift-cum-credit society such as this, in essence, is.

The Mill-hands' Society are more or less of a similar type, the differences lying, chiefly

in the illiteracy of the members, in their smaller transactions and in the possibility, though experience hitherto has not converted that into actuality, of the whole organisation being wrecked to pieces when the millhands go on a prolonged strike.

The Communal Society as consumers' organisations are not indeed quite sound; where sentiment comes in from the door, efficiency and safety fly away through the window; the ability to save is not properly assessed; the nobler, but the unbusiness like, desire to help takes possession; overdues mount high; procrastination in the matter of recoveries and references to the Registrar for arbitration create great trouble. Despite this inherent weakness, however, several societies of a communal type have done remarkably well and have been serving their communities in more ways than one.

An important class of the urban population is that of the merchants and traders, and though the joint-stock banking system that has so far developed in India is quite well suited in many respects for them, from the point of view of the small trader, it is co-operative banking that is obviously wanted. The importance of **People's Co-operative Banks** promoted for the benefit of urban people without any distinction of caste or creed is, therefore, very great, for the finance of small merchants, artisans and craftsmen for the stimulation of trade and industries in and around district and taluka towns. The principal business of these banks is short-term credit and in this respect they resemble the ordinary commercial banks. In the absence of any industrial co-operative bank, it is also for the peoples' bank to finance small industrialists and help the development of cottage industries, which still play a very considerable part in the industrial economy of India. Another very important function which falls to peoples' banks is the financing of the marketing of the produce of the land from the field to the port or to the principal market centres and thus assist in the development of the internal trade of the country. It is only, however, in the Bombay and Bengal Presidencies that we meet with some good institutions functioning as peoples' banks. In Madras there are 1,130 non-agricultural credit societies but most of these are not real peoples' banks. The Punjab has over 1,000 unlimited liability societies and only 92 with limited liability. Even here we hardly find any development of real peoples' banks. In Bengal the limited liability urban credit societies number 469 and though these societies seem to have won public confidence the more important of them are salary earners' credit societies. Some of the divisions especially the Chittagong divisions have several big concerns, however, working on sound lines. The question of starting Peoples' Banks in Bihar and Orissa has not yet been seriously taken in hand. In the Bombay Presidency, institutions with a working capital of Rs. 50,000 and more are classed as urban banks. Since 1922 co-operators in this Presidency have been very keen on having a full-fledged peoples' bank in every taluka town, for it has been realised that with the proper development of urban co-operative banking, there is no doubt that the various units will come into touch with one another and that mutual settlement of terms and co-ordinated and harmonious work will greatly assist the development of inland trading agencies. Peoples' banks are a repository of peoples' savings, a nucleus for co-operative activity and an institution giving facilities for internal remittance and it is quite necessary therefore that their share capital must be pretty large. In the Bombay Presidency on the 31st March 1932 there were 91 urban banks most of which are fairly successful. The total membership was 1,39,379, the working capital was Rs. 3,57,60,347 and the reserve fund amounted to Rs. 19,44,622. It can be said without exaggeration that the development of urban banking has been a distinct contribution of Bombay to the co-operative movement in India and other provinces might well follow Bombay's example in this direction.

In 1926 the urban banks of Gujarat formed themselves into a supervising union for the purpose of inspecting the accounts of its banks and helping them in the development of business. The Bombay Provincial Banking Enquiry Committee have recommended the formation of similar unions for the urban banks in other divisions of the Presidency which will be useful not only for supervision of the existing banks but also for the guidance of the newly formed banks.

An important variant of the urban co-operative society is the **Thrift Society.** The system adopted is to collect regular savings every month for a continuous period of two to four years, invest the collected amount to the best advantage and pay back to the subscriber his amount at the end of the term with interest. In many societies, loans are advanced also but not exceeding a certain fixed proportion, usually ¾ of the deposits. The Punjab has about 1,000 such societies and the bulk of the members are school masters. There are about 125 thrift societies for women only having a membership of about 2,000. Madras has also more than 100 thrift societies and Bombay has half a dozen. Recently however **Life Insurance Societies** have been started in Bombay, Bengal and Madras. The Bombay society was started in July 1930 and for a few months worked as a provident society only, issuing policies of Rs. 150 to Rs. 500 and that too without medical examination, the idea being to bring life insurance within easy reach of the small man in the village as in the town. It has no share capital and works on a mutual basis. It has now, however, widened its scope and has been writing policies for larger amounts under its ordinary branch, while under the rural branch, besides the ordinary small policies, it has recently issued a scheme for decreasing term insurance, which will, it is hoped, meet the needs of the primary societies and their borrowing members much better. It has by now written a business of over Rs. 10 lacs. The Bengal society is yet a provident society issuing small policies, while the Madras society—the South India Co-operative Insurance Society has started vigorously as a full fledged life insurance society with share capital and comparatively low rates of premia, and has already written a large business of over Rs. 10 lacs.

Non-Credit Societies in Urban Areas.—*The consumers' movement* in this country has had a very sorry record excepting in the almost solitary example of the Triplicane Co-operative

Stores of Madras. The reasons for this state of affairs have been discussed by the Registrars in their annual reports from time to time and it seems that there is no immediate possibility of any very great efforts being made at pushing on this form of co-operative effort, which has found such signal success in England. The small capital of the societies when started, the want of experience and business ability of the workers, the inability of the honorary workers to perform efficiently the complicated work of a store society, the absence of any common tie between the members, the narrow margin between the whole sale rates and the retail rates. In Indian cities leaving little economic advantage in the store system, the pinning of their faith on absence of adulteration and correct weights and measures, the insistence on cash payments—all these have been responsible for the failure of the co-operative store movement in this country. The Triplicane Society of Madras forms a splendid exception and from humble beginnings in 1908 it has attained a position of considerable importance serving its members through numerous branches. The society celebrated its silver jubilee in 1930.

Producers' Movement.—Producers' co-operation in India is yet in a rudimentary stage. Half-hearted attempts made to apply co-operative methods in the case of the artisans and cottage workers have not been attended with success. People engaged in these industries may be divided into three classes: (*i*) those working on their own account and selling their finished articles themselves; (*ii*) those working in their own home on behalf of some merchant or dealer, receiving wages on the piece-work system for the work done by them, and being provided with the raw materials from the merchants who give them the work; and (*iii*) those working in small *karkhanas* or factories under an employer, generally known as the *karkhandar* and receiving wages on the time-scale, somewhat on the lines of the workers employed in large scale industries. A large number of artisans are still carrying on their trade on their own account, and these are wholly in the hands of the money-lenders, who charge exorbitant rates of interest. The latter also supply raw materials and purchase the finished articles at prices dictated by themselves. These transactions leave little margin to the worker, who having a running debt with the merchants is obliged to deal with them without being able to resort to the competitive markets.

What the artisan requires is thus (*i*) credit facilities, (*ii*) facilities for the purchase of raw materials and implements, and (*iii*) facilities for the sale of his product. The only thing that has been so far done is to organise credit societies for some of the artisans, hoping in a half-hearted way for societies for purchase and for sale to follow later on. The most important cottage industry being hand-loom weaving, attention was directed early to them and we have several *societies of weavers*. The societies for weavers in the Punjab affiliate themselves to the Co-operative Industrial Bank at Amritsar for finance. Besides this bank, there are six unions at different centres to which the societies within their areas are affiliated as shareholders. They raise their own funds too by shares and compulsory deposits. The Co-operative Industrial Bank at Amritsar helps the weavers' societies in the purchase of raw materials. The business branch of the bank—the sales depot at Lahore—sends to the societies weekly quotations and keeps them in touch with the trend of the market. The indents from societies are received by the Bank which arranges for the purchase of the requirements from Amritsar itself—the most important commercial centre in the Punjab or from Ahmedabad and Bombay. The other six Unions also help in this work through the Lahore sale depot. For the sale of the finished goods, however, the societies are left to held themselves; the unions and bank help but little, though the depot renders some service by securing orders, keeping goods on deposit and by advising societies to prepare cloth of the pattern most in demand in the market.

Bombay, Madras and other provinces have also a number of weavers' societies, but nowhere have they developed into producers' societies or have met with any marked success.

Co-operative Housing Societies.—An important direction in which the co-operative movement has developed in urban areas on the non-credit side is the provision of suitable housing accommodation to the lower middle classes at a fair rent. The housing movement represents a protest against exploitation of tenants by landlords in large cities. It has achieved a considerable measure of success in the Presidency of Bombay, where the Societies in 1931-32 numbered 83 with a total working capital of 89 lakhs. Of the 83 societies, 23 are in the city of Bombay and its suburbs, 21 in Ahmedabad, 12 in Karachi and the rest in other parts of the province. Of the remaining provinces, Madras has 130 societies with a total working capital of 40 lakhs, and the rest of the provinces have only one or two. Among the Indian States only Mysore has 12 societies. The societies outside the Bombay Presidency are mere lending societies and do not undertake the construction of buildings as those in Bombay do.

The housing societies started so far are confined to the middle class men such as clerks, pleaders, traders and the like and are all on a communal basis. No housing societies have yet been started in this country for the working classes. There are two main systems of co-operative housing, the individual ownership and the co-ownership or tenant co-partnership systems.

An important drawback of the *ownership system* is that the members of the society have an unrestricted right to transfer their property to any person, with the result that many houses built with the help of co-operative money, have passed into the hands of speculators. In order to remove this defect, Bombay has introduced a new scheme known as the *tenant ownership system*. In this system the society takes a large plot of land on lease or by purchase, and after laying out roads, if they do not exist already, divides the land into smaller plots and distributes them among the members, reserving some land for common purposes, for erecting a common hall and for a play-ground. The cost of development is a charge on the members' plots, the price of which varies according to their situation. The members hold the plots on a lease from the society on condition that in case of sale of their holding, before or after erecting a

building, they will give the first choice to the society or to a member recommended by it. Government undertakes to advance loans to members of this type of society to the extent of twice the capital paid by each member, repayable within 20 years, the maximum amount allowed to a member being Rs. 10,000. When all the houses are built, the society would look after the common property, settle disputes between members and generally to the work of a municipality for the colony.

In the *tenant co-partnership system*, the society takes up a large area of land and constructs buildings thereon for the residence of its members and makes provision for their common amenities. Members reside in the buildings as the tenants of the society. They contribute capital to the extent of 1/5 to ¼ of total cost, in proportion to the gross residential area provided. The remaining capital, in addition to that contributed by the members, is raised by way of a loan. The Government of Bombay advances loans to the housing societies of this type to the extent of three-fourths the paid up capital repayable in 40 years by annual instalments with interest at 5½ per cent. Governments of other provinces have recently commenced to advance long-term loans to housing societies at about 6 per cent. In this system the position of the society as well as of the members is secured. The society holds a substantial stake of the members, and there is no chance of default. Though no member is the owner of any building or its part in which he resides, yet all the members are joint-owners of all the buildings. It is a socialistic ideal in which the ownership rests in the community as a whole and not in individuals.

Review.—The Co-operative Societies Act of 1904 had limitations which were soon recognised and at a conference of the Registrars, a bill was drawn up which became the **Co-operative Societies Act of 1912**. This Act remedied the defects of its predecessor, authorized the registration of societies for purposes other than credit, substituted a scientific classification based on the nature of the liability for the arbitrary one into rural and urban and legalised the registration of Unions and Central Banks.

In 1914 the Government of India reviewed the situation in a comprehensive resolution and recommended a change in the policy regarding the grant of loans to members, so that they might lend money for domestic purposes as well as for agricultural ones in order that the members might confine their dealings with the Co-operative Societies and be weaned from the sowcars. In 1914, the **Maclagan Committee** on Co-operation was appointed and its report in 1915 led to the reorganisation and overhauling of the whole administration of co-operation. Punctual repayment of loans was insisted upon, and all those societies that failed to live up to the ideal of co-operation were sought to be eliminated. From this time onwards the share of non-officials in the movement assumed increasing importance and it came to be realized that for the success of the movement, deofficializing of the same was necessary. The Government of India Act of 1919 made co-operation a provincial transferred subject and the local Governments were left free to adapt the 1912 Act to their own requirements.

The steady growth of the **Central Financing Agencies** relieved the Registrars partly of the need for attending to this very important matter in the development of co-operation; but propaganda still remained the function of the Registrar and his staff, paid or honorary, and it was perceived that non-official institutions should be established to take over this function from official hands. Accordingly **Co-operative Institutes** were started in various provinces, in some cases as unitary societies reaching down to the village through their branches in the divisions and the district, in other cases as a federation or union more or less complete of the primary societies. The part these non-official bodies began to play henceforth became increasingly important, some adding to the primary function of propaganda, others such as co-operative education, supervision over societies and even audit.

The steady progress of the movement—sometimes even too rapid—for nearly 20 years, however, was found hardly to lessen the colossal burden of the indebtedness of the ryot, for co-operative credit necessarily confined itself to short-term loans. It was in the Punjab that the first *Co-operative Land Mortgage Bank* was started at Jhang in 1920. Soon after other provinces also followed suit.

While the movement was developing at a rapid pace it was found that financially the situation was worsening. Defaults in repayment were becoming increasingly common and **Co-operative Committees of Enquiry** were instituted in various provinces. The Central Provinces thought it necessary to have such a committee in 1922, while Bihar and Orissa followed with a similar committee in 1923. A few years after the Oakden Committee made similar inquiries for the U. P., the Townsend Committee for Madras and the Calvert Committee for Burma. These Committees have carefully analysed the position in their respective provinces and have made recommendations for the consolidation and rectification of the co-operative credit organisation and the extension of the non-credit side of agricultural co-operation. The powers conferred upon the Local Government by the Act of 1919 to modify the Act of 1912 have been exercised so far in but few provinces such as Bombay, Burma, Madras and Bihar and Orissa. Bombay passed the **Co-operative Societies' Act of 1925** incorporating the suggestions made from time to time for the amendment of the previous All-India Act. This new Act made the object of the movement still wider than that of its predecessor and its preamble refers to "better living, better business and better methods of production" as the aim of the movement. The chief features of the Bombay Act of 1925 are the adoption of a scientific system of classification of societies, the improvement of the procedure for liquidation of cancelled societies, the extension of summary powers of recovery to the awards of arbitrators and the provision of penalties against specified offences. The Burma Act came into force in 1927 and the Madras Act in July 1932. In Behar and Orissa, the draft of a new Act is under consideration and the bill will be very likely introduced in the council shortly. The progress of the

movement in forms other than credit has not been very remarkable and credit societies still predominate, especially the Agricultural Credit Societies.

The **non-credit movement** has had naturally more obstacles to overcome than the credit but the former is slowly gathering force in the shape of sale societies for cotton in Karnatak, Gujarat and Khandesh, cattle insurance societies in Burma and irrigation societies in Bengal and the Southern Division of the Bombay Presidency. Perhaps the most remarkable instance of the co-operative movement in India is to be found in the Punjab where consolidation of holdings has been successfully attempted through co-operation. In the non-agricultural non-credit sphere, a still smaller headway has been made. There are a number of housing societies especially in Bombay, Madras and Mysore, and artisans' societies and unskilled labour societies in Madras. It may be noted that on the agricultural side, co-operative farming has hardly been touched and on the non-credit side the consumers' movement has made but meagre progress.

In 1926, the *Royal Commission on Agriculture* was appointed and co-operation formed only a part—though an important one—of its extensive enquiry. Recently, in consequence of the appointment of the provincial committees under the *Indian Central Banking Enquiry Committee* the co-operative movement in the different provinces has been surveyed. But the provincial committees, for obvious reasons, confined their inquiries to banking in relation to agriculture, small industries and trade. Thus only those aspects of the co-operative movement which have an intimate bearing on the credit needs of the population and the development of banking facilities have been examined, while the need for separate enquiries into the whole movement in the different provinces of the lines of those undertaken in C. P., U. P. and Madras and emphasised by the Royal Commission on Agriculture is still to be met. Bihar and Orissa recently got its movement examined by a committee which has published its report last year. The Government of Bombay convened in June 1933 a Round Table Conference of official and non-official Co-operators to discuss the problems that confronted the Movement in Bombay. As a result of this Conference, three Committees were appointed, one to examine the system of supervision over Co-operative societies by the Supervising Unions in the Presidency, another to report on the best way to help the agriculturists in these times of falling prices and trade depression, and the third to examine the problem of extension of land mortgage banking on a Co-operative basis. These Committees have not yet submitted their reports, but there is little doubt that their recommendations would lead to a tightening up of supervision, an extension of land mortgage banking and efforts to meet the growth of overdue loans.

The growing difficulties of the Co-operative Movement throughout India in these times of unprecedented depression led the Government of India to hold an All-India Co-operative Conference at New Delhi on the 29th January 1934. This Conference was unique in so far as it was not restricted only to the Registrars of Co-operative Societies and their advisers from the various provinces and States, but it also included some ministers in charge of Agriculture and Co-operation from the provinces and a representative of each of the two All-India Co-operative organisations—the Institutes' Association and the Provincial Banks' Association. This Conference recommended the enactment of an All-India Co-operative Societies Act so as to permit the registration of Co-operative Societies working in the whole of India or in more provinces than one. It also recommended earnest efforts for the development of land mortgage banks by the Government guaranteeing not only the interest on their debentures but also the capital and suggested the creation of a Central Co-operative Board under the Imperial Government with a small establishment to bring about a closer co-ordination of work between the different provinces and States of India. This last suggestion has met with some opposition, since after the provincialisation of Co-operation under the on Montford Reforms of 1914, the provinces do not much fancy the imposition of control from the centre. And yet, there seems to be nothing wrong in the idea of a central organisation, which would be a clearing house for authentic information and stimulate progress through a careful study of experiments and efforts in particular areas and drawing attention of other areas to the success achieved or the deficiencies revealed.

It may also be mentioned that **the Indian States** were not slow in introducing the co-operative movement within their limits, and the movement in some of the more important of the States, such as Hyderabad (Deccan), Mysore, Baroda, Gwalior and Indore has made considerable progress, more or less on the same lines as those followed in the neighbouring British Indian Provinces.

The landmarks in the history of the co-operative movement in India are; the Co-operative Credit Societies Act of 1904; the Co-operative Societies Act of 1912; the Maclagan Committee Report, 1915; the provincialisation of co-operation, 1919; the establishment of institutes, unions and federations for propaganda; the Committees of Enquiry into the co-operative movement in several provinces; provincial legislation; the Report of the Royal Commission on Agriculture, 1928; and Reports of the Indian Central and Provincial Banking Enquiry Committees, 1931.

The movement has thus developed rapidly and the **stages of its evolution** may be briefly summarised as—agricultural credit; urban credit; central credit organisations; apex co-operative banks; propaganda by non-officials; non-credit agricultural co-operation; urban co-operative banking; long-term loans and debt redemption schemes; land mortgage banks; co-operative education; rectification and consolidation of the credit movement; and organisation of supervision over primary societies.

BENARES MATHEMATICAL SOCIETY.—Founded in 1918 for the encouragement and promotion of research in the various branches of Pure and Applied Mathematics, and in the History of Mathematics. It conducts a journal "The Proceedings of the Benares Mathematical Society" in which original papers on Mathematics are published and maintains a library. There are about 60 members from all parts of India. Admission fee Rs. 10. Annual subscription Rs. 12 (resident members) and Rs. 5 (non-resident members). *Life President*: Dr. Ganesh Prasad, M.A. (Cantab), D.Sc.; *Secretary*: Prof. Chandi Prasad, M.A., B.Sc.; *Treasurer*: Prof. Pashupati Prasad, M.A., B.Sc.

BHANDARKAR ORIENTAL RESEARCH INSTITUTE, POONA.—The Institute was inaugurated on the 6th of July 1917, the 80th birthday of late Sir R. G. Bhandarkar, at the hands of H. E. Lord Willingdon, who became its first President. Its objects are to publish critical editions of texts and original works bearing on Oriental Antiquities, to provide an up-to-date Oriental Library, to train students in the methods of research and to act as an information bureau on all points connected with Oriental Studies. The valuable library of the late Dr. Sir R. G Bhandarkar, which he had bequeathed already to the Institute, was after his demise handed over by his executors to the Institute, and is now located in the Central Hall of the Institute. Since the 1st of April 1918 the Government of Bombay have transferred to the custody of the Institute the unique collection of nearly 20,000 manuscripts formerly in charge of the Deccan College, together with a maintenance grant of Rs. 3,000 a year. Government have likewise entrusted to the Institute a grant of Rs. 12,000 a year for the publication of the B. S. S. and the Government Oriental Series. The Institute has undertaken to edit *Mahabharata* critically (*Editor-in-Chief*: Dr. V. S. Sukthankar), at the request of the Chief of Aundh who has promised a total grant of Rs. one lakh for that purpose. Grants are being received from the Government of India (Rs. 4,000 a year), the University of Bombay (Rs. 3,000 a year) and the Government of Bombay (Rs. 6,000 a year), Burma, Baroda and Mysore as well as several Southern Mahratta States. The Institute has a Journal called "Annals of the Bhandarkar Institute" published four times a year. It also held under its auspices the First Oriental Conference on the 5th, 6th and 7th of November 1919 under the patronage of H. E. Sir George Lloyd and the presidency of Sir R. G. Bhandarkar. Thanks to liberal donations from the Tatas and the Jain community, supplemented by Grants-in-Aid from the Government of Bombay, the Institute is housed in a fine building near the hills behind the Home of the Servants of India Society. Since August 1927 the Institute has been conducting regular M.A. classes in Sanskrit, Pali, Ardhamagadh and Ancient Indian Culture, where at present over 30 students are attending. Membership dues Rs. 10 a year or Rs. 100 compounded for life. Members can, subject to certain conditions, borrow books from the library and get the "Annals" free and other publications (a list covering about 100 titles sent free upon request) at concession rates. *Secretary*: Dr. V. S. Sukthankar, M.A., Ph.D.

BHARATA ITIHASA SANSHODHAKA MANDALA, POONA.—Founded in 1910, generally to encourage and foster critical study of, and research in, Indian History and especially to collect and conserve historical documents, etc., relating to the same. The Mandala is entirely supported by public subscriptions and holds fortnightly meetings and annual conferences for historical discussions which are usually published in its quarterly Journal. Recently the Mandala has received by will a gift of thirty thousand dollars for a building to house, Marathi Manascripts from the late Dr. J. E. Abbott, of New Jersey, U.S.A. It has a library of its own and a permanent museum of historical exhibits and curiosities and a unique collection of Indian paintings of all pens and schools. The Mandala besides

publishing its Quarterly, edits and publishes original documents and monographs on historical subject, both in the *Sweeya, i.e.*, "Own" and *Puraskrita, i.e.*, "Recommended" series. Membership dues from Rs. 3 to Rs. 300 annually, with varying rights and privileges which may be compounded for life. Members, subject to certain conditions, can borrow books and get the Quarterly free and other Mandala publications at concession rates. *President:* C. V. Vaidya, M.A., LL.B.; *Secretaries:* D. V. Potdar, B.A. and Shri Sardar G. N. Mujumdar, M.L.A.; *Treasurer:* A. V. Patwardhan, B.A. *Address:* 312-13, Sadashiv Peth, Poona City.

BOMBAY ART SOCIETY.—Founded 1888; to promote and encourage Art by exhibitions of Pictures and Applied Arts, and to assist in the establishment and maintenance of a permanent gallery for pictures and other works of Art. Annual exhibition usually held every January. Annual subscription Rs.10; Life member Rs. 100. *Hon. Secretary:* V. V. Oak, Bar-at-Law. *Office:* Secretariat, Ground Floor, Bombay.

BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY.—Founded 1804, to investigate and encourage Oriental Arts, Sciences and Literature. Annual subscription Rs. 60. *Secretary:* J. S. Tilley, Town Hall, Bombay.

The Entrance Fee for Resident members Rs. 5, monthly subscription Rs. 2, Absent members Re. 1, and non-resident members yearly subscription Rs. 5, *President:* Dr. Abraham S. Erulkar. *Vice-Presidents:* Dr. S. B. Gadgil and Dr. K. J. J. Cursetji. *Hon. Treasurer:* Dr. R. D. P. Mody. *Hon. Librarians:* Dr. V. B. Desai and Dr. K. S. Bharucha. *Hon. Secretaries:* Dr. Sorab J. Popat and Dr. M. B. Thakore. Blavatsky Lodge Building, French Bridge, Chowpatty, Bombay.

BOMBAY NATURAL HISTORY SOCIETY. (Registered under Act XXI of 1860).—Founded 1883 to promote the study of Natural History in all its branches. The Society has a membership of about 1,400 all over the world and a museum with a representative collection of the different vertebrates and invertebrates found in the Indian Empire and Ceylon. In 1921 the Society was entrusted with the management of the Natural History Section of the Prince of Wales Museum, and a great part of the Society's collections have been transferred to that Museum. A Journal is published at varying times during the year which contains articles on natural history and sport as well as descriptions of new species and local lists of different orders. The Society's library is open to members and books may be borrowed under special arrangement by members residing in the mofussil. The Society's Taxidermist Department undertakes the curing and mounting of trophies for members. Annual subscription Rs. 25. Entrance fee Rs. 10. *Patrons:* H. E. The Viceroy of India, H. R. H. the Prince of Wales. *Vice-Patrons:* H. H. The Maharao of Cutch, G.C.S.I., G.C.I.E., H. H. the Maharaja of Jodhpur, K.C.S.I., K.C.V.O., H. H. the Maharaja of Rewa, K.C.S.I., H. H. the Maharaja of Bhavnagar and Mr. F. V. Evans, Liverpool; Sir David Ezra, Kt., A. S. Vernay, Esq., London. *President:* H.E. The Rt. Hon. Major-General Sir Frederick Sykes, G.C.I.E., G.B.E., K.C.B. *Vice-Presidents:* Mr. R. D. Bell, C.I.E., I.C.S., H. H. The Maharao of Cutch, G.C.S.I., G.C.I.E., Rev. E. Blatter, S.J., Ph.D., F.L.S. *Honorary Secretaries:* Sir Reginald Spence, Kt., F.Z.S., M.L.C. and Mr. P. M. D. Sanderson, F.Z.S. *Curator:* S. H. Prater, C.M.Z.S., M.L.C. *Asstt. Curators:* C. McCann, V. S. La Personne. *Head Clerk:* Mr. A. F. Fernandes. *Offices:* 6, Apollo Street, Bombay.

BOMBAY SANITARY ASSOCIATION.—Founded to create an educated public opinion with regard to sanitary matters in general; (*b*) to diffuse the knowledge of sanitation and hygiene generally, and of the prevention of the spread of disease amongst all classes of people by means of lectures, leaflets and practical demonstrations and, if possible, by holding classes and examinations; (*c*) to promote sanitary science by giving prizes, rewards or medals to those who may by diligent application add to our knowledge in sanitary science by original research or otherwise; (*d*) to arrange for homely talk or simple practical lectures for mothers and girls in the various localities and different chawls, provided the people in such localities or chawls give facilities. The Sanitary Institute Building in Princess Street, which has lately been built by the Association, at a cost of nearly Rs. 1,00,000 the foundation stone of which was laid by Lady Willingdon in March, 1914, and opened in March, 1915, is a large and handsome structure with a large Lecture Hall, Library, Museum, etc., and also provides accommodation for King George V. Anti-Tuberculosis League Dispensary transferred to the Municipality in 1924 and Museum and the office of the Assistant Health Officer, C and D Wards, and the Vaccination Station. *Hon. Secretary*: Dr. J. S. Nerurker, B. Sc., L.M. & S., D.P.H. (Cantab.), Executive Health Officer, Bombay.

BRITISH AND FOREIGN BIBLE SOCIETY.—Since 1811 the British and Foreign Bible Society has been at work in this country. It has 6 Auxiliaries in India and an Agency in Burma. The first Auxiliary was established in Calcutta, in 1811, then followed the Bombay Auxiliary in 1813, the Madras Auxiliary in 1820, the North-India Auxiliary in 1845, the Punjab Auxiliary in 1863, the Bangalore Auxiliary in 1875, while the Burma Agency was founded in 1899. The Bible or some portion of it is now to be had in over 100 different Indian languages and dialects and the circulation throughout India and Burma reached 1,120,422 issues in 1932. The Bibles, Testaments, and Por-

tions in the various vernaculars are sold at rates which the very poorest can pay, and at considerable loss to the Society. Grants of English Scriptures are made to Students who pass University examinations, as under:—

The New Testament and Psalms to Matriculates and the Bible to Graduates.

Portions of Scriptures in the important vernaculars have been prepared in raised type for the use of the Blind and large grants of money are annually given to the different Missions, to enable them to carry on Colportage and Bible Women's work. Besides the British and Foreign Bible Society, there is Bible work carried on in India, and Burma in a much smaller way by the Bible Translation Society—which is connected with the Baptist Missionary Society—the National Bible Society of Scotland, the American Bible Society and the Tranquebar Tamil Bible Society.

The following table shows the growth in the British & Foreign Bible Society's work during the past few years in India and Burma:—

TABLE OF CIRCULATION OF THE B.F.B.S. IN INDIA.

Auxiliaries.	1932.	1931.	1930.	1929.	1928.	1927.

Lahore—P. O. Box No. 165.
Calcutta—P.O. Box No. 2285.
Madras—P. O. Box No. 1270.
Rangoon—P. O. Box No. 333.
Assam—P. O. Mohanaghat.

INDIAN SOCIETY OF ORIENTAL ART (Calcutta)—*President*: Sir Rajendra Nath Mookerjee, Kt., K.C.I.E., K.C.V.O.; *Vice-Presidents*: The Hon'ble Raja Sir Monmotha Nath Roy Chowdhury of Santosh, Kt.; Mr. J. N. Basu, M.A., M.L.C., and Mr. G. N. Tagore; *Joint Hony. Secretaries*: Mr. P. N. Tagore and Mr. N. N. Tagore; *Hony. Treasurer*: Rai F. L. De, Bahadur; *Asst. Secretary*: Mr. P. K. Chatterjee. *Office*: 11, Samavaya Mansions, 1st Floor, Calcutta.

INDIA SUNDAY SCHOOL UNION.—The India Sunday School Union is an interdenominational organisation having for its object the strengthening of religious and moral education in the Christian schools throughout the Indian Empire. It has six full time workers, both Indian and European. It was founded in Allahabad in 1876. Its General Committee is composed of representatives from the National Christian Council, from the Provincial Representative Councils and from local Sunday School Unions which are Auxiliaries of the I.S.S.U.

The headquarters of the Union are at Coonoor on the Nilgiri Hills, where besides the office and well-stocked book shop, there is the St. Andrew Teacher Training Institution. In this institution Summer Schools are held where a short but intensive course of study and training is offered to leaders in religious education from all parts of India.

Besides the activities at headquarters, the Union offers courses of lectures in any part of the country, delivered by members of its staff. A Quarterly Journal is published in English, and Lesson Notes for teachers in English and several vernaculars. Text books on subjects connected with the work of Bible teaching are also published in various languages, and Scripture examinations are organised.

The officers of the Union are as follows:—

President: Rev. A. Ralla Ram, B.A., Allahabad; *Treasurers*: W. H. Warren, Madras, and J. G. Fritschi, Coonoor.; *General Secretary*: E. A. Annett, Coonoor; *Assistant Secretary*: Rev. N. Franklin, Madras.

The most recent statistics show that there are in India 18,322 Sunday Schools with 30,428 teachers, and 707,204 scholars.

INSTITUTION OF ENGINEERS (INDIA).—The organisation of the Institution began in 1919 and it was inaugurated by H. E. Lord Chelmsford early in 1921. Its object is to promote and advance the science, practice and business of engineering in India on the same lines as are adopted by the Institutions of Civil, Mechanical and Electrical Engineers in the United Kingdom. The standard of qualification is the same. Membership is divided into four classes, *viz.*, Members, Associate Members, Companions and Associates, and there is an additional class for students. *President:* Dr. A. Jardine, D.Sc., M.I.E. (Ind.), *Offg. Secretary:* S. K. Banerjee. *Offices:* 241-1-1, Lower Circular Road, P. O. Box No. 669, Calcutta.

MADRAS FINE ARTS SOCIETY.—*Patron:* H. E. The Governor of Madras; *President:* The Lady Beatrix Stanley; *Vice-President:* K. Kay, Esq.; *Hon. Secretary:* S. H. Slater, Esq., C.M.G., C.I.E., I.C.S.; C/o Development Secretariat, Fort St. George, Madras.

MADRAS LITERARY SOCIETY AND AUXILIARY OF THE ROYAL ASIATIC SOCIETY.—*Patrons:* H. E. Lt.-Col. Rt. Hon. Sir George Frederick Stanley, P.C., G.C.I.E., C.M.G., and the Lord Bishop of Madras; *President:* The Hon. Mr. Justice G. H. B. Jackson, M.A., I.C.S.; *Hony. Secretary:* M. Ruthnaswamy, Esq., M.A., Bar-at-Law, and *Librarian:* U. S. Phanuel. *Address:* College Road, Nungumbakam, Madras.

NATIONAL HORSE BREEDING AND SHOW SOCIETY OF INDIA.—Formed in 1923, by Major-General Sir Bernard James, C.B., C.I.E., M.V.O., who was President from 1923 to 1925. Objects: To form a national body of public opinion on horse-breeding matters; to encourage and promote horse-breeding in India; to protect and promote the interests of horse-breeders and to give them every encouragement; to improve and standardise the various types of horses bred in India; to prepare an Indian stud book; and to promote uniformity in all matters connected with horse shows in India. *Patron-in-Chief:* H. E. The Viceroy; *President* (for 1933-34): Brigadier Sir Terence Keyes, K.C.I.E., C.S.I., C.M.G. *Secretary:* Major-General Sir Bernard James, C.B., C.I.E., M.V.O. The Society issues the following publications: "Horse Breeding." An Illustrated Quarterly Journal in English, Station Register and Supplement, Indian Stud Book, Record of Country Breed Racing, Show Judging Pamphlet. The Second Volume of the Indian Stud Book was published at the end of 1930. The Society holds the Imperial Delhi Horse Show annually in February. *Registered Office*—Delhi.

NATIONAL INDIAN ASSOCIATION.—Founded in 1870. Its objects are:—(*a*) To extend in England, knowledge of India, and interest in the people of that country. (*b*) To co-operate with all efforts made for advancing Education and Social reform in India. (*c*) To promote friendly intercourse between English people and the people of India. In all the proceedings of the Association the principle of non-interference in religion and avoidance of political controversy is strictly maintained. It has branches in Bombay, Madras, Ahmedabad, Nagpur and Calcutta. *Hon. Secretary,* Miss Beck, 21, Cromwell-road, London. Publication: *The Indian Magazine and Review,* (8 numbers a year) which chronicles the doings of the Association in England and in India, and takes note of movements for educational and social progress. It publishes articles about the East to interest Western readers, and articles about the West to interest readers in the East. *Life Memebers*—Ten Guineas. Annual Subscriptions: Members one Guinea; County Members, Ten Shillings; Associate Students, Seven shillings and Six pence.

PASSENGERS' AND TRAFFIC RELIEF ASSOCIATION. (Established in 1915). *Head Office*—Albert Building, Hornby Road, Fotr, Bombay. Objects: (*a*) To inquire into and ascertain grievances with respect to passengers in India generally. (*b*) To petition Government, Local bodies, Railway, Steamers and other companies carrying passengers and traffic; to take all proper and necessary steps to obtain redress with regard to the said grievances. (*c*) To hold periodical meetings and discuss questions relating to grievances. (*d*) To start a fund to meet expenses for carrying out the objects of the Association. *President.*—L. R. Tairsee, *Vice-Presidents.*—Behram N. Karanjia, J.P., and Sheth Lachhmandas Daga, *Hon. Jt. Secretaries.*—Khan Bahadur P. E. Ghamat and Gordhandas G. Morarji. *Asst. Secretary.*—M. M. Raiji.

PHILATELIC SOCIETY OF INDIA.—Formed March 1897; Annual subscription Rs. 10. *Secretary,* Jno. Godinho, 15, Burrow's Street, Bombay.

PHOTOGRAPHIC SOCIETY OF INDIA (Calcutta):—Annual subscription Rs. 30 (Town members) and Rs. 15 (Mofussil members). Entrance fee Rs. 20 and Rs. 10. The Society is affiliated to the Royal Photographic Society of Great Britain, London, and holds annual exhibitions, distributes a monthly journal to members, and undertakes developing, printing and enlarging work from its members only. There are excellent work-rooms apparatus and reading room at the Society's Headquarters at 229, Lower Circular Road, Calcutta. *Hon. Secretary:* A. Hearn, 229, Lower Circular Road, Calcutta.

POONA SEVA SADAN SOCIETY.—This Institution was started in 1909 by the late Mrs. Ramabai Ranade, Mr. G. K. Devadhar, and a few other ladies and gentlemen in Poona and registered in 1917. It is now working independently though for a few years in the beginning it was conducted as a branch of the Bombay Seva Sadan. Its main object is to make women self-reliant and to train them for missionary work undertaking educational and medical activities for their sisters and brethren, especially the former in backward areas and working on a non-sectarian basis. Nominal fees are now being charged for instruction in all classes. There are eight different departments sub-divided into 60 classes. Arrangements are made for training Nurses and Midwives and women Sub-Assistant Surgeons at the Sassoon Hospitals, Poona, and a hostel is maintained for the former and another for those attending the Sub-Assistant

Surgeon's Classes. There is a Public Health School affiliated to the Lady Chelmsford League for Maternity and Child Welfare, Delhi, with a hostel. The number in these three hostels is now about 85. Besides, there is a full-fledged Training College, named after Bai Motlibai Wadia with about 65 students excluding those in the V. F. Class for being trained as Mistresses for Vernacular schools. This College is probably the only college in India maintained by a non-official, non-Christian missionary body teaching the full course. The results of the Certificate Examinations held in the year 1931-32 under the authority of the local Government Training College for Women were as follows : I year senior B and II year 7. The total number of certificates granted so far is 350 now. The Practising Schools for little girls attached to the Training College has now eleven classes with 290 students reading up to the Marathi VI Standard, English being taught in the V and VI standard classes. Primary Classes for grown up women teaching up to the Marathi V Standard are attended by about 100 women. It is here that poor women are recruited for their training as a teacher, nurse, midwife, or doctor. Special classes for teaching English, First Aid, Home Nursing were attended by about 90 students ; the Music Classes by 30 students, and the Work-room Classes for teaching Sewing, Embroidery, Hosiery, Composing, Weaving, etc., by 130 Women. Thus, the total number of pupils is about 990 to-day. There are two branches of the Society started at Satara and Baramati which are named after Lady Vithaldas Thakersey, the wife of the greatest helper of the Society so far, the late Sir Vithaldas D. Thakersey. Besides there are branches started at Bombay (Dadar and Girgaum), Sholapur, Ahmednagar Alibag, Nasik, Nagpur, and Gwalior for either educational or medical work or for both. Thus the total number of women and girls including about 150 duplications on the rolls at these various Centres of the Society is over 1,500. There are in Poona five hostels, three of which are located at the headquarters and the other two in the Somwar Peth for Nurses, etc., under training at the Sassoon Hospital. The number of resident students is above 200 in these five hostels. One of the three hostels at the headquarters is intended for women of depressed classes. The number of these women at present is 8. In connection with the medical branch a Committee has been formed in England, which will enable the Society to send fully qualified Nurses there to undergo further training. Two fully qualified Nurses have so far been sent by the Society for their post graduate course in Public Health Nursing at Bedford College for women, London, with the partial help of a scholarship of the League of Red Cross Society, Paris. There is an active Infant Welfare centre and ante-natal clinics with the average daily attendance of 50 excluding expectant mothers. The Society has extended its medical activities in Bombay by undertaking, with the help of two charitable Trusts in Bombay, to work out the scheme of Maternity, Infant Welfare, Child Welfare and General Nursing for the women and children of the Bhatia Community under the supervision of Mr. G. K. Devadhar, the organiser of the society. This scheme has a Maternity Hospital and Nursing Home, and three Infant Welfare centres. Besides, there are Maternity Hospitals and Nursing Homes at Ahmednagar, Alibag, Nasik, and Sholapur under the management of the society in connection with other organizations. Now Her Excellency the Countess of Irwin, the Countess of Reading, Lady Wilson, Lady Lloyd, Lady Willingdon, Lady Sydenham and Lady Chelmsford are Hon. Patronesses. The institution is largely dependent upon public contributions and Government assistance. The annual expenditure of the whole organization now exceeds Rs. 2,50,000. *President :* Shrimant Saubhagyavati H.H. the Ranisaheb of Sangli ; *Honorary Organiser and General Secretary :* Mr. Gopal Krishna Devadhar, M.A., C.I.E.; *Local Secretary and Treasurer :* Mrs. Yamunabai Bhat ; *Lady Superintendent and Secretary for Development and Collections :* Mrs. Janakibai Bhat (Kaiser-i-Hind Silver Medal) ; *Joint Lady Superintendents :* Mrs. Saralabai Naik, M.A., and Miss Dwarkabai Bhat, B.A., B.T. ; *Hon : Secretaries, Nursing and Medical Education Committee : Joint Hon. Secretaries :* Dr. V. C. Gokhale, L.M.&S.; Dr. N. L. Ranade, B.A., M.B.B.S., and Dr. V. R. Dhamdhere, M.B.B.S.

PRESS-OWNERS' ASSOCIATION, Bombay—Started on 30th April 1919 to promote the interests of the printing and litho presses and allied trades, to bring about harmony and co-operation among press owners and proprietors and to take such steps as may be necessary in furtherance of the above objects.

Office:—Gaiwadi, Girgaum, Bombay 4.
President:—Shet Pandurang Javjee, J.P.
Secretary:—Mr. Manilal C. Modi.

RANGOON LITERARY SOCIETY.—*Patron :* H.E. The Governor of Burma ; *President :* J. M. Symns, Esq., M.A., I.E.S., Director of Public Instruction ; *Vice-President :* Dr. H. B. Osborn, *Hon. Secretary :* Mrs. C. Peacock, 35, York Road.

RECREATION CLUB INSTITUTE.—This Institution was started in 1912-13 by the members of the Ismaily Dharmic (religious) Library in Bombay. Its central office is in Bombay with branches at Ahmedabad, Ahmednagar, Karachi, Hyderabad (Sindh), Poona, Warangal, etc. The aims and objects of the society are to elevate and improve the social, economic and spiritual condition of the depressed and poor classes of people and with that intent to found primary schools, associations and such departments and to take all constructive means to achieve the above objects. The Institute has 2 orphanages with 150 inmates, industrial works, domestic industries, sales depots, clubs, libraries, etc. It also issues two Anglo-Vernacular papers, The *Ismaily* (a weekly) and The *Nizari* (a monthly). *Hon. Secretary*, Mr. Hasan Lalj, Devraj.

ROYAL SOCIETY OF ARTS, INDIAN SECTION.—This Society was founded in London in 1754. Its recently published history by Sir Henry Trueman Wood, late Secretary of the Society, gives the following account of

the Indian Section. In 1857 a proposition was made by Mr. Hyde Clarke, who wrote to the Council suggesting that "a special section be formed for India, another for Australia, one for English America and so on." It was suggested that the Indian Section should meet once a fortnight for the reading of papers. Nothing came of the suggestion until ten years later when Mr. Hyde Clarke returned to England, and in 1868 he renewed his proposal, but only proposing the formation of a Committee which should organise conferences on Indian subjects. This time the suggestion was taken up more warmly. Mr. Hyde Clarke himself was placed on the Council, and the Indian Conferences, which soon developed into the Indian Section, were started. "The Indian Section thus established became a most important department of the Society. It has had great results in India by spreading information as to the directions which the development of Indian manufactures and Indian products could most usefully take, and in England by giving similar information as to the industrial resources and progress of India itself. The Section has received great help from the Indian press and it has in return been of service to the Indian press in supplying useful information to it. It has been of great value to the Society itself as the means by which many members have been added to its list, so that in fact, thanks to a very large extent to the work of the Indian Section and of the allied section for the Dominions and Colonies, a large proportion of the present number of members come from the dependencies of the Empire abroad." *Secretary of the Society:* G. K. Menzies, C.B.E., M.A.; *Secretary of the Indian and Dominions and Colonies Sections:* W. Perry, B.A., I.C.S. (retired) 18, John Street, Adelphi, London, W. C. 2.

SERVANTS OF INDIA SOCIETY.—The Servants of India Society, founded by the late Hon. Mr. G. K. Gokhale in 1905, is a body of men who are pledged to devote all their lives to the service of the country on such allowances as the Society may be able to give. Its objects are to train national missionaries for the service of India and to promote, by all constitutional means the interests of the Indian people. Its present strength is 21 Ordinary members, 8 members under training, 2 permanent assistants, 1 Attache and 1 probationer. The Society has its headquarters in Poona with branches at Madras, Bombay, Allahabad and Nagpur and other centres of work at Dohad in Gujerat; Mayanur, Coimbatore, Mangalore and Calicut in the Madras Presidency; Lucknow in U. P., Lahore in the Punjab and Cuttack in Bihar and Orissa.

The Society's work is primarily political but as it believes in all round progress of the Indian people, it has always laid equal emphasis on social, economic, educational, labour and depressed class activities and has worked in these fields. The political work is done through the legislatures, the non-official political organizations, deputations to foreign countries and propaganda. The Right Hon. V. S. Srinivasa Sastri was in the old Imperial Legislative Council and in the new Council of State till 1924 and has to his credit many achievements. Pandit Hirday Nath Kunzru was a member of the U. P. Legislative Council and of the Legislative Assembly. He takes special interest in the questions of the Indianisation of Army, public services, education and Indians overseas. Mr. N. M. Joshi has been a nominated member of the Assembly since 1921 and has to his credit many a labour legislation. Mr. N. A. Dravid was for three years a member of the C. P. Council. Mr. Joshi was a member of Bombay Municipal Corporation and Mr. R. R. Bakhale a member of the Board of the Port of Bombay for a short period. Mr. Kunzru has been the General Secretary of the National Liberal Federation of India, and Messrs. Joshi, S. P. Andrews, Dube and K. P. Kaul are Secretaries of its Provincial branches and have all done the work of organising political conferences. Messrs. Sastri and Kunzru were members of the Liberal Party's deputation to England during the Reforms period of 1919-20. Mr. Sastri again toured some of the Dominions in 1921 on behalf of the Government of India to secure legitimate rights for Indians there; attended as India's representative the Assembly of the League of Nations and the Washington Naval Disarmament Conference; went to England in 1923 as a Leader of the Kenya Deputation of the Indian Legislature; went in 1927 to South Africa as Agent-General of the Government of India under the now famous Cape Town Agreement for eighteen months; and lastly went to Kenya in 1929 on behalf of Government to place the Kenya Indian's case before Sir Samuel Wilson. His achievements in South Africa are a marvel to the world and brought the White and Indian communities together. Mr. Kunzru went in 1929 to Kenya to preside over the East African Congress and to England as the spokesman of the Kenya Indians to put their case before the British Government. Mr. P. Kodand Rao was in South Africa with Mr. Sastri and in Kenya with Mr. Kunzru and has mastered the question of Indians there. Mr. Joshi was a member of the Nehru Committee which is the author of the now famous Nehru Report on Constitutional Reforms. Messrs. Sastri and Joshi were members of the Round Table Conference and Mr. Joshi of the Consultative Committee and a Delegate to the Joint Select Committee.

In the field of social economic and educational work, the Society's activities are equally varied. Some of its members are practically the founders of such institutions as the Poona Seva Sadan, Bombay and Madras Social Service Leagues, the U. P. Seva Samiti, the Bhil Seva Mandal catering for the needs and uplift of the aboriginal tribes in Gujerat. The Seva Sadan has been a model institution for the education of women which gives training to over 1,500 girls and women in all useful directions. It has many branches in different parts of India carrying on social and educational work. The Social Service League has done good co-operative, educational and welfare work for the mill workers in Bombay by starting Co-operative Societies, adult night and technical schools and conducting welfare centres. The Seva Samiti is an unique organization in Upper India

doing service to the pilgrims going to religious places such as Hardwar and Benares, and working in times of epidemics. Its Boy Scouts organization is a well-knit body recognised both by the public and Government. Mr. Chitalia conducts the Bhagini Samaj for social educational work among the Gujarati ladies. The Society has been conducting a model Depressed Class Mission in Mangalore and the Devadhar Malabar Reconstruction Trust activities at Calicut. In the Co-operative movement the Society has done the pioneering work in the Bombay and Madras presidencies. During natural calamities such as floods, famines and epidemics, the Society has done relief work in every part of India. By its work in the Moplah rebellion, the Society has become a household name in Malabar. Mr. Sastri was for many years a member of the Madras University Senate. Mr. Kunzru is a member of the Allahabad and Benares University Senates and Syndicates and Mr. Dube, a member of the Lucknow University Court and of the Lucknow District Local Board.

The Society has taken equally prominent part in various labour activities. Messrs. Joshi and Bakhale have been General and Assistant Secretaries of the All-India Trade Union Congress since 1925 and are greatly responsible for the shape given to the labour movement and for the organisational work particularly in Bombay. They have been President and General Secretary of the Bombay Textile Labour Union since 1926 and have conducted many Textile strikes. Mr. Joshi attended five times the International Labour Conference at Washington and Geneva as Indian Worker's Delegate and the British Commonwealth Labour Conference in 1925. Mr. Bakhale went to Europe in 1928 to attend on behalf of Indian Labour, the Geneva International Labour Conference, the British Commonwealth Labour Conference, the International Textile Worker's Congress, the Labour and Socialist International Congress and the British Trades Union Congress. He studied the Trade Union movement in Great Britain, Germany and Russia. Mr. Parulekar and a few other members of the Society are doing similar labour work. Messrs. Sastri and Joshi were members of the Royal Commission on Indian Labour.

The Society conducts three papers.—The *Servant of India*, an English weekly of which Mr. P. Kodanda Rao is Editor, the *Dnyan Prakash*, the oldest Marathi daily of which Mr. Limaye is the Editor and the *Hitawad*, a bi-weekly. Mr. Parulekar conducts the *All-India Trade Union Bulletin*, and Mr. A. V. Patwardhan, the *Sansthani Swaraj*, a Marathi weekly for the benefit of the subjects of Indian States. The Society has also published several pamphlets on public questions of the day.

The question of the subjects of the Indian States has also engaged the attention of the Society and some of its members, particularly Messrs. A. V. Patwardhan, S. G. Vaze, and A. V. Thakkar are devoting a part of their energies for that work.

Mr. G. K. Devadhar, M.A., C.I.E., is the President and Mr. H. N. Kunzru, is the Vice-President and Mr. P. Kodanda Rao, the Secretary. Messrs. V Venkatasubbaiya, Joshi, Kunzru and Dravid are senior members of the four branches.

The Society is a non-communal, non-sectarian body which does not recognise any caste distinctions.

SEVA SADAN.—The Seva Sadan Society was started on the 11th of July 1908, by the late Mr. B. M. Malabari and Mr. Dayaram Gidumal. It is the pioneer Indian ladies' society for training Indian sisters ministrant and serving (through them) the poor, the sick and the distressed. To spread its Gospel far and wide, the first branch was opened at Poona as early as 1909. The Society has its headquarters in Gamdevi, Bombay. The Society maintains the following departments of work: (1) Home for the Homeless: (2) Ashrams (Training Homes); (3) Marathi Normal Classes with a primary School: (4) Home Education Classes; (5) Industrial Department including a workroom, Sewing, Cutting, Hosiery, Cooking and Pastry and machine and hand Embroidery are among the chief industries taught. Total number of women in the different classes is nearly 300.

Secretary, Miss B. A. Engineer, M.A., LL.B., M.B.E., J.P.

CONSUMPTIVES' HOMES SOCIETY.—This Society was started by the late Mr. B. M. Malabari and Mr. Dayaram Gidumal on the 1st of June 1909. It was registered under Act XXI of 1860. Mr. Malabari secured a large grant of land in a Himalayan pine forest in Dharampur (Simla Hills) from H. H. the Maharaja of Patiala, for a Sanatorium for Consumptives. His Highness also gave a donation of Rs. one lakh. In 1911 by special permission the Sanatorium was named "The King Edward VII Sanatorium." The Sanatorium has its special water works known as the Lady Hardinge Water Works, presented by the late Sir Chinubhai Madhavlal, Bart., of Ahmedabad. The Sanatorium has a Guest House: The Noshirwan Adul Guest House for visitors to Dharampore. It has accommodation for 90 patients including the special Punjab Block built from a grant of the Punjab Government and reserved for European patients. Most of the blocks and cottages are built by Parsis. The Sanatorium has its own dairy and is called the Bai Pirojbai R. H. Patuck Dairy. The Recreation Hall is called "The Sir Bhupinder Singh Recreation Hall" after the name of the Maharaja of Patiala. Mr. Malabari collected an Endowment Fund of about Rs. 67,000 lodged with the Treasurer, Charitable Endowments, under Act VI of 1890. Nearly Rs. 2,87,000 have been spent on laying out the sites, buildings, etc., and the current annual expenditure is about Rs. 56,000. The Senior and Junior Medical Officers are in charge of the Sanatorium. The Office of this Society is situated at the Seva Sadan Buildings, Gamdevi, Bombay. Mr. S. P. Wadia is the Hon. Secretary and Diwan Bahadur K. M. Jhaveri is the Hon. Treasurer.

SOCIETY FOR THE PROTECTION OF CHILDREN IN WESTERN INDIA.—Office and Homes at King's Circle, Matunga.

Founded—To prevent the public and private wrongs of children and the corruption of their morals; to take action for the enforcement of the laws for their protection, and, if necessary,

to suggest new laws or amendments of the existing laws; to provide and maintain an organization for these objects; to promote education; and to do all other lawful things incidental or conducive to the attainment of the foregoing objects. Subscription for annual membership, Rs. 10; for Life Membership, Rs. 100. *President*: Dr. Sir Temuji B. Nariman, Kt.

Honorary Secretaries: Dr. Mrs. D. A. D'Monte, Mrs. R. P. Masani and Mrs. Maneklal Premchand. *Hon. Treasurer*: Khan Bahadur H. S. Katrak.

WESTERN INDIA NATIONAL LIBERAL ASSOCIATION.—(*Founded in* 1919).—The Association was formed, in pursuance of clause (*b*) of Resolution XI of the First Session of the All-India Conference of the Moderate Party, with a view to do sustained work for the political progress and the moral and material welfare of the people; to give expression from time to time to the considered opinion of the Party on matters of public interest; and to inform and educate public opinion in this presidency in support of its views, policy and methods.

The objects of the Association are the attainment by constitutional means of full Dominion Status for India at the earliest possible date. For the promotion of these objects, the Association shall adopt constitutional methods of agitation and work and shall foster a spirit of broadminded liberalism based on principles of liberty, equality and fraternity among the different classes and communities of the people. For the fulfilment of these objects the Association shall carry on educative, and propagandist work by means of leaflets, pamphlets and other publications, (*a*) representations to Government, (*c*) meetings or conferences, lectures and all such methods as may be deemed practicable and expedient to educate public opinion, and (*d*) for advancing the interests of the Liberal Party by organising and influencing elections to the legislatures, Central and Provincial, to Municipalities and District Local Boards.

The affairs of the Association are conducted by a Council consisting of 46 members who are elected every two years.

President: Sir Chimanlal H. Setalvad, K.C.I.E., LL.D.; *Vice-Presidents*: The Hon. Sir Phiroze C. Sethna, K.T., O.B.E. and Sir Cowasji Jehangir (Jr.), K.C.I.E.; *Hon. Secretaries*: Mr. Kazi Kabiruddin, Mr. J. R. B. Jeejeebhoy and Mr. A. D. Shroff; *Assistant Secretary*: Mr. V. R. Bhende.

Office:—107, Esplanade Road, Fort, Bombay.

WOMEN'S INDIAN ASSOCIATION (PANTHEON GARDENS, EGMORE, MADRAS).—This Association was started in Adyar, Madras, in July 1917, with aims of service.

Aims and Objects:—To present to women their responsibilities as daughters of India. To secure for every girl and boy the right of Education through schemes of Compulsory Primary Education, including the teaching of religion. To secure the abolition of child-marriage and to raise the Age of Consent for married girls to sixteen. To secure for women the vote for Municipal and Legislative Councils on the same terms as it is or may be granted to men. To secure adequate representation of women on Municipalities, Taluk and Local Boards, Legislative Councils and Assemblies. To secure for women the right to vote and to be elected for the Council of State. To establish equality of rights and opportunities between men and women. To help women to realise that the future of India lies largely in their hands; for as wives and mothers they have the task of training, guiding and forming the character of the future rulers of India. To band women into groups for the purpose of self-development and education and for the definite service of others.

It has 48 branches and over 4,000 members. Each branch is autonomous and works according to the needs of the locality.

The Association grants scholarships to girls, interests women in maternity and child-welfare work in the uplift of the depressed class and in other social and welfare activities for the general betterment of Indian society; has worked successfully for securing Franchise for women in India, (see pages 93 and 94 of the Simon Report, Vol. II) and compulsory education for girls and also actually helped in the passage of Child-Marriage Restraint Act in the Assembly and the Acts for the Suppression of Traffic in women and children and the abolition of the Devadasi system, in the local legislature. Holds regular monthly meetings of women to educate them as to their duties as wives, mothers and citizens, publishes a monthly magazine titled *Stri-Dharma*, now edited by Dr. (Mrs.) Muthulakshmi Reddi, for carrying out of the above objects. The Association is an All-India body. Its largest branch being in Bombay and its branches are spread throughout India and flourishing as far as Kashmir and Lashkar. It is found that women everywhere welcome the opportunities given for their self-development and self-expression. The Association is affiliated to all the important progressive women associations in India and throughout the world. It was the initiator of the All-India Women's Conference and the First All-Asian Women's Conference at Lahore. The Madras Seva Sadan and the Madras Children's Aid Society owe their origin to the efforts of this Association.

YOUNG MEN'S CHRISTIAN ASSOCIATION.—This Association, which was founded by the late Sir George Williams in 1844, is now a world-wide movement, well established in almost every country in both the hemispheres. The aim of the Association is, through its religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men and boys.

The Young Men's Christian Association, though relatively new to India, is spreading rapidly. The 'local' Associations are autonomous and governed by local Boards of Directors. These Associations in Convention elect a National Council which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and Ceylon.

There are now over 60 Associations affiliated to the National Council and many other village Associations with many thousands of members of all races and creeds. The following Associations own one or more buildings which serve as the local headquarters:—Allahabad; Alleppey; Bangalore; Bombay; Calcutta; Calicut; Coimbatore; Colombo; Delhi; Galle; Hyderabad; Jubbulpore; Kandy; Karachi; Kunnamkulam; Kottayam; Lahore; Madras; Madura; Nagpur; Naini Tal; Ootacamund; Poona; Rangoon; Risalpur; Secunderabad; Simla; Trivandrum; Wellington. The others use rented or rent-free buildings.

The work of the National Council and of the local Association is carried on by numerous voluntary workers and Committees, assisted by 85 specially trained full-time Secretaries. A feature of the Y.M.C.A. in India is the international character of its Secretariat. It is made up of 7 Americans, 2 Canadians, 5 Englishmen, 3 Scotchmen, 1 Swiss, 1 Swedish, 4 Anglo-Indians, 1 Dane, 2 Australians, 1 Burman and 58 Indians and Ceylonese.

The classes of people reached by the Indian Y.M.C.A. and the lines of service it attempts to do for them may be stated as follows:—

Generally:—1. Literature:—Publication of original works and reprints Six series: "Heritage of India;" "Religious Quest of India;" "Religious Life of India;" "Builders of Modern India;" "Education of India;" "Heritage of Ceylon;" "Women of India."

2. Lecture Bureau:—Many thousands of slides on a wide variety of educational and recreational topics serving a clientele in over 700 centres in India.

3. Physical—Training Physical Directors for schools and colleges, fostering playground movement, Olympics.

Boys:—Scouting, Boys' Clubs, Camps, etc.

Students:—Hostels and Institutes in most University Centres.

Indian students in Britain:—Specially in London, Edinburgh and Glasgow.

"Citizens":—(*i.e.*, English-educated Indians, Ceylonese and Burmese): Reading Rooms, Libraries, Lectures, Group Conferences; Study-Circles; handling many subjects of vital interest—social, intellectual and religious.

Soldiers:—Institutes and Holiday Homes for British Soldiers in a number of centres including the N. W. Frontiers.

Anglo-Indians:—Hostels, Institutes, Employment Bureaux.

Europeans:—Hostels, Institutes, Employment Bureaux.

Labourers in Mills:—"Welfare" Work.

Rural Communities.—"Rural Reconstruction" work embracing Co-operative Banking, Distribution, Cattle Insurance and Arbitration, Cottage Industries, and Adult Education in four Selected Centres.

A monthly magazine, the YOUNG MEN OF INDIA, BURMA AND CEYLON is issued at Rs. 2-8-0 per annum, including postage.

The work of the National Council (excluding that of the 50 local Y.M.C.As.) called for a Budget of Rs. 1,25,662 in 1933. Of this sum Rs. 28,790 had to be raised from the public in India.

The Headquarters of the National Council is 5, Russell Street, Calcutta. The officers are:—

Patron:—His Excellency the Earl of Willingdon, G.M.S.I., G.M.I.E., G.C.M.G., G.B.E., Viceroy and Governor-General of India.

President of the National Council:—The Most Rev. Dr. Foss Westcott, Metropolitan of India.

General Secretary:—B. L. Rallia Ram, B.Sc., B.T.
